| #  | ARTICLE                                                                                                                                                                                                                         | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Sex and ethnic differences in 2nd to 4th digit ratio of children. <i>Early Human Development</i> , 2004, 80, 161-168.                                                                                                           | 0.8 | 258       |
| 2  | Metalliferous Mine Dust: Human Health Impacts and the Potential Determinants of Disease in Mining Communities. <i>Current Pollution Reports</i> , 2019, 5, 67-83.                                                               | 3.1 | 98        |
| 3  | Mining is bad for health: a voyage of discovery. <i>Environmental Geochemistry and Health</i> , 2020, 42, 1153-1165.                                                                                                            | 1.8 | 70        |
| 4  | Beyond 'cure' and 'treatment success': quality of life of patients with multidrug-resistant tuberculosis. <i>International Journal of Tuberculosis and Lung Disease</i> , 2019, 23, 73-81.                                      | 0.6 | 33        |
| 5  | Drifting continents and endemic goitre in northern Pakistan.. <i>BMJ: British Medical Journal</i> , 1990, 300, 1507-1512.                                                                                                       | 2.4 | 23        |
| 6  | A Whole Systems Approach to Hospital Waste Management in Rural Uganda. <i>Frontiers in Public Health</i> , 2019, 7, 136.                                                                                                        | 1.3 | 23        |
| 7  | Environment and Human Health: The Challenge of Uncertainty in Risk Assessment. <i>Geosciences (Switzerland)</i> , 2018, 8, 24.                                                                                                  | 1.0 | 22        |
| 8  | Osteomalacia in Hazara District, Pakistan. <i>Tropical Doctor</i> , 2005, 35, 8-10.                                                                                                                                             | 0.2 | 17        |
| 9  | The illusion of environmental iodine deficiency. <i>Environmental Geochemistry and Health</i> , 2003, 25, 165-170.                                                                                                              | 1.8 | 16        |
| 10 | Towards the development of a multidisciplinary understanding of the effects of toxic chemical mixtures on health. <i>Environmental Geochemistry and Health</i> , 2009, 31, 239-251.                                             | 1.8 | 15        |
| 11 | Real or Illusory? Case Studies on the Public Perception of Environmental Health Risks in the North West of England. <i>International Journal of Environmental Research and Public Health</i> , 2010, 7, 1153-1173.              | 1.2 | 15        |
| 12 | Community-Based Health Insurance Increased Health Care Utilization and Reduced Mortality in Children Under-5, Around Bwindi Community Hospital, Uganda Between 2015 and 2017. <i>Frontiers in Public Health</i> , 2018, 6, 281. | 1.3 | 14        |
| 13 | Goitre and environmental iodine deficiency in the UK ? Derbyshire: A review. <i>Environmental Geochemistry and Health</i> , 2004, 26, 395-401.                                                                                  | 1.8 | 12        |
| 14 | Alarming rates of attrition among tuberculosis patients in public-private facilities in Lahore, Pakistan. <i>Public Health Action</i> , 2017, 7, 127-133.                                                                       | 0.4 | 12        |
| 15 | Seeking evidence of multidisciplinary in environmental geochemistry and health: an analysis of arsenic in drinking water research. <i>Environmental Geochemistry and Health</i> , 2018, 40, 395-413.                            | 1.8 | 12        |
| 16 | Spatial analysis of health effects of large industrial incinerators in England, 1998–2008: a study using matched case–control areas. <i>BMJ Open</i> , 2013, 3, e001847.                                                        | 0.8 | 10        |
| 17 | Achieving attainable outcomes from good science in an untidy world: case studies in land and air pollution. <i>Environmental Geochemistry and Health</i> , 2015, 37, 689-706.                                                   | 1.8 | 10        |
| 18 | Environmental and human iodine and selenium status: lessons from Gilgit-Baltistan, North-East Pakistan. <i>Environmental Geochemistry and Health</i> , 2021, 43, 4665-4686.                                                     | 1.8 | 7         |

| #  | ARTICLE                                                                                                                                                                                                                                                                                  | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Health risk estimates for groundwater and soil contamination in the Slovak Republic: a convenient tool for identification and mapping of risk areas. <i>Environmental Geochemistry and Health</i> , 2014, 36, 973-986.                                                                   | 1.8 | 5         |
