#	Article	IF	CITATIONS
1	A randomized trial of aerobic exercise for major depression: examining neural indicators of reward and cognitive control as predictors and treatment targets. Psychological Medicine, 2022, 52, 893-903.	2.7	22
2	Depressive Symptoms Prospectively Predict Peer Victimization: A Longitudinal Study Among Adolescent Females. Child Psychiatry and Human Development, 2022, 53, 39-47.	1.1	13
3	Increases in depression and anxiety symptoms in adolescents and young adults during the COVID-19 pandemic. Psychological Medicine, 2022, 52, 3222-3230.	2.7	354
4	An Electrocortical Measure Associated With Metarepresentation Mediates the Relationship Between Autism Symptoms and Theory of Mind. Clinical Psychological Science, 2022, 10, 324-339.	2.4	3
5	Blunted Flanker P300 Demonstrates Specificity to Depressive Symptoms in Females during Adolescence. Research on Child and Adolescent Psychopathology, 2022, 50, 537-548.	1.4	3
6	Appearance concerns are uniquely associated with LPP amplitude to pictures of oneself. Social Cognitive and Affective Neuroscience, 2022, 17, 430-436.	1.5	6
7	Accurate classification of depression through optimized machine learning models on high-dimensional noisy data. Biomedical Signal Processing and Control, 2022, 71, 103237.	3 <b>.</b> 5	2
8	Subjective, neuropsychological, and neural markers of memory in older adults. International Psychogeriatrics, 2022, 34, 1035-1043.	0.6	3
9	Internal consistency and test–retest reliability of the P3 eventâ€related potential (ERP) elicited by alcoholic and nonâ€alcoholic beverage pictures. Psychophysiology, 2022, 59, e13967.	1.2	10
10	A biomarker of maternal vicarious reward processing and its association with parenting behavior. Biological Psychology, 2022, 167, 108240.	1.1	0
11	Manipulating Reward Sensitivity Using Reward Circuit–Targeted Transcranial Magnetic Stimulation. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2022, 7, 833-840.	1.1	8
12	Neighborhood Disadvantage Associated With Blunted Amygdala Reactivity to Predictable and Unpredictable Threat in a Community Sample of Youth. Biological Psychiatry Global Open Science, 2022, 2, 242-252.	1.0	6
13	Depression reduces neural correlates of reward salience with increasing effort over the course of the progressive ratio task. Journal of Affective Disorders, 2022, 307, 294-300.	2.0	7
14	Reduced electrocortical responses to pleasant pictures in depression: A brief report on time-domain and time-frequency delta analyses. Biological Psychology, 2022, 170, 108302.	1.1	5
15	The relationship between stressful life events and the error-related negativity in children and adolescents. Developmental Cognitive Neuroscience, 2022, 55, 101110.	1.9	13
16	Letter to the Editor: Response to "A common neural correlate for affective and monetary reward― Biological Psychology, 2022, 171, 108347.	1.1	1
17	The P300, loneliness, and depression in older adults. Biological Psychology, 2022, 171, 108339.	1.1	5
18	Reduced <scp>P300</scp> amplitude is consistently associated with trait anhedonia across repeated assessments. Psychophysiology, 2022, 59, .	1.2	5

#	Article	IF	CITATIONS
19	Pathways from performance monitoring to negative symptoms and functional outcomes in psychotic disorders. Psychological Medicine, 2021, 51, 2012-2022.	2.7	13
20	The Relationship Between Depression Symptoms and Adolescent Neural Response During Reward Anticipation and Outcome Depends on Developmental Timing: Evidence From a Longitudinal Study. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2021, 6, 527-535.	1.1	4
21	Neural Response to Rewards, Stress and Sleep Interact to Prospectively Predict Depressive Symptoms in Adolescent Girls. Journal of Clinical Child and Adolescent Psychology, 2021, 50, 131-140.	2.2	39
22	Cognitive reappraisal and the association between depressive symptoms and perceived social support among older adults. Aging and Mental Health, 2021, 25, 453-461.	1.5	20
23	Reduced neural response to reward and pleasant pictures independently relate to depression. Psychological Medicine, 2021, 51, 741-749.	2.7	83
