1	Can false denials turn fact into fiction? The effect of false denials on memory for self-performed actions. <i>Psychological Research</i> , 2023, 87, 816-825.	1.0	1
2	A Critical Review of Case Studies on Dissociative Amnesia. <i>Clinical Psychological Science</i> , 2022, 10, 191-211.	2.4	22
3	Empirical research on fantasy proneness and its correlates 2000â€“2018: A meta-analysis.. <i>Psychology of Consciousness: Theory Research, and Practice</i> , 2022, 9, 2-26.	0.3	13
4	The Self-Report Symptom Inventory. <i>Psychological Injury and Law</i> , 2022, 15, 94.	1.0	6
5	Dissociation and Dissociative Disorders Reconsidered: Beyond Sociocognitive and Trauma Models Toward a Transtheoretical Framework. <i>Annual Review of Clinical Psychology</i> , 2022, 18, 259-289.	6.3	25
6	Cry for help as a root cause of poor symptom validity: A critical note. <i>Applied Neuropsychology Adult</i> , 2022, , 1-6.	0.7	3
7	Expertsâ€™ Failure to Consider the Negative Predictive Power of Symptom Validity Tests. <i>Frontiers in Psychology</i> , 2022, 13, 789762.	1.1	0
8	Feeling guilty: little effect on false confession rate. <i>Psychology, Crime and Law</i> , 2021, 27, 265-281.	0.8	3
9	Associations between supernormality (â€˜faking goodâ€™), narcissism and depression: An exploratory study in a clinical sample. <i>Clinical Psychology and Psychotherapy</i> , 2021, 28, 182-188.	1.4	2
10	The link between suggestibility, compliance, and false confessions: A review using experimental and field studies. <i>Applied Cognitive Psychology</i> , 2021, 35, 445-455.	0.9	12
11	Self-Reported Voluntary Blame-Taking: Kinship Before Friendship and No Effect of Incentives. <i>Frontiers in Psychology</i> , 2021, 12, 621960.	1.1	4
12	Consistency does not aid detection of feigned symptoms, overreporting does: Two explorative studies on symptom stability among truth tellers and feigners. <i>Applied Neuropsychology Adult</i> , 2021, , 1-9.	0.7	0
13	Belief in Unconscious Repressed Memory Persists. <i>Perspectives on Psychological Science</i> , 2021, 16, 454-460.	5.2	20
14	How Plausible Is the Implausible? Studentsâ€™ Plausibility and Prevalence Ratings of the Self-Report Symptom Inventory. <i>Psychological Injury and Law</i> , 2021, 14, 127-133.	1.0	1
15	Memory and eye movement desensitization and reprocessing therapy: a potentially risky combination in the courtroom. <i>Memory</i> , 2021, 29, 1254-1262.	0.9	7
16	The link between dissociative tendencies and hyperassociativity. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2021, 73, 101665.	0.6	4
17	Psychosis as a confounder of symptom credibility testing in a transcultural sample. <i>Journal of Forensic Psychiatry and Psychology</i> , 2020, 31, 64-75.	0.6	8
18	Increases of correct memories and spontaneous false memories due to eye movements when memories are retrieved after a time delay. <i>Behaviour Research and Therapy</i> , 2020, 125, 103546.	1.6	12

#	ARTICLE	IF	CITATIONS
19	Worsening of Self-Reported Symptoms Through Suggestive Feedback. <i>Clinical Psychological Science</i> , 2020, 8, 359-365.	2.4	2
20	Do You Know People Who Feign? Proxy Respondents About Feigned Symptoms. <i>Psychological Injury and Law</i> , 2020, 13, 225-234.	1.0	18
21	Overlooking Feigning Behavior May Result in Potential Harmful Treatment Interventions: Two Case Reports of Undetected Malingering. <i>Journal of Forensic Sciences</i> , 2020, 65, 1371-1375.	0.9	11
