

Michel den Elzen

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/4851101/michel-den-elzen-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
112	Developing scenarios in the context of the Paris Agreement and application in the integrated assessment model IMAGE: A framework for bridging the policy-modelling divide. <i>Environmental Science and Policy</i> , 2022 , 135, 104-116	6.2	1
111	Global roll-out of comprehensive policy measures may aid in bridging emissions gap. <i>Nature Communications</i> , 2021 , 12, 6419	17.4	6
110	Net-zero emission targets for major emitting countries consistent with the Paris Agreement. <i>Nature Communications</i> , 2021 , 12, 2140	17.4	56
109	A review of successful climate change mitigation policies in major emitting economies and the potential of global replication. <i>Renewable and Sustainable Energy Reviews</i> , 2021 , 137, 110602	16.2	26
108	Wave of net zero emission targets opens window to meeting the Paris Agreement. <i>Nature Climate Change</i> , 2021 , 11, 820-822	21.4	19
107	Regional energy diversity and sovereignty in different 2 °C and 1.5 °C pathways. <i>Energy</i> , 2021 , 239, 122197	9.9	3
106	Greenhouse gas emission scenarios in nine key non-G20 countries: An assessment of progress toward 2030 climate targets. <i>Environmental Science and Policy</i> , 2021 , 123, 67-81	6.2	7
105	Taking stock of national climate policies to evaluate implementation of the Paris Agreement. <i>Nature Communications</i> , 2020 , 11, 2096	17.4	108
104	Implications of various effort-sharing approaches for national carbon budgets and emission pathways. <i>Climatic Change</i> , 2020 , 162, 1805-1822	4.5	64
103	Are the G20 economies making enough progress to meet their NDC targets?. <i>Energy Policy</i> , 2019 , 126, 238-250	7.2	47
102	Assessing the ambition of post-2020 climate targets: a comprehensive framework. <i>Climate Policy</i> , 2018 , 18, 425-441	5.3	35
101	Reducing global GHG emissions by replicating successful sector examples: the good practice policies scenario. <i>Climate Policy</i> , 2018 , 18, 1103-1113	5.3	12
100	The key role of forests in meeting climate targets requires science for credible mitigation. <i>Nature Climate Change</i> , 2017 , 7, 220-226	21.4	218
99	Low-emission pathways in 11 major economies: comparison of cost-optimal pathways and Paris climate proposals. <i>Climatic Change</i> , 2017 , 142, 491-504	4.5	30
98	Exploring fair and ambitious mitigation contributions under the Paris Agreement goals. <i>Environmental Science and Policy</i> , 2017 , 74, 49-56	6.2	72
97	Global and regional abatement costs of Nationally Determined Contributions (NDCs) and of enhanced action to levels well below 2 °C and 1.5 °C. <i>Environmental Science and Policy</i> , 2017 , 71, 30-40	6.2	73
96	Early action on Paris Agreement allows for more time to change energy systems. <i>Climatic Change</i> , 2017 , 144, 165-179	4.5	20

95	Costs and benefits of differences in the timing of greenhouse gas emission reductions. <i>Mitigation and Adaptation Strategies for Global Change</i> , 2016 , 21, 1165-1179	3.9	8
94	Contribution of the G20 economies to the global impact of the Paris agreement climate proposals. <i>Climatic Change</i> , 2016 , 137, 655-665	4.5	55
93	Paris Agreement climate proposals need a boost to keep warming well below 2 °C. <i>Nature</i> , 2016 , 534, 631-9	50.4	1652
92	Greenhouse gas emissions from current and enhanced policies of China until 2030: Can emissions peak before 2030?. <i>Energy Policy</i> , 2016 , 89, 224-236	7.2	126
91	Assessing the INDCs' land use, land use change, and forest emission projections. <i>Carbon Balance and Management</i> , 2016 , 11, 26	3.6	56
90	The EU 40 % greenhouse gas emission reduction target by 2030 in perspective. <i>International Environmental Agreements: Politics, Law and Economics</i> , 2016 , 16, 375-392	2	11
89	The implications of carbon dioxide and methane exchange for the heavy mitigation RCP2.6 scenario under two metrics. <i>Environmental Science and Policy</i> , 2015 , 51, 77-87	6.2	9
88	National post-2020 greenhouse gas targets and diversity-aware leadership. <i>Nature Climate Change</i> , 2015 , 5, 1098-1106	21.4	66
87	Locked into Copenhagen pledges ¶ Implications of short-term emission targets for the cost and feasibility of long-term climate goals. <i>Technological Forecasting and Social Change</i> , 2015 , 90, 8-23	9.5	222
86	Multi-model comparison of the economic and energy implications for China and India in an international climate regime. <i>Mitigation and Adaptation Strategies for Global Change</i> , 2015 , 20, 1335-1359	3.9	33
85	Are major economies on track to achieve their pledges for 2020? An assessment of domestic climate and energy policies. <i>Energy Policy</i> , 2014 , 67, 781-796	7.2	30
84	The impact of technology availability on the timing and costs of emission reductions for achieving long-term climate targets. <i>Climatic Change</i> , 2014 , 123, 559-569	4.5	21
83	Regional GHG reduction targets based on effort sharing: a comparison of studies. <i>Climate Policy</i> , 2014 , 14, 122-147	5.3	136
82	Reduction targets and abatement costs of developing countries resulting from global and developed countries ¶ reduction targets by 2050. <i>Mitigation and Adaptation Strategies for Global Change</i> , 2013 , 18, 491-512	3.9	18
81	Implications of the international reduction pledges on long-term energy system changes and costs in China and India. <i>Energy Policy</i> , 2013 , 63, 1032-1041	7.2	35
80	Countries ¶ contributions to climate change: effect of accounting for all greenhouse gases, recent trends, basic needs and technological progress. <i>Climatic Change</i> , 2013 , 121, 397-412	4.5	59
79	The effect of updated pledges and business-as-usual projections, and new agreed rules on expected global greenhouse gas emissions in 2020. <i>Environmental Science and Policy</i> , 2013 , 33, 308-319	6.2	12
78	Analysing the greenhouse gas emission reductions of the mitigation action plans by non-Annex I countries by 2020. <i>Energy Policy</i> , 2013 , 56, 633-643	7.2	16