24	Reward Processing Abnormalities and Promising New Directions for Understanding Suicide Vulnerability. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2021, 6, 8-9.	1.1	4
25	Recoiling From Threat: Anxiety Is Related to Heightened Suppression of Threat, Not Increased Attention to Threat. Clinical Psychological Science, 2021, 9, 434-448.	2.4	15
26	The effort-doors task: Examining the temporal dynamics of effort-based reward processing using ERPs. NeuroImage, 2021, 228, 117656.	2.1	19
27	Acute stress reduces reward-related neural activity: Evidence from the reward positivity. Stress, 2021, 24, 833-839.	0.8	13
28	Data quality and reliability metrics for event-related potentials (ERPs): The utility of subject-level reliability. International Journal of Psychophysiology, 2021, 165, 121-136.	0.5	40
29	Error-related negativity predicts increases in anxiety in a sample of clinically anxious female children and adolescents over 2 years. Journal of Psychiatry and Neuroscience, 2021, 46, E472-E479.	1.4	13
30	Ventral striatal activation during reward differs between major depression with and without impaired mood reactivity. Psychiatry Research - Neuroimaging, 2021, 313, 111298.	0.9	7
31	The rewards of motherhood: Neural response to reward in pregnancy prospectively predicts maternal bonding with the infant in the postpartum period. Biological Psychology, 2021, 163, 108148.	1.1	6
32	Reliability of reward―and error―elated brain activity in early childhood. Developmental Psychobiology, 2021, 63, e22175.	0.9	7
33	The impact of a single session of aerobic exercise on positive emotional reactivity in depression: Insight into individual differences from the late positive potential. Behaviour Research and Therapy, 2021, 144, 103914.	1.6	4
34	Neural responses to reward and pleasant pictures prospectively predict remission from depression Journal of Abnormal Psychology, 2021, 130, 702-712.	2.0	13
35	Suicidal thoughts, behaviors, and eventâ€related potentials: A systematic review and metaâ€analysis. Psychophysiology, 2021, 58, e13939.	1.2	10
36	Doors P300 moderates the relationship between reward positivity and current depression status in adults. Journal of Affective Disorders, 2021, 294, 776-785.	2.0	19

#	Article	lF	CITATIONS
37	A reduced P300 prospectively predicts increased depressive severity in adults with clinical depression. Psychophysiology, 2021, 58, e13767.	1.2	25
38	Maternal suicidality interacts with blunted reward processing to prospectively predict increases in depressive symptoms in 8-to-14-year-old girls. International Journal of Psychophysiology, 2021, 170, 67-74.	0.5	6
39	Brain-behavioral adaptability predicts response to cognitive behavioral therapy for emotional disorders: A person-centered event-related potential study. Neuropsychologia, 2020, 145, 106408.	0.7	7
40	Emotion regulation to idiographic stimuli: Testing the Autobiographical Emotion Regulation Task. Neuropsychologia, 2020, 145, 106346.	0.7	15
41	Preschool-Onset Major Depressive Disorder is Characterized by Electrocortical Deficits in Processing Pleasant Emotional Pictures. Research on Child and Adolescent Psychopathology, 2020, 48, 91-108.	1.4	10
42	Developmental trajectory of the late positive potential: Using temporalâ€spatial PCA to characterize withinâ€subject developmental changes in emotional processing. Psychophysiology, 2020, 57, e13478.	1.2	8
43	Stressful life events moderate the effect of neural reward responsiveness in childhood on depressive symptoms in adolescence. Psychological Medicine, 2020, 50, 1548-1555.	2.7	40
44	A brief, computerized intervention targeting error sensitivity reduces the error-related negativity. Cognitive, Affective and Behavioral Neuroscience, 2020, 20, 172-180.	1.0	25
45	Reduced P300 in depression: Evidence from a flanker task and impact on ERN, CRN, and Pe. Psychophysiology, 2020, 57, e13520.	1.2	51
46	Application of attentional bias modification training to modulate hyperactive error-monitoring in OCD. International Journal of Psychophysiology, 2020, 156, 79-86.	0.5	23
