#	ARTICLE	IF	CITATIONS
1	Event-Related Potentials, Emotion, and Emotion Regulation: An Integrative Review. <i>Developmental Neuropsychology</i> , 2010, 35, 129-155.	1.0	1,005
2	The feedback-related negativity reflects the binary evaluation of good versus bad outcomes. <i>Biological Psychology</i> , 2006, 71, 148-154.	1.1	609
3	The Obsessive-Compulsive Inventory: development and validation of a short version. <i>Psychological Assessment</i> , 2002, 14, 485-96.	1.2	550
4	Reappraisal modulates the electrocortical response to unpleasant pictures. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2006, 6, 291-297.	1.0	505
5	On the ERN and the significance of errors. <i>Psychophysiology</i> , 2005, 42, 151-160.	1.2	503
6	To err is autonomic: Error-related brain potentials, ANS activity, and post-error compensatory behavior. <i>Psychophysiology</i> , 2003, 40, 895-903.	1.2	477
7	The error-related negativity (ERN) and psychopathology: Toward an endophenotype. <i>Clinical Psychology Review</i> , 2008, 28, 1343-1354.	6.0	468
8	Differentiating neural responses to emotional pictures: Evidence from temporal-spatial PCA. <i>Psychophysiology</i> , 2009, 46, 521-530.	1.2	461
9	It's worse than you thought: The feedback negativity and violations of reward prediction in gambling tasks. <i>Psychophysiology</i> , 2007, 44, 905-912.	1.2	448
10	Motivated and controlled attention to emotion: Time-course of the late positive potential. <i>Clinical Neurophysiology</i> , 2009, 120, 505-510.	0.7	435
11	Brain potentials associated with expected and unexpected good and bad outcomes. <i>Psychophysiology</i> , 2005, 42, 161-170.	1.2	414
12	Ventral striatal and medial prefrontal BOLD activation is correlated with reward-related electrocortical activity: A combined ERP and fMRI study. <i>NeuroImage</i> , 2011, 57, 1608-1616.	2.1	412
13	Deconstructing Reappraisal: Descriptions Preceding Arousing Pictures Modulate the Subsequent Neural Response. <i>Journal of Cognitive Neuroscience</i> , 2008, 20, 977-988.	1.1	394
14	Anxiety and error-related brain activity. <i>Biological Psychology</i> , 2003, 64, 77-90.	1.1	388
15	Beyond good and evil: The time-course of neural activity elicited by specific picture content.. <i>Emotion</i> , 2010, 10, 767-782.	1.5	373
16	Error-related psychophysiology and negative affect. <i>Brain and Cognition</i> , 2004, 56, 189-197.	0.8	363
17	The persistence of attention to emotion: Brain potentials during and after picture presentation.. <i>Emotion</i> , 2008, 8, 250-255.	1.5	361
18	Increases in depression and anxiety symptoms in adolescents and young adults during the COVID-19 pandemic. <i>Psychological Medicine</i> , 2022, 52, 3222-3230.	2.7	354

#	ARTICLE	IF	CITATIONS
19	Event-related potential activity in the basal ganglia differentiates rewards from nonrewards: Temporospacial principal components analysis and source localization of the feedback negativity. <i>Human Brain Mapping</i> , 2011, 32, 2207-2216.	1.9	353
20	Errors Are Aversive. <i>Psychological Science</i> , 2008, 19, 103-108.	1.8	328
21	Intentional modulation of emotional responding to unpleasant pictures: An ERP study. <i>Psychophysiology</i> , 2006, 43, 292-296.	1.2	327
22	The good, the bad and the neutral: Electrophysiological responses to feedback stimuli. <i>Brain Research</i> , 2006, 1105, 93-101.	1.1	310
23	Depression and reduced sensitivity to non-rewards versus rewards: Evidence from event-related potentials. <i>Biological Psychology</i> , 2009, 81, 1-8.	1.1	298
24	Error-related brain activity in obsessive-compulsive undergraduates. <i>Psychiatry Research</i> , 2002, 110, 63-72.	1.7	285
25	Psychometric properties of the OCI-R in a college sample. <i>Behaviour Research and Therapy</i> , 2004, 42, 115-123.	1.6	282