22	The Self-Report Symptom Inventory as an Instrument for Detecting Symptom Over-Reporting. <i>European Journal of Psychological Assessment</i> , 2020, 36, 730-739.	1.7	9
23	Belief in unconscious repressed memory is widespread: A comment on Brewin, Li, Ntarantana, Unsworth, and McNeilis (2019).. <i>Journal of Experimental Psychology: General</i> , 2020, 149, 1996-2000.	1.5	11
24	Skirting the issue: What does believing in repression mean?. <i>Journal of Experimental Psychology: General</i> , 2020, 149, 2005-2006.	1.5	14
25	Dissociation and its disorders: Competing models, future directions, and a way forward. <i>Clinical Psychology Review</i> , 2019, 73, 101755.	6.0	60
26	The Return of the Repressed: The Persistent and Problematic Claims of Long-Forgotten Trauma. <i>Perspectives on Psychological Science</i> , 2019, 14, 1072-1095.	5.2	97
27	A survey on adverse incidents in legal psychology studies: Reflections on ethics review. <i>Applied Cognitive Psychology</i> , 2019, 33, 682.	0.9	0
28	When Patients Overreport Symptoms: More Than Just Malingering. <i>Current Directions in Psychological Science</i> , 2019, 28, 321-326.	2.8	41
29	Detecting feigned high impact experiences: A symptom over-report questionnaire outperforms the emotional Stroop task. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2019, 65, 101483.	0.6	7
30	EMDR and False Memories: A Response to Lee, de Jongh, and Hase (2019). <i>Clinical Psychological Science</i> , 2019, 7, 405-406.	2.4	2
31	Dealing With False Memories in Children and Adults: Recommendations for the Legal Arena. <i>Policy Insights From the Behavioral and Brain Sciences</i> , 2019, 6, 87-93.	1.4	5
32	The Self-Report Symptom Inventory (SRSI) is sensitive to instructed feigning, but not to genuine psychopathology in male forensic inpatients: An initial study. <i>Clinical Neuropsychologist</i> , 2019, 33, 1069-1082.	1.5	17
33	Expert Witnesses, Dissociative Amnesia, and Extraordinary Remembering: Response to Brand et al.. <i>Psychological Injury and Law</i> , 2019, 12, 281-285.	1.0	10
34	Verifiability on the run: an experimental study on the verifiability approach to malingered symptoms. <i>Psychiatry, Psychology and Law</i> , 2019, 26, 65-76.	0.9	8
35	Reflections on Recovered Memories: Comment on Patihis and Pendergrast (2019). <i>Clinical Psychological Science</i> , 2019, 7, 22-24.	2.4	4
36	Associative Activation as a Mechanism Underlying False Memory Formation. <i>Clinical Psychological Science</i> , 2019, 7, 191-195.	2.4	25

#	ARTICLE	IF	CITATIONS
37	Feigning Hand Preference? A Case Report Preliminary Data. <i>Journal of Forensic Sciences</i> , 2019, 64, 938-940.	0.9	0
38	Detecting Feigned Cognitive Impairment With Schretlen's Malingering Scale Vocabulary and Abstraction Test. <i>European Journal of Psychological Assessment</i> , 2019, 35, 712-724.	1.7	2
39	Posttraumatic Stress Disorder and Diminished Criminal Responsibility as "New Evidence" in Criminal Revision Procedures. <i>Journal of Forensic Sciences</i> , 2018, 63, 1911-1913.	0.9	3
40	Alexithymia as a potential source of symptom over-reporting: An exploratory study in forensic patients and non-forensic participants. <i>Scandinavian Journal of Psychology</i> , 2018, 59, 192-197.	0.8	15
41	Lateral Eye Movements Increase False Memory Rates. <i>Clinical Psychological Science</i> , 2018, 6, 610-616.	2.4	27
42	The effects of co-witness discussion on confidence and precision in eyewitness memory reports. <i>Memory</i> , 2018, 26, 904-912.	0.9	6
