#	Article	IF	CITATIONS
1	Behavioral and Magnetoencephalographic Correlates of Fear Generalization Are Associated With Responses to Later Virtual Reality Exposure Therapy in Spider Phobia. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2022, 7, 221-230.	1.1	5
2	Effects of low-level visual information and perceptual load on P1 and N170 responses to emotional expressions. Cortex, 2021, 136, 14-27.	1.1	46
3	Clinical predictors of treatment response towards exposure therapy in virtuo in spider phobia: A machine learning and external cross-validation approach. Journal of Anxiety Disorders, 2021, 83, 102448.	1.5	15
4	Theranostic markers for personalized therapy of spider phobia: Methods of a bicentric external crossâ€validation machine learning approach. International Journal of Methods in Psychiatric Research, 2020, 29, e1812.	1.1	20
5	Stimulus arousal drives amygdalar responses to emotional expressions across sensory modalities. Scientific Reports, 2020, 10, 1898.	1.6	18
6	Brain activation during disorder-related script-driven imagery in panic disorder: a pilot study. Scientific Reports, 2019, 9, 2415.	1.6	5
7	One executive function never comes alone: monitoring and its relation to working memory, reasoning, and different executive functions. Cognitive Processing, 2017, 18, 13-29.	0.7	7
8	Interpersonal violence in posttraumatic women: brain networks triggered by trauma-related pictures. Social Cognitive and Affective Neuroscience, 2017, 12, 555-568.	1.5	33
9	Specifically altered brain responses to threat in generalized anxiety disorder relative to social anxiety disorder and panic disorder. Neurolmage: Clinical, 2016, 12, 698-706.	1.4	64
10	Monitoring supports performance in a dual-task paradigm involving a risky decision-making task and a working memory task. Frontiers in Psychology, 2015, 6, 142.	1.1	7
11	Among three different executive functions, general executive control ability is a key predictor of decision making under objective risk. Frontiers in Psychology, 2014, 5, 1386.	1.1	40
12	Performing a secondary executive task with affective stimuli interferes with decision making under risk conditions. Cognitive Processing, 2014, 15, 113-126.	0.7	13
13	Stress and decision making: neural correlates of the interaction between stress, executive functions, and decision making under risk. Experimental Brain Research, 2014, 232, 957-973.	0.7	54
