#	ARTICLE	IF	CITATIONS
1	The impact of the Australian Black Summer Bushfires and the COVID-19 pandemic on wellbeing in persons with multiple sclerosis; preparation for future and ongoing crises. <i>Disability and Rehabilitation</i> , 2023, 45, 630-643.	0.9	6
2	Physical activity participation in Australians with multiple sclerosis: associations with geographical remoteness. <i>Disability and Rehabilitation</i> , 2023, 45, 1969-1974.	0.9	3
3	Physical activity, sitting time and exercise types, and associations with symptoms in Australian people with multiple sclerosis. <i>Disability and Rehabilitation</i> , 2022, 44, 1380-1388.	0.9	16
4	Lifestyle and complementary therapies in multiple sclerosis guidelines: Systematic review. <i>Acta Neurologica Scandinavica</i> , 2022, 145, 379-392.	1.0	7
5	The impact of the COVID-19 pandemic on physical therapy practice for people with multiple sclerosis: A multicenter survey study of the RIMS network. <i>Multiple Sclerosis and Related Disorders</i> , 2022, 62, 103799.	0.9	3
6	Comparing the effectiveness, safety and tolerability of interventions for depressive symptoms in people with multiple sclerosis: a systematic review and network meta-analysis protocol. <i>BMJ Open</i> , 2022, 12, e055796.	0.8	1
7	Exercise participation and promotion in the multiple sclerosis community; perspectives across varying socio-ecological levels. <i>Disability and Rehabilitation</i> , 2021, 43, 3623-3638.	0.9	10
8	Persons with Multiple Sclerosis Exhibit Strength Asymmetries in both Upper and Lower Extremities. <i>Physiotherapy</i> , 2021, 111, 83-91.	0.2	13
9	Motivations Toward Exercise Participation: Active Persons With Multiple Sclerosis Have Greater Self-directed and Self-capable Motivations. <i>Archives of Physical Medicine and Rehabilitation</i> , 2021, 102, 1232-1235.	0.5	3
10	Safety of exercise training in multiple sclerosis: a protocol for an updated systematic review and meta-analysis. <i>Systematic Reviews</i> , 2021, 10, 208.	2.5	6
11	Capitalising on the opinions of persons with multiple sclerosis to inform the main trial “ participant opinions from participation in a feasibility study, a qualitative extension study. <i>Disability and Rehabilitation</i> , 2019, 41, 3071-3078.	0.9	10
12	Physical education and leisure-time sport reduce overweight and obesity: a number needed to treat analysis. <i>International Journal of Obesity</i> , 2019, 43, 2076-2084.	1.6	7
13	The interpretation of physical activity, exercise, and sedentary behaviours by persons with multiple sclerosis. <i>Disability and Rehabilitation</i> , 2019, 41, 166-171.	0.9	9
14	Promotion of Exercise in Multiple Sclerosis Through Health Care Providers. <i>Exercise and Sport Sciences Reviews</i> , 2018, 46, 105-111.	1.6	27
15	Investigating the needs and wants of healthcare providers for promoting exercise in persons with multiple sclerosis: a qualitative study. <i>Disability and Rehabilitation</i> , 2018, 40, 2172-2180.	0.9	26
16	Important considerations for feasibility studies in physical activity research involving persons with multiple sclerosis: a scoping systematic review and case study. <i>Pilot and Feasibility Studies</i> , 2018, 4, 1.	0.5	67
17	Six-Minute Walk Test Performance in Persons With Multiple Sclerosis While Using Passive or Powered Ankle-Foot Orthoses. <i>Archives of Physical Medicine and Rehabilitation</i> , 2018, 99, 484-490.	0.5	18
18	Targeted ballet program mitigates ataxia and improves balance in females with mild-to-moderate multiple sclerosis. <i>PLoS ONE</i> , 2018, 13, e0205382.	1.1	28

#	ARTICLE	IF	CITATIONS
19	Multiple sclerosis patients need and want information on exercise promotion from healthcare providers: a qualitative study. <i>Health Expectations</i> , 2017, 20, 574-583.	1.1	54
20	Effects of Daily Physical Activity Level on Manual Wheelchair Propulsion Technique in Full-Time Manual Wheelchair Users During Steady-State Treadmill Propulsion. <i>Archives of Physical Medicine and Rehabilitation</i> , 2017, 98, 1374-1381.	0.5	7
21	Lower Physical Activity in Persons with Multiple Sclerosis at Increased Fall Risk. <i>American Journal of Physical Medicine and Rehabilitation</i> , 2017, 96, 357-361.	0.7	17
22	Mobility measures differentiate falls risk status in persons with multiple sclerosis: An exploratory study. <i>NeuroRehabilitation</i> , 2017, 40, 153-161.	0.5	4
23	Results of a feasibility randomised controlled study of the guidelines for exercise in multiple sclerosis project. <i>Contemporary Clinical Trials</i> , 2017, 54, 84-97.	0.8	74