26	The late positive potential: a neurophysiological marker for emotion regulation in children. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2009, 50, 1373-1383.	3.1	263
27	Blunted neural response to rewards prospectively predicts depression in adolescent girls. <i>Psychophysiology</i> , 2013, 50, 74-81.	1.2	261
28	Attending to affect: Appraisal strategies modulate the electrocortical response to arousing pictures.. <i>Emotion</i> , 2006, 6, 517-522.	1.5	236
29	Increased error-related brain activity in generalized anxiety disorder. <i>Biological Psychology</i> , 2010, 85, 472-480.	1.1	230
30	Increased Error-Related Brain Activity in Pediatric Obsessive-Compulsive Disorder Before and After Treatment. <i>American Journal of Psychiatry</i> , 2008, 165, 116-123.	4.0	219
31	The OCI-R: Validation of the subscales in a clinical sample. <i>Journal of Anxiety Disorders</i> , 2007, 21, 394-406.	1.5	218
32	VENTROMEDIAL PREFRONTAL CORTEX REACTIVITY IS ALTERED IN GENERALIZED ANXIETY DISORDER DURING FEAR GENERALIZATION. <i>Depression and Anxiety</i> , 2013, 30, 242-250.	2.0	200
33	Tell me about it: Neural activity elicited by emotional pictures and preceding descriptions.. <i>Emotion</i> , 2009, 9, 531-543.	1.5	195
34	Blunted Neural Response to Rewards as a Prospective Predictor of the Development of Depression in Adolescent Girls. <i>American Journal of Psychiatry</i> , 2016, 173, 1223-1230.	4.0	194
35	Considering ERP difference scores as individual difference measures: Issues with subtraction and alternative approaches. <i>Psychophysiology</i> , 2017, 54, 114-122.	1.2	194
36	Integrating multiple perspectives on error-related brain activity: The ERN as a neural indicator of trait defensive reactivity. <i>Motivation and Emotion</i> , 2012, 36, 84-100.	0.8	193

#	ARTICLE	IF	CITATIONS
37	Emotion facilitates action: A transcranial magnetic stimulation study of motor cortex excitability during picture viewing. <i>Psychophysiology</i> , 2007, 44, 91-97.	1.2	186
38	Significance?... Significance! Empirical, methodological, and theoretical connections between the late positive potential and P300 as neural responses to stimulus significance: An integrative review. <i>Psychophysiology</i> , 2020, 57, e13570.	1.2	181
39	See no evil: Directing visual attention within unpleasant images modulates the electrocortical response. <i>Psychophysiology</i> , 2009, 46, 28-33.	1.2	169
40	Neural response to reward and depressive symptoms in late childhood to early adolescence. <i>Biological Psychology</i> , 2012, 89, 156-162.	1.1	162
41	Brain potentials during affective picture processing in children. <i>Biological Psychology</i> , 2009, 80, 333-338.	1.1	161
42	Increased error-related brain activity distinguishes generalized anxiety disorder with and without comorbid major depressive disorder.. <i>Journal of Abnormal Psychology</i> , 2012, 121, 885-896.	2.0	155
43	The ERN is the ERN is the ERN? Convergent validity of error-related brain activity across different tasks. <i>Biological Psychology</i> , 2013, 93, 377-385.	1.1	155
44	Motivated attention to cocaine and emotional cues in abstinent and current cocaine users - an ERP study. <i>European Journal of Neuroscience</i> , 2011, 33, 1716-1723.	1.2	154
45	The Late Positive Potential Predicts Subsequent Interference with Target Processing. <i>Journal of Cognitive Neuroscience</i> , 2011, 23, 2994-3007.	1.1	153
46	What Weâ€™ve Learned From Mistakes. <i>Current Directions in Psychological Science</i> , 2012, 21, 101-106.	2.8	153
47	Reduced electrocortical response to threatening faces in major depressive disorder. <i>Depression and Anxiety</i> , 2010, 27, 813-820.	2.0	151
48	Error-related negativity (ERN) and sustained threat: Conceptual framework and empirical evaluation in an adolescent sample. <i>Psychophysiology</i> , 2016, 53, 372-385.	1.2	143
49	Reliability of error-related brain activity. <i>Brain Research</i> , 2009, 1284, 89-99.	1.1	139
