List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/4656254/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Self-Directed Learning in Problem-Based Learning and its Relationships with Self-Regulated Learning. Educational Psychology Review, 2008, 20, 411-427.	8.4	452
2	How expertise develops in medicine: knowledge encapsulation and illness script formation. Medical Education, 2007, 41, 071116225013002-???.	2.1	374
3	Towards a Framework for Attention Cueing in Instructional Animations: Guidelines for Research and Design. Educational Psychology Review, 2009, 21, 113-140.	8.4	295
4	Effect of Availability Bias and Reflective Reasoning on Diagnostic Accuracy Among Internal Medicine Residents. JAMA - Journal of the American Medical Association, 2010, 304, 1198.	7.4	269
5	Attention guidance in learning from a complex animation: Seeing is understanding?. Learning and Instruction, 2010, 20, 111-122.	3.2	251
6	Attention cueing as a means to enhance learning from an animation. Applied Cognitive Psychology, 2007, 21, 731-746.	1.6	202
7	Diagnostic errors and reflective practice in medicine. Journal of Evaluation in Clinical Practice, 2007, 13, 138-145.	1.8	136
8	Conscious thought beats deliberation without attention in diagnostic decision-making: at least when you are an expert. Psychological Research, 2010, 74, 586-592.	1.7	136
9	Instructional design for advanced learners: Establishing connections between the theoretical frameworks of cognitive load and deliberate practice. Educational Technology Research and Development, 2005, 53, 73-81.	2.8	134
10	The Role of Basic Science Knowledge and Clinical Knowledge in Diagnostic Reasoning: A Structural Equation Modeling Approach. Academic Medicine, 2005, 80, 765-773.	1.6	113
11	Reflection as a strategy to foster medical students' acquisition of diagnostic competence. Medical Education, 2012, 46, 464-472.	2.1	111
12	Dynamic problem selection in air traffic control training: a comparison between performance, mental efficiency. Computers in Human Behavior, 2001, 17, 575-595.	8.5	102
13	Learning by generating vs. receiving instructional explanations: Two approaches to enhance attention cueing in animations. Computers and Education, 2010, 55, 681-691.	8.3	89
14	Knowledge Encapsulation and the Intermediate Effect. Contemporary Educational Psychology, 2000, 25, 150-166.	2.9	87
15	Educational Implications of Expertise Reversal Effects in Learning and Performance of Complex Cognitive and Sensorimotor Skills. Educational Psychology Review, 2012, 24, 313-337.	8.4	84
16	Breaking down automaticity: case ambiguity and the shift to reflective approaches in clinical reasoning. Medical Education, 2007, 41, 1185-1192.	2.1	83
17	The effects of deliberate practice in undergraduate medical education. Medical Education, 2004, 38, 1044-1052.	2.1	82
18	Detrimental Influence of Contextual Change on Spacing Effects in Free Recall Journal of Experimental Psychology: Learning Memory and Cognition, 2004, 30, 796-800.	0.9	70

