#	ARTICLE	IF	CITATIONS
1	Determinants of fruit and vegetable consumption among children and adolescents: a review of the literature. Part I: Quantitative studies. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2006, 3, 22.	4.6	789
2	Fruit and Vegetable Intake in a Sample of 11-Year-Old Children in 9 European Countries: The Pro Children Cross-Sectional Survey. <i>Annals of Nutrition and Metabolism</i> , 2005, 49, 236-245.	1.9	259
3	Determinants of fruit and vegetable consumption among children and adolescents: a review of the literature. Part II: qualitative studies. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2011, 8, 112.	4.6	239
4	Reliability and validity of a questionnaire to measure personal, social and environmental correlates of fruit and vegetable intake in 10-year-old children in five European countries. <i>Public Health Nutrition</i> , 2005, 8, 189-200.	2.2	160
5	Pathways and mechanisms in adolescence contribute to adult health inequalities. <i>Scandinavian Journal of Public Health</i> , 2011, 39, 62-78.	2.3	156
6	Fruit and vegetable consumption trends among adolescents from 2002 to 2010 in 33 countries. <i>European Journal of Public Health</i> , 2015, 25, 16-19.	0.3	125
7	Socioeconomic position, macroeconomic environment and overweight among adolescents in 35 countries. <i>International Journal of Obesity</i> , 2009, 33, 1084-1093.	3.4	109
8	Addressing Social Inequality in Aging by the Danish Occupational Social Class Measurement. <i>Journal of Aging and Health</i> , 2014, 26, 106-127.	1.7	96
9	High agreement on family affluence between children's and parents' reports: international study of 11-year-old children. <i>Journal of Epidemiology and Community Health</i> , 2008, 62, 1092-1094.	3.7	88
10	Fruit and Vegetable Intake of Mothers of 11-Year-Old Children in Nine European Countries: The Pro Children Cross-Sectional Survey. <i>Annals of Nutrition and Metabolism</i> , 2005, 49, 246-254.	1.9	37
11	The Boost study: design of a school- and community-based randomised trial to promote fruit and vegetable consumption among teenagers. <i>BMC Public Health</i> , 2012, 12, 191.	2.9	35
12	Trend analyses in the health behaviour in school-aged children study: methodological considerations and recommendations. <i>European Journal of Public Health</i> , 2015, 25, 7-12.	0.3	33
13	Young adolescents' use of medicine for headache: sources of supply, availability and accessibility at home. <i>Pharmacoepidemiology and Drug Safety</i> , 2008, 17, 406-410.	1.9	30
14	Medicine Use Among 11- and 13-Year-Olds: Agreement Between Parents' Reports and Children's Self-Reports. <i>Annals of Pharmacotherapy</i> , 2007, 41, 581-586.	1.9	27
15	Measurement of Ethnic Background in Cross-national School Surveys: Agreement Between Students' and Parents' Responses. <i>Journal of Adolescent Health</i> , 2011, 49, 272-277.	2.5	27
16	Does school environment affect 11-year-olds' fruit and vegetable intake in Denmark?. <i>Social Science and Medicine</i> , 2009, 68, 1416-1424.	3.8	26
17	Effects of the X:IT smoking intervention: a school-based cluster randomized trial. <i>International Journal of Epidemiology</i> , 2015, 44, 1900-1908.	1.9	24
18	Barriers and Facilitators for Teachers' Implementation of the Curricular Component of the Boost Intervention Targeting Adolescents' Fruit and Vegetable Intake. <i>Journal of Nutrition Education and Behavior</i> , 2014, 46, e1-e8.	0.7	21

#	ARTICLE	IF	CITATIONS
19	Implementation of strategies to increase adolescents' access to fruit and vegetables at school: process evaluation findings from the Boost study. <i>BMC Public Health</i> , 2015, 15, 86.	2.9	19
20	Trends in social inequality in overweight and obesity among adolescents in Denmark 1998–2018. <i>International Journal of Public Health</i> , 2020, 65, 607-616.	2.3	19
21	Secular trends in fruit intake among Danish schoolchildren, 1988 to 2006: Changing habits or methodological artefacts?. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2008, 5, 6.	4.6	18
22	A six-step protocol to systematic process evaluation of multicomponent cluster-randomised health promoting interventions illustrated by the Boost study. <i>Evaluation and Program Planning</i> , 2014, 46, 58-71.	1.6	17
