#	ARTICLE	IF	CITATIONS
1	Heart rate variability as a marker of autonomic nervous system activity in young people with eosinophilic and non-eosinophilic asthma. <i>Journal of Asthma</i> , 2022, , 1-9.	1.7	1
2	Continuous glucose monitoring and dysglycaemia in young children with cystic fibrosis: A case series. <i>Journal of Paediatrics and Child Health</i> , 2022, , .	0.8	0
3	Enhanced airway sensory nerve reactivity in non-eosinophilic asthma. <i>BMJ Open Respiratory Research</i> , 2021, 8, e000974.	3.0	3
4	Changes in asthma severity in the first year of school and difficulty learning to read. <i>Journal of Asthma</i> , 2020, 57, 799-809.	1.7	3
5	Exposure of <i>Pseudomonas aeruginosa</i> to bactericidal hypochlorous acid during neutrophil phagocytosis is compromised in cystic fibrosis. <i>Journal of Biological Chemistry</i> , 2019, 294, 13502-13514.	3.4	37
6	Effects of asthma on breathing during reading aloud. <i>Speech, Language and Hearing</i> , 2018, 21, 30-40.	1.0	10
7	Hair nicotine at 15 months old, tobacco exposure and wheeze or asthma from 15 months to 6 years old. <i>Pediatric Pulmonology</i> , 2018, 53, 443-451.	2.0	3
8	Association between Frequency of Consumption of Fruit, Vegetables, Nuts and Pulses and BMI: Analyses of the International Study of Asthma and Allergies in Childhood (ISAAC). <i>Nutrients</i> , 2018, 10, 316.	4.1	44
9	Missed opportunities for antimicrobial stewardship in pre-school children admitted to hospital with lower respiratory tract infection. <i>Journal of Paediatrics and Child Health</i> , 2017, 53, 569-571.	0.8	8
10	Birthweight and the risk of atopic diseases: the ISAAC Phase III study. <i>Pediatric Allergy and Immunology</i> , 2014, 25, 264-270.	2.6	17
11	Infant wheeze: Is asthma a possibility?. <i>Journal of Paediatrics and Child Health</i> , 2013, 49, 991-994.	0.8	5
12	Time trends, ethnicity and risk factors for eczema in New Zealand children: ISAAC Phase Three. <i>Asia Pacific Allergy</i> , 2013, 3, 161-178.	1.3	13
13	Tobacco or healthy children: the two cannot co-exist. <i>Frontiers in Pediatrics</i> , 2013, 1, 20.	1.9	8
14	Time trends and risk factors for rhinoconjunctivitis in New Zealand children: An International Study of Asthma and Allergies in Childhood (ISAAC) survey. <i>Journal of Paediatrics and Child Health</i> , 2012, 48, 913-920.	0.8	12
15	Asthma, atopy and exhaled nitric oxide in a cohort of 6-year-old New Zealand children. <i>Pediatric Allergy and Immunology</i> , 2012, 23, 59-64.	2.6	19
16	Breastfeeding Protects against Current Asthma up to 6 Years of Age. <i>Journal of Pediatrics</i> , 2012, 160, 991-996.e1.	1.8	84
17	Cord-Blood 25-Hydroxyvitamin D Levels and Risk of Respiratory Infection, Wheezing, and Asthma. <i>Pediatrics</i> , 2011, 127, e180-e187.	2.1	440
18	The effects of early and late paracetamol exposure on asthma and atopy: a birth cohort. <i>Clinical and Experimental Allergy</i> , 2011, 41, 399-406.	2.9	60

#	ARTICLE	IF	CITATIONS
19	Beginning School With Asthma Independently Predicts Low Achievement in a Prospective Cohort of Children. <i>Chest</i> , 2010, 138, 1349-1355.	0.8	39
20	2-Aminoacetophenone as a potential breath biomarker for <i>Pseudomonas aeruginosa</i> in the cystic fibrosis lung. <i>BMC Pulmonary Medicine</i> , 2010, 10, 56.	2.0	127
21	Breastfeeding protects against adverse respiratory outcomes at 15 months of age. <i>Maternal and Child Nutrition</i> , 2009, 5, 243-250.	3.0	34
22	The association of early life exposure to antibiotics and the development of asthma, eczema and atopy in a birth cohort: confounding or causality?. <i>Clinical and Experimental Allergy</i> , 2008, 38, 1318-1324.	2.9	73
