#	ARTICLE	IF	CITATIONS
1	Mechanical properties of carbon nanotubes based polymer composites. Composites Part B: Engineering, 2016, 103, 113-121.	5.9	162
2	Additive manufacturing of polymer composites: Processing and modeling approaches. Composites Part B: Engineering, 2019, 171, 166-182.	5.9	116
3	Damage development in thick composite tubes under impact loading and influence on implosion pressure: experimental observations. Composites Part B: Engineering, 2005, 36, 306-318.	5.9	108
4	A review on the technologies, design considerations and numerical models of tidal current turbines. Renewable Energy, 2020, 157, 1274-1288.	4.3	93
5	Effect of fibre orientation on mechanical properties of the laminated polymer composites subjected to out-of-plane high strain rate compressive loadings. Composites Science and Technology, 2008, 68, 477-485.	3.8	74
6	Progressive damage modeling in carbon fibers/carbon nanotubes reinforced polymer composites. Composites Part B: Engineering, 2017, 112, 185-195.	5.9	73
7	Modelling of the temperature and residual stress fields during 3D printing of polymer composites. International Journal of Advanced Manufacturing Technology, 2019, 104, 1661-1676.	1.5	73
8	Mechanical behavior and damage kinetics of woven E-glass/vinylester laminate composites under high strain rate dynamic compressive loading: Experimental and numerical investigation. International Journal of Impact Engineering, 2016, 87, 44-54.	2.4	71
9	3D Printing to Support the Shortage in Personal Protective Equipment Caused by COVID-19 Pandemic. Materials, 2020, 13, 3339.	1.3	69
10	Mechanical characterization of carbon nanotubes based polymer composites using indentation tests. Composites Part B: Engineering, 2017, 114, 1-7.	5.9	68
11	Dynamic properties of carbon nanotubes reinforced carbon fibers/epoxy textile composites under low velocity impact. Composites Part B: Engineering, 2017, 125, 1-8.	5.9	58
12	A progressive damage model for pressurized filament-wound hybrid composite pipe under low-velocity impact. Composite Structures, 2021, 276, 114520.	3.1	51
13	Damage detection versus heat dissipation in E-glass/Epoxy laminated composites under dynamic compression at high strain rate. Composite Structures, 2018, 186, 50-61.	3.1	50
14	Scale and Size Effects on Dynamic Response and Damage of Glass/Epoxy Tubular Structures. Journal of Composite Materials, 2007, 41, 547-558.	1.2	49
15	An interface debonding law subject to viscous regularization for avoiding instability: Application to the delamination problems. Engineering Fracture Mechanics, 2008, 75, 3084-3100.	2.0	47
16	An investigation of hygrothermal aging effects on high strain rate behaviour of adhesively bonded composite joints. Composites Part B: Engineering, 2019, 172, 111-120.	5.9	47
17	Prediction of Damage in Composite Cylinders After Impact. Journal of Composite Materials, 2005, 39, 917-928.	1.2	43
18	Dynamic response and damage modeling of glass/epoxy tubular structures: Numerical investigation. Composites Part A: Applied Science and Manufacturing, 2008, 39, 1-12.	3.8	42

#	ARTICLE	IF	CITATIONS
19	Damage Kinetics of Glass/Epoxy Composite Materials Under Dynamic Compression. Journal of Composite Materials, 2009, 43, 1137-1154.	1.2	41
20	Self-heating and deicing epoxy/glass fiber based carbon nanotubes buckypaper composite. Journal of Materials Science, 2019, 54, 1351-1362.	1.7	39
21	Damage prediction of horizontal axis marine current turbines under hydrodynamic, hydrostatic and impacts loads. Composite Structures, 2017, 170, 146-157.	3.1	38
22	Experimental Study and Numerical Modelling of Low Velocity Impact on Laminated Composite Reinforced with Thin Film Made of Carbon Nanotubes. Applied Composite Materials, 2018, 25, 309-320.	1.3	38
23	Experimental investigation on the dynamic behavior of 3D printed CF-PEKK composite under cyclic uniaxial compression. Composite Structures, 2020, 247, 112474.	3.1	38
