

Ana I Arroba

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/4854598/ana-i-arroba-publications-by-year.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

36
papers

940
citations

#	Paper	IF	Citations
36	Adult kidney explants is a physiologic model for studying diabetic nephropathy.. <i>Life Sciences</i> , 2022 , 120575	5.75	0
35	A New Perspective on Huntington's Disease: How a Neurological Disorder Influences the Peripheral Tissues. <i>International Journal of Molecular Sciences</i> , 2022 , 23, 6089	6.3	1
34	Anti-Inflammatory (M2) Response Is Induced by a sp-Iminosugar Glycolipid Sulfoxide in Diabetic Retinopathy. <i>Frontiers in Immunology</i> , 2021 , 12, 632132	8.4	3
33	Effect of Topical Administration of Somatostatin on Retinal Inflammation and Neurodegeneration in an Experimental Model of Diabetes. <i>Journal of Clinical Medicine</i> , 2020 , 9,	5.1	6
32	Synthesis of polyfluoroalkyl sp-iminosugar glycolipids and evaluation of their immunomodulatory properties towards anti-tumor, anti-leishmanial and anti-inflammatory therapies. <i>European Journal of Medicinal Chemistry</i> , 2019 , 182, 111604	6.8	10
31	Insulin receptor substrate 2 (IRS2) deficiency delays liver fibrosis associated with cholestatic injury. <i>DMM Disease Models and Mechanisms</i> , 2019 , 12,	4.1	4
30	Imbalance between pro-apoptotic and pro-survival factors in human retinal pericytes in diabetic-like conditions. <i>Acta Ophthalmologica</i> , 2018 , 96, e19-e26	3.7	8
29	IGF-1, Inflammation and Retinal Degeneration: A Close Network. <i>Frontiers in Aging Neuroscience</i> , 2018 , 10, 203	5.3	33
28	The sp-iminosugar glycolipid 1-dodecylsulfonyl-5N,6O-oxomethylidenenojirimycin (DSO-ONJ) as selective anti-inflammatory agent by modulation of hemeoxygenase-1 in Bv.2 microglial cells and retinal explants. <i>Food and Chemical Toxicology</i> , 2018 , 111, 454-466	4.7	15
27	Modulation of microglia in the retina: new insights into diabetic retinopathy. <i>Acta Diabetologica</i> , 2017 , 54, 527-533	3.9	50
26	Somatostatin protects human retinal pericytes from inflammation mediated by microglia. <i>Experimental Eye Research</i> , 2017 , 164, 46-54	3.7	12
25	A novel glucagon-like peptide 1/glucagon receptor dual agonist improves steatohepatitis and liver regeneration in mice. <i>Hepatology</i> , 2017 , 65, 950-968	11.2	49
24	Topical Administration of GLP-1 Receptor Agonists Prevents Retinal Neurodegeneration in Experimental Diabetes. <i>Diabetes</i> , 2016 , 65, 172-87	0.9	119
23	Effects of the neuroprotective drugs somatostatin and brimonidine on retinal cell models of diabetic retinopathy. <i>Acta Diabetologica</i> , 2016 , 53, 957-964	3.9	14
22	Modulation of microglia polarization dynamics during diabetic retinopathy in db/db mice. <i>Biochimica Et Biophysica Acta - Molecular Basis of Disease</i> , 2016 , 1862, 1663-74	6.9	57
21	Somatostatin protects photoreceptor cells against high glucose-induced apoptosis. <i>Molecular Vision</i> , 2016 , 22, 1522-1531	2.3	17
20	Friedelane-type triterpenoids as selective anti-inflammatory agents by regulation of differential signaling pathways in LPS-stimulated macrophages. <i>Toxicology and Applied Pharmacology</i> , 2016 , 313, 57-67	4.6	3

19	Rapamycin negatively impacts insulin signaling, glucose uptake and uncoupling protein-1 in brown adipocytes. <i>Biochimica Et Biophysica Acta - Molecular and Cell Biology of Lipids</i> , 2016 , 1861, 1929-1941	5	10
18	Autophagy resolves early retinal inflammation in Igf1-deficient mice. <i>DMM Disease Models and Mechanisms</i> , 2016 , 9, 965-74	4.1	12
17	Inhibition of Protein Tyrosine Phosphatase 1B Improves IGF-I Receptor Signaling and Protects Against Inflammation-Induced Gliosis in the Retina 2015 , 56, 8031-44		12
16	Microglia-Müller glia crosstalk in the rd10 mouse model of retinitis pigmentosa. <i>Advances in Experimental Medicine and Biology</i> , 2014 , 801, 373-9	3.6	29
15	Cellular prion protein modulates β -amyloid deposition in aged APP/PS1 transgenic mice. <i>Neurobiology of Aging</i> , 2013 , 34, 2793-804	5.6	15
14	Loss of protein tyrosine phosphatase 1B increases IGF-I receptor tyrosine phosphorylation but does not rescue retinal defects in IRS2-deficient mice 2013 , 54, 4215-25		11
13	Spontaneous generation of infectious prion disease in transgenic mice. <i>Emerging Infectious Diseases</i> , 2013 , 19, 1938-47	10.2	15
12	Atg5 and Ambra1 differentially modulate neurogenesis in neural stem cells. <i>Autophagy</i> , 2012 , 8, 187-99	10.2	126
11	Microglia-mediated IGF-I neuroprotection in the rd10 mouse model of retinitis pigmentosa 2011 , 52, 9124-30		69
10	IGF-I maintains calpastatin expression and attenuates apoptosis in several models of photoreceptor cell death. <i>European Journal of Neuroscience</i> , 2009 , 30, 975-86	3.5	28
9	Attenuation of vision loss and delay in apoptosis of photoreceptors induced by proinsulin in a mouse model of retinitis pigmentosa 2008 , 49, 4188-94		42
8	Cell-specific expression of X-linked inhibitor of apoptosis in the anterior pituitary of streptozotocin-induced diabetic rats. <i>Journal of Endocrinology</i> , 2007 , 192, 215-27	4.7	11
7	Activation of the intrinsic cell death pathway, increased apoptosis and modulation of astrocytes in the cerebellum of diabetic rats. <i>Neurobiology of Disease</i> , 2006 , 23, 290-9	7.5	33
6	Increased apoptosis of lactotrophs in streptozotocin-induced diabetic rats is followed by increased proliferation. <i>Journal of Endocrinology</i> , 2006 , 191, 55-63	4.7	7
5	Reduction in the number of astrocytes and their projections is associated with increased synaptic protein density in the hypothalamus of poorly controlled diabetic rats. <i>Endocrinology</i> , 2006 , 147, 5314-24	4.8	44
4	Oestrogen requires the insulin-like growth factor-I receptor for stimulation of prolactin synthesis via mitogen-activated protein kinase. <i>Journal of Neuroendocrinology</i> , 2005 , 17, 97-104	3.8	10
3	Activation of caspase 8 in the pituitaries of streptozotocin-induced diabetic rats: implication in increased apoptosis of lactotrophs. <i>Endocrinology</i> , 2005 , 146, 4417-24	4.8	23
2	Growth hormone-releasing peptide-6 inhibits cerebellar cell death in aged rats. <i>NeuroReport</i> , 2003 , 14, 1633-5	1.7	20

- 1 The number of lactotrophs is reduced in the anterior pituitary of streptozotocin-induced diabetic rats. *Diabetologia*, **2003**, 46, 634-8