50	The development of the error-related negativity (ERN) and its relationship with anxiety: Evidence from 8 to 13 year-olds. <i>Developmental Cognitive Neuroscience</i> , 2012, 2, 152-161.	1.9	139
51	Intolerance of Uncertainty and Decisions About Delayed, Probabilistic Rewards. <i>Behavior Therapy</i> , 2011, 42, 378-386.	1.3	127
52	The Utility of Event-Related Potentials in Clinical Psychology. <i>Annual Review of Clinical Psychology</i> , 2019, 15, 71-95.	6.3	121
53	The development of fear learning and generalization in 8â€“13 year-olds. <i>Developmental Psychobiology</i> , 2012, 54, 675-684.	0.9	117
54	Enhanced error-related brain activity in children predicts the onset of anxiety disorders between the ages of 6 and 9.. <i>Journal of Abnormal Psychology</i> , 2015, 124, 266-274.	2.0	116

#	ARTICLE	IF	CITATIONS
55	Neural response to emotional pictures is unaffected by concurrent task difficulty: An event-related potential study.. Behavioral Neuroscience, 2007, 121, 1156-1162.	0.6	115
56	Circuit-Wide Structural and Functional Measures Predict Ventromedial Prefrontal Cortex Fear Generalization: Implications for Generalized Anxiety Disorder. Journal of Neuroscience, 2014, 34, 4043-4053.	1.7	113
57	The dynamic allocation of attention to emotion: Simultaneous and independent evidence from the late positive potential and steady state visual evoked potentials. Biological Psychology, 2013, 92, 447-455.	1.1	112
58	Attentional Biases for Emotional Faces in Young Children of Mothers with Chronic or Recurrent Depression. Journal of Abnormal Child Psychology, 2011, 39, 125-135.	3.5	110
59	Electrocortical reactivity to emotional faces in young children and associations with maternal and paternal depression. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2012, 53, 207-215.	3.1	109
60	Distinct electrocortical and behavioral evidence for increased attention to threat in generalized anxiety disorder. Depression and Anxiety, 2010, 27, 234-243.	2.0	107
61	Blunted neural response to rewards as a vulnerability factor for depression: Results from a family study.. Journal of Abnormal Psychology, 2015, 124, 878-889.	2.0	107
62	Modulation of late positive potentials by sexual images in problem users and controls inconsistent with "porn addiction". Biological Psychology, 2015, 109, 192-199.	1.1	107
63	Anxiety and spatial attention moderate the electrocortical response to aversive pictures. Neuropsychologia, 2009, 47, 2975-2980.	0.7	106
64	Working memory load reduces the late positive potential and this effect is attenuated with increasing anxiety. Cognitive, Affective and Behavioral Neuroscience, 2011, 11, 321-331.	1.0	105
65	Posttraumatic stress disorder symptoms in trauma-exposed college students: The role of trauma-related cognitions, gender, and negative affect. Journal of Anxiety Disorders, 2007, 21, 1039-1049.	1.5	104
66	Revising the BIS/BAS Scale to study development: Measurement invariance and normative effects of age and sex from childhood through adulthood.. Psychological Assessment, 2016, 28, 429-442.	1.2	104
67	Longer term test-retest reliability of error-related brain activity. Psychophysiology, 2011, 48, 1420-1425.	1.2	103
68	Differentiating Anxiety and Depression in Children and Adolescents: Evidence From Event-Related Brain Potentials. Journal of Clinical Child and Adolescent Psychology, 2015, 44, 238-249.	2.2	102
69	Neural Correlates of Reward Processing in Depressed and Healthy Preschool-Age Children. Journal of the American Academy of Child and Adolescent Psychiatry, 2016, 55, 1081-1089.	0.3	102
70	Performance monitoring in obsessive-compulsive disorder. Psychiatry Research, 2005, 134, 111-122.	1.7	101
71	Emotional targets: Evaluative categorization as a function of context and content. International Journal of Psychophysiology, 2012, 84, 149-154.	0.5	99