23	Anthropic what?. <i>New Scientist</i> , 2008, 199, 19.	0.0	0
24	Epidemiology of Respiratory Infections. , 2008, , 435-452.		14
25	<i>Pseudomonas aeruginosa</i> transmission is infrequent in New Zealand cystic fibrosis clinics. <i>European Respiratory Journal</i> , 2008, 32, 1583-1590.	6.7	12
26	Has the prevalence and severity of symptoms of asthma changed among children in New Zealand? ISAAC Phase Three. <i>New Zealand Medical Journal</i> , 2008, 121, 52-63.	0.5	13
27	Asthma prevalence in European, Maori, and Pacific children in New Zealand: ISAAC study. <i>Pediatric Pulmonology</i> , 2004, 37, 433-442.	2.0	29
28	Variations in bronchiolitis management between five New Zealand hospitals: Can we do better?. <i>Journal of Paediatrics and Child Health</i> , 2003, 39, 40-45.	0.8	52
29	Fatal late onset necrotising enterocolitis in a term infant: Atypical Kawasaki disease or polyarteritis nodosa of infancy?. <i>Journal of Paediatrics and Child Health</i> , 2003, 39, 555-557.	0.8	5
30	Epidemiology and Diagnosis of Virus-Induced Asthma Exacerbations. , 2003, , .		1
31	Cost-effectiveness of palivizumab in New Zealand. <i>Journal of Paediatrics and Child Health</i> , 2002, 38, 352-357.	0.8	41
32	Asthma survey items as predictors of respiratory problems in children 2 yrs later: a longitudinal study. <i>European Respiratory Journal</i> , 1999, 14, 650.	6.7	9
33	The effect of season-of-response to ISAAC questions about asthma, rhinitis and eczema in children.. <i>International Journal of Epidemiology</i> , 1997, 26, 126-136.	1.9	53
34	Adaptive resistance to tobramycin in <i>Pseudomonas aeruginosa</i> lung infection in cystic fibrosis. <i>Journal of Antimicrobial Chemotherapy</i> , 1996, 37, 1155-1164.	3.0	83
35	Community study of role of viral infections in exacerbations of asthma in 9-11 year old children. <i>BMJ: British Medical Journal</i> , 1995, 310, 1225-1229.	2.3	1,737
36	Are non-Allergenic environmental factors important in asthma?. <i>Medical Journal of Australia</i> , 1995, 163, 542-545.	1.7	13

#	ARTICLE	IF	CITATIONS
37	Bronchial hyperresponsiveness and its relationship to asthma in childhood. <i>Clinical and Experimental Allergy</i> , 1993, 23, 886-900.	2.9	22
38	Viruses as precipitants of asthma symptoms III. Rhinoviruses: molecular biology and prospects for future intervention. <i>Clinical and Experimental Allergy</i> , 1993, 23, 237-246.	2.9	47
39	Comparison of the prevalence of asthma among Asian and European children in Southampton.. <i>Thorax</i> , 1992, 47, 529-532.	5.6	38
40	Longitudinal changes in skin-prick test reactivity over 2 years in a population of schoolchildren with respiratory symptoms. <i>Clinical and Experimental Allergy</i> , 1992, 22, 948-957.	2.9	21
41	Viruses as precipitants of asthma symptoms II. Physiology and mechanisms. <i>Clinical and Experimental Allergy</i> , 1992, 22, 809-822.	2.9	121
42	Viruses as precipitants of asthma symptoms. I. Epidemiology. <i>Clinical and Experimental Allergy</i> , 1992, 22, 325-336.	2.9	301
43	The Interrelationship among Bronchial Hyperresponsiveness, the Diagnosis of Asthma, and Asthma Symptoms. <i>The American Review of Respiratory Disease</i> , 1990, 142, 549-554.	2.9	272
44	Ethnic differences in prevalence of asthma symptoms and bronchial hyperresponsiveness in New Zealand schoolchildren.. <i>Thorax</i> , 1989, 44, 168-176.	5.6	44
45	Socioeconomic Status in Childhood Asthma. <i>International Journal of Epidemiology</i> , 1989, 18, 888-890.	1.9	71
46	International Comparison of the Prevalence of Asthma Symptoms and Bronchial Hyperresponsiveness. <i>The American Review of Respiratory Disease</i> , 1988, 138, 524-529.	2.9	100