47	Cross-sectional and prospective associations of P300, RewP, and ADHD symptoms in female adolescents. International Journal of Psychophysiology, 2020, 158, 215-224.	0.5	14
48	Reduced flanker P300 prospectively predicts increases in depression in female adolescents. Biological Psychology, 2020, 156, 107967.	1,1	19
49	Neural Indicators of Anhedonia: Predictors and Mechanisms of Treatment Change in a Randomized Clinical Trial in Early Childhood Depression. Biological Psychiatry, 2020, 88, 879-887.	0.7	13
50	Aberrant attentional bias to sad faces in depression and the role of stressful life events: Evidence from an eye-tracking paradigm. Behaviour Research and Therapy, 2020, 135, 103762.	1.6	31
51	Increased dehydroepiandrosterone (DHEA) is associated with anxiety in adolescent girls. Psychoneuroendocrinology, 2020, 119, 104751.	1.3	12
52	Examining the underpinnings of loudness dependence of auditory evoked potentials with positron emission tomography. NeuroImage, 2020, 213, 116733.	2.1	12
53	Event-related potential and behavioural differences in affective self-referential processing in long-term meditators versus controls. Cognitive, Affective and Behavioral Neuroscience, 2020, 20, 326-339.	1.0	11
54	Significance? Significance! Empirical, methodological, and theoretical connections between the late positive potential and P300 as neural responses to stimulus significance: An integrative review. Psychophysiology, 2020, 57, e13570.	1.2	181

#	Article	IF	CITATIONS
55	The reward positivity: Comparing visual and auditory feedback. Biological Psychology, 2020, 154, 107907.	1.1	5
56	Methodological choices in event-related potential (ERP) research and their impact on internal consistency reliability and individual differences: An examination of the error-related negativity (ERN) and anxiety Journal of Abnormal Psychology, 2020, 129, 29-37.	2.0	54
57	Impact of pubertal timing and depression on errorâ€related brain activity in anxious youth. Developmental Psychobiology, 2019, 61, 69-80.	0.9	5
58	Reduced reward responsiveness moderates the effect of maternal depression on depressive symptoms in offspring: evidence across levels of analysis. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2019, 60, 82-90.	3.1	78
59	A review examining the relationship between individual differences in the error-related negativity and cognitive control. International Journal of Psychophysiology, 2019, 144, 7-13.	0.5	22
60	Differences in the Late Positive Potential and P300 to Emotional Faces in Individuals with Autism Spectrum Disorder. Journal of Autism and Developmental Disorders, 2019, 49, 5009-5022.	1.7	9
61	T31. Amygdala and Hippocampal Activation to Conditioned Stimuli During Extinction Following Threat Avoidance. Biological Psychiatry, 2019, 85, S141.	0.7	0
62	Longitudinal increases in reward-related neural activity in early adolescence: Evidence from event-related potentials (ERPs). Developmental Cognitive Neuroscience, 2019, 36, 100620.	1.9	30
63	The Multidimensional Emotion Questionnaire (MEQ): Rationale and Initial Psychometric Properties. Journal of Psychopathology and Behavioral Assessment, 2019, 41, 409-424.	0.7	17
64	The importance of agency in human reward processing. Cognitive, Affective and Behavioral Neuroscience, 2019, 19, 1458-1466.	1.0	16
65	The Utility of Event-Related Potentials in Clinical Psychology. Annual Review of Clinical Psychology, 2019, 15, 71-95.	6.3	121
66	112. Individual Differences Neuroscience: From Within- To Between-Subjects Differences in Psychopathology. Biological Psychiatry, 2019, 85, S47.	0.7	0
67	Blunted Reward Sensitivity and Trait Disinhibition Interact to Predict Substance Use Problems. Clinical Psychological Science, 2019, 7, 1109-1124.	2.4	49
68	Do sensorimotor perturbations to standing balance elicit an errorâ€related negativity?. Psychophysiology, 2019, 56, e13359.	1.2	24
69	Ageâ€typical changes in neural reward response are moderated by maternal anhedonia. Psychophysiology, 2019, 56, e13358.	1.2	6
70	Toward a neurobehavioral trait conceptualization of depression proneness. Psychophysiology, 2019, 56, e13367.	1.2	23
