RDETT I WONG

#	Article	IF	CITATIONS
1	Decreased nitric oxide- and axon reflex-mediated cutaneous vasodilation with age during local heating. Journal of Applied Physiology, 2002, 93, 1644-1649.	2.5	231
2	Nitric oxide synthase inhibition does not alter the reactive hyperemic response in the cutaneous circulation. Journal of Applied Physiology, 2003, 95, 504-510.	2.5	146
3	Nitric oxide and attenuated reflex cutaneous vasodilation in aged skin. American Journal of Physiology - Heart and Circulatory Physiology, 2003, 284, H1662-H1667.	3.2	123
4	Changes in the control of skin blood flow with exercise training: where do cutaneous vascular adaptations fit in?. Experimental Physiology, 2011, 96, 822-828.	2.0	102
5	Transient receptor potential vanilloid type-1 (TRPV-1) channels contribute to cutaneous thermal hyperaemia in humans. Journal of Physiology, 2010, 588, 4317-4326.	2.9	101
6	Nitric oxide and noradrenaline contribute to the temperature threshold of the axon reflex response to gradual local heating in human skin. Journal of Physiology, 2006, 572, 811-820.	2.9	100
7	H1 but not H2 histamine receptor activation contributes to the rise in skin blood flow during whole body heating in humans. Journal of Physiology, 2004, 560, 941-948.	2.9	89
8	Increased brachial artery retrograde shear rate at exercise onset is abolished during prolonged cycling: role of thermoregulatory vasodilation. Journal of Applied Physiology, 2011, 110, 389-397.	2.5	80
9	Neurokinin-1 receptor desensitization attenuates cutaneous active vasodilatation in humans. Journal of Physiology, 2006, 577, 1043-1051.	2.9	67
10	Mechanisms of vasoactive intestinal peptide-mediated vasodilation in human skin. Journal of Applied Physiology, 2004, 97, 1291-1298.	2.5	61
11	Endothelial nitric oxide synthase mediates the nitric oxide component of reflex cutaneous vasodilatation during dynamic exercise in humans. Journal of Physiology, 2014, 592, 5317-5326.	2.9	59
12	Current concepts of active vasodilation in human skin. Temperature, 2017, 4, 41-59.	3.0	54
13	Nitric oxide is not permissive for cutaneous active vasodilatation in humans. Journal of Physiology, 2003, 548, 963-969.	2.9	54
14	Counterpoint: Investigators should not control for menstrual cycle phase when performing studies of vascular control that include women. Journal of Applied Physiology, 2020, 129, 1117-1119.	2.5	50
15	Heat therapy promotes the expression of angiogenic regulators in human skeletal muscle. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2016, 311, R377-R391.	1.8	45
16	Adenosine receptor inhibition with theophylline attenuates the skin blood flow response to local heating in humans. Experimental Physiology, 2010, 95, 946-954.	2.0	44
17	Transient receptor potential vanilloid type 1 channels contribute to reflex cutaneous vasodilation in humans. Journal of Applied Physiology, 2012, 112, 2037-2042.	2.5	41
18	Thermotherapy reduces blood pressure and circulating endothelin-1 concentration and enhances leg blood flow in patients with symptomatic peripheral artery disease. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2016, 311, R392-R400.	1.8	38

#	Article	IF	CITATIONS
19	Short-term dietary nitrate supplementation augments cutaneous vasodilatation and reduces mean arterial pressure in healthy humans. Microvascular Research, 2015, 98, 48-53.	2.5	36
20	Neurokininâ€1 receptor desensitization to consecutive microdialysis infusions of substance P in human skin. Journal of Physiology, 2005, 568, 1047-1056.	2.9	34
21	Sensory nerves and nitric oxide contribute to reflex cutaneous vasodilation in humans. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2013, 304, R651-R656.	1.8	31
22	Vasoactive intestinal peptide fragment VIP10–28 and active vasodilation in human skin. Journal of Applied Physiology, 2005, 99, 2294-2301.	2.5	28
23	Altered thermal hyperaemia in human skin by prior desensitization of neurokinin-1 receptors. Experimental Physiology, 2011, 96, 599-609.	2.0	28
24	Minimal role for H <sub>1</sub> and H <sub>2</sub> histamine receptors in cutaneous thermal hyperemia to local heating in humans. Journal of Applied Physiology, 2006, 100, 535-540.	2.5	24
25	Anterograde and retrograde blood velocity profiles in the intact human cardiovascular system. Experimental Physiology, 2012, 97, 849-860.	2.0	22
26	Augmented reflex cutaneous vasodilatation following shortâ€ŧerm dietary nitrate supplementation in humans. Experimental Physiology, 2015, 100, 708-718.	2.0	22
27	Reactive hyperemia as a test of endothelial or microvascular function?. Journal of the American College of Cardiology, 2004, 43, 2147.	2.8	21
28	Influence of exercise intensity on respiratory muscle fatigue and brachial artery blood flow during cycling exercise. European Journal of Applied Physiology, 2014, 114, 1767-1777.	2.5	20
29	No direct role for <scp>A</scp> 1/ <scp>A</scp> 2 adenosine receptor activation to reflex cutaneous vasodilatation during wholeâ€body heat stress in humans. Acta Physiologica, 2012, 205, 403-410.	3.8	18
30	Berry-Derived Polyphenols in Cardiovascular Pathologies: Mechanisms of Disease and the Role of Diet and Sex. Nutrients, 2021, 13, 387.	4.1	16
31	Very low frequency blood pressure variability is modulated by myogenic vascular function and is reduced in stroke-prone rats. Journal of Hypertension, 2008, 26, 1127-1137.	0.5	11
32	Berries and Their Polyphenols as a Potential Therapy for Coronary Microvascular Dysfunction: A Mini-Review. International Journal of Molecular Sciences, 2021, 22, 3373.	4.1	11
33	Urinary F 2 -isoprostanes and the risk of hypertension. Annals of Epidemiology, 2017, 27, 391-396.	1.9	10
34	No effect of systemic isocapnic hypoxia on α-adrenergic vasoconstrictor responsiveness in human skin. Acta Physiologica, 2011, 201, 339-347.	3.8	9
35	Sensory nerve-mediated and nitric oxide-dependent cutaneous vasodilation in normotensive and prehypertensive non-Hispanic blacks and whites. American Journal of Physiology - Heart and Circulatory Physiology, 2020, 319, H271-H281.	3.2	9
36	Female Sex Hormone Effects on the Vasculature: Considering the Validity of Restricting Study Inclusion to Low-Hormone Phases. Frontiers in Physiology, 2020, 11, 596507.	2.8	9

