ΔΜΙΤ Ρ ΔΜΙΝ

#	Article	IF	CITATIONS
1	Contemporary Incidence, Predictors, andÂOutcomes of Acute Kidney Injury inÂPatients Undergoing Percutaneous Coronary Interventions. JACC: Cardiovascular Interventions, 2014, 7, 1-9.	2.9	471
2	The Evolving Landscape of Impella Use in the United States Among Patients Undergoing Percutaneous Coronary Intervention With Mechanical Circulatory Support. Circulation, 2020, 141, 273-284.	1.6	278
3	Association Between Use of Bleeding Avoidance Strategies and Risk of Periprocedural Bleeding Among Patients Undergoing Percutaneous Coronary Intervention. JAMA - Journal of the American Medical Association, 2010, 303, 2156.	7.4	264
4	Validated Contemporary Risk Model of Acute Kidney Injury in Patients Undergoing Percutaneous Coronary Interventions: Insights From the National Cardiovascular Data Registry Cathâ€PCI Registry. Journal of the American Heart Association, 2014, 3, e001380.	3.7	167
5	Trends in the Incidence of Acute Kidney Injury in Patients Hospitalized With Acute Myocardial Infarction. Archives of Internal Medicine, 2012, 172, 246.	3.8	129
6	The prognostic importance of worsening renal function during an acute myocardial infarction on long-term mortality. American Heart Journal, 2010, 160, 1065-1071.	2.7	113
7	Costs of Transradial Percutaneous Coronary Intervention. JACC: Cardiovascular Interventions, 2013, 6, 827-834.	2.9	96
8	Costs Associated With Access Site andÂSame-Day Discharge Among MedicareÂBeneficiaries Undergoing Percutaneous Coronary Intervention. JACC: Cardiovascular Interventions, 2017, 10, 342-351.	2.9	92
9	Nuisance Bleeding With Prolonged Dual Antiplatelet Therapy After Acute Myocardial Infarction and its Impact on Health Status. Journal of the American College of Cardiology, 2013, 61, 2130-2138.	2.8	77
10	The Synergistic Relationship Between Estimated GFR and Microalbuminuria in Predicting Long-term Progression to ESRD or Death in Patients With Diabetes: Results From the Kidney Early Evaluation Program (KEEP). American Journal of Kidney Diseases, 2013, 61, S12-S23.	1.9	72
11	Association of Same-Day Discharge After Elective Percutaneous Coronary Intervention in the United States With Costs and Outcomes. JAMA Cardiology, 2018, 3, 1041.	6.1	65
12	Comparison of costs between transradial and transfemoral percutaneous coronary intervention: A cohort analysis from the Premier research database. American Heart Journal, 2013, 165, 303-309.e2.	2.7	58
13	Association of Variation in Contrast Volume With Acute Kidney Injury in Patients Undergoing Percutaneous Coronary Intervention. JAMA Cardiology, 2017, 2, 1007.	6.1	57
14	Use of Mechanical Circulatory Support Devices Among Patients With Acute Myocardial Infarction Complicated by Cardiogenic Shock. JAMA Network Open, 2021, 4, e2037748.	5.9	54
15	Use of Drug-Eluting Stents as a Function of Predicted Benefit. Archives of Internal Medicine, 2012, 172, 1145-52.	3.8	52
16	Impact of Bleeding on Quality of Life in Patients on DAPT. Journal of the American College of Cardiology, 2016, 67, 59-65.	2.8	48
17	Blood Transfusion During Acute Myocardial Infarction. Journal of the American College of Cardiology, 2014, 64, 811-819.	2.8	42
18	Temporal Trends in the Risk Profile of Patients Undergoing Outpatient Percutaneous Coronary Intervention. Circulation: Cardiovascular Interventions, 2016, 9, e003070.	3.9	41

