List of Publications by Year
in descending order

40 papers	825 citations	623734 14 h-index	501196 28 g-index
41 all docs	41 docs citations	41 times ranked	1124 citing authors

#	Article	IF	Citations
1	Implications of salivary <scp>miRNAs</scp> for noninvasive diagnosing oral potentially malignant disorders. Oral Diseases, 2024, 30, 796-798.	3.0	3
2	Focus on <scp>DNA</scp> methylation in saliva and oral swabs for oral potentially malignant disorder diagnosis. Oral Diseases, 2024, 30, 801-804.	3.0	0
3	Salivary and serum cytokines as indicators for monitoring therapeutic response of oral lichen planus. Oral Diseases, 2023, 29, 333-335.	3.0	2
4	Clinical investigation on oral lichen planus and associated comorbidities needs a holistic concept. Oral Diseases, 2023, 29, 327-329.	3.0	2
5	Curcumin nanoemulsions inhibit oral squamous cell carcinoma cell proliferation by <scp>PI3K</scp>/Akt/<scp>mTOR</scp> suppression and <scp>miR</scp>‐199a upregulation: A preliminary study. Oral Diseases, 2023, 29, 3183-3192.	3.0	10
6	Andrographide‐loaded solid lipid nanoparticles enhance anti‐cancer activity against head and neck cancer and precancerous cells. Oral Diseases, 2022, 28, 142-149.	3.0	22
7	Focus on DNA‐aneuploidy cytology relationship with dysplasia and clinical features in OPMDs. Oral Diseases, 2022, 28, 1743-1745.	3.0	1
8	Focus on higher rate of malignant transformation of oral submucous fibrosis and concomitant leukoplakia. Oral Diseases, 2022, 28, 2055-2056.	3.0	3
9	Whether cancer stem cell markers can serve as the markers for malignant progression of oral potentially malignant disorders. Oral Diseases, 2022, 28, 2057-2058.	3.0	2
10	Chemopreventive efficacy of salvianolic acid B phospholipid complex loaded nanoparticles against experimental oral carcinogenesis: implication of sustained drug release. Annals of Translational Medicine, 2022, 10, 244-244.	1.7	7
11	The implications of gene mutations in salivary DNA for noninvasive diagnosis of head and neck cancer with a focus on oral cancer. Oral Oncology, 2022, 130, 105924.	1.5	5
12	Autofluorescence imaging as a noninvasive tool of risk stratification for malignant transformation of oral leukoplakia: A follow-up cohort study. Oral Oncology, 2022, 130, 105941.	1.5	2
13	A bibliometric analysis of the papers on oral potentially malignant disorder in Oral Oncology. Oral Oncology, 2022, 132, 105996.	1.5	5
14	Development and validation of a risk model for noninvasive detection of cancer in oral potentially malignant disorders using DNA image cytometry. Cancer Biology and Medicine, 2021, 18, 763-771.	3.0	5
15	A novel lncRNA LOLA1 may predict malignant progression and promote migration, invasion, and EMT of oral leukoplakia via the AKT/GSK‐3β pathway. Journal of Cellular Biochemistry, 2021, 122, 1302-1312.	2.6	13
16	Prevalence and risk of chronic kidney disease in oral lichen planus: a large cross-sectional study from eastern China. Annals of Translational Medicine, 2021, 9, 1078-1078.	1.7	2
17	Relationship of DNA aneuploidy with distinctive features of oral potentially malignant disorders: A cytological analysis of 748 cases. Journal of Dental Sciences, 2021, , .	2.5	1
18	Bibliometric analysis of research trends and characteristics of oral potentially malignant disorders. Clinical Oral Investigations, 2020, 24, 447-454.	3.0	18