24	Evaluation of durability of composite materials applied to renewable marine energy: Case of ducted tidal turbine. Energy Reports, 2018, 4, 31-40.	2.5	37
25	Energy dissipation of stitched and unstitched woven composite materials during dynamic compression test. Composites Part B: Engineering, 2019, 167, 487-496.	5.9	36
26	Dynamic properties of hybrid composite structures based multiwalled carbon nanotubes. Composites Science and Technology, 2017, 148, 70-79.	3.8	35
27	Computational Homogenization of Mechanical Properties for Laminate Composites Reinforced with Thin Film Made of Carbon Nanotubes. Applied Composite Materials, 2018, 25, 569-588.	1.3	35
28	Experimental and numerical investigation on the dynamic response of sandwich composite panels under hydrodynamic slamming loads. Composite Structures, 2017, 178, 297-307.	3.1	34
29	An investigation of in-plane dynamic behavior of adhesively-bonded composite joints under dynamic compression at high strain rate. Composite Structures, 2018, 191, 168-179.	3.1	34
30	Simulation of Mechanical Behavior and Damage of a Large Composite Wind Turbine Blade under Critical Loads. Applied Composite Materials, 2018, 25, 237-254.	1.3	34
31	Mechanical properties of offshore polymer composite pipes at various temperatures. Composites Part B: Engineering, 2018, 152, 231-240.	5.9	33
32	Progressive damage modeling in laminate composites under slamming impact water for naval applications. Composite Structures, 2017, 167, 178-190.	3.1	32
33	Development of microscale flexible nylon/Ag strain sensor wire for real-time monitoring and damage detection in composite structures subjected to three-point bend test. Composites Science and Technology, 2019, 181, 107693.	3.8	32
34	Determination of mode I & II strain energy release rates in composite foam core sandwiches. An experimental study of the composite foam core interfacial fracture resistance. Composites Part B: Engineering, 2017, 111, 134-142.	5.9	31
35	Mechanical behavior of composite structures subjected to constant slamming impact velocity: An experimental and numerical investigation. International Journal of Mechanical Sciences, 2018, 144, 618-627.	3.6	30
36	Strain rate effects on the dynamic compressive response and the failure behavior of polyester matrix. Composites Part B: Engineering, 2019, 174, 107040.	5.9	28

#	ARTICLE	IF	CITATIONS
37	Design and Optimization of Composite Offshore Wind Turbine Blades. Journal of Energy Resources Technology, Transactions of the ASME, 2019, 141, .	1.4	27
38	Residual Strength of Damaged Glass/Epoxy Tubular Structures. Journal of Composite Materials, 2007, 41, 2165-2182.	1.2	26
39	Comparative study of mechanical properties and damage kinetics of two- and three-dimensional woven composites under high-strain rate dynamic compressive loading. International Journal of Damage Mechanics, 2016, 25, 878-899.	2.4	26
40	In-situ heat dissipation monitoring in adhesively bonded composite joints under dynamic compression loading using SHPB. Composites Part B: Engineering, 2018, 154, 64-76.	5.9	26
41	Carbon nanotubes as a player to improve mechanical shock wave absorption. Composites Part B: Engineering, 2019, 164, 67-71.	5.9	26
42	The Effect of Agglomeration on the Electrical and Mechanical Properties of Polymer Matrix Nanocomposites Reinforced with Carbon Nanotubes. Polymers, 2022, 14, 1842.	2.0	26
43	An experimental investigation on dynamic response of composite panels subjected to hydroelastic impact loading at constant velocities. Engineering Structures, 2017, 153, 180-190.	2.6	25
44	Finite Element Analysis of Composite Offshore Wind Turbine Blades Under Operating Conditions. Journal of Thermal Science and Engineering Applications, 2020, 12, .	0.8	25
45	Predicting the Stress-Strain Behavior of Woven Fabrics Using the Finite Element Method. Textile Reseach Journal, 2001, 71, 790-795.	1.1	24
