Version: 2024-02-01

201 papers	7,440 citations	66250 44 h-index	78623 77 g-index
205 all docs	205 docs citations	205 times ranked	9458 citing authors

#	Article	IF	Citations
1	Exploring domains, clinical implications and environmental associations of a deep learning marker of biological ageing. European Journal of Epidemiology, 2022, 37, 35-48.	2.5	14
2	Fine-grained investigation of the relationship between human nutrition and global DNA methylation patterns. European Journal of Nutrition, 2022, 61, 1231-1243.	1.8	3
3	Psychological distress resulting from the COVID-19 confinement is associated with unhealthy dietary changes in two Italian population-based cohorts. European Journal of Nutrition, 2022, 61, 1491-1505.	1.8	12
4	Impact of Nationwide Lockdowns Resulting from the First Wave of the COVID-19 Pandemic on Food Intake, Eating Behaviors, and Diet Quality: A Systematic Review. Advances in Nutrition, 2022, 13, 388-423.	2.9	54
5	Mediterranean diet and other dietary patterns in association with biological aging in the Moli-sani Study cohort. Clinical Nutrition, 2022, 41, 1025-1033.	2.3	7
6	Association of Psychological Resilience with All-Cause and Cardiovascular Mortality in a General Population in Italy: Prospective Findings from the Moli-Sani Study. International Journal of Environmental Research and Public Health, 2022, 19, 222.	1.2	2
7	The night of randomized clinical trials where all patients are black: a need to estimate variability in treatment effects. , 2022, 1, 1-2.		1
8	Determinants of serum uric acid levels in an adult general population: results from the Moli-sani Study. Clinical Rheumatology, 2021, 40, 857-865.	1.0	1
9	Skin toxicity following radiotherapy in patients with breast carcinoma: is anthocyanin supplementation beneficial?. Clinical Nutrition, 2021, 40, 2068-2077.	2.3	9
10	The CASSIOPEA Study (Economic Crisis and Adherence to the Mediterranean diet: poSSIble impact on) Tj ETQq0 0 0 rgBT /Overlock 10 T Rationale, design and characteristics of participants. Nutrition, Metabolism and Cardiovascular Diseases, 2021, 31, 1053-1062.	1.1	4
11	Ultra-processed food consumption is associated with increased risk of all-cause and cardiovascular mortality in the Moli-sani Study. American Journal of Clinical Nutrition, 2021, 113, 446-455.	2.2	103
12	Life-Course Socioeconomic Status and Risk of Hospitalization for Heart Failure or Atrial Fibrillation in the Moli-sani Study Cohort. American Journal of Epidemiology, 2021, 190, 1561-1571.	1.6	7
13	Changes in ultra-processed food consumption during the first Italian lockdown following the COVID-19 pandemic and major correlates: results from two population-based cohorts. Public Health Nutrition, 2021, 24, 3905-3915.	1.1	28
14	Changes in the consumption of foods characterising the Mediterranean dietary pattern and major correlates during the COVID-19 confinement in Italy: results from two cohort studies. International Journal of Food Sciences and Nutrition, 2021, 72, 1105-1117.	1.3	22
15	Dietary Polyphenol Intake Is Associated with Biological Aging, a Novel Predictor of Cardiovascular Disease: Cross-Sectional Findings from the Moli-Sani Study. Nutrients, 2021, 13, 1701.	1.7	12
16	Ultra-processed food consumption and its correlates among Italian children, adolescents and adults from the Italian Nutrition & Health Survey (INHES) cohort study. Public Health Nutrition, 2021, 24, 6258-6271.	1.1	27
17	Edible Mushrooms and Beta-Glucans: Impact on Human Health. Nutrients, 2021, 13, 2195.	1.7	57
18	Dietary selenium intake and risk of hospitalization for type 2 diabetes in the Moli-sani study cohort. Nutrition, Metabolism and Cardiovascular Diseases, 2021, 31, 1738-1746.	1.1	25

#	Article	IF	Citations
19	Genomic Overlap between Platelet Parameters Variability and Age at Onset of Parkinson Disease. Applied Sciences (Switzerland), 2021, 11, 6927.	1.3	4