77	Emission allowances and mitigation costs of China and India resulting from different effort-sharing approaches. <i>Energy Policy</i> , 2012 , 46, 116-134	7.2	38
76	The impact of surplus units from the first Kyoto period on achieving the reduction pledges of the Cancun Agreements. <i>Climatic Change</i> , 2012 , 114, 401-408	4.5	3
75	The role of the land use, land use change and forestry sector in achieving Annex I reduction pledges. <i>Climatic Change</i> , 2012 , 115, 873-881	4.5	27
74	Implications of greenhouse gas emission mitigation scenarios for the main Asian regions. <i>Energy Economics</i> , 2012 , 34, S459-S469	8.3	23
73	National GHG emissions reduction pledges and 2°C: comparison of studies. <i>Climate Policy</i> , 2012 , 12, 356-377	3.7	22
72	Copenhagen Accord Pledges imply higher costs for staying below 2°C warming. <i>Climatic Change</i> , 2012 , 113, 551-561	4.5	43
71	The emissions gap between the Copenhagen pledges and the 2 °C climate goal: Options for closing and risks that could widen the gap. <i>Global Environmental Change</i> , 2011 , 21, 733-743	10.1	52
70	Exploring the bargaining space within international climate negotiations based on political, economic and environmental considerations. <i>Energy Policy</i> , 2011 , 39, 7361-7371	7.2	1
69	RCP2.6: exploring the possibility to keep global mean temperature increase below 2°C. <i>Climatic Change</i> , 2011 , 109, 95-116	4.5	617
68	The Copenhagen Accord: abatement costs and carbon prices resulting from the submissions. <i>Environmental Science and Policy</i> , 2011 , 14, 28-39	6.2	83
67	Predictability, equitability and adequacy of post-2012 international climate financing proposals. <i>Environmental Science and Policy</i> , 2011 , 14, 615-627	6.2	22
66	Sharing the reduction effort to limit global warming to 2°C. <i>Climate Policy</i> , 2010 , 10, 247-260	5.3	43
65	The effect of different historical emissions datasets on emission targets of the sectoral mitigation approach Triptych. <i>Climate Policy</i> , 2010 , 10, 684-704	5.3	15
64	Dealing with surplus emissions in the climate negotiations after Copenhagen: What are the options for compromise?. <i>Energy Policy</i> , 2010 , 38, 6615-6628	7.2	12
63	Postponing emission reductions from 2020 to 2030 increases climate risks and long-term costs. <i>Climatic Change</i> , 2010 , 99, 313-320	4.5	38
62	The feasibility of low CO2 concentration targets and the role of bio-energy with carbon capture and storage (BECCS). <i>Climatic Change</i> , 2010 , 100, 195-202	4.5	224
61	Including adaptation costs and climate change damages in evaluating post-2012 burden-sharing regimes. <i>Mitigation and Adaptation Strategies for Global Change</i> , 2010 , 15, 19-40	3.9	22
60	Sharing developed countries' post-2012 greenhouse gas emission reductions based on comparable efforts. <i>Mitigation and Adaptation Strategies for Global Change</i> , 2010 , 15, 433-465	3.9	8