46	Mechanical behavior of carbon nanotubes-based polymer composites under impact tests. Journal of Composite Materials, 2019, 53, 925-940.	1.2	22
47	Mechanical performance evaluation of sandwich panels exposed to slamming impacts: Comparison between experimental and SPH results. Composite Structures, 2019, 220, 776-783.	3.1	22
48	Finite Element Analysis of Impact-Induced Damage in Pressurized Hybrid Composites Pipes. International Journal of Applied Mechanics, 2021, 13, .	1.3	22
49	A finite element model of mechanical properties of plain weave. Colloids and Surfaces A: Physicochemical and Engineering Aspects, 2001, 187-188, 439-448.	2.3	21
50	Effect of adhesive thickness on the Mode I and II strain energy release rates. Comparative study between different approaches for the calculation of Mode I & II SERR's. Composites Part B: Engineering, 2016, 96, 354-363.	5.9	21
51	Inter laminar failure behavior in laminate carbon nanotubes-based polymer composites. Journal of Composite Materials, 2018, 52, 3655-3667.	1.2	21
52	Effects of environmental exposure on the mechanical properties of composite tidal current turbine. Renewable Energy, 2020, 156, 1132-1145.	4.3	21
53	Mechanical Properties of a Biocomposite Based on Carbon Nanotube and Graphene Nanoplatelet Reinforced Polymers: Analytical and Numerical Study. Journal of Composites Science, 2021, 5, 234.	1.4	21
54	Numerical study of the mechanical behaviour of textile structures. International Journal of Clothing Science and Technology, 2001, 13, 166-175.	0.5	20

#	ARTICLE	IF	CITATIONS
55	Numerical Evaluation of Dynamic Response for Flexible Composite Structures under Slamming Impact for Naval Applications. <i>Applied Composite Materials</i> , 2018, 25, 689-706.	1.3	20
56	Can a three-dimensional composite really provide better mechanical performance compared to two-dimensional composite under compressive loading?. <i>Journal of Reinforced Plastics and Composites</i> , 2019, 38, 49-61.	1.6	20
57	Assessment of Energy Production Potential from Tidal Stream Currents in Morocco. <i>Energies</i> , 2018, 11, 1065.	1.6	19
58	Dynamical characterisation and damage mechanisms of E-glass/vinylester woven composites at high strain rates compression. <i>Journal of Composite Materials</i> , 2016, 50, 3313-3323.	1.2	17
59	Effect of Graphene Nano-Additives on the Local Mechanical Behavior of Derived Polymer Nanocomposites. <i>Polymers</i> , 2018, 10, 667.	2.0	17
60	Real-time strain monitoring performance of flexible Nylon/Ag conductive fiber. <i>Sensors and Actuators A: Physical</i> , 2019, 295, 612-622.	2.0	17
61	Mechanical properties of carbon black/poly ( $\epsilon$ -caprolactone)-based tissue scaffolds. <i>Arabian Journal of Chemistry</i> , 2020, 13, 3210-3217.	2.3	17
62	Structural analysis of offshore wind turbine blades using finite element method. <i>Wind Engineering</i> , 2020, 44, 168-180.	1.1	17
63	3D printing: rapid manufacturing of a new small-scale tidal turbine blade. <i>International Journal of Advanced Manufacturing Technology</i> , 2021, 115, 61-76.	1.5	17
64	Real-time strain monitoring and damage detection of composites in different directions of the applied load using a microscale flexible Nylon/Ag strain sensor. <i>Structural Health Monitoring</i> , 2020, 19, 885-901.	4.3	16
65	Design of bare and ducted axial marine current turbines. <i>Renewable Energy</i> , 2016, 89, 181-187.	4.3	15
66	The identification of structurally sensitive zones subject to failure in a wind turbine blade using nodal displacement based finite element sub-modeling. <i>Renewable Energy</i> , 2016, 87, 168-181.	4.3	15
67	Numerical study of the structural static and fatigue strength of wind turbine blades. <i>Materials Today: Proceedings</i> , 2019, 13, 1215-1223.	0.9	15
68	Design and Finite Element Modal Analysis of 48m Composite Wind Turbine Blade. <i>Applied Mechanics and Materials</i> , 0, 146, 170-184.	0.2	14