20	Reduced pulmonary function, low-grade inflammation and increased risk of total and cardiovascular mortality in a general adult population: Prospective results from the Moli-sani study. Respiratory Medicine, 2021, 184, 106441.	1.3	12
21	Circulating Inflammation Markers Partly Explain the Link Between the Dietary Inflammatory Index and Depressive Symptoms. Journal of Inflammation Research, 2021, Volume 14, 4955-4968.	1.6	8
22	Dietary factors and the risk of lumbar spinal stenosis: a caseâ€“control analysis from the PREFACE Study. Nutrition, Metabolism and Cardiovascular Diseases, 2021, , .	1.1	1
23	NMU DNA methylation in blood is associated with metabolic and inflammatory indices: results from the Moli-sani study. Epigenetics, 2021, 16, 1-14.	1.3	4
24	Combined influence of depression severity and low-grade inflammation on incident hospitalization and mortality risk in Italian adults. Journal of Affective Disorders, 2021, 279, 173-182.	2.0	12
25	Association of a traditional Mediterranean diet and non-Mediterranean dietary scores with all-cause and cause-specific mortality: prospective findings from the Moli-sani Study. European Journal of Nutrition, 2021, 60, 729-746.	1.8	18
26	Daily Coffee Drinking Is Associated with Lower Risks of Cardiovascular and Total Mortality in a General Italian Population: Results from the Moli-sani Study. Journal of Nutrition, 2021, 151, 395-404.	1.3	15
27	Platelet Distribution Width Is Associated with P-Selectin Dependent Platelet Function: Results from the Moli-Family Cohort Study. Cells, 2021, 10, 2737.	1.8	16
28	Tissue Plasminogen Activator Levels and Risk of Breast Cancer in a Caseâ€“Cohort Study on Italian Women: Results from the Moli-sani Study. Thrombosis and Haemostasis, 2021, 121, 449-456.	1.8	5
29	Randomised trial of chronic supplementation with a nutraceutical mixture in subjects with non-alcoholic fatty liver disease. British Journal of Nutrition, 2020, 123, 190-197.	1.2	16
30	Assessing Genetic Overlap Between Platelet Parameters and Neurodegenerative Disorders. Frontiers in Immunology, 2020, 11, 02127.	2.2	10
31	Beyond Haemostasis and Thrombosis: Platelets in Depression and Its Co-Morbidities. International Journal of Molecular Sciences, 2020, 21, 8817.	1.8	32
32	Revisiting the link between platelets and depression through genetic epidemiology: new insights from platelet distribution width. Haematologica, 2020, 105, e246-e248.	1.7	17
33	Associations between systemic inflammation and somatic depressive symptoms: Findings from the Moliâ€sani study. Depression and Anxiety, 2020, 37, 935-943.	2.0	9
34	Socioeconomic and psychosocial determinants of adherence to the Mediterranean diet in a general adult Italian population. European Journal of Public Health, 2019, 29, 328-335.	0.1	37
35	Variation of PEAR1 DNA methylation influences platelet and leukocyte function. Clinical Epigenetics, 2019, 11, 151.	1.8	25
36	F48INVESTIGATING THE RELATION BETWEEN MENTAL HEALTH AND LOW GRADE INFLAMMATION. European Neuropsychopharmacology, 2019, 29, S1135.	0.3	0

#	Article	IF	Citations
37	ZBTB12 DNA methylation is associated with coagulation- and inflammation-related blood cell parameters: findings from the Moli-family cohort. Clinical Epigenetics, 2019, 11, 74.	1.8	12
38	Socioeconomic trajectories across the life course and risk of total and cause-specific mortality: prospective findings from the Moli-sani Study. Journal of Epidemiology and Community Health, 2019, 73, 516-528.	2.0	7
39	Chili Pepper Consumption and Mortality in Italian Adults. Journal of the American College of Cardiology, 2019, 74, 3139-3149.	1.2	57
40	Interaction between Mediterranean diet and statins on mortality risk in patients with cardiovascular disease: Findings from the Moli-sani Study. International Journal of Cardiology, 2019, 276, 248-254.	0.8	19
41	Alcohol consumption and hospitalization burden in an adult Italian population: prospective results from the Moliâ€sani study. Addiction, 2019, 114, 636-650.	1.7	14
42	Abstract P079: Prediction of All-Cause Mortality in Diabetic Patients. Circulation, 2019, 139, .	1.6	0
