#	ARTICLE	IF	CITATIONS
1	Menstrual cycle phase does not influence gender differences in experimental pain sensitivity. <i>European Journal of Pain</i> , 2010, 14, 77-82.	2.8	87
2	Persistent alterations in biological profiles in women with abuse histories: Influence of premenstrual dysphoric disorder.. <i>Health Psychology</i> , 2007, 26, 201-213.	1.6	58
3	Histories of depression, allopregnanolone responses to stress, and premenstrual symptoms in women. <i>Biological Psychology</i> , 2006, 71, 2-11.	2.2	50
4	Associations of histories of depression and PMDD diagnosis with allopregnanolone concentrations following the oral administration of micronized progesterone. <i>Psychoneuroendocrinology</i> , 2006, 31, 1208-1219.	2.7	45
5	Binge eating disorder and obesity: Preliminary evidence for distinct cardiovascular and psychological phenotypes. <i>Physiology and Behavior</i> , 2015, 142, 20-27.	2.1	45
6	Stress-induced eating in women with binge-eating disorder and obesity. <i>Biological Psychology</i> , 2018, 131, 96-106.	2.2	44
7	Histories of major depression and premenstrual dysphoric disorder: Evidence for phenotypic differences. <i>Biological Psychology</i> , 2010, 84, 235-247.	2.2	43
8	The impact of chronic stress on the predictors of acute stress-induced eating in women. <i>Appetite</i> , 2018, 123, 343-351.	3.7	28
9	Physiological responses to acute stress and the drive to eat: The impact of perceived life stress. <i>Appetite</i> , 2019, 133, 393-399.	3.7	27
10	Negative affect is associated with increased stress-eating for women with high perceived life stress. <i>Physiology and Behavior</i> , 2019, 210, 112639.	2.1	25
11	Race and Histories of Mood Disorders Modulate Experimental Pain Tolerance in Women. <i>Journal of Pain</i> , 2007, 8, 861-868.	1.4	17
12	Menstrual mood disorders are associated with blunted sympathetic reactivity to stress. <i>Journal of Psychosomatic Research</i> , 2014, 76, 46-55.	2.6	14
13	Self-reported emotional eaters consume more food under stress if they experience heightened stress reactivity and emotional relief from stress upon eating. <i>Physiology and Behavior</i> , 2022, 243, 113638.	2.1	10
14	Recalled and momentary virtual portions created of snacks predict actual intake under laboratory stress condition. <i>Physiology and Behavior</i> , 2021, 238, 113479.	2.1	3
15	Measures of emotions as influences on eating and weight control. , 2021, , 871-906.		2