#	Article	IF	CITATIONS
19	Exposure to Media Information About a Disease Can Cause Doctors to Misdiagnose Similar-Looking Clinical Cases. Academic Medicine, 2014, 89, 285-291.	1.6	69
20	Building bridges in higher education: Student-faculty relationship quality, student engagement, and student loyalty. International Journal of Educational Research, 2020, 100, 101538.	2.2	69
21	Attention cueing in an instructional animation: The role of presentation speed. Computers in Human Behavior, 2011, 27, 41-45.	8.5	67
22	Improved effectiveness of cueing by self-explanations when learning from a complex animation. Applied Cognitive Psychology, 2011, 25, 183-194.	1.6	67
23	The role of encapsulated knowledge in clinical case representations of medical students and family doctors. Medical Education, 2004, 38, 1035-1043.	2.1	66
24	The influence of medical students' self-explanations on diagnostic performance. Medical Education, 2011, 45, 688-695.	2.1	64
25	Instructional compensation for age-related cognitive declines: Effects of goal specificity in maze learning Journal of Educational Psychology, 2001, 93, 181-186.	2.9	62
26	The impact of students' conceptions of constructivist assumptions on academic achievement and dropâ€out. Studies in Higher Education, 2007, 32, 581-602.	4.5	62
27	Deliberate practice predicts performance over time in adolescent chess players and dropâ€outs: A linear mixed models analysis. British Journal of Psychology, 2008, 99, 473-497.	2.3	60
28	Self-regulated learning and academic performance in medical education. Medical Teacher, 2016, 38, 585-593.	1.8	60
29	Relationships between students' conceptions of constructivist learning and their regulation and processing strategies. Instructional Science, 2008, 36, 445-462.	2.0	56
30	Generation Psy: Student characteristics and academic achievement in a three-year problem-based learning bachelor program. Learning and Individual Differences, 2012, 22, 313-323.	2.7	54
31	Formative assessment as practice: the role of students' motivation. Assessment and Evaluation in Higher Education, 2021, 46, 236-255.	5.6	53
32	Students' Conceptions of Constructivist Learning: A Comparison between a Traditional and a Problem-based Learning Curriculum. Advances in Health Sciences Education, 2006, 11, 365-379.	3.3	50
33	Exploring the role of salient distracting clinical features in the emergence of diagnostic errors and the mechanisms through which reflection counteracts mistakes. BMJ Quality and Safety, 2012, 21, 295-300.	3.7	49
34	On the Constraints of Encapsulated Knowledge: Clinical Case Representations by Medical Experts and Subexperts. Cognition and Instruction, 2002, 20, 27-45.	2.9	43
35	Biomedical knowledge: encapsulated or two worlds apart?. Applied Cognitive Psychology, 2005, 19, 223-231.	1.6	43
36	The Role of Biomedical Knowledge in Clinical Reasoning: A Lexical Decision Study. Academic Medicine, 2005, 80, 945-949.	1.6	43

3

#	Article	IF	CITATIONS
37	The effect of self-explanation and prediction on the development of principled understanding of chess in novices. Contemporary Educational Psychology, 2007, 32, 188-205.	2.9	42
38	Learning Adinkra symbols: The effect of testing. Journal of Cognitive Psychology, 2011, 23, 351-357.	0.9	42
39	Influence of Perceived Difficulty of Cases on Physicians' Diagnostic Reasoning. Academic Medicine, 2008, 83, 1210-1216.	1.6	41
40	Case representation by medical experts, intermediates and novices for laboratory data presented with or without a clinical context. Medical Education, 2004, 38, 617-627.	2.1	40
41	Students' self-explanations while solving unfamiliar cases: the role of biomedical knowledge. Medical Education, 2013, 47, 1109-1116.	2.1	39
42	Need-supportive teaching in higher education: Configurations of autonomy support, structure, and involvement. Teaching and Teacher Education, 2017, 68, 134-142.	3.2	38
43	Students' conceptions of constructivist learning in different programme years and different learning environments. British Journal of Educational Psychology, 2009, 79, 501-514.	2.9	36
44	Limitations to the Spacing Effect. Experimental Psychology, 2005, 52, 257-263.	0.7	36
45	Students' conceptions of distinct constructivist assumptions. European Journal of Psychology of Education, 2007, 22, 179-199.	2.6	34
46	The Robustness of Medical Expertise: Clinical Case Processing by Medical Experts and Subexperts. American Journal of Psychology, 2002, 115, 609.	0.3	33
47	The influence of computer anxiety on experienced computer users while performing complex computer tasks. Computers in Human Behavior, 2006, 22, 456-466.	8.5	31
48	Distributed rereading can hurt the spacing effect in text memory. Applied Cognitive Psychology, 2008, 22, 685-695.	1.6	30
49	The Influence of Achievement Motivation and Chess-Specific Motivation on Deliberate Practice. Journal of Sport and Exercise Psychology, 2007, 29, 561-583.	1.2	29
50	Alumni loyalty drivers in higher education. Social Psychology of Education, 2019, 22, 607-627.	2.5	27
51	Cognitive Load Theory as a Tool for Expertise Development. Instructional Science, 2004, 32, 173-182.	2.0	26
52	To observe or not to observe peers when learning physical examination skills; that is the question. BMC Medical Education, 2013, 13, 55.	2.4	25
53	Recent advances in expertise research. Applied Cognitive Psychology, 2005, 19, 145-149.	1.6	22
54	Clinical case processing: a diagnostic versus a management focus. Medical Education, 2007, 41, 1166-1172.	2.1	20

