#	ARTICLE	IF	CITATIONS
1	Semantic Transparency in Chinese Compound Word Processing: Evidence from Mismatch Negativity. <i>Neuroscience</i> , 2022, 490, 216-223.	1.1	7
2	An <sc>ERP</sc> megastudy of Chinese word recognition. <i>Psychophysiology</i> , 2022, 59, .	1.2	7
3	Morpho-semantic analysis of ambiguous morphemes in Chinese compound word recognition: An fMRI study. <i>Neuropsychologia</i> , 2021, 157, 107862.	0.7	8
4	Morphophonological activation in Chinese word recognition. <i>Mental Lexicon</i> , 2021, 16, 240-270.	0.2	1
5	The roles of lexical tone and rime during Mandarin sentence comprehension: An event-related potential study. <i>Neuropsychologia</i> , 2020, 147, 107578.	0.7	15
6	Processing Ambiguous Morphemes in Chinese Compound Word Recognition: Behavioral and ERP Evidence. <i>Neuroscience</i> , 2020, 446, 249-260.	1.1	13
7	Morphosemantic activation of opaque Chinese words in sentence comprehension. <i>PLoS ONE</i> , 2020, 15, e0236697.	1.1	7
8	Semantic Radical Activation in Chinese Phonogram Recognition: Evidence from Event-Related Potential Recording. <i>Neuroscience</i> , 2019, 417, 24-34.	1.1	12
9	Behavioural evidence for segments as subordinate units in Chinese spoken word production: The form-preparation paradigm revisited. <i>PLoS ONE</i> , 2019, 14, e0225718.	1.1	3
10	MELD-SCH: A megastudy of lexical decision in simplified Chinese. <i>Behavior Research Methods</i> , 2018, 50, 1763-1777.	2.3	57
11	Neural evidence for reduced automaticity in processing emotional prosody among men with high levels of autistic traits. <i>Physiology and Behavior</i> , 2018, 196, 47-58.	1.0	3
12	Semantic activation of phonetic radicals in Chinese. <i>Language, Cognition and Neuroscience</i> , 2017, 32, 618-636.	0.7	12
13	The processing of homographic morphemes in Chinese: an ERP study. <i>Language, Cognition and Neuroscience</i> , 2017, 32, 102-116.	0.7	25
14	Processing Cantonese lexical tones: Evidence from oddball paradigms. <i>Neuroscience</i> , 2015, 305, 351-360.	1.1	18
15	Activation of morphemic meanings in processing opaque words. <i>Psychonomic Bulletin and Review</i> , 2014, 21, 1281-1286.	1.4	22
16	Morpho-orthographic and morpho-semantic processing in word recognition and production: evidence from ambiguous morphemes. <i>Language, Cognition and Neuroscience</i> , 2014, 29, 543-560.	0.7	18
17	Right hemisphere advantage in processing Cantonese level and contour tones: Evidence from dichotic listening. <i>Neuroscience Letters</i> , 2013, 556, 135-139.	1.0	13
18	Morpho-semantic processing in word recognition: Evidence from balanced and biased ambiguous morphemes.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2013, 39, 1990-2001.	0.7	19

#	ARTICLE	IF	CITATIONS
19	Early morphological processing is sensitive to morphemic meanings: Evidence from processing ambiguous morphemes. <i>Journal of Memory and Language</i> , 2013, 68, 223-239.	1.1	44
20	ERPs reveal sub-lexical processing in Chinese character recognition. <i>Neuroscience Letters</i> , 2012, 514, 164-168.	1.0	35
21	Eye movement control in reading: Logographic Chinese versus alphabetic scripts. <i>PsyCh Journal</i> , 2012, 1, 128-142.	0.5	20
22	ERP correlates of pre-attentive processing of Cantonese lexical tones: The effects of pitch contour and pitch height. <i>Neuroscience Letters</i> , 2011, 487, 268-272.	1.0	55
23	Morphemic ambiguity resolution in Chinese: Activation of the subordinate meaning with a prior dominant-biased context. <i>Psychonomic Bulletin and Review</i> , 2010, 17, 875-881.	1.4	20
24	Do position-general radicals have a role to play in processing Chinese characters?. <i>Language and Cognitive Processes</i> , 2009, 24, 947-966.	2.3	28