#	Article	IF	Citations
19	Current evidence on DNA aneuploidy cytology in noninvasive detection of oral cancer. Oral Oncology, 2020, 101, 104367.	1.5	7
20	Podoplanin and ABCG2 expression in oral erythroplakia revisited: Potential evidence for cancer stem cells driving the process of field cancerization. Oral Oncology, 2020, 101, 104368.	1.5	4
21	Cancer stem cell markers ALDH1 and Bmi1 expression in oral erythroplakia revisited: Implication for driving the process of field cancerization. Journal of Oral Pathology and Medicine, 2020, 49, 96-99.	2.7	10
22	Altered expression of CCN1 in oral lichen planus associated with keratinocyte activation and ILâ€1Î², ICAM1, and CCL5 upâ€regulation. Journal of Oral Pathology and Medicine, 2020, 49, 920-925.	2.7	9
23	<scp>DNA</scp> content abnormality in oral submucous fibrosis concomitant leukoplakia: A preliminary evaluation of the diagnostic and clinical implications. Diagnostic Cytopathology, 2020, 48, 1111-1114.	1.0	3
24	DNA aneuploidy with image cytometry for detecting dysplasia and carcinoma in oral potentially malignant disorders: A prospective diagnostic study. Cancer Medicine, 2020, 9, 6411-6420.	2.8	16
25	Potential association between oral mucosal nevus and melanoma: A preliminary clinicopathologic study. Oral Diseases, 2020, 26, 1240-1245.	3.0	4
26	Potential role of autofluorescence imaging in determining biopsy of oral potentially malignant disorders: A large prospective diagnostic study. Oral Oncology, 2019, 98, 176-179.	1.5	15
27	Contrasting results of DNA content analysis in oral lichen planus. Oral Diseases, 2019, 25, 1674-1675.	3.0	1
28	Retrospective analysis of oral erythroplakia focused on multiple and multifocal malignant behavior. Oral Diseases, 2019, 25, 1829-1830.	3.0	5
29	Bibliometric analysis of the topâ€cited articles on oral erythroplakia and leukoplakia. Journal of Oral Pathology and Medicine, 2019, 48, 505-506.	2.7	2
30	Cytological study of DNA content and nuclear morphometric analysis for aid in the diagnosis of high-grade dysplasia within oral leukoplakia. Oral Surgery, Oral Medicine, Oral Pathology and Oral Radiology, 2017, 124, 280-285.	0.4	18
31	Cellular uptake and anticancer activity of salvianolic acid B phospholipid complex loaded nanoparticles in head and neck cancer and precancer cells. Colloids and Surfaces B: Biointerfaces, 2016, 147, 65-72.	5.0	41
32	DNA content status using brush biopsy with image cytometry correlated with staging of oral leukoplakia: A preliminary study. Oral Oncology, 2015, 51, 59-63.	1.5	18
33	Expression patterns of cancer stem cell markers ALDH1 and CD133 correlate with a high risk of malignant transformation of oral leukoplakia. International Journal of Cancer, 2013, 132, 868-874.	5.1	67
34	Expression of cancer stem cell markers ALDH1 and Bmi1 in oral erythroplakia and the risk of oral cancer. Journal of Oral Pathology and Medicine, 2013, 42, 148-153.	2.7	36
35	Immunoexpression of Interleukin-22 and Interleukin-23 in Oral and Cutaneous Lichen Planus Lesions: A Preliminary Study. Mediators of Inflammation, 2013, 2013, 1-7.	3.0	37
36	Two stem cell markers, ATPâ€binding cassette, G2 subfamily (ABCG2) and BMIâ€1, predict the transformation of oral leukoplakia to cancer. Cancer, 2012, 118, 1693-1700.	4.1	57

#	Article	IF	Citations
37	Oral Cancer Development in Patients with Leukoplakia â€" Clinicopathological Factors Affecting Outcome. PLoS ONE, 2012, 7, e34773.	2.5	86
38	Malignant transformation of oral epithelial dysplasia: clinicopathological risk factors and outcome analysis in a retrospective cohort of 138 cases. Histopathology, 2011, 59, 733-740.	2.9	60
39	Poor oral bioavailability of a promising anticancer agent andrographolide is due to extensive metabolism and efflux by Pâ€glycoprotein. Journal of Pharmaceutical Sciences, 2011, 100, 5007-5017.	3.3	111
40	Malignant transformation of oral leukoplakia: a retrospective cohort study of 218 Chinese patients. BMC Cancer, 2010, 10, 685.	2.6	115