4

#	Article	IF	CITATIONS
55	The development of self-regulated learning during the pre-clinical stage of medical school: a comparison between a lecture-based and a problem-based curriculum. Advances in Health Sciences Education, 2016, 21, 93-104.	3.3	20
56	Monitoring accuracy and self-regulation when learning to play a chess endgame. Applied Cognitive Psychology, 2005, 19, 167-181.	1.6	19
57	Clinical Case Processing by Medical Experts and Subexperts. Journal of Psychology: Interdisciplinary and Applied, 2003, 137, 213-223.	1.6	18
58	Initial diagnostic hypotheses bias analytic information processing in non-visual domains. Medical Education, 2008, 42, 496-502.	2.1	18
59	Improving metacomprehension accuracy and self-regulation in cognitive skill acquisition: The effect of learner expertise. European Journal of Cognitive Psychology, 2007, 19, 671-688.	1.3	17
60	From See One Do One, to See a Good One Do a Better One: Learning Physical Examination Skills Through Peer Observation. Teaching and Learning in Medicine, 2013, 25, 195-200.	2.1	17
61	Impact of binding study advice on study behavior and pre-university education qualification factors in a problem-based psychology bachelor program. Studies in Higher Education, 2014, 39, 835-847.	4.5	17
62	The Effect of Testing on the Retention of Coherent and Incoherent Text Material. Educational Psychology Review, 2015, 27, 305-315.	8.4	17
63	Early Use of Magnetic Endoscopic Imaging by Novice Colonoscopists: Improved Performance without Increase in Workload. Canadian Journal of Gastroenterology & Hepatology, 2010, 24, 727-732.	1.7	16
64	Relationship quality time: the validation of a relationship quality scale in higher education. Higher Education Research and Development, 2018, 37, 404-417.	2.9	16
65	Mind your mindset. An empirical study of mindset in secondary vocational education and training. Educational Studies, 2020, 46, 273-281.	2.4	16
66	Non-cognitive selected students do not outperform lottery-admitted students in the pre-clinical stage of medical school. Advances in Health Sciences Education, 2016, 21, 51-61.	3.3	15
67	Do student-defined learning issues increase quality and quantity of individual study?. Advances in Health Sciences Education, 2006, 11, 337-347.	3.3	14
68	Influence of Learning Resources on Study Time and Achievement Scores in a Problem-based Curriculum. Advances in Health Sciences Education, 2006, 11, 381-389.	3.3	13
69	The effects of constructivist learning environments: a commentary. Instructional Science, 2008, 36, 463-467.	2.0	12
70	ls analytic information processing a feature of expertise in medicine?. Advances in Health Sciences Education, 2008, 13, 123-128.	3.3	12
71	The Effect of Performance Standards and Medical Experience on Diagnostic Calibration Accuracy. Health Professions Education, 2018, 4, 300-307.	1.4	12
72	Relationship quality in higher education and the interplay with student engagement and loyalty. British Journal of Educational Psychology, 2022, 92, 425-446.	2.9	12

