| #  | Article                                                                                                                                                                                                          | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Influence of a Counterflow Plasma Jet on Supersonic Blunt-Body Pressures. AIAA Journal, 2002, 40, 1170-1177.                                                                                                     | 2.6 | 43        |
| 2  | Effect of the Pitot Tube on Measurements in Supersonic Axisymmetric Underexpanded Microjets. Micromachines, 2019, 10, 235.                                                                                       | 2.9 | 13        |
| 3  | An Advanced Approach for Far-Field Sonic Boom Prediction. , 2009, , .                                                                                                                                            |     | 7         |
| 4  | Investigation of magnetohydrodymamic interaction in a supersonic air flow at $M=8$ . Technical Physics, 2011, 56, 327-334.                                                                                       | 0.7 | 4         |
| 5  | Modeling the Laser Energy Supply in a Gas Flow. Technical Physics Letters, 2019, 45, 335-338.                                                                                                                    | 0.7 | 4         |
| 6  | Initiation of Nonequilibrium Conductivity of a Hypersonic Flow and MHD-Interaction., 2007,,.                                                                                                                     |     | 2         |
| 7  | Numerical simulations of an effect produced by a cold jet propagating opposite to the incident supersonic flow on resulting aerodynamic characteristics of a blunted body. Doklady Physics, 2000, 45, 478-480.   | 0.7 | 1         |
| 8  | The effect of arbitrarily oriented hot jet on supersonic flow past a blunt body. Technical Physics Letters, 2012, 38, 548-551.                                                                                   | 0.7 | 1         |
| 9  | Numerical simulation of the pollution formed by exhaust jets at the ground running procedure. AIP Conference Proceedings, $2016$ , , .                                                                           | 0.4 | 1         |
| 10 | Numerical simulation of the flow in small bleed orifice at the external flow high speed. AIP Conference Proceedings, $2018$ , , .                                                                                | 0.4 | 1         |
| 11 | Study of heat transfer during the impact of a supersonic axisymmetric gas micro-jet onto the heated surface using thermal imaging and thermosensitive fluorescent coating. AIP Conference Proceedings, 2019, , . | 0.4 | 1         |
| 12 | The effect of a position and shape of local energy source on the aerodynamic characteristics of a supersonic vehicle. , $0$ , , .                                                                                |     | 0         |
| 13 | Simulation of the spatial pollutant jets exiting from the aircraft engine nozzles. , 2016, , .                                                                                                                   |     | O         |
| 14 | Numerical simulation of interaction between chemically active exhaust and a jet blast deflector. AIP Conference Proceedings, $2017$ , , .                                                                        | 0.4 | 0         |
| 15 | Gasdynamic structure of underexpanded planar microjets ejected into still air. AIP Conference<br>Proceedings, 2018, , .                                                                                          | 0.4 | O         |
| 16 | Study of magneto hydrodynamic interaction at supersonic flow around a blunt body. AIP Conference Proceedings, 2018, , .                                                                                          | 0.4 | 0         |
| 17 | Flows structure with a laser plasma depending on the optical breakdown mode: Numerical simulation. AIP Conference Proceedings, $2019$ , , .                                                                      | 0.4 | O         |
| 18 | Study of the flow structure in boundary layer bleed channel at the hypersonic speed of external flow. Journal of Physics: Conference Series, 2019, 1404, 012120.                                                 | 0.4 | 0         |
