#	ARTICLE	IF	CITATIONS
1	Epstein-Barr virus infection associated polymyositis and coronary artery dilation. <i>BMC Infectious Diseases</i> , 2022, 22, 227.	2.9	1
2	Effective therapy of tocilizumab on systemic juvenile idiopathic arthritis-associated refractory macrophage activation syndrome. <i>Modern Rheumatology</i> , 2022, 32, 1114-1121.	1.8	3
3	Etiologic Profile of Older Children With Diffuse Radiological Changes in Eastern China. <i>Frontiers in Pediatrics</i> , 2022, 10, 823350.	1.9	1
4	A practical guide to amplicon and metagenomic analysis of microbiome data. <i>Protein and Cell</i> , 2021, 12, 315-330.	11.0	376
5	Prevalence of Epstein-Barr virus infection and characteristics of lymphocyte subsets in newly onset juvenile dermatomyositis. <i>World Journal of Pediatrics</i> , 2021, 17, 205-209.	1.8	8
6	Juvenile-onset multifocal osteonecrosis in systemic lupus erythematosus. <i>Medicine (United States)</i> , 2021, 100, e24031.	1.0	4
7	Case Report: Activating PIK3CD Mutation in Patients Presenting With Granulomatosis With Polyangiitis. <i>Frontiers in Immunology</i> , 2021, 12, 670312.	4.8	9
8	Sudden Hypotension and Increased Serum Interferon- $\beta$ and Interleukin-10 Predict Early Macrophage Activation Syndrome in Patients with Systemic Juvenile Idiopathic Arthritis. <i>Journal of Pediatrics</i> , 2021, 235, 203-211.e3.	1.8	8
9	Case Report: Macrophage Activation Syndrome and Widespread Neuroimaging Abnormality in Childhood-Onset Systemic Lupus Erythematosus. <i>Frontiers in Pediatrics</i> , 2021, 9, 767115.	1.9	2
10	Immunological pathogenesis and treatment of systemic lupus erythematosus. <i>World Journal of Pediatrics</i> , 2020, 16, 19-30.	1.8	180
11	Current status and recent advances on the use of ultrasonography in pediatric rheumatic diseases. <i>World Journal of Pediatrics</i> , 2020, 16, 52-59.	1.8	2
12	Haploinsufficiency of A20 (HA20): updates on the genetics, phenotype, pathogenesis and treatment. <i>World Journal of Pediatrics</i> , 2020, 16, 575-584.	1.8	49
13	Juvenile dermatomyositis: advances in clinical presentation, myositis-specific antibodies and treatment. <i>World Journal of Pediatrics</i> , 2020, 16, 31-43.	1.8	22
14	Clinical and laboratory features, treatment, and outcomes of macrophage activation syndrome in 80 children: a multi-center study in China. <i>World Journal of Pediatrics</i> , 2020, 16, 89-98.	1.8	14
15	A guide to human microbiome research: study design, sample collection, and bioinformatics analysis. <i>Chinese Medical Journal</i> , 2020, 133, 1844-1855.	2.3	55
16	Gut microbiota in children with juvenile idiopathic arthritis: characteristics, biomarker identification, and usefulness in clinical prediction. <i>BMC Genomics</i> , 2020, 21, 286.	2.8	30
17	Bilateral brachial synovial cysts in systemic juvenile idiopathic arthritis: Case report and literature review. <i>International Journal of Rheumatic Diseases</i> , 2019, 22, 1578-1581.	1.9	2
18	A CRTH2 antagonist, CT-133, suppresses NF- $\kappa$ B signalling to relieve lipopolysaccharide-induced acute lung injury. <i>European Journal of Pharmacology</i> , 2019, 854, 79-91.	3.5	11

#	ARTICLE	IF	CITATIONS
19	CRTH2 antagonist, CTâ€™133, effectively alleviates cigarette smoke-induced acute lung injury. <i>Life Sciences</i> , 2019, 216, 156-167.	4.3	7
20	Kawasaki disease shock syndrome: clinical characteristics and possible use of IL-6, IL-10 and IFN- $\gamma$ as biomarkers for early recognition. <i>Pediatric Rheumatology</i> , 2019, 17, 1.	2.1	110
21	Cdc42 Is Essential for Both Articular Cartilage Degeneration and Subchondral Bone Deterioration in Experimental Osteoarthritis. <i>Journal of Bone and Mineral Research</i> , 2018, 33, 945-958.	2.8	35
22	High expression of Sonic hedgehog in allergic airway epithelia contributes to goblet cell metaplasia. <i>Mucosal Immunology</i> , 2018, 11, 1306-1315.	6.0	23
23	Inhibition of p21-activated kinase 1 attenuates the cardinal features of asthma through suppressing the lymph node homing of dendritic cells. <i>Biochemical Pharmacology</i> , 2018, 154, 464-473.	4.4	8
24	Inhibition of Myosin Light-Chain Kinase Enhances the Clearance of Lipopolysaccharide-Induced Lung Inflammation Possibly by Accelerating Neutrophil Apoptosis. <i>Shock</i> , 2017, 48, 377-386.	2.1	9
25	Increased T cell activation in BALF from children with <i>Mycoplasma pneumoniae</i> pneumonia. <i>Pediatric Pulmonology</i> , 2015, 50, 814-819.	2.0	51
26	X-linked hyper-IgM syndrome with eosinophilia in a male child: A case report. <i>Experimental and Therapeutic Medicine</i> , 2015, 9, 1328-1330.	1.8	9
27	Association of STAT6 variants with asthma risk: A systematic review and meta-analysis. <i>Human Immunology</i> , 2014, 75, 847-853.	2.4	20
28	Clinical characteristics of adenovirus associated lower respiratory tract infection in children. <i>World Journal of Pediatrics</i> , 2013, 9, 346-349.	1.8	37
29	Nitric oxide inhalation inhibits inducible nitric oxide synthase but not nitrotyrosine formation and cell apoptosis in rat lungs with meconium-induced injury1. <i>Acta Pharmacologica Sinica</i> , 2005, 26, 1123-1129.	6.1	16