69	Experimental study of the out-of-plane dynamic behaviour of adhesively bonded composite joints using split Hopkinson pressure bars. <i>Journal of Composite Materials</i> , 2018, 52, 2875-2885.	1.2	14
70	Effect of carbon nanotubes on the in-plane dynamic behavior of a carbon/epoxy composite under high strain rate compression using SHPB. <i>Smart Materials and Structures</i> , 2020, 29, 085012.	1.8	14
71	Effect of damage progression on the heat generation and final failure of a polyester-glass fiber composite under tension-tension cyclic loading. <i>Composites Part B: Engineering</i> , 2014, 62, 121-125.	5.9	13
72	Comparative study of tubular composite structure subjected to internal pressure loading: Analytical and numerical investigation. <i>Journal of Composite Materials</i> , 2021, 55, 1517-1533.	1.2	13

#	ARTICLE	IF	CITATIONS
73	Design and Hydrodynamic Performance of a Horizontal Axis Hydrokinetic Turbine. <i>International Journal of Automotive and Mechanical Engineering</i> , 2019, 16, 6453-6469.	0.5	13
74	Graphene nanofillers as a player to improve the dynamic compressive response and failure behavior of carbon/epoxy composite. <i>Nanotechnology</i> , 2020, 31, 425709.	1.3	12
75	Poly(Lactic Acid) (PLA)-Based Nanocomposites: Impact of Vermiculite, Silver, and Graphene Oxide on Thermal Stability, Isothermal Crystallization, and Local Mechanical Behavior. <i>Journal of Composites Science</i> , 2022, 6, 112.	1.4	12
76	Dynamic behavior of top-hat bonded stiffened composite panels: Experimental characterization. <i>Composites Part B: Engineering</i> , 2018, 149, 216-226.	5.9	11
77	Experimental Analysis of the Crushing of Honeycomb Cores Under Compression. <i>Journal of Materials Engineering and Performance</i> , 2019, 28, 1628-1638.	1.2	11
78	Mechanical properties of graphene nanoplatelets reinforced epikote 828 under dynamic compression. <i>Mechanics of Materials</i> , 2021, 158, 103873.	1.7	11
79	Influence of Moisture Diffusion on the Dynamic Compressive Behavior of Glass/Polyester Composite Joints for Marine Engineering Applications. <i>Journal of Composites Science</i> , 2022, 6, 94.	1.4	11
80	Dynamic Response of Symmetric and Asymmetric E-Glass / Epoxy Laminates at High Strain Rates. <i>Key Engineering Materials</i> , 0, 446, 73-82.	0.4	10
81	Thermomechanical behavior of adhesively bonded joints under out-of-plane dynamic compression loading at high strain rate. <i>Journal of Composite Materials</i> , 2018, 52, 4171-4184.	1.2	10
82	Prediction of notched strength for cylindrical composites pipes under tensile loading conditions. <i>Composites Part B: Engineering</i> , 2018, 150, 104-114.	5.9	10
83	Experimental and numerical investigation of the fracture behavior of adhesive shear tests single lap joints. <i>Journal of the Brazilian Society of Mechanical Sciences and Engineering</i> , 2018, 40, 1.	0.8	10
84	Modal analysis for optimal design of offshore wind turbine blades. <i>Materials Today: Proceedings</i> , 2020, 30, 998-1004.	0.9	10
85	Effect of stacking sequence of the bonded composite patch on repair performance. <i>Structural Engineering and Mechanics</i> , 2016, 57, 295-313.	1.0	10
86	Hydrodynamic performance evaluation of a new hydrofoil design for marine current turbines. <i>Materials Today: Proceedings</i> , 2020, 30, 889-898.	0.9	9
87	A numerical investigation of the effects of ice accretion on the aerodynamic and structural behavior of offshore wind turbine blade. <i>Wind Engineering</i> , 2021, 45, 1433-1446.	1.1	8
88	Numerical investigation of damage progressive in composite tidal turbine for renewable marine energy. , 2016, , .		7
89	Nanotechnology and Development of Strain Sensor for Damage Detection. , 2019, , .		7
90	Prediction of Mechanical Performance of Natural Fibers Polypropylene Composites: a Comparison Study. <i>IOP Conference Series: Materials Science and Engineering</i> , 2020, 948, 012031.	0.3	7