BRETT J WONG

#	Article	IF	CITATIONS
37	Inhibition of iNOS augments cutaneous endothelial NO-dependent vasodilation in prehypertensive non-Hispanic Whites and in non-Hispanic Blacks. American Journal of Physiology - Heart and Circulatory Physiology, 2021, 320, H190-H199.	3.2	8
38	Cutaneous reactive hyperaemia is unaltered by dietary nitrate supplementation in healthy humans. Clinical Physiology and Functional Imaging, 2018, 38, 772-778.	1.2	7
39	Leg heat therapy improves perceived physical function but does not enhance walking capacity or vascular function in patients with peripheral artery disease. Journal of Applied Physiology, 2020, 129, 1279-1289.	2.5	7
40	Last Word on Point:Counterpoint: Investigators should/should not control for menstrual cycle phase when performing studies of vascular control that include women. Journal of Applied Physiology, 2020, 129, 1138-1139.	2.5	7
41	Cutaneous sensory nerveâ€mediated microvascular vasodilation in normotensive and prehypertensive nonâ€Hispanic Blacks and Whites. Physiological Reports, 2020, 8, e14437.	1.7	7
42	Myogenic origin of the hypotension induced by rapid changes in posture in awake dogs following autonomic blockade. Journal of Applied Physiology, 2008, 105, 1837-1844.	2.5	6
43	Does limb angular motion raise limb arterial pressure?. Acta Physiologica, 2009, 195, 367-374.	3.8	6
44	Commentary on Viewpoint: The human cutaneous circulation as a model of generalized microvascular function. Journal of Applied Physiology, 2008, 105, 376-376.	2.5	4
45	Systemic F2-Isoprostane Levels in Predisposition to Obesity and Type 2 Diabetes: Emphasis on Racial Differences. Diversity and Equality in Health and Care, 2017, 14, 91-101.	0.2	4
46	Rebuttal to Drs. Wenner and Stachenfeld. Journal of Applied Physiology, 2020, 129, 1121-1121.	2.5	4
47	Nitric oxide is not permissive for cutaneous active vasodilatation in humans. Journal of Physiology, 2003, 548, 963-969.	2.9	4
48	Thermoregulatory Vasodilation During Prolonged Cycling Abolishes Increases In Brachial Artery Retrograde Shear Rate At Exercise Onset. Medicine and Science in Sports and Exercise, 2010, 42, 39.	0.4	4
49	Commentaries on Viewpoint: Pick your Poiseuille: Normalizing the shear stimulus in studies of flow-mediated dilation. Journal of Applied Physiology, 2009, 107, 1360-1365.	2.5	3
50	Acute Thermotherapy Prevents Impairments in Cutaneous Microvascular Function Induced by a High Fat Meal. Journal of Diabetes Research, 2016, 2016, 1-11.	2.3	3
51	Role of splanchnic constriction in governing the hemodynamic responses to gravitational stress in conscious dogs. Journal of Applied Physiology, 2011, 111, 40-47.	2.5	2
52	Dietary sodium and oxidative stress impair cutaneous microvascular function independent of blood pressure. American Journal of Physiology - Heart and Circulatory Physiology, 2019, 317, H60-H62.	3.2	2
53	Commentary on Viewpoint: Is left ventricular volume during diastasis the real equilibrium volume, and what is the relationship to diastolic suction?. Journal of Applied Physiology, 2008, 105, 1017-1017.	2.5	1
54	Contribution of Hindlimb Myogenic Reactions to Push-Pull Gravitational Stress in Conscious Dogs. Medicine and Science in Sports and Exercise, 2007, 39, S325.	0.4	1