43	Failing to tell friend from foe: A comment on Wijn et al. (2017). <i>Legal and Criminological Psychology</i> , 2018, 23, 2-4.	1.5	3
44	Decreasing Invalid Symptom Reporting: A Comment on Horner, Turner, Van Kirk, and Denning (2017). <i>Archives of Clinical Neuropsychology</i> , 2018, 33, 1080-1082.	0.3	2
45	Who Is the Better Eyewitness? Sometimes Adults but at Other Times Children. <i>Current Directions in Psychological Science</i> , 2018, 27, 378-385.	2.8	29
46	Antisocial features are not predictive of symptom exaggeration in forensic patients. <i>Legal and Criminological Psychology</i> , 2018, 23, 135-147.	1.5	2
47	Feigning Amnesia Moderately Impairs Memory for a Mock Crime Video. <i>Frontiers in Psychology</i> , 2018, 9, 625.	1.1	22
48	Warnings to Counter Choice Blindness for Identification Decisions: Warnings Offer an Advantage in Time but Not in Rate of Detection. <i>Frontiers in Psychology</i> , 2018, 9, 981.	1.1	2
49	Fantasy Proneness Correlates With the Intensity of Near-Death Experience. <i>Frontiers in Psychiatry</i> , 2018, 9, 190.	1.3	22
50	The Modified Stroop Task Is Susceptible to Feigning: Stroop Performance and Symptom Over-endorsement in Feigned Test Anxiety. <i>Frontiers in Psychology</i> , 2018, 9, 1195.	1.1	11
51	Why "Trauma-Related Dissociation" Is a Misnomer in Courts: a Critical Analysis of Brand et al. (2017a,). <i>Tj ETQq1_1 0.784314 rgB</i>	1.0	27
52	Symptom overreporting and dissociative experiences: A qualitative review. <i>Consciousness and Cognition</i> , 2017, 49, 132-144.	0.8	49
53	The Malevolent Side of Human Nature. <i>Perspectives on Psychological Science</i> , 2017, 12, 183-204.	5.2	589
54	Witnesses' failure to detect covert manipulations in their written statements. <i>Journal of Investigative Psychology and Offender Profiling</i> , 2017, 14, 320-331.	0.4	3

#	ARTICLE	IF	CITATIONS
55	The Verifiability Approach to detection of malingered physical symptoms. <i>Psychology, Crime and Law</i> , 2017, 23, 717-729.	0.8	16
56	Biased Symptom Reporting and Antisocial Behaviour in Forensic Samples: A Weak Link. <i>Psychiatry, Psychology and Law</i> , 2017, 24, 530-548.	0.9	9
57	What Drives False Memories in Psychopathology? A Case for Associative Activation. <i>Clinical Psychological Science</i> , 2017, 5, 1048-1069.	2.4	37
58	Standard Symptom Inventories for Asylum Seekers in a Psychiatric Hospital: Limited Utility Due to Poor Symptom Validity. <i>Psychological Injury and Law</i> , 2017, 10, 358-367.	1.0	8
59	Plausibility Judgments of Atypical Symptoms Across Cultures: an Explorative Study Among Western and Non-Western Experts. <i>Psychological Injury and Law</i> , 2017, 10, 274-281.	1.0	8
60	Undermining belief in false memories leads to less efficient problem-solving behaviour. <i>Memory</i> , 2017, 25, 910-921.	0.9	15
61	The Potential for False Memories is Bigger than What Brewin and Andrews Suggest. <i>Applied Cognitive Psychology</i> , 2017, 31, 24-25.	0.9	14
62	Dangerously Neglecting Courtroom Realities. <i>Applied Cognitive Psychology</i> , 2017, 31, 26-27.	0.9	6
63	Neuropsychologists'™ ability to predict distorted symptom presentation. <i>Journal of Clinical and Experimental Neuropsychology</i> , 2017, 39, 257-264.	0.8	45
64	Differentiating Factitious from Malingered Symptomatology: the Development of a Psychometric Approach. <i>Psychological Injury and Law</i> , 2017, 10, 341-357.	1.0	7
65	Moral Reminders Do Not Reduce Symptom Over-Reporting Tendencies. <i>Psychological Injury and Law</i> , 2017, 10, 368-384.	1.0	9