72	Previously reappraised: the lasting effect of description type on picture-elicited electrocortical activity. Social Cognitive and Affective Neuroscience, 2011, 6, 348-358.	1.5	98

#	ARTICLE	IF	CITATIONS
73	Reliability of the electrocortical response to gains and losses in the doors task. <i>Psychophysiology</i> , 2017, 54, 601-607.	1.2	98
74	Depression and reduced neural response to emotional images: Distinction from anxiety, and importance of symptom dimensions and age of onset.. <i>Journal of Abnormal Psychology</i> , 2016, 125, 26-39.	2.0	97
75	Diagnostic and Symptom-Based Predictors of Emotional Processing in Generalized Anxiety Disorder and Major Depressive Disorder: An Event-Related Potential Study. <i>Cognitive Therapy and Research</i> , 2016, 40, 275-289.	1.2	97
76	Electrocortical responses to NIMSTIM facial expressions of emotion. <i>International Journal of Psychophysiology</i> , 2013, 88, 17-25.	0.5	96
77	RDoC: Translating promise into progress. <i>Psychophysiology</i> , 2016, 53, 415-424.	1.2	92
78	Enhanced Choice for Viewing Cocaine Pictures in Cocaine Addiction. <i>Biological Psychiatry</i> , 2009, 66, 169-176.	0.7	90
79	Impaired emotion regulation in schizophrenia: evidence from event-related potentials. <i>Psychological Medicine</i> , 2013, 43, 2377-2391.	2.7	90
80	Electrocortical and behavioral measures of response monitoring in young children during a Go/NoGo task. <i>Developmental Psychobiology</i> , 2012, 54, 139-150.	0.9	86
81	Neural reactivity tracks fear generalization gradients. <i>Biological Psychology</i> , 2013, 92, 2-8.	1.1	86
82	Autonomic impairment in Borderline Personality Disorder: A laboratory investigation. <i>Brain and Cognition</i> , 2009, 71, 279-286.	0.8	84
83	Depression symptom severity and error-related brain activity. <i>Psychiatry Research</i> , 2010, 179, 30-37.	1.7	84
84	Abnormal Neural Sensitivity to Monetary Gains Versus Losses Among Adolescents at Risk for Depression. <i>Journal of Abnormal Child Psychology</i> , 2011, 39, 913-924.	3.5	84
85	Electrocortical reactivity to emotional images and faces in middle childhood to early adolescence. <i>Developmental Cognitive Neuroscience</i> , 2012, 2, 458-467.	1.9	84
86	Reduced neural response to reward and pleasant pictures independently relate to depression. <i>Psychological Medicine</i> , 2021, 51, 741-749.	2.7	83
87	Psychophysiological prediction of choice: relevance to insight and drug addiction. <i>Brain</i> , 2012, 135, 3481-3494.	3.7	82
88	Robust is not necessarily reliable: From within-subjects fMRI contrasts to between-subjects comparisons. <i>NeuroImage</i> , 2018, 173, 146-152.	2.1	82
89	Psychometrics and the neuroscience of individual differences: Internal consistency limits between-subjects effects.. <i>Journal of Abnormal Psychology</i> , 2017, 126, 823-834.	2.0	82
90	Reduced reward responsiveness moderates the effect of maternal depression on depressive symptoms in offspring: evidence across levels of analysis. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2019, 60, 82-90.	3.1	78

#	ARTICLE	IF	CITATIONS
91	Error-related negativities elicited by monetary loss and cues that predict loss. <i>NeuroReport</i> , 2007, 18, 1875-1878.	0.6	77
92	Genetic variation in brain-derived neurotrophic factor and human fear conditioning. <i>Genes, Brain and Behavior</i> , 2009, 8, 80-85.	1.1	77
93	Familial risk for distress and fear disorders and emotional reactivity in adolescence: an event-related potential investigation. <i>Psychological Medicine</i> , 2015, 45, 2545-2556.	2.7	75
94	The relationship between obsessive-compulsive and posttraumatic stress symptoms in clinical and non-clinical samples. <i>Journal of Anxiety Disorders</i> , 2005, 19, 127-136.	1.5	74