71	Increased neural sensitivity to selfâ€relevant stimuli in major depressive disorder. Psychophysiology, 2019, 56, e13345.	1.2	29
72	Parenting style moderates the effects of exposure to natural disaster-related stress on the neural development of reactivity to threat and reward in children. Development and Psychopathology, 2019, 31, 1589-1598.	1.4	11

#	Article	IF	Citations
73	Neural response to reward and psychosocial risk factors independently predict antenatal depressive symptoms. Biological Psychology, 2019, 147, 107622.	1.1	8
74	Altered reward processing following an acute social stressor in adolescents. PLoS ONE, 2019, 14, e0209361.	1.1	21
75	Dissociation of muscle and cortical response scaling to balance perturbation acceleration. Journal of Neurophysiology, 2019, 121, 867-880.	0.9	32
76	Neural Response to Pleasant Pictures Moderates Prospective Relationship Between Stress and Depressive Symptoms in Adolescent Girls. Journal of Clinical Child and Adolescent Psychology, 2019, 48, 643-655.	2.2	27
77	Working Memory Load and Negative Picture Processing: Neural and Behavioral Associations With Panic, Social Anxiety, and Positive Affect. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2019, 4, 151-159.	1.1	29
78	Effects of menstrual cycle phase on associations between the error-related negativity and checking symptoms in women. Psychoneuroendocrinology, 2019, 103, 233-240.	1.3	9
79	Reward processing and future life stress: Stress generation pathway to depression Journal of Abnormal Psychology, 2019, 128, 305-314.	2.0	32
80	Reward processing in certain versus uncertain contexts in schizophrenia: An event-related potential (ERP) study Journal of Abnormal Psychology, 2019, 128, 867-880.	2.0	12
81	Robust is not necessarily reliable: From within-subjects fMRI contrasts to between-subjects comparisons. NeuroImage, 2018, 173, 146-152.	2.1	82
82	Early temperamental fearfulness and the developmental trajectory of errorâ€related brain activity. Developmental Psychobiology, 2018, 60, 224-231.	0.9	22
83	Using Multilevel Modeling to Examine Blunted Neural Responses to Reward in Major Depression. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2018, 3, 1032-1039.	1.1	44
84	Neural reward responsiveness in children who engage in nonsuicidal selfâ€injury: an <scp>ERP</scp> study. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2018, 59, 1289-1297.	3.1	21
85	Alcohol hangover impacts learning and reward processing within the medialâ€frontal cortex. Psychophysiology, 2018, 55, e13081.	1.2	13
86	Prospective predictors of first-onset depressive disorders in adolescent females with anxiety disorders. Journal of Affective Disorders, 2018, 235, 176-183.	2.0	6
87	Cognitive Reappraisal Intervention for Suicide Prevention (CRISP) for Middle-Aged and Older Adults Hospitalized for Suicidality. American Journal of Geriatric Psychiatry, 2018, 26, 494-503.	0.6	20
88	Putamen Volume Differences Among Older Adults: Depression Status, Melancholia, and Age. Journal of Geriatric Psychiatry and Neurology, 2018, 31, 39-49.	1.2	22
89	Maternal Depression Is Related to Reduced Error-Related Brain Activity in Child and Adolescent Offspring. Journal of Clinical Child and Adolescent Psychology, 2018, 47, 324-335.	2.2	17
90	A genetic variant brain-derived neurotrophic factor (BDNF) polymorphism interacts with hostile parenting to predict error-related brain activity and thereby risk for internalizing disorders in children. Development and Psychopathology, 2018, 30, 125-141.	1.4	5

#	Article	IF	Citations
91	Hurricane Sandy Exposure Alters the Development of Neural Reactivity to Negative Stimuli in Children. Child Development, 2018, 89, 339-348.	1.7	11
92	Emotion processing in female youth: Testing the stability of the late positive potential. Psychophysiology, 2018, 55, e12977.	1.2	34
93	Time-Frequency Reward-Related Delta Prospectively Predicts the Development of Adolescent-Onset Depression. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2018, 3, 41-49.	1.1	27
94	The electrocortical response to rewarding and aversive feedback: The reward positivity does not reflect salience in simple gambling tasks. International Journal of Psychophysiology, 2018, 132, 262-267.	0.5	33