43	Abstract P224: Chili Pepper Intake and Risk of Total and Cardiovascular Mortality in Italian Adults: Prospective Findings From the Moli-Sani Study. Circulation, 2019, 139, .	1.6	0
44	Association of proinflammatory diet with low-grade inflammation: results from the Moli-sani study. Nutrition, 2018, 54, 182-188.	1.1	66
45	Serum vitamin D deficiency and risk of hospitalization for heart failure: Prospective results from the Moli-sani study. Nutrition, Metabolism and Cardiovascular Diseases, 2018, 28, 298-307.	1.1	21
46	Reduced mortality risk by a polyphenol-rich diet: An analysis from the Moli-sani study. Nutrition, 2018, 48, 87-95.	1.1	31
47	Health-related quality of life and risk of composite coronary heart disease and cerebrovascular events in the Moli-sani study cohort. European Journal of Preventive Cardiology, 2018, 25, 287-297.	0.8	11
48	Age- and sex-based ranges of platelet count and cause-specific mortality risk in an adult general population: prospective findings from the Moli-sani study. Platelets, 2018, 29, 312-315.	1.1	15
49	Body Mass Index and Mortality in Elderly Subjects from the Moli-Sani Study: A Possible Mediation by Low-Grade Inflammation?. Immunological Investigations, 2018, 47, 774-789.	1.0	8
50	Socioeconomic status and impact of the economic crisis on dietary habits in Italy: results from the INHES study. Journal of Public Health, 2018, 40, 703-712.	1.0	15
51	Mediterranean diet and mortality in the elderly: a prospective cohort study and a meta-analysis. British Journal of Nutrition, 2018, 120, 841-854.	1.2	74
52	Mediterranean diet, dietary polyphenols and low grade inflammation: results from the MOLIâ€SANI study. British Journal of Clinical Pharmacology, 2017, 83, 107-113.	1.1	164
53	Dietary anthocyanins and health: data from FLORA and ATHENA EU projects. British Journal of Clinical Pharmacology, 2017, 83, 103-106.	1.1	47
54	Relative contribution of health-related behaviours and chronic diseases to the socioeconomic patterning of low-grade inflammation. International Journal of Public Health, 2017, 62, 551-562.	1.0	28

#	Article	IF	Citations
55	Pharmacogenomics of Antiplatelet Drugs. , 2017, , 1325-1340.		0
56	Moderate Alcohol Consumption IsÂAssociated With Lower Risk for HeartÂFailure But Not Atrial Fibrillation. JACC: Heart Failure, 2017, 5, 837-844.	1.9	30
57	Frontal plane T-wave axis orientation predicts coronary events: Findings from the Moli-sani study. Atherosclerosis, 2017, 264, 51-57.	0.4	3
58	High adherence to the Mediterranean diet is associated with cardiovascular protection in higher but not in lower socioeconomic groups: prospective findings from the Moli-sani study. International Journal of Epidemiology, 2017, 46, 1478-1487.	0.9	51
59	Mean platelet volume is associated with lower risk of overall and non-vascular mortality in a general population. Thrombosis and Haemostasis, 2017, 117, 1129-1140.	1.8	7
60	Polyphenol intake is associated with low-grade inflammation, using a novel data analysis from the Moli-sani study. Thrombosis and Haemostasis, 2016, 115, 344-352.	1.8	91
61	Association of pasta consumption with body mass index and waist-to-hip ratio: results from Moli-sani and INHES studies. Nutrition and Diabetes, 2016, 6, e218-e218.	1.5	22
62	A score of low-grade inflammation and risk of mortality: prospective findings from the Moli-sani study. Haematologica, 2016, 101, 1434-1441.	1.7	97
63	Effects of moderate beer consumption on health and disease: A consensus document. Nutrition, Metabolism and Cardiovascular Diseases, 2016, 26, 443-467.	1.1	196
64	Age-sexâ€“specific ranges of platelet count and all-cause mortality: prospective findings from the MOLI-SANI study. Blood, 2016, 127, 1614-1616.	0.6	33
65	Nut consumption is inversely associated with both cancer and total mortality in a Mediterranean population: prospective results from the Moli-sani study. British Journal of Nutrition, 2015, 114, 804-811.	1.2	46
