#	Article	IF	CITATIONS
1	Temporal disease trajectories condensed from population-wide registry data covering 6.2 million patients. Nature Communications, 2014, 5, 4022.	12.8	289
2	Dose-Specific Adverse Drug Reaction Identification in Electronic Patient Records: Temporal Data Mining in an Inpatient Psychiatric Population. Drug Safety, 2014, 37, 237-247.	3.2	96
3	Dictionary construction and identification of possible adverse drug events in Danish clinical narrative text. Journal of the American Medical Informatics Association: JAMIA, 2013, 20, 947-953.	4.4	71
4	Discrepancies in listed adverse drug reactions in pharmaceutical product information supplied by the regulatory authorities in Denmark and the USA. Pharmacology Research and Perspectives, 2014, 2, e00038.	2.4	17
5	Patient stratification and identification of adverse event correlations in the space of 1190 drug related adverse events. Frontiers in Physiology, 2014, 5, 332.	2.8	15
6	Sex differences in text-mined possible adverse drug events associated with drugs for psychosis. Journal of Psychopharmacology, 2020, 34, 532-539.	4.0	13
7	Drug interactions in hospital prescriptions in Denmark: Prevalence and associations with adverse outcomes. Pharmacoepidemiology and Drug Safety, 2022, 31, 632-642.	1.9	9
8	Implementation and comparison of two text mining methods with a standard pharmacovigilance method for signal detection of medication errors. BMC Medical Informatics and Decision Making, 2020, 20, 94.	3.0	5
9	Association between antipsychotic drug dose and length of clinical notes: a proxy of disease severity?. BMC Medical Research Methodology, 2020, 20, 107.	3.1	3
10	Tramadol use in Denmark, Norway, and Sweden: a population-based study. Proceedings for Annual Meeting of the Japanese Pharmacological Society, 2018, WCP2018, PO3-12-31.	0.0	0
11	Sex and age differences among tramadol users in three Nordic countries. Danish Medical Journal, 2020, 67, .	0.5	Ο