66	A Lab Model for Symptom Exaggeration: What do we Need?. <i>Journal of Experimental Psychopathology</i> , 2017, 8, 55-75.	0.4	4
67	Seven Myths About Feigning. , 2017, , .		5
68	Scientific Content Analysis (SCAN) Cannot Distinguish Between Truthful and Fabricated Accounts of a Negative Event. <i>Frontiers in Psychology</i> , 2016, 7, 243.	1.1	24
69	Validity of symptom reports of asylum seekers in a psychiatric hospital: A descriptive study. <i>International Journal of Law and Psychiatry</i> , 2016, 49, 40-46.	0.5	13
70	The Self-Report Symptom Inventory (SRSI): a New Instrument for the Assessment of Distorted Symptom Endorsement. <i>Psychological Injury and Law</i> , 2016, 9, 102-111.	1.0	55
71	A Multilab Preregistered Replication of the Ego-Depletion Effect. <i>Perspectives on Psychological Science</i> , 2016, 11, 546-573.	5.2	660
72	These two are different. Yes, they'™re the same: Choice blindness for facial identity. <i>Consciousness and Cognition</i> , 2016, 40, 93-104.	0.8	11

#	ARTICLE	IF	CITATIONS
73	On the alleged memory-undermining effects of daydreaming. <i>Consciousness and Cognition</i> , 2016, 39, 8-17.	0.8	0
74	The effect of choice reversals on blindness for identification decisions. <i>Psychology, Crime and Law</i> , 2016, 22, 303-314.	0.8	7
75	Strong, but Wrong: Lay People's and Police Officers' Beliefs about Verbal and Nonverbal Cues to Deception. <i>PLoS ONE</i> , 2016, 11, e0156615.	1.1	63
76	Imagining the impossible before breakfast: the relation between creativity, dissociation, and sleep. <i>Frontiers in Psychology</i> , 2015, 06, 324.	1.1	18
77	MDMA, cannabis, and cocaine produce acute dissociative symptoms. <i>Psychiatry Research</i> , 2015, 228, 907-912.	1.7	28
78	Exaggerating Psychopathology Produces Residual Effects That Are Resistant to Corrective Feedback: An Experimental Demonstration. <i>Applied Neuropsychology Adult</i> , 2015, 22, 16-22.	0.7	13
79	What if you went to the police and accused your uncle of abuse? Misunderstandings concerning the benefits of memory distortion: A commentary on Fernandez (2015). <i>Consciousness and Cognition</i> , 2015, 33, 286-290.	0.8	5
80	How effective is retrieval support for witnesses with different levels of working and source memory?. <i>Journal of Cognitive Psychology</i> , 2015, 27, 335-348.	0.4	2
81	Inconsistent retrospective self-reports of childhood sexual abuse and their correlates in the general population. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2015, 50, 603-612.	1.6	21
82	Antisocial features and "faking bad": A critical note. <i>International Journal of Law and Psychiatry</i> , 2015, 41, 34-42.	0.5	17
83	Sleep loss increases dissociation and affects memory for emotional stimuli. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2015, 47, 9-17.	0.6	67
84	Self-Reported Sleep Disturbances in Patients with Dissociative Identity Disorder and Post-Traumatic Stress Disorder and How They Relate to Cognitive Failures and Fantasy Proneness. <i>Frontiers in Psychiatry</i> , 2014, 5, 19.	1.3	22
85	SCAN is largely driven by 12 criteria: results from sexual abuse statements. <i>Psychology, Crime and Law</i> , 2014, 20, 430-449.	0.8	10
86	The trauma model of dissociation: Inconvenient truths and stubborn fictions. Comment on Dalenberg et al. (2012).. <i>Psychological Bulletin</i> , 2014, 140, 896-910.	5.5	108
87	Memory impairment is not sufficient for choice blindness to occur. <i>Frontiers in Psychology</i> , 2014, 5, 449.	1.1	10
