citing authors

#	ARTICLE	IF	CITATIONS
1	Different Effects of a School-Based Physical Activity Intervention on Health-related Quality of Life. <i>Applied Research in Quality of Life</i> , 2022, 17, 1767-1785.	2.4	1
2	Determining thresholds for spatial urban design and transport features that support walking to create healthy and sustainable cities: findings from the IPEN Adult study. <i>The Lancet Global Health</i> , 2022, 10, e895-e906.	6.3	42
3	Association between Implementation and Effect in the Randomized Controlled Trial "Move for Well-Being in School". <i>Advances in Physical Education</i> , 2021, 11, 141-157.	0.4	1
4	A Qualitative Exploration of Implementation, Adaptation, and Sustainability of a School-Based Physical Activity Intervention: Move for Well-Being in School. <i>SAGE Open</i> , 2021, 11, 215824402110000.	1.7	6
5	Life Skills Through School Sport: A Participatory Teacher Development Program. <i>Advances in Physical Education</i> , 2020, 10, 293-310.	0.4	5
6	What we build makes a difference " Mapping activating schoolyard features after renewal using GIS, GPS and accelerometers. <i>Landscape and Urban Planning</i> , 2019, 191, 103617.	7.5	22
7	Development and validation of the neighborhood environment walkability scale for youth across six continents. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2019, 16, 122.	4.6	22
8	Do associations of sex, age and education with transport and leisure-time physical activity differ across 17 cities in 12 countries?. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2019, 16, 121.	4.6	29
9	Pupils' experiences of autonomy, competence and relatedness in "Move for Well-being in Schools": A physical activity intervention. <i>European Physical Education Review</i> , 2019, 25, 640-658.	2.0	26
10	Improving children's physical self-perception through a school-based physical activity intervention: The Move for Well-being in School study. <i>Mental Health and Physical Activity</i> , 2018, 14, 31-38.	1.8	43
11	Objectively-assessed neighbourhood destination accessibility and physical activity in adults from 10 countries: An analysis of moderators and perceptions as mediators. <i>Social Science and Medicine</i> , 2018, 211, 282-293.	3.8	71
12	What happened in the "Move for Well-being in School": a process evaluation of a cluster randomized physical activity intervention using the RE-AIM framework. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017, 14, 159.	4.6	21
13	Schoolyard upgrade in a randomized controlled study design"how are school interventions associated with adolescents' perception of opportunities and recess physical activity. <i>Health Education Research</i> , 2017, 32, cyw058.	1.9	13
14	Perceived Neighborhood Environmental Attributes Associated with Walking and Cycling for Transport among Adult Residents of 17 Cities in 12 Countries: The IPEN Study. <i>Environmental Health Perspectives</i> , 2016, 124, 290-298.	6.0	195
15	Improving the well-being of children and youths: a randomized multicomponent, school-based, physical activity intervention. <i>BMC Public Health</i> , 2016, 16, 1127.	2.9	33
16	International comparisons of the associations between objective measures of the built environment and transport-related walking and cycling: IPEN adult study. <i>Journal of Transport and Health</i> , 2016, 3, 467-478.	2.2	160
17	International study of perceived neighbourhood environmental attributes and Body Mass Index: IPEN Adult study in 12 countries. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 62.	4.6	52
18	Developing Suitable Buffers to Capture Transport Cycling Behavior. <i>Frontiers in Public Health</i> , 2014, 2, 61.	2.7	16

#	ARTICLE	IF	CITATIONS
19	International variation in neighborhood walkability, transit, and recreation environments using geographic information systems: the IPEN adult study. <i>International Journal of Health Geographics</i> , 2014, 13, 43.	2.5	176
20	Variations in active transport behavior among different neighborhoods and across adult life stages. <i>Journal of Transport and Health</i> , 2014, 1, 316-325.	2.2	44
21	Neighborhood Environments and Objectively Measured Physical Activity in 11 Countries. <i>Medicine and Science in Sports and Exercise</i> , 2014, 46, 2253-2264.	0.4	96
22	Effects of a Danish multicomponent physical activity intervention on active school transport. <i>Journal of Transport and Health</i> , 2014, 1, 174-181.	2.2	20
23	School site walkability and active school transport – association, mediation and moderation. <i>Journal of Transport Geography</i> , 2014, 34, 7-15.	5.0	52
24	Intervention Effects on Adolescent Physical Activity in the Multicomponent SPACE Study: A Cluster Randomized Controlled Trial. <i>PLoS ONE</i> , 2014, 9, e99369.	2.5	47
25	Sharing good NEWS across the world: developing comparable scores across 12 countries for the neighborhood environment walkability scale (NEWS). <i>BMC Public Health</i> , 2013, 13, 309.	2.9	113
26	Advancing Science and Policy Through a Coordinated International Study of Physical Activity and Built Environments: IPEN Adult Methods. <i>Journal of Physical Activity and Health</i> , 2013, 10, 581-601.	2.0	148
27	SPACE for physical activity - a multicomponent intervention study: study design and baseline findings from a cluster randomized controlled trial. <i>BMC Public Health</i> , 2011, 11, 777.	2.9	33