95	Neural indices of emotional reactivity and regulation predict course of PTSD symptoms in combat-exposed veterans. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2018, 82, 255-262.	2.5	28
96	A longitudinal examination of event-related potentials sensitive to monetary reward and loss feedback from late childhood to middle adolescence. International Journal of Psychophysiology, 2018, 132, 323-330.	0.5	51
97	Electrocortical Responses to Emotional Stimuli in Psychotic Disorders: Comparing Schizophrenia Spectrum Disorders and Affective Psychosis. Frontiers in Psychiatry, 2018, 9, 586.	1.3	5
98	Feedback-Related Electroencephalogram Oscillations of Athletes With High and Low Sports Anxiety. Frontiers in Psychology, 2018, 9, 1420.	1.1	7
99	Extraversion, neuroticism, and the electrocortical response to monetary rewards in adolescent girls. Biological Psychology, 2018, 136, 111-118.	1.1	15
100	Individual differences in combat experiences and error-related brain activity in OEF/OIF/OND veterans. International Journal of Psychophysiology, 2018, 129, 52-57.	0.5	8
101	Is There an Effect of Medications on Neural Response to Threat in Patients Who Have Attempted Suicide? A Response to Lewine. Clinical Psychological Science, 2018, 6, 299-300.	2.4	0
102	Ventral Striatal Function Interacts With Positive and Negative Life Events to Predict Concurrent Youth Depressive Symptoms. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2018, 3, 937-946.	1.1	13
103	Effects of menstrual cycle phase on electrocortical response to reward and depressive symptoms in women. Psychophysiology, 2018, 55, e13268.	1.2	10
104	Neural Responsiveness to Reward as an Index of Depressive Symptom Change Following Cognitive-Behavioral Therapy and SSRI Treatment. Journal of Clinical Psychiatry, 2018, 79, .	1.1	35
105	Here Comes Trouble: Prestimulus Brain Activity Predicts Enhanced Perception of Threat. Cerebral Cortex, 2017, 27, bhw104.	1.6	20
106	Internal Consistency of Functional Magnetic Resonance Imaging and Electroencephalography Measures of Reward in Late Childhood and Early Adolescence. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2017, 2, 289-297.	1.1	53
107	Error-Specific Cognitive Control Alterations in Generalized Anxiety Disorder. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2017, 2, 413-420.	1.1	39
108	Reliability of the electrocortical response to gains and losses in the doors task. Psychophysiology, 2017, 54, 601-607.	1.2	98

#	Article	IF	Citations
109	Intervention for Anxiety and Problem Behavior in Children with Autism Spectrum Disorder and Intellectual Disability. Journal of Autism and Developmental Disorders, 2017, 47, 3930-3948.	1.7	36
110	Neural Biomarker and Early Temperament Predict Increased Internalizing Symptoms After aÂNatural Disaster. Journal of the American Academy of Child and Adolescent Psychiatry, 2017, 56, 410-416.	0.3	38
111	What do clinicians treat: Diagnoses or symptoms? The incremental validity of a symptom-based, dimensional characterization of emotional disorders in predicting medication prescription patterns. Comprehensive Psychiatry, 2017, 79, 80-88.	1.5	61
112	Pubertal development and anxiety risk independently relate to startle habituation during fear conditioning in 8–14 yearâ€old females. Developmental Psychobiology, 2017, 59, 436-448.	0.9	13
113	Rumination is associated with diminished performance monitoring Emotion, 2017, 17, 953-964.	1.5	13
114	Behavioral observations of positive and negative valence systems in early childhood predict physiological measures of emotional processing three years later. Journal of Affective Disorders, 2017, 216, 70-77.	2.0	15
115	Neural Correlates of Choking Under Pressure: Athletes High in Sports Anxiety Monitor Errors More When Performance Is Being Evaluated. Developmental Neuropsychology, 2017, 42, 104-112.	1.0	26
116	Defensive motivation and attention in anticipation of different types of predictable and unpredictable threat: A startle and eventâ€related potential investigation. Psychophysiology, 2017, 54, 1180-1194.	1.2	37