| 20 | The Society for Environmental Geochemistry and Health (SEGH): building for the future. <i>Environmental Geochemistry and Health</i> , 2020, 42, 343-347.                                                                                                                                 | 1.8 | 5         |
| 21 | Clinical and epidemiological correlates of iodine deficiency disorders. <i>Geological Society Special Publication</i> , 1996, 113, 223-230.                                                                                                                                              | 0.8 | 4         |
| 22 | A Retrospective Cross Sectional Study of the Effectiveness of a Project in Improving Infant Health in Bwindi, South Western Uganda. <i>Frontiers in Public Health</i> , 2018, 6, 290.                                                                                                    | 1.3 | 4         |
| 23 | Multiple links towards integrating teams for understanding of disease and environment (MULTITUDE). <i>Environmental Geochemistry and Health</i> , 2009, 31, 161-163.                                                                                                                     | 1.8 | 3         |
| 24 | Evaluating the impact of interdisciplinary networking in environmental geochemistry and health: reviewing SEGH conferences and workshops. <i>Environmental Geochemistry and Health</i> , 2012, 34, 653-664.                                                                              | 1.8 | 3         |
| 25 | “Old” and “new” contaminants and their management: learning from the past, looking to the future. <i>Environmental Geochemistry and Health</i> , 2021, , 1.                                                                                                                              | 1.8 | 3         |
| 26 | Health: A Necessity for Sustainable Development. , 2005, , 151-181.                                                                                                                                                                                                                      |     | 3         |
| 27 | The Structured Operational Research and Training Initiative for Strengthening Health Systems to Tackle Antimicrobial Resistance and Improve Public Health in Low-and-Middle Income Countries. <i>International Journal of Environmental Research and Public Health</i> , 2022, 19, 4582. | 1.2 | 2         |
| 28 | Screening, Diagnosis, and Management of Patients With Alcohol Use Disorders at Bwindi Community Hospital, Uganda. <i>Frontiers in Public Health</i> , 2018, 6, 148.                                                                                                                      | 1.3 | 1         |
| 29 | Adapting the Structured Operational Research Training Initiative (SORT IT) for high-income countries. <i>Public Health Action</i> , 2019, 9, 69-71.                                                                                                                                      | 0.4 | 1         |
| 30 | Population Health Screening after Environmental Pollution. <i>Geosciences (Switzerland)</i> , 2020, 10, 477.                                                                                                                                                                             | 1.0 | 1         |
| 31 | Cycles, Papers, and Education. <i>Journal of Cancer Education</i> , 2004, 19, 127-127.                                                                                                                                                                                                   | 0.6 | 1         |
| 32 | Expiry Dates on Drug Packages. <i>Tropical Doctor</i> , 1997, 27, 191-191.                                                                                                                                                                                                               | 0.2 | 0         |
| 33 | Preface: selected papers from SEGH 2010 conference on environmental quality and human health. <i>Environmental Geochemistry and Health</i> , 2011, 33, 309-310.                                                                                                                          | 1.8 | 0         |
| 34 | Comprehensive review needed to inform guidance on air quality standards. <i>BMJ, The</i> , 2014, 348, g1634-g1634.                                                                                                                                                                       | 3.0 | 0         |
| 35 | Science and agriculture: promoting beneficial symbiosis. <i>Environmental Geochemistry and Health</i> , 2021, 43, 2571-2582.                                                                                                                                                             | 1.8 | 0         |
| 36 | Alarming rates of attrition among tuberculosis patients in public-private facilities in Lahore, Pakistan.. <i>International Journal of Mycobacteriology</i> , 2021, 9, 43.                                                                                                               | 0.3 | 0         |
