#	Article	IF	CITATIONS
1	Self-reported emotional eaters consume more food under stress if they experience heightened stress reactivity and emotional relief from stress upon eating. Physiology and Behavior, 2022, 243, 113638.	2.1	10
2	Measures of emotions as influences on eating and weight control., 2021,, 871-906.		2
3	Recalled and momentary virtual portions created of snacks predict actual intake under laboratory stress condition. Physiology and Behavior, 2021, 238, 113479.	2.1	3
4	Negative affect is associated with increased stress-eating for women with high perceived life stress. Physiology and Behavior, 2019, 210, 112639.	2.1	25
5	Physiological responses to acute stress and the drive to eat: The impact of perceived life stress. Appetite, 2019, 133, 393-399.	3.7	27
6	The impact of chronic stress on the predictors of acute stress-induced eating in women. Appetite, 2018, 123, 343-351.	3.7	28
7	Stress-induced eating in women with binge-eating disorder and obesity. Biological Psychology, 2018, 131, 96-106.	2.2	44
8	Binge eating disorder and obesity: Preliminary evidence for distinct cardiovascular and psychological phenotypes. Physiology and Behavior, 2015, 142, 20-27.	2.1	45
9	Menstrual mood disorders are associated with blunted sympathetic reactivity to stress. Journal of Psychosomatic Research, 2014, 76, 46-55.	2.6	14
10	Menstrual cycle phase does not influence gender differences in experimental pain sensitivity. European Journal of Pain, 2010, 14, 77-82.	2.8	87
11	Histories of major depression and premenstrual dysphoric disorder: Evidence for phenotypic differences. Biological Psychology, 2010, 84, 235-247.	2.2	43
12	Persistent alterations in biological profiles in women with abuse histories: Influence of premenstrual dysphoric disorder Health Psychology, 2007, 26, 201-213.	1.6	58
13	Race and Histories of Mood Disorders Modulate Experimental Pain Tolerance in Women. Journal of Pain, 2007, 8, 861-868.	1.4	17
14	Histories of depression, allopregnanolone responses to stress, and premenstrual symptoms in women. Biological Psychology, 2006, 71, 2-11.	2.2	50
15	Associations of histories of depression and PMDD diagnosis with allopregnanolone concentrations following the oral administration of micronized progesterone. Psychoneuroendocrinology, 2006, 31, 1208-1219.	2.7	45