23	Study protocol of the Healthy High School study: a school-based intervention to improve well-being among high school students in Denmark. <i>BMC Public Health</i> , 2020, 20, 95.	2.9	16
24	Implementing a free school-based fruit and vegetable programme: barriers and facilitators experienced by pupils, teachers and produce suppliers in the Boost study. <i>BMC Public Health</i> , 2014, 14, 146.	2.9	15
25	Fast-food intake and perceived and objective measures of the local fast-food environment in adolescents. <i>Public Health Nutrition</i> , 2016, 19, 446-455.	2.2	13
26	Parental involvement and association with adolescents' fruit and vegetable intake at follow-up: Process evaluation results from the multi-component school-based Boost intervention. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2016, 13, 112.	4.6	11
27	Results From Denmark's 2016 Report Card on Physical Activity for Children and Youth. <i>Journal of Physical Activity and Health</i> , 2016, 13, S137-S142.	2.0	10
28	Persistent social inequality in low intake of vegetables among adolescents, 2002–2014. <i>Public Health Nutrition</i> , 2018, 21, 1649-1653.	2.2	10
29	Reducing smoking in youth by a smoke-free school environment: A stratified cluster randomized controlled trial of Focus, a multicomponent program for alternative high schools. <i>Tobacco Prevention and Cessation</i> , 2021, 7, 1-12.	0.4	10
30	Health promotion in primary and secondary schools in Denmark: time trends and associations with schools' and students' characteristics. <i>BMC Public Health</i> , 2015, 15, 93.	2.9	8
31	The role of curriculum dose for the promotion of fruit and vegetable intake among adolescents: results from the Boost intervention. <i>BMC Public Health</i> , 2015, 15, 536.	2.9	8
32	Intake of sugar sweetened soft drinks among adolescents: Trends and social inequality in Denmark 2002-2018. <i>Nutrition and Health</i> , 2020, 26, 3-8.	1.5	7
33	High schools High on life: Development of an Intervention to Reduce Excessive Drinking in Danish High Schools. <i>Frontiers in Public Health</i> , 2020, 8, 435.	2.7	6
34	School Coordinators' Perceptions of Organizational Readiness Is Associated with Implementation Fidelity in a Smoking Prevention Program: Findings from the X:IT II Study. <i>Prevention Science</i> , 2021, 22, 312-323.	2.6	6
35	The meaning of movement in the everyday lives of Danish high-school students: a phenomenological study exploring existential well-being as "dwelling-mobility". <i>Qualitative Research in Sport, Exercise and Health</i> , 2021, 13, 488-506.	5.9	4
36	Lunch frequency among adolescents: associations with sociodemographic factors and school characteristics. <i>Public Health Nutrition</i> , 2016, 19, 872-884.	2.2	3

#	ARTICLE	IF	CITATIONS
37	Curricular activities and change in determinants of fruit and vegetable intake among adolescents: Results from the Boost intervention. <i>Preventive Medicine Reports</i> , 2017, 5, 48-56.	1.8	2
38	Study protocol for a cluster randomised controlled trial testing the effectiveness of the "High schools High on life"™ intervention on reducing excessive drinking in Danish high schools. <i>BMJ Open</i> , 2020, 10, e038857.	1.9	2
39	What characterizes schools and students participating in health promoting school-based intervention studies? Findings from the healthy high school study. <i>Preventive Medicine Reports</i> , 2021, 23, 101491.	1.8	2
40	Effect of the multicomponent healthy high school intervention on meal frequency and eating habits among high school students in Denmark: a cluster randomized controlled trial. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2022, 19, 12.	4.6	2
41	OUP accepted manuscript. <i>Health Promotion International</i> , 2021, , .	1.8	1
42	Adaptation, Student Participation and Gradual Withdrawal by Researchers as Sustainability Strategies in the High School-Based Young and Active Intervention: School Coordinators'™ Perspectives. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 10557.	2.6	0
43	Study Protocol for Evaluation of an Extended Maintenance Intervention on Life Satisfaction and BMI Among 7-14-Year-Old Children Following a Stay at a Residential Health Camp in Denmark. <i>Frontiers in Public Health</i> , 2021, 9, 733144.	2.7	0