59	A quantitative minimax regret approach to climate change: Does discounting still matter?. <i>Ecological Economics</i> , 2010 , 70, 43-51	5.6	15
58	Exploring IMAGE model scenarios that keep greenhouse gas radiative forcing below 3 W/m ² in 2100. <i>Energy Economics</i> , 2010 , 32, 1105-1120	8.3	54
57	Low Stabilization Scenarios and Implications for Major World Regions from an Integrated Assessment Perspective. <i>Energy Journal</i> , 2010 , 31,	3.5	7
56	Environmental effectiveness and economic consequences of fragmented versus universal regimes: what can we learn from model studies?. <i>International Environmental Agreements: Politics, Law and Economics</i> , 2009 , 9, 39-62	2	36
55	Climate benefits of changing diet. <i>Climatic Change</i> , 2009 , 95, 83-102	4.5	53 ²
54	Meeting radiative forcing targets under delayed participation. <i>Energy Economics</i> , 2009 , 31, S152-S162	8.3	40
53	Analysing comparable greenhouse gas mitigation efforts for Annex I countries. <i>Energy Policy</i> , 2009 , 37, 4114-4131	7.2	17
52	Comparison of different climate regimes: the impact of broadening participation. <i>Energy Policy</i> , 2009 , 37, 5351-5362	7.2	22
51	The effect of different mitigation strategies on international financing of adaptation. <i>Environmental Science and Policy</i> , 2009 , 12, 832-843	6.2	19
50	Sharing the burden of financing adaptation to climate change. <i>Global Environmental Change</i> , 2009 , 19, 411-421	10.1	120
49	Analysing the costs and benefits of climate policy: Value judgements and scientific uncertainties. <i>Global Environmental Change</i> , 2008 , 18, 412-424	10.1	46
48	Methods for quantifying the benefits of sustainable development policies and measures (SD-PAMs). <i>Climate Policy</i> , 2008 , 8, 119-134	5.3	26
47	Temperature increase of 21st century mitigation scenarios. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2008 , 105, 15258-62	11.5	121
46	Regional abatement action and costs under allocation schemes for emission allowances for achieving low CO ₂ -equivalent concentrations. <i>Climatic Change</i> , 2008 , 90, 243-268	4.5	63
45	The Triptych approach revisited: A staged sectoral approach for climate mitigation. <i>Energy Policy</i> , 2008 , 36, 1107-1124	7.2	39
44	Long-term reduction potential of non-CO ₂ greenhouse gases. <i>Environmental Science and Policy</i> , 2007 , 10, 85-103	6.2	114
43	Differentiation of countries' future commitments in a post-2012 climate regime: An assessment of the South-North Dialogue Proposal. <i>Environmental Science and Policy</i> , 2007 , 10, 185-203	6.2	43
42	Stabilizing greenhouse gas concentrations at low levels: an assessment of reduction strategies and costs. <i>Climatic Change</i> , 2007 , 81, 119-159	4.5	53 ⁶

41	Peaking profiles for achieving long-term temperature targets with more likelihood at lower costs. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2007 , 104, 17931-6	11.5	51
40	Multi-gas emission envelopes to meet greenhouse gas concentration targets: Costs versus certainty of limiting temperature increase. <i>Global Environmental Change</i> , 2007 , 17, 260-280	10.1	69
39	Meeting the EU 2°C climate target: global and regional emission implications. <i>Climate Policy</i> , 2006 , 6, 545-564	5.3	30
38	Common but differentiated convergence (CDC): a new conceptual approach to long-term climate policy. <i>Climate Policy</i> , 2006 , 6, 181-199	5.3	73
37	Exploring the ancillary benefits of the Kyoto Protocol for air pollution in Europe. <i>Energy Policy</i> , 2006 , 34, 444-460	7.2	106
36	Multi-gas Emissions Pathways to Meet Climate Targets. <i>Climatic Change</i> , 2006 , 75, 151-194	4.5	86
35	Multi-Stage: A Rule-Based Evolution of Future Commitments under the Climate Change Convention. <i>International Environmental Agreements: Politics, Law and Economics</i> , 2006 , 6, 1-28	2	39
34	Long-Term Multi-Gas Scenarios to Stabilise Radiative Forcing - Exploring Costs and Benefits Within an Integrated Assessment Framework. <i>Energy Journal</i> , 2006 , SI2006,	3.5	32
33	Analysing countries' contribution to climate change: scientific and policy-related choices. <i>Environmental Science and Policy</i> , 2005 , 8, 614-636	6.2	58
32	Abatement costs of post-Kyoto climate regimes. <i>Energy Policy</i> , 2005 , 33, 2138-2151	7.2	66
31	The FAIR model: A tool to analyse environmental and costs implications of regimes of future commitments. <i>Environmental Modeling and Assessment</i> , 2005 , 10, 115-134	2	67
30	Differentiating Future Commitments on the Basis of Countries' Relative Historical Responsibility for Climate Change: Uncertainties in the Brazilian Proposal in the Context of a Policy Implementation. <i>Climatic Change</i> , 2005 , 71, 277-301	4.5	51
29	Analyzing the Kyoto Protocol under the Marrakesh Accords: economic efficiency and environmental effectiveness. <i>Ecological Economics</i> , 2002 , 43, 141-158	5.6	33
28	Long-term, consistent scenarios of emissions, deposition, and climate change in Europe. <i>Environmental Science and Policy</i> , 2002 , 5, 273-305	6.2	24
27	Long-term reductions in costs of controlling regional air pollution in Europe due to climate policy. <i>Environmental Science and Policy</i> , 2002 , 5, 349-365	6.2	32
26	Responsibility for Past and Future Global Warming: Uncertainties in Attributing Anthropogenic Climate Change. <i>Climatic Change</i> , 2002 , 54, 29-73	4.5	38
25	Evaluating the Bonn/Marrakesh agreement. <i>Climate Policy</i> , 2002 , 2, 111-117	5.3	10
24	Towards an equitable global climate change regime: compatibility with Article 2 of the Climate Change Convention and the link with sustainable development. <i>Climate Policy</i> , 2002 , 2, 211-230	5.3	53