66	T- wave axis deviation is associated with biomarkers of low-grade inflammation. Thrombosis and Haemostasis, 2015, 114, 1199-1206.	1.8	9
67	Orange juice intake during a fatty meal consumption reduces the postprandial low-grade inflammatory response in healthy subjects. Thrombosis Research, 2015, 135, 255-259.	0.8	29
68	Prevalence and cardiovascular risk profile of chronic kidney disease in Italy: results of the 2008â€“12 National Health Examination Survey. Nephrology Dialysis Transplantation, 2015, 30, 806-814.	0.4	82
69	Postoperative atrial fibrillation and total dietary antioxidant capacity in patients undergoing cardiac surgery: The Polyphemus Observational Study. Journal of Thoracic and Cardiovascular Surgery, 2015, 149, 1175-1182.e1.	0.4	24
70	Mediterranean Diet and Low-grade Subclinical Inflammation: The Moli-sani Study. Endocrine, Metabolic and Immune Disorders - Drug Targets, 2015, 15, 18-24.	0.6	47
71	Adherence to the Mediterranean diet is associated with lower platelet and leukocyte counts: results from the Moli-sani study. Blood, 2014, 123, 3037-3044.	0.6	82
72	Both red and blond orange juice intake decreases the procoagulant activity of whole blood in healthy volunteers. Thrombosis Research, 2013, 132, 288-292.	0.8	14

#	Article	IF	Citations
73	Prolonged administration of Ascophyllum nodosum to healthy human volunteers and cardiovascular risk. Nutrafoods, 2013, 12, 137-144.	0.5	5
74	Nutrition knowledge is associated with higher adherence to Mediterranean diet and lower prevalence of obesity. Results from the Moli-sani study. Appetite, 2013, 68, 139-146.	1.8	128
75	Heritability, genetic correlation and linkageÂto the 9p21.3 region of mixed plateletâ€“leukocyte conjugates in families with and without early myocardial infarction. Nutrition, Metabolism and Cardiovascular Diseases, 2013, 23, 684-692.	1.1	9
76	Relation between pulmonary function and 10-year risk for cardiovascular disease among healthy men and women in Italy: the Moli-sani Project. European Journal of Preventive Cardiology, 2013, 20, 862-871.	0.8	25
77	Recommendations for the standardization of light transmission aggregometry: a consensus of the working party from the platelet physiology subcommittee of SSC/ISTH. Journal of Thrombosis and Haemostasis, 2013, 11, 1183-1189.	1.9	398
78	Age- And Sex-Related Variations in Platelet Count in Italy: A Proposal of Reference Ranges Based on 40987 Subjects' Data. PLoS ONE, 2013, 8, e54289.	1.1	190
79	Platelet-leukocyte interactions in thrombosis. Thrombosis Research, 2012, 129, 263-266.	0.8	128
80	Total dietary antioxidant capacity and lung function in an Italian population: a favorable role in premenopausal/never smoker women. European Journal of Clinical Nutrition, 2012, 66, 61-68.	1.3	30
81	Platelet proteome in healthy volunteers who smoke. Platelets, 2012, 23, 91-105.	1.1	22
82	Typical breakfast food consumption and risk factors for cardiovascular disease in a large sample of Italian adults. Nutrition, Metabolism and Cardiovascular Diseases, 2012, 22, 347-354.	1.1	40
83	Variability of Platelet Indices and Function: Acquired and Genetic Factors. Handbook of Experimental Pharmacology, 2012, , 395-434.	0.9	14
84	The Moli-sani project: computerized ECG database in a population-based cohort study. Journal of Electrocardiology, 2012, 45, 684-689.	0.4	5
85	Postprandial cell inflammatory response to a standardised fatty meal in subjects at different degree of cardiovascular risk. Thrombosis and Haemostasis, 2012, 107, 530-537.	1.8	17
86	Four-week ingestion of blood orange juice results in measurable anthocyanin urinary levels but does not affect cellular markers related to cardiovascular risk: a randomized cross-over study in healthy volunteers. European Journal of Nutrition, 2012, 51, 541-548.	1.8	30
87	White blood cell count, sex and age are major determinants of heterogeneity of platelet indices in an adult general population: results from the MOLI-SANI project. Haematologica, 2011, 96, 1180-1188.	1.7	151