ΑΜΙΤ Ρ ΑΜΙΝ

#	Article	IF	CITATIONS
19	Risk model for estimating the 1-year risk of deferred lesion intervention following deferred revascularization after fractional flow reserve assessment. European Heart Journal, 2015, 36, 509-515.	2.2	36
20	Novel Patientâ€Centered Approach to Facilitate Sameâ€Day Discharge in Patients Undergoing Elective Percutaneous Coronary Intervention. Journal of the American Heart Association, 2018, 7, .	3.7	30
21	Minimizing radiographic contrast administration during coronary angiography using a novel contrast reduction system: A multicenter observational study of the DyeVertâ,,¢ plus contrast reduction system. Catheterization and Cardiovascular Interventions, 2019, 93, 1228-1235.	1.7	28
22	Incremental Cost of Acute Kidney Injury after Percutaneous Coronary Intervention in the United States. American Journal of Cardiology, 2020, 125, 29-33.	1.6	27
23	Predicting Length of Stay and the Need for Postacute Care After Acute Myocardial Infarction to Improve Healthcare Efficiency. Circulation: Cardiovascular Quality and Outcomes, 2018, 11, e004635.	2.2	18
24	Clinical Model to Predict 90-Day Risk of Readmission After Acute Myocardial Infarction. Circulation: Cardiovascular Quality and Outcomes, 2018, 11, e004788.	2.2	18
25	Sociodemographic differences in utilization and outcomes for temporary cardiovascular mechanical support in the setting of cardiogenic shock. American Heart Journal, 2021, 236, 87-96.	2.7	18
26	Clinical predictors of length of stay in adults with congenital heart disease. Heart, 2017, 103, 1258-1263.	2.9	15
27	Artificial neural networkâ€based prediction of prolonged length of stay and need for postâ€acute care in acute coronary syndrome patients undergoing percutaneous coronary intervention. European Journal of Clinical Investigation, 2021, 51, e13406.	3.4	14
28	Trends in Use and Outcomes of Same-Day Discharge Following Elective Percutaneous Coronary Intervention. JACC: Cardiovascular Interventions, 2021, 14, 1655-1666.	2.9	14
29	Patient-centered contrast thresholds to reduce acute kidney injury in high-risk patients undergoing percutaneous coronary intervention. American Heart Journal, 2021, 234, 51-59.	2.7	13
30	Impact of Multivessel Revascularization on Health Status Outcomes in Patients With ST-Segment Elevation Myocardial Infarction and Multivessel Coronary Artery Disease. Journal of the American College of Cardiology, 2015, 66, 2104-2113.	2.8	11
31	Predictors of Rehospitalization Among Adults With Congenital Heart Disease Are Lesion Specific. Circulation: Cardiovascular Quality and Outcomes, 2016, 9, 566-575.	2.2	11
32	Reversing the "Riskâ€Treatment Paradox―of Bleeding in Patients Undergoing Percutaneous Coronary Intervention: Riskâ€Concordant Use of Bleeding Avoidance Strategies Is Associated With Reduced Bleeding and Lower Costs. Journal of the American Heart Association, 2018, 7, e008551.	3.7	11
33	Reducing Acute Kidney Injury and Costs of Percutaneous Coronary Intervention by Patient-Centered, Evidence-Based Contrast Use. Circulation: Cardiovascular Quality and Outcomes, 2019, 12, e004961.	2.2	11
34	The Value of Transradial. Interventional Cardiology Clinics, 2020, 9, 107-115.	0.4	10
35	Noncardiac chest pain after acute myocardial infarction: Frequency and association with health status outcomes. American Heart Journal, 2017, 186, 1-11.	2.7	9
36	The Cardiovascular Quality Improvement and Care Innovation Consortium. Circulation: Cardiovascular Quality and Outcomes, 2021, 14, e006753.	2.2	9

