#	ARTICLE	IF	CITATIONS
1	Prealbumin and lymphocyte-based prognostic score, a new tool for predicting long-term survival after curative resection of stage II/III gastric cancer. <i>British Journal of Nutrition</i> , 2018, 120, 1359-1369.	2.3	38
2	Intra-abdominal infection after radical gastrectomy for gastric cancer: Incidence, pathogens, risk factors and outcomes. <i>International Journal of Surgery</i> , 2017, 48, 195-200.	2.7	31
3	Impact of peri-operative blood transfusion on post-operative infections after radical gastrectomy for gastric cancer: a propensity score matching analysis focusing on the timing, amount of transfusion and role of leukocyte depletion. <i>Journal of Cancer Research and Clinical Oncology</i> , 2018, 144, 1143-1154.	2.5	29
4	The effect of preoperative smoking cessation and smoking dose on postoperative complications following radical gastrectomy for gastric cancer: a retrospective study of 2469 patients. <i>World Journal of Surgical Oncology</i> , 2019, 17, 61.	1.9	19
5	Association among the prognostic nutritional index, completion of adjuvant chemotherapy, and cancer-specific survival after curative resection of stage II/III gastric cancer. <i>European Journal of Clinical Nutrition</i> , 2020, 74, 555-564.	2.9	16
6	Peri-Operative Blood Transfusion Does Not Influence Overall and Disease-Free Survival After Radical Gastrectomy for Stage II/III Gastric Cancer: a Propensity Score Matching Analysis. <i>Journal of Gastrointestinal Surgery</i> , 2018, 22, 1489-1500.	1.7	14
7	Clinicopathological features and prognosis of young gastric cancer patients following radical gastrectomy: a propensity score matching analysis. <i>Scientific Reports</i> , 2019, 9, 5943.	3.3	14
8	Development and validation of a prognostic nomogram for predicting early recurrence after curative resection of stage II/III gastric cancer. <i>World Journal of Surgical Oncology</i> , 2019, 17, 223.	1.9	14
9	Development and validation of a prognostic nomogram for predicting post-operative pulmonary infection in gastric cancer patients following radical gastrectomy. <i>Scientific Reports</i> , 2019, 9, 14587.	3.3	12
10	Incomplete resection and linitis plastica are factors for poor survival after extended multiorgan resection in gastric cancer patients. <i>Scientific Reports</i> , 2017, 7, 15800.	3.3	10
11	Incidence, causes and risk factors for 30-day readmission after radical gastrectomy for gastric cancer: a retrospective study of 2,023 patients. <i>Scientific Reports</i> , 2018, 8, 10582.	3.3	10
12	Incidence, Causes and Risk Factors for 30-Day Unplanned Reoperation After Gastrectomy for Gastric Cancer: Experience of a High-Volume Center. <i>Gastroenterology Research</i> , 2018, 11, 213-220.	1.3	2
13	Application analysis of omental flap isolation and modified pancreaticojejunostomy in pancreaticoduodenectomy (175 cases). <i>BMC Surgery</i> , 2022, 22, 127.	1.3	0