#	Article	IF	CITATIONS
73	Assessing Patient Management Plans of Doctors and Medical Students: An Illness Script Perspective. Journal of Continuing Education in the Health Professions, 2012, 32, 4-9.	1.3	11
74	The robustness of medical expertise: clinical case processing by medical experts and subexperts. American Journal of Psychology, 2002, 115, 609-29.	0.3	11
75	Accepting Diagnostic Suggestions by Residents: A Potential Cause of Diagnostic Error in Medicine. Teaching and Learning in Medicine, 2012, 24, 149-154.	2.1	10
76	The Testing Effect and Far Transfer: The Role of Exposure to Key Information. Frontiers in Psychology, 2016, 7, 1977.	2.1	10
77	Clinical expertise research: a history lesson from those who wrote it. Medical Education, 2007, 41, 1115-1116.	2.1	8
78	Learning to calibrate: Providing standards to improve calibration accuracy for different performance levels. Applied Cognitive Psychology, 2019, 33, 1068-1079.	1.6	8
79	The effects of praise for effort versus praise for intelligence on vocational education students. Educational Psychology, 2020, 40, 1270-1286.	2.7	8
80	Reflection on exam grades to improve calibration of secondary school students: a longitudinal study. Metacognition and Learning, 2020, 15, 291-317.	2.7	8
81	How does Patient Management Knowledge Integrate into an Illness Script?. Education for Health: Change in Learning and Practice, 2012, 25, 153.	0.3	8
82	Examining the stability of experts' clinical case processing: An experimental manipulation. Instructional Science, 2005, 33, 251-270.	2.0	7
83	The Effects of Prior Knowledge on Study-Time Allocation and Free Recall: Investigating the Discrepancy Reduction Model. Journal of Psychology: Interdisciplinary and Applied, 2005, 139, 67-79.	1.6	7
84	Conscious versus unconscious thinking in the medical domain: the deliberation-without-attention effect examined. Perspectives on Medical Education, 2014, 3, 179-189.	3.5	7
85	Introduction to the Special Issue on Innovations in Problem-based Learning. Advances in Health Sciences Education, 2006, 11, 315-319.	3.3	6
86	Acquisition of visual perceptual skills from worked examples: learning to interpret electrocardiograms (ECGs). Interactive Learning Environments, 2013, 21, 263-272.	6.4	6
87	The testing effect for mediator final test cues and related final test cues in online and laboratory experiments. BMC Psychology, 2016, 4, 25.	2.1	6
88	Experienced physicians benefit from analyzing initial diagnostic hypotheses. Canadian Medical Education Journal, 2013, 4, e7-e15.	0.4	6
89	A critical reflection on emerging topics in cognitive load research. Applied Cognitive Psychology, 2006, 20, 359-364.	1.6	5
90	Age-related decline and diagnostic performance of more and less prevalent clinical cases. Advances in Health Sciences Education, 2016, 21, 561-570.	3.3	5

#	Article	IF	CITATIONS
91	Is an online mindset intervention effective in vocational education?. Interactive Learning Environments, 2020, 28, 821-830.	6.4	5
92	Building relationships in higher education to support students' motivation. Teaching in Higher Education, 2023, 28, 632-653.	2.6	5
93	What is in a student-faculty relationship? A template analysis of students' positive and negative critical incidents with faculty and staff in higher education. European Journal of Psychology of Education, 2022, 37, 1115-1139.	2.6	5
94	The role of patient management in medical expertise development: Extending the contemporary theory. International Journal of Person Centered Medicine, 2011, 1, 161-166.	0.2	5
95	A critical look at the discrepancy reduction mechanism of study time allocation. European Journal of Cognitive Psychology, 2005, 17, 371-387.	1.3	4
96	Metacognitive awareness as measured by second-order judgements among university and secondary school students. Metacognition and Learning, 2021, 16, 1-14.	2.7	4
97	The Role of Reflection in Medical Practice: Continuing Professional Development in Medicine. , 2012, , 163-174.		3
98	Does Applying Biomedical Knowledge Improve Diagnostic Performance When Solving Electrolyte Problems?. Canadian Medical Education Journal, 2010, 1, e4-e9.	0.4	3
99	Consistency in diagnostic suggestions does not influence the tendency to accept them. Canadian Medical Education Journal, 2012, 3, e98-e106.	0.4	3
100	Retention beyond the threshold: Test-enhanced relearning of forgotten information. Journal of Cognitive Psychology, 2014, 26, 58-64.	0.9	2
101	Does retrieval practice depend on semantic cues? Assessing the fuzzy trace account of the testing effect. Journal of Cognitive Psychology, 2017, 29, 583-598.	0.9	2
102	Improving calibration over texts by providing standards both with and without idea-units. Journal of Cognitive Psychology, 2018, 30, 689-700.	0.9	2
103	Does Level of Education Influence the Development of Adolescents' Mindsets?. Education Sciences, 2020, 10, 367.	2.6	2
104	Experienced physicians benefit from analyzing initial diagnostic hypotheses. Canadian Medical Education Journal, 2013, 4, e7-e15.	0.4	2
105	Does walking improve diagnosis of skin conditions at varying levels of medical expertise?. Advances in Health Sciences Education, 2021, 26, 405-416.	3.3	1
106	Consistency in diagnostic suggestions does not influence the tendency to accept them. Canadian Medical Education Journal, 2012, 3, e98-e106.	0.4	1
107	Does Walking Help to Generate a Differential Diagnosis?. Teaching and Learning in Medicine, 2021, , 1-9.	2.1	0
108	Samantha Green vs. Peter Stevens: Reversed Gender Stereotype Threat in Online Chess. Education Sciences, 2022, 12, 433.	2.6	0