88	The (+)-enantiomer is responsible for the antiplatelet and anti-inflammatory activity of (Â±)-indobufen. Journal of Pharmacy and Pharmacology, 2011, 42, 885-887.	1.2	21
89	Incomplete inhibition of platelet function as assessed by the platelet function analyzer (PFA-100) identifies a subset of cardiovascular patients with high residual platelet response while on aspirin. Platelets, 2011, 22, 179-187.	1.1	22
90	Epoprostenol inhibits human platelet-leukocyte mixed conjugate and platelet microparticle formation in whole blood. Thrombosis Research, 2011, 128, 446-451.	0.8	30

#	Article	IF	Citations
91	Genetic regulation of inflammation-mediated activation of haemostasis: Family-based approaches in population studies. Nutrition, Metabolism and Cardiovascular Diseases, 2011, 21, 857-861.	1.1	5
92	OFFgelâ€based multidimensional LCâ€MS/MS approach to the cataloguing of the human platelet proteome for an interactomic profile. Electrophoresis, 2011, 32, 686-695.	1.3	28
93	Effects of resveratrol and other wine polyphenols on vascular function: an update. Journal of Nutritional Biochemistry, 2011, 22, 201-211.	1.9	144
94	PLATELET-LEUKOCYTE INTERACTIONS : MULTIPLE LINKS BETWEEN INFLAMMATION , BLOOD COAGULATION AND VASCULAR RISK. Mediterranean Journal of Hematology and Infectious Diseases, 2010, 2, e2010023.	0.5	50
95	Dietary patterns, cardiovascular risk factors and C-reactive protein in a healthy Italian population. Nutrition, Metabolism and Cardiovascular Diseases, 2009, 19, 697-706.	1.1	136
96	Platelet-leukocyte mixed conjugates in patients with atrial fibrillation. Platelets, 2009, 20, 235-241.	1.1	17
97	Interactions of gallic acid, resveratrol, quercetin and aspirin at the platelet cyclooxygenase-1 level Functional and modelling studies. Thrombosis and Haemostasis, 2009, 102, 336-346.	1.8	63
98	Adherence to Mediterranean diet and anthropometric and metabolic parameters in an observational study in the â€˜Alto Moliseâ€™ region: The MOLI-SAL project. Nutrition, Metabolism and Cardiovascular Diseases, 2008, 18, 415-421.	1.1	43
99	Current concepts about inhibition of platelet aggregation. Platelets, 2008, 19, 565-570.	1.1	11
100	Application of 2-dimensional difference gel electrophoresis (2D-DIGE) to the study of thrombin-activated human platelet secretome. Platelets, 2008, 19, 43-50.	1.1	46
101	Inhibition by soya isoflavones of human polymorphonuclear leukocyte function: possible relevance for the beneficial effects of soya intake. British Journal of Nutrition, 2008, 99, 240-247.	1.2	11
102	Rebuttal to "Aspirin response variability assessed with the PFA-100 device" by Reny et al.. Thrombosis and Haemostasis, 2008, 99, 969-969.	1.8	39
103	Response variability to aspirin as assessed by the platelet function analyzer (PFA)-100. Thrombosis and Haemostasis, 2008, 99, 14-26.	1.8	116
104	PFA-100 closure time to predict cardiovascular events in aspirin-treated cardiovascular patients: A meta-analysis of 19 studies comprising 3,003 patients. Thrombosis and Haemostasis, 2008, 99, 1129-1131.	1.8	50
105	Gallic acid, a dietary polyphenolic component, blunts the inhibition of platelet COX-1 by aspirin: Preliminary in-vitro findings. Thrombosis and Haemostasis, 2007, 97, 1054-1056.	1.8	8
106	Determinants of platelet conjugate formation with polymorphonuclear leukocytes or monocytes in whole blood. Thrombosis and Haemostasis, 2007, 98, 1276-1284.	1.8	30
107	Parnaparin, a low-molecular-weight heparin, prevents P-selectindependent formation of platelet-leukocyte aggregates in human whole blood. Thrombosis and Haemostasis, 2007, 97, 965-973.	1.8	32
108	Platelet function, antiplatelet therapy and clinical outcomes: to test or not to test?. Journal of Thrombosis and Haemostasis, 2007, 5, 1835-1838.	1.9	13

#	Article	IF	Citations
109	Formation of mixed platelet-PMN leukocyte aggregates in the platelet function analyzer (PFA-100) device. Thrombosis and Haemostasis, 2007, 97, 156-157.	1.8	8