#	Article	lF	CITATIONS
55	Variation In Near-infrared Spectroscopy And Cutaneous And Intramuscular Laser Doppler Results During Ischemia And Post-occlusive Reactive Hyperemia. Medicine and Science in Sports and Exercise, 2010, 42, 54.	0.4	0
56	lbuprofen Alters Initial Hyperemic Response Within Skeletal Muscle, But Not Cutaneous, Microvasculature During Post-occlusive Reactive Hyperemia. Medicine and Science in Sports and Exercise, 2011, 43, 156.	0.4	0
57	Inhibition of Transient Receptor Potential Vanilloid Type-4 (TRPV-4) Channels Attenuates Cutaneous Thermal Hyperemia in Humans. Medicine and Science in Sports and Exercise, 2011, 43, 645.	0.4	0
58	Prospective Association Between Oxidative Status and Hypertension. Annals of Epidemiology, 2015, 25, 706.	1.9	0
59	Which comes first in human temperature regulation: the physiological or the behavioural response?. Experimental Physiology, 2016, 101, 1191-1191.	2.0	0
60	Endotheliumâ€Independent, but Not Endotheliumâ€Dependent, Human Microvascular Vasodilation Differs Between Young, Healthy Females and Males. FASEB Journal, 2021, 35, .	0.5	0
61	Independent and Cumulative Effects of Superoxide and iNOS on Cutaneous NOâ€Dependent Vasodilation in Normotensive Nonâ€Hispanic Blacks and Whites. FASEB Journal, 2021, 35, .	0.5	0
62	Impact of a somatostatin analog on vascular capacity in conscious dogs. FASEB Journal, 2007, 21, A949.	0.5	0
63	Muscle pump function of limb swing: limb angular motion augments limb arterial pressure. FASEB Journal, 2007, 21, A572.	0.5	0
64	Evidence for NK″ Receptors in the Thermal Hyperemic Response in Human Skin. FASEB Journal, 2008, 22, .	0.5	0
65	TRPVâ€1 Channels Contribute to Cutaneous Active Vasodilation in Humans. FASEB Journal, 2011, 25, 1053.19.	0.5	0
66	BRACHIAL AND FEMORAL ARTERY BLOOD VELOCITY PROFILES ARE QUASIâ€₽ARABOLIC DURING PHYSIOLOGIC STRESS. FASEB Journal, 2011, 25, 1108.12.	0.5	0
67	The role of protein kinase G in the cutaneous vascular response to whole body heat stress in humans. FASEB Journal, 2011, 25, 1053.20.	0.5	0
68	eNOS and nNOS contribution to reflex cutaneous vasodilation during dynamic exercise in humans. FASEB Journal, 2012, 26, 1079.11.	0.5	0
69	Nitrate supplementation augments cutaneous reactive hyperemia in healthy humans. FASEB Journal, 2013, 27, .	0.5	0
70	Sensory Nerveâ€Mediated and Nitric Oxideâ€Dependent Vasodilation Is Reduced in Nonâ€Hispanic Blacks Compared to Nonâ€Hispanic Whites. FASEB Journal, 2019, 33, 696.7.	0.5	0
71	Reduced Sensory Nerve Function and Nitric Oxide Sensitivity in Nonâ€Hispanic Blacks Compared to Nonâ€Hispanic Whites. FASEB Journal, 2019, 33, 696.8.	0.5	0
72	Effect of iNOS on Cutaneous Thermal Hyperemia in Nonâ€Hispanic Blacks versus Nonâ€Hispanic Whites. FASEB Journal, 2019, 33, 696.5.	0.5	0

#	Article	IF	CITATIONS
73	Endothelialâ€Dependent, but not Endothelialâ€Independent, Vasodilation Is Reduced in Nonâ€Hispanic Blacks versus Nonâ€Hispanic Whites. FASEB Journal, 2020, 34, 1-1.	0.5	0
74	Effect of Physical Activity on Oxidative Stress and Endothelialâ€Dependent Cutaneous Microvascular Function in Nonâ€Hispanic Blacks: A Pilot Study. FASEB Journal, 2020, 34, 1-1.	0.5	0
75	The Effects of Exclusive Walking on Lipids and Lipoproteins in Women with Overweight and Obesity: A Systematic Review and Meta-Analysis. American Journal of Health Promotion, 2021, , 089011712110481.	1.7	0
76	A (heatâ€)sensitive matter: Microvascular function and preâ€eclampsia. Experimental Physiology, 2022, 107, 101-102.	2.0	0
77	Effect of Oral Contraceptive Phase on Mechanisms of Cutaneous Microvascular Function. FASEB Journal, 2022, 36, .	0.5	0
78	The Role of Endothelin Receptors on Sensory Nerve Mediated Dilation in Postmenopausal Women. FASEB Journal, 2022, 36, .	0.5	0