88	Contextual Bias in Verbal Credibility Assessment: Criteria-Based Content Analysis, Reality Monitoring and Scientific Content Analysis. <i>Applied Cognitive Psychology</i> , 2014, 28, 79-90.	0.9	27
89	The Structured Inventory of Malingered Symptomatology (SIMS): A Systematic Review and Meta-Analysis. <i>Clinical Neuropsychologist</i> , 2014, 28, 1336-1365.	1.5	115
90	"This Is the Person You Selected": Eyewitnesses' Blindness for Their Own Facial Recognition Decisions. <i>Applied Cognitive Psychology</i> , 2014, 28, 753-764.	0.9	12

#	ARTICLE	IF	CITATIONS
91	Night-time experiences and daytime dissociation: A path analysis modeling study. <i>Psychiatry Research</i> , 2014, 216, 236-241.	1.7	26
92	Symptom overreporting obscures the dose-response relationship between trauma severity and symptoms. <i>Psychiatry Research</i> , 2014, 217, 215-219.	1.7	20
93	Symptom Validity Testing in Somatoform and Dissociative Disorders: A Critical Review. <i>Psychological Injury and Law</i> , 2013, 6, 122-137.	1.0	72
94	“Yes, I Have Sometimes Stolen Bikes”: Blindness for Norm-Violating Behaviors and Implications for Suspect Interrogations. <i>Behavioral Sciences and the Law</i> , 2013, 31, 239-255.	0.6	16
95	Early emotional processing deficits in depersonalization: An exploration with event-related potentials in an undergraduate sample. <i>Psychiatry Research - Neuroimaging</i> , 2013, 212, 223-229.	0.9	7
96	Let's use those tests! Evaluations of crime-related amnesia claims. <i>Memory</i> , 2013, 21, 599-607.	0.9	10
97	Dissociative symptoms and sleep parameters in an all-night polysomnography study in patients with insomnia. <i>Comprehensive Psychiatry</i> , 2013, 54, 658-664.	1.5	42
98	Dissociative symptoms and REM sleep. <i>Behavioral and Brain Sciences</i> , 2013, 36, 630-631.	0.4	5
99	Witnesses' Blindness for their Own Facial Recognition Decisions: A Field Study. <i>Behavioral Sciences and the Law</i> , 2013, 31, 624-636.	0.6	15
100	Feigning a Memory Deficit: The Medical Symptom Validity Test as an Example. <i>Journal of Experimental Psychopathology</i> , 2013, 4, 46-63.	0.4	32
101	Forced-Choice Tests as Single-Case Experiments in the Differential Diagnosis of Intentional Symptom Distortion. <i>Journal of Experimental Psychopathology</i> , 2013, 4, 20-37.	0.4	26
102	Introduction to Malingering Research and Symptom Validity Assessment. <i>Journal of Experimental Psychopathology</i> , 2013, 4, 3-5.	0.4	8
103	Mother Teresa Doesn't Help Here: Lack of Moral Priming Effects on Malingered Symptom Reports and What We Can Learn from it. <i>Psychologica Belgica</i> , 2013, 52, 271.	1.0	9
104	Sleep normalization and decrease in dissociative experiences: Evaluation in an inpatient sample. <i>Journal of Abnormal Psychology</i> , 2012, 121, 140-150.	2.0	57
105	Fragmented Sleep, Fragmented Mind. <i>Perspectives on Psychological Science</i> , 2012, 7, 159-175.	5.2	108
106	Susceptibility to misleading information under social pressure in schizophrenia. <i>Comprehensive Psychiatry</i> , 2012, 53, 1187-1193.	1.5	7
107	The efficiency of reappraisal and expressive suppression in regulating everyday affective experiences. <i>Psychiatry Research</i> , 2012, 200, 964-969.	1.7	32
108	Introducing the Maastricht Acute Stress Test (MAST): A quick and non-invasive approach to elicit robust autonomic and glucocorticoid stress responses. <i>Psychoneuroendocrinology</i> , 2012, 37, 1998-2008.	1.3	236