95	Mind Perception: Real but Not Artificial Faces Sustain Neural Activity beyond the N170/VPP. <i>PLoS ONE</i> , 2011, 6, e17960.	1.1	74
96	Oops!.. I did it again: An ERP and behavioral study of double-errors. <i>Brain and Cognition</i> , 2008, 68, 15-21.	0.8	73
97	Beyond the Broken Error-Related Negativity: Functional and Diagnostic Correlates of Error Processing in Psychosis. <i>Biological Psychiatry</i> , 2012, 71, 864-872.	0.7	70
98	Error-related brain activity in youth and young adults before and after treatment for generalized or social anxiety disorder. <i>Progress in Neuro-Psychopharmacology and Biological Psychiatry</i> , 2016, 71, 162-168.	2.5	70
99	Impaired neural response to internal but not external feedback in schizophrenia. <i>Psychological Medicine</i> , 2012, 42, 1637-1647.	2.7	69
100	Increased Error-Related Brain Activity in Six-Year-Old Children with Clinical Anxiety. <i>Journal of Abnormal Child Psychology</i> , 2013, 41, 1257-1266.	3.5	69
101	Emotional reactivity in nonsuicidal self-injury: Divergence between self-report and startle measures. <i>International Journal of Psychophysiology</i> , 2011, 80, 166-170.	0.5	67
102	Interpretation bias in social anxiety as detected by event-related brain potentials.. <i>Emotion</i> , 2008, 8, 693-700.	1.5	64
103	Neural correlates of attentional deployment within unpleasant pictures. <i>NeuroImage</i> , 2013, 70, 268-277.	2.1	64
104	Validating dimensions of psychosis symptomatology: Neural correlates and 20-year outcomes.. <i>Journal of Abnormal Psychology</i> , 2016, 125, 1103-1119.	2.0	62
105	Depression risk and electrocortical reactivity during self-referential emotional processing in 8 to 14 year-old girls.. <i>Journal of Abnormal Psychology</i> , 2016, 125, 607-619.	2.0	61
106	What do clinicians treat: Diagnoses or symptoms? The incremental validity of a symptom-based, dimensional characterization of emotional disorders in predicting medication prescription patterns. <i>Comprehensive Psychiatry</i> , 2017, 79, 80-88.	1.5	61
107	Event-related potentials to acoustic startle probes during the anticipation of predictable and unpredictable threat. <i>Psychophysiology</i> , 2015, 52, 887-894.	1.2	59
108	Error-preceding brain activity: Robustness, temporal dynamics, and boundary conditions. <i>Biological Psychology</i> , 2005, 70, 67-78.	1.1	57

#	ARTICLE	IF	CITATIONS
109	To eat or not to eat? Availability of food modulates the electrocortical response to food pictures in restrained eaters. <i>Appetite</i> , 2010, 54, 262-268.	1.8	57
110	Second-hand stress: inhalation of stress sweat enhances neural response to neutral faces. <i>Social Cognitive and Affective Neuroscience</i> , 2012, 7, 208-212.	1.5	57
111	Personality and emotional processing: A relationship between extraversion and the late positive potential in adolescence. <i>Psychophysiology</i> , 2015, 52, 1039-1047.	1.2	55
112	Psychometric considerations in using error-related brain activity as a biomarker in psychotic disorders.. <i>Journal of Abnormal Psychology</i> , 2013, 122, 520-531.	2.0	54
113	Methodological choices in event-related potential (ERP) research and their impact on internal consistency reliability and individual differences: An examination of the error-related negativity (ERN) and anxiety.. <i>Journal of Abnormal Psychology</i> , 2020, 129, 29-37.	2.0	54
114	Error-related brain activity in young children: associations with parental anxiety and child temperamental negative emotionality. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2013, 54, 854-862.	3.1	53
115	Internal Consistency of Functional Magnetic Resonance Imaging and Electroencephalography Measures of Reward in Late Childhood and Early Adolescence. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2017, 2, 289-297.	1.1	53