117	Orbitofrontal Cortex Activity and Connectivity Predict Future Depression Symptoms in Adolescence. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2017, 2, 610-618.	1.1	21
118	Effects of anticipated emotional category and temporal predictability on the startle reflex. International Journal of Psychophysiology, 2017, 119, 67-72.	0.5	4
119	Considering ERP difference scores as individual difference measures: Issues with subtraction and alternative approaches. Psychophysiology, 2017, 54, 114-122.	1.2	194
120	Anxiety and Depression Symptom Dimensions Demonstrate Unique Relationships with the Startle Reflex in Anticipation of Unpredictable Threat in 8 to 14ÂYear-Old Girls. Journal of Abnormal Child Psychology, 2017, 45, 397-410.	3.5	21
121	Unpredictability increases the error-related negativity in children and adolescents. Brain and Cognition, 2017, 119, 25-31.	0.8	15
122	Attention bias modification reduces neural correlates of response monitoring. Biological Psychology, 2017, 129, 103-110.	1.1	26
123	Decreased Neural Response to Threat Differentiates Patients Who Have Attempted Suicide From Nonattempters With Current Ideation. Clinical Psychological Science, 2017, 5, 952-963.	2.4	31
124	Neurophysiological Processing of Emotion in Children of Mothers with a History of Depression: the Moderating Role of Preschool Persistent Irritability. Journal of Abnormal Child Psychology, 2017, 45, 1599-1608.	3.5	12
125	Neural markers of attention to aversive pictures predict response to cognitive behavioral therapy in anxiety and depression. Biological Psychology, 2017, 123, 269-277.	1.1	26
126	Authoritarian parenting predicts reduced electrocortical response to observed adolescent offspring rewards. Social Cognitive and Affective Neuroscience, 2017, 12, 363-371.	1,5	4

#	Article	IF	Citations
127	Error-related brain activity is related to aversive potentiation of the startle response in children, but only the ERN is associated with anxiety disorders Emotion, 2017, 17, 487-496.	1.5	24
128	Neural responses to gains and losses in children of suicide attempters Journal of Abnormal Psychology, 2017, 126, 237-243.	2.0	36
129	Psychometrics and the neuroscience of individual differences: Internal consistency limits between-subjects effects Journal of Abnormal Psychology, 2017, 126, 823-834.	2.0	82
130	Impact of alcohol use disorder comorbidity on defensive reactivity to errors in veterans with posttraumatic stress disorder Psychology of Addictive Behaviors, 2016, 30, 733-742.	1.4	22
131	Reshaping clinical science: Introduction to the Special Issue on <i>Psychophysiology and the NIMH Research Domain Criteria</i> ( <i>RDoC</i> ) <i>initiative</i> ). Psychophysiology, 2016, 53, 281-285.	1.2	12
132	Blunted Neural Response to Rewards as a Prospective Predictor of the Development of Depression in Adolescent Girls. American Journal of Psychiatry, 2016, 173, 1223-1230.	4.0	194
133	Errorâ€related negativity (ERN) and sustained threat: Conceptual framework and empirical evaluation in an adolescent sample. Psychophysiology, 2016, 53, 372-385.	1.2	143
134	Attentional biases in children of depressed mothers: An event-related potential (ERP) study Journal of Abnormal Psychology, 2016, 125, 1166-1178.	2.0	22
135	Depression and reduced neural response to emotional images: Distinction from anxiety, and importance of symptom dimensions and age of onset Journal of Abnormal Psychology, 2016, 125, 26-39.	2.0	97
136	Validating dimensions of psychosis symptomatology: Neural correlates and 20-year outcomes Journal of Abnormal Psychology, 2016, 125, 1103-1119.	2.0	62
137	Transdiagnostic factors and pathways to multifinality: The error-related negativity predicts whether preschool irritability is associated with internalizing versus externalizing symptoms at age 9. Development and Psychopathology, 2016, 28, 913-926.	1.4	32
138	Clinically Anxious Individuals Show Disrupted Feedback between Inferior Frontal Gyrus and Prefrontal-Limbic Control Circuit. Journal of Neuroscience, 2016, 36, 4708-4718.	1.7	31