23	An evaluation of the level of ambition and implications of the Bush Climate Change Initiative. <i>Climate Policy</i> , 2002 , 2, 293-301	5.3	15
22	Towards an equitable global climate change regime: compatibility with Article 2 of the Climate Change Convention and the link with sustainable development. <i>Climate Policy</i> , 2002 , 2, 211-230	5.3	8
21	An evaluation of the level of ambition and implications of the Bush Climate Change Initiative. <i>Climate Policy</i> , 2002 , 2, 293-301	5.3	4
20	Evaluating the BonnMarrakesh agreement. <i>Climate Policy</i> , 2002 , 2, 111-117	5.3	16
19	Exploring Climate Regimes for Differentiation of Future Commitments to Stabilise Greenhouse Gas Concentrations. <i>Integrated Assessment: an International Journal</i> , 2002 , 3, 343-359		29
18	Options for differentiation of future commitments in climate policy: how to realise timely participation to meet stringent climate goals?. <i>Climate Policy</i> , 2001 , 1, 465-480	5.3	82
17	Greenhouse Gas Emissions in an Equity-, Environment- and Service-Oriented World: An IMAGE-Based Scenario for the 21st Century. <i>Technological Forecasting and Social Change</i> , 2000 , 63, 137-174	9.5	39
16	An integrated modeling approach to global carbon and nitrogen cycles: Balancing their budgets. <i>Global Biogeochemical Cycles</i> , 1997 , 11, 191-215	5.9	9
15	The image greenhouse model as a mathematical system. <i>Applied Mathematical Modelling</i> , 1994 , 18, 234-254	4.5	15
14	Modeling climate related feedback processes. <i>Journal of Environmental Science and Health Part A: Environmental Science and Engineering</i> , 1993 , 28, 2095-2151		
13	. <i>Tellus, Series B: Chemical and Physical Meteorology</i> , 1993 , 45, 301-320	3.3	7
12	Strengthening the Montreal protocol: does it cool down the greenhouse?. <i>Science of the Total Environment</i> , 1992 , 113, 229-50	10.2	7
11	The socio-economic impact of sea-level rise on the Netherlands: A study of possible scenarios. <i>Climatic Change</i> , 1992 , 20, 169-195	4.5	8
10	A model-based approach to the calculation of global warming potentials (GWP). <i>International Journal of Climatology</i> , 1992 , 12, 865-874	3.5	11
9	Environmental effectiveness and economic consequences of fragmented versus universal regimes	35-59	1
8	Costs, benefits and interlinkages between adaptation and mitigation	235-254	1
7	A staged sectoral approach for climate mitigation	183-207	
6	Regional Low-Emission Pathways from Global Models. <i>SSRN Electronic Journal</i> ,	1	1

5	Common but differentiated convergence (CDC): a new conceptual approach to long-term climate policy	14
4	Meeting the EU 2°C climate target: global and regional emission implications	13
3	Twenty years of climate policy: G20 coverage and gaps. <i>Climate Policy</i> ,1-17	5:3 3
2	Sharing the Burden of Adaptation Financing: An Assessment of the Contributions of Countries. <i>SSRN Electronic Journal</i> ,	1 2
1	Targeted green recovery measures in a post-COVID-19 world enable the energy transition	2