116	Neural Reactivity to Emotional Stimuli Prospectively Predicts the Impact of a Natural Disaster on Psychiatric Symptoms in Children. <i>Biological Psychiatry</i> , 2016, 80, 381-389.	0.7	52
117	State sadness reduces neural sensitivity to nonrewards versus rewards. <i>NeuroReport</i> , 2010, 21, 143-147.	0.6	51
118	Intolerance of uncertainty and startle potentiation in relation to different threat reinforcement rates. <i>International Journal of Psychophysiology</i> , 2016, 99, 79-84.	0.5	51
119	A longitudinal examination of event-related potentials sensitive to monetary reward and loss feedback from late childhood to middle adolescence. <i>International Journal of Psychophysiology</i> , 2018, 132, 323-330.	0.5	51
120	Reduced P300 in depression: Evidence from a flanker task and impact on ERN, CRN, and Pe. <i>Psychophysiology</i> , 2020, 57, e13520.	1.2	51
121	The error-related negativity relates to sadness following mood induction among individuals with high neuroticism. <i>Social Cognitive and Affective Neuroscience</i> , 2012, 7, 289-295.	1.5	49
122	Blunted Reward Sensitivity and Trait Disinhibition Interact to Predict Substance Use Problems. <i>Clinical Psychological Science</i> , 2019, 7, 1109-1124.	2.4	49
123	Event-related potential activity in the basal ganglia differentiates rewards from nonrewards: Response to commentary. <i>Human Brain Mapping</i> , 2011, 32, 2267-2269.	1.9	47
124	Intact motivated attention in schizophrenia: Evidence from event-related potentials. <i>Schizophrenia Research</i> , 2012, 135, 95-99.	1.1	47
125	Nonconscious attention bias to threat is correlated with anterior cingulate cortex gray matter volume: A voxel-based morphometry result and replication. <i>NeuroImage</i> , 2012, 59, 1713-1718.	2.1	46
126	Looking Inward. <i>Psychological Science</i> , 2012, 23, 1461-1466.	1.8	45

#	ARTICLE	IF	CITATIONS
127	Comparing electric shock and a fearful screaming face as unconditioned stimuli for fear learning. <i>International Journal of Psychophysiology</i> , 2012, 86, 214-219.	0.5	45
128	The impact of an unpredictable context and intolerance of uncertainty on the electrocortical response to monetary gains and losses. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2016, 16, 153-163.	1.0	45
129	Hairpulling and Skin Picking in Relation to Affective Distress and Obsessive-Compulsive Symptoms. <i>Journal of Psychopathology and Behavioral Assessment</i> , 2006, 28, 177-185.	0.7	44
130	Using Multilevel Modeling to Examine Blunted Neural Responses to Reward in Major Depression. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2018, 3, 1032-1039.	1.1	44
131	Differentiating event-related potential components sensitive to emotion in middle childhood: Evidence from temporal-spatial PCA. <i>Developmental Psychobiology</i> , 2013, 55, 539-550.	0.9	43
132	It's all in the anticipation: How perception of threat is enhanced in anxiety.. <i>Emotion</i> , 2016, 16, 320-327.	1.5	42
133	The uncertainty of errors: Intolerance of uncertainty is associated with error-related brain activity. <i>Biological Psychology</i> , 2016, 113, 52-58.	1.1	42
134	An Examination of Error-Related Brain Activity and Its Modulation by Error Value in Young Children. <i>Developmental Neuropsychology</i> , 2009, 34, 749-761.	1.0	41
135	Longitudinal Associations Between Preschool Disruptive Mood Dysregulation Disorder Symptoms and Neural Reactivity to Monetary Reward During Preadolescence. <i>Journal of Child and Adolescent Psychopharmacology</i> , 2016, 26, 131-137.	0.7	40
136	Stressful life events moderate the effect of neural reward responsiveness in childhood on depressive symptoms in adolescence. <i>Psychological Medicine</i> , 2020, 50, 1548-1555.	2.7	40
137	Data quality and reliability metrics for event-related potentials (ERPs): The utility of subject-level reliability. <i>International Journal of Psychophysiology</i> , 2021, 165, 121-136.	0.5	40
