

Lyuben Ivanov Zagorchev

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/4676791/lyuben-ivanov-zagorchev-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
20	Variability in Early Seed Development of 26 Populations of <i>Cuscuta campestris</i> Yunck.: The Significance of Host, Seed Age, Morphological Trait, Light, Temperature, and Genetic Variance. <i>Agronomy</i> , 2022 , 12, 559	3.6	0
19	A Snapshot Picture of the Fungal Composition of Bee Bread in Four Locations in Bulgaria, Differing in Anthropogenic Influence. <i>Journal of Fungi (Basel, Switzerland)</i> , 2021 , 7,	5.6	1
18	Functional Characterization of the Photosynthetic Machinery in Galls on the Parasitic Plant by JIP-Test. <i>Cells</i> , 2021 , 10,	7.9	6
17	Plant Parasites under Pressure: Effects of Abiotic Stress on the Interactions between Parasitic Plants and Their Hosts. <i>International Journal of Molecular Sciences</i> , 2021 , 22,	6.3	4
16	NGS-Based Metagenomic Study of Four Traditional Bulgarian Green Cheeses from Tcherni Vit. <i>LWT - Food Science and Technology</i> , 2021 , 152, 112278	5.4	1
15	Predicting the potential distribution of the parasitic <i>Cuscuta chinensis</i> under global warming. <i>BMC Ecology</i> , 2020 , 20, 28	2.7	8
14	Special issue in honour of Prof. Reto J. Strasser: Influence of <i>Cuscuta campestris</i> Yunck. on the photosynthetic activity of <i>Ipomoea tricolor</i> Cav. - in vivo chlorophyll a fluorescence assessment. <i>Photosynthetica</i> , 2020 , 58, 422-432	2.2	2
13	Functional GUS assay of GRAS transcription factor from <i>Medicago truncatula</i> . <i>Biotechnology and Biotechnological Equipment</i> , 2019 , 33, 1187-1194	1.6	1
12	Parasitism changes rhizospheric soil microbial communities of invasive <i>Alternanthera philoxeroides</i> , benefitting the growth of neighboring plants. <i>Applied Soil Ecology</i> , 2019 , 143, 1-9	5	4
11	Salinity effect on <i>Cuscuta campestris</i> Yunck. Parasitism on <i>Arabidopsis thaliana</i> L. <i>Plant Physiology and Biochemistry</i> , 2018 , 132, 408-414	5.4	4
10	Metabolic and functional distinction of the <i>Smicronyx</i> sp. galls on <i>Cuscuta campestris</i> . <i>Planta</i> , 2018 , 248, 591-599	4.7	2
9	Ascorbate-Glutathione Cycle: Controlling the Redox Environment for Drought Tolerance 2016 , 187-226		5
8	Microscopic investigations (LM, TEM and SEM) and identification of <i>Chlorella</i> isolate R-06/2 from extreme habitat in Bulgaria with a strong biological activity and resistance to environmental stress factors. <i>Biotechnology and Biotechnological Equipment</i> , 2015 , 29, 536-540	1.6	19
7	The role of plant cell wall proteins in response to salt stress. <i>Scientific World Journal, The</i> , 2014 , 2014, 764089	2.2	30
6	Changes in protein thiols in response to salt stress in embryogenic suspension cultures of <i>L.</i> <i>Biotechnology and Biotechnological Equipment</i> , 2014 , 28, 616-621	1.6	4
5	A central role for thiols in plant tolerance to abiotic stress. <i>International Journal of Molecular Sciences</i> , 2013 , 14, 7405-32	6.3	282
4	Significance of Milk Protein Genes Polymorphism for Bulgarian Rhodopean Cattle: Comparative Studies. <i>Biotechnology and Biotechnological Equipment</i> , 2013 , 27, 3659-3664	1.6	3

3	Redox state of low-molecular-weight thiols and disulphides during somatic embryogenesis of salt-treated suspension cultures of <i>Dactylis glomerata</i> L. <i>Free Radical Research</i> , 2012 , 46, 656-64	4	22
2	Hydroxyproline Rich Proteins in Salt Adapted Embryogenic Suspension Cultures of <i>Dactylis Glomerata</i> L.. <i>Biotechnology and Biotechnological Equipment</i> , 2011 , 25, 2321-2328	1.6	6
1	<i>Cuscuta</i> spp. populations as potential reservoirs and vectors of four plant viruses. <i>Phytoparasitica</i> ,1	1.5