24	Egress Efficacy of Persons with Multiple Sclerosis During Simulated Evacuations. <i>Fire Technology</i> , 2017, 53, 2007-2021.	1.5	3
25	Identifying preferred format and source of exercise information in persons with multiple sclerosis that can be delivered by health care providers. <i>Health Expectations</i> , 2017, 20, 1001-1010.	1.1	15
26	Cognitive Motor Interference in Multiple Sclerosis: Insights From a Systematic Quantitative Review. <i>Archives of Physical Medicine and Rehabilitation</i> , 2017, 98, 1229-1240.	0.5	60
27	Physiotherapy and walking outcomes in adults with multiple sclerosis: systematic review and meta-analysis. <i>Physical Therapy Reviews</i> , 2016, 21, 160-172.	0.3	38
28	Validity of the Timed Up and Go Test as a Measure of Functional Mobility in Persons With Multiple Sclerosis. <i>Archives of Physical Medicine and Rehabilitation</i> , 2016, 97, 1072-1077.	0.5	186
29	Feasibility study design and methods for Project GEMS: Guidelines for Exercise in Multiple Sclerosis. <i>Contemporary Clinical Trials</i> , 2016, 47, 32-39.	0.8	47
30	Physical activity and exercise training in multiple sclerosis: a review and content analysis of qualitative research identifying perceived determinants and consequences. <i>Disability and Rehabilitation</i> , 2016, 38, 1227-1242.	0.9	107
31	Preliminary validation of the short physical performance battery in older adults with multiple sclerosis: secondary data analysis. <i>BMC Geriatrics</i> , 2015, 15, 157.	1.1	35
32	Physical Fitness Assessment Across the Disability Spectrum in Persons With Multiple Sclerosis. <i>Journal of Neurologic Physical Therapy</i> , 2015, 39, 241-249.	0.7	53
33	Quality of Life and Health-Related Quality of Life over 1 Year in Older Women: Monitoring Stability and Reliability of Measurement. <i>Social Indicators Research</i> , 2015, 123, 267-279.	1.4	5
34	Top 10 Research Questions Related to Physical Activity and Multiple Sclerosis. <i>Research Quarterly for Exercise and Sport</i> , 2015, 86, 117-129.	0.8	43
35	Effect of Cognitive Motor Interference in Persons with Multiple Sclerosis: A Systematic Review and Meta-analysis. <i>Archives of Physical Medicine and Rehabilitation</i> , 2015, 96, e27-e28.	0.5	0
36	Perspectives on Physical Activity Among People with Multiple Sclerosis Who Are Wheelchair Users. <i>International Journal of MS Care</i> , 2015, 17, 109-119.	0.4	28

#	ARTICLE	IF	CITATIONS
37	Improving physical functional and quality of life in older adults with multiple sclerosis via a DVD-delivered exercise intervention: a study protocol. <i>BMJ Open</i> , 2014, 4, e006250.	0.8	15
38	Neurological disability and its association with walking impairment in multiple sclerosis: brief review. <i>Neurodegenerative Disease Management</i> , 2014, 4, 491-500.	1.2	53
39	Validity of Minimal Clinically Important Difference Values for the Multiple Sclerosis Walking Scale-12?. <i>European Neurology</i> , 2014, 71, 196-202.	0.6	24
40	Cognitive Motor Interference During Walking in Multiple Sclerosis Using an Alternate-Letter Alphabet Task. <i>Archives of Physical Medicine and Rehabilitation</i> , 2014, 95, 1498-1503.	0.5	42
41	Accuracy of StepWatch [®] and ActiGraph Accelerometers for Measuring Steps Taken among Persons with Multiple Sclerosis. <i>PLoS ONE</i> , 2014, 9, e93511.	1.1	92
42	Short-Term Effect of Aerobic Exercise on Symptoms in Multiple Sclerosis and Chronic Fatigue Syndrome. <i>International Journal of MS Care</i> , 2014, 16, 76-82.	0.4	15
43	Comparing Two Conditions of Administering the Six-Minute Walk Test in People with Multiple Sclerosis. <i>International Journal of MS Care</i> , 2014, 16, 48-54.	0.4	15
44	Blood-flow Restriction Training Does Not Increase Muscular Gains in Persons with Multiple Sclerosis. <i>Medicine and Science in Sports and Exercise</i> , 2014, 46, 551.	0.2	0
45	Validation of patient determined disease steps (PDDS) scale scores in persons with multiple sclerosis. <i>BMC Neurology</i> , 2013, 13, 37.	0.8	520
46	The reliability, precision and clinically meaningful change of walking assessments in multiple sclerosis. <i>Multiple Sclerosis Journal</i> , 2013, 19, 1784-1791.	1.4	127
47	Clinical Importance of Steps Taken per Day among Persons with Multiple Sclerosis. <i>PLoS ONE</i> , 2013, 8, e73247.	1.1	65
48	Reliability and clinical significance of mobility and balance assessments in multiple sclerosis. <i>International Journal of Rehabilitation Research</i> , 2012, 35, 69-74.	0.7	102