AMIT P AMIN

#	Article	IF	CITATIONS
37	Prophylactic Mechanical Circulatory Support Use in Elective Percutaneous Coronary Intervention for Patients With Stable Coronary Artery Disease. Circulation: Cardiovascular Interventions, 2022, 15, e011534.	3.9	9
38	Variation in the Incidence of Hospital-Acquired Anemia During Hospitalization With Acute Myocardial Infarction (Data from 57 US Hospitals). American Journal of Cardiology, 2014, 113, 1130-1136.	1.6	8
39	Transradial Access for High-Risk Percutaneous Coronary Intervention: Implications of the Risk-Treatment Paradox. Circulation: Cardiovascular Interventions, 2021, 14, e009328.	3.9	8
40	Lesion-Specific Factors Contributing to Inhospital Costs in Adults With Congenital Heart Disease. American Journal of Cardiology, 2016, 117, 1821-1825.	1.6	5
41	Use of <scp>isoâ€osmolar</scp> contrast media during endovascular revascularization is associated with a lower incidence of major adverse renal, cardiac, or limb events. Catheterization and Cardiovascular Interventions, 2022, 99, 1335-1342.	1.7	5
42	Cost of coronary syndrome treated with percutaneous coronary intervention and 30â€day unplanned readmission in the United States. Catheterization and Cardiovascular Interventions, 2021, 97, 80-93.	1.7	4
43	Improving Care Pathways for Acute Coronary Syndrome: Patients Undergoing Percutaneous Coronary Intervention. American Journal of Cardiology, 2020, 125, 354-361.	1.6	3
44	Artificial intelligence in percutaneous coronary intervention: improved risk prediction of PCI-related complications using an artificial neural network. BMJ Innovations, 2021, 7, 564-579.	1.7	3
45	Effect of Chronic Hematologic Malignancies on In-Hospital Outcomes of Patients With ST-Segment Elevation Myocardial Infarction. American Journal of Cardiology, 2019, 124, 349-354.	1.6	2
46	Differential Use and Impact of Bleeding Avoidance Strategies on Percutaneous Coronary Intervention-Related Bleeding Stratified by Predicted Risk. Circulation: Cardiovascular Interventions, 2020, 13, e008702.	3.9	2
47	Variation in contrast-associated acute kidney injury prophylaxis for percutaneous coronary intervention: insights from the Veterans Affairs Clinical Assessment, Reporting, and Tracking (CART) program. BMC Nephrology, 2020, 21, 150.	1.8	2
48	The bleeding risk treatment paradox at the physician and hospital level: Implications for reducing bleeding in patients undergoing percutaneous coronary intervention. American Heart Journal, 2022, 243, 221-231.	2.7	2
49	Same-Day Discharge After Percutaneous Coronary Intervention—An Elusive Bargain—Reply. JAMA Cardiology, 2019, 4, 496.	6.1	1
50	Response by Amin et al to Letters Regarding Article, "The Evolving Landscape of Impella Use in the United States Among Patients Undergoing Percutaneous Coronary Intervention With Mechanical Circulatory Support― Circulation, 2020, 142, e82-e84.	1.6	1
51	Abstract 111: A Patient-centered Approach to Reduce Contrast Volume During Percutaneous Coronary Intervention to Prevent Acute Kidney Injury. Circulation: Cardiovascular Quality and Outcomes, 2016, 9, .	2.2	1
52	Costs associated with transradial access and same-day discharge after percutaneous coronary intervention: a systematic review and meta-analysis. Reviews in Cardiovascular Medicine, 2021, 22, 429.	1.4	0
53	Association of Iso-Osmolar vs Low-Osmolar Contrast Media With Major Adverse Renal or Cardiovascular Events in Patients at High Risk for Acute Kidney Injury Undergoing Endovascular Abdominal Aortic Aneurysm Repair. Journal of Invasive Cardiology, 2021, 33, E640-E646.	0.4	0
54	Making sense of the costs of life and death interventions. Catheterization and Cardiovascular Interventions, 2021, 98, 711-712.	1.7	0