110	Formation of mixed platelet-PMN leukocyte aggregates in the platelet function analyzer (PFA-100) device. Thrombosis and Haemostasis, 2007, 97, 156-7.	1.8	1
111	Determinants of platelet conjugate formation with polymorphonuclear leukocytes or monocytes in whole blood. Thrombosis and Haemostasis, 2007, 98, 1276-84.	1.8	15
112	Neutrophils and sepsis. Lancet, The, 2006, 368, 1153.	6.3	3
113	Comparison of VASP-phosphorylation assay to light-transmission aggregometry in assessing inhibition of the platelet ADP P2Y12 receptor. Thrombosis and Haemostasis, 2006, 96, 767-773.	1.8	45
114	Src-family kinases mediate an outside-in signal necessary for Î²2 integrins to achieve full activation and sustain firm adhesion of polymorphonuclear leucocytes tethered on E-selectin. Biochemical Journal, 2006, 396, 89-98.	1.7	49
115	Human polymorphonuclear leukocytes produce and express functional tissue factor upon stimulation1. Journal of Thrombosis and Haemostasis, 2006, 4, 1323-1330.	1.9	169
116	Inhibition of tissue factor expression by hydroxyurea in polymorphonuclear leukocytes from patients with myeloproliferative disorders: a new effect for an old drug?. Journal of Thrombosis and Haemostasis, 2006, 4, 2593-2598.	1.9	75
117	The lipoxygenaseâ€“cyclooxygenase inhibitor licofelone prevents thromboxane A2-mediated cardiovascular derangement triggered by the inflammatory peptide fMLP in the rabbit. European Journal of Pharmacology, 2006, 546, 95-101.	1.7	8
118	Upregulation of Tissue Factor in Polymorphonuclear Leukocytes from Patients with Myeloproliferative Disorders and Inhibition by Hydroxyurea Treatment.. Blood, 2006, 108, 1469-1469.	0.6	11
119	More on: tissue factor in neutrophils. Journal of Thrombosis and Haemostasis, 2005, 3, 1114-1114.	1.9	2
120	Aspirin resistance: position paper of the Working Group on Aspirin Resistance. Journal of Thrombosis and Haemostasis, 2005, 3, 1309-1311.	1.9	315
121	Prevention of platelet-polymorphonuclear leukocyte interactions: new clues to the antithrombotic properties of parnaparin, a low molecular weight heparin. Haematologica, 2005, 90, 833-9.	1.7	23
122	Aspirin. Journal of Thrombosis and Haemostasis, 2004, 2, 335-336.	1.9	6
123	Licofelone, an inhibitor of cyclooxygenase and 5-lipoxygenase, specifically inhibits cyclooxygenase-1-dependent platelet activation. European Journal of Pharmacology, 2004, 488, 79-83.	1.7	23
124	SRC-dependent outside-in signalling is a key step in the process of autoregulation of beta2 integrins in polymorphonuclear cells. Biochemical Journal, 2004, 380, 57-65.	1.7	38
125	Synthesis and Antiaggregant Properties of Stabilized Analogues of Polyunsaturated Fatty Acid Metabolites.. ChemInform, 2003, 34, no.	0.1	0
126	TxA2-mediated myocardial ischemia as a consequence of an acute lung inflammatory reaction in the rabbit. Journal of Thrombosis and Haemostasis, 2003, 1, 314-319.	1.9	5

#	Article	IF	Citations
127	Aspirin resistance: a revival of platelet aggregation tests?. Journal of Thrombosis and Haemostasis, 2003, 1, 2048-2050.	1.9	61
128	Pharmacokinetic and Pharmacodynamic Differences Between Two Low Dosages of Aspirin May Affect Therapeutic Outcomes. Clinical Pharmacokinetics, 2003, 42, 1059-1070.	1.6	62
129	The epidemiological night where all patients are black: will pharmacogenetics shed some light?. Thrombosis Research, 2003, 112, 273-274.	0.8	6
130	Prevention of thrombosis and vascular inflammation: benefits and limitations of selective or combined COX-1, COX-2 and 5-LOX inhibitors. Trends in Pharmacological Sciences, 2003, 24, 245-252.	4.0	114
131	Platelet adhesion and aggregation and fibrin formation in flowing blood: a historical contribution by Giulio Bizzozero. Platelets, 2002, 13, 85-89.	1.1	21
132	How old is Helicobacter pylori?. Lancet, The, 2002, 359, 1700-1701.	6.3	1
133	Inhibition of cGMP-dependent protein kinases potently decreases neutrophil spontaneous apoptosis. Biochemical and Biophysical Research Communications, 2002, 297, 498-501.	1.0	22
