#	Article	IF	CITATIONS
1	The Holocene Asian Monsoon: Links to Solar Changes and North Atlantic Climate. Science, 2005, 308, 854-857.	12.6	2,115
2	Millennial- and orbital-scale changes in the East Asian monsoon over the past 224,000 years. Nature, 2008, 451, 1090-1093.	27.8	1,567
3	Timing, Duration, and Transitions of the Last Interglacial Asian Monsoon. Science, 2004, 304, 575-578.	12.6	1,013
4	Improvements in 230Th dating, 230Th and 234U half-life values, and U–Th isotopic measurements by multi-collector inductively coupled plasma mass spectrometry. Earth and Planetary Science Letters, 2013, 371-372, 82-91.	4.4	1,007
5	The Asian monsoon over the past 640,000 years and ice age terminations. Nature, 2016, 534, 640-646.	27.8	956
6	Ice Age Terminations. Science, 2009, 326, 248-252.	12.6	794
7	Chinese cave records and the East Asia Summer Monsoon. Quaternary Science Reviews, 2014, 83, 115-128.	3.0	452
8	Hydroclimate footprint of pan-Asian monsoon water isotope during the last deglaciation. Science Advances, 2021, 7, .	10.3	66
9	High-resolution stalagmite δ18O records of Asian monsoon changes in central and southern China spanning the MIS 3/2 transition. Earth and Planetary Science Letters, 2010, 298, 191-198.	4.4	60
10	Sub-millennial variability of Asian monsoon intensity during the early MIS 3 and its analogue to the ice age terminations. Quaternary Science Reviews, 2010, 29, 1107-1115.	3.0	45
11	A highâ€resolution monsoon record of millennialâ€scale oscillations during Late <scp>MIS</scp> 3 from Wulu Cave, southâ€west China. Journal of Quaternary Science, 2014, 29, 83-90.	2.1	31
12	Multi-scale Holocene Asian monsoon variability deduced from a twin-stalagmite record in southwestern China. Quaternary Research, 2016, 86, 34-44.	1.7	21
13	Cyclic changes of Asian monsoon intensity during the early mid-Holocene from annually-laminated stalagmites, central China. Quaternary Science Reviews, 2015, 121, 1-10.	3.0	20
14	Correlation between high-resolution climate records from a Nanjing stalagmite and GRIP ice core during the last glaciation. Science in China Series D: Earth Sciences, 2001, 44, 14-23.	0.9	19
15	The transfer of oxygen isotopic signals from precipitation to drip water and modern calcite on the seasonal time scale in Yongxing Cave, central China. Environmental Earth Sciences, 2018, 77, 1.	2.7	13
16	Modulation of centennial-scale hydroclimate variations in the middle Yangtze River Valley by the East Asian-Pacific pattern and ENSO over the past two millennia. Earth and Planetary Science Letters, 2021, 576, 117220.	4.4	10
17	A high-resolution stalagmite record from Luoshui Cave, Central China over the past 23.5 kyr. Quaternary Science Reviews, 2022, 282, 107443.	3.0	10
18	A possible Younger Dryas-type event during Asian monsoonal Termination 3. Science in China Series D: Earth Sciences, 2006, 49, 982-990.	0.9	9

#	Article	IF	CITATIONS
19	Spatio-temporal expressions of precessional-scale stalagmite δ180 variations from the Asian monsoon area. Palaeogeography, Palaeoclimatology, Palaeoecology, 2022, 585, 110720.	2.3	7
20	Different response of stalagmite l´180 and l´13C to millennial-scale events during the last glacial, evidenced from Huangjin Cave, northern China. Quaternary Science Reviews, 2022, 276, 107305.	3.0	7
21	Divergent influences of the Greenland and Antarctica climates on the Asian monsoon during a stadial to interstadial cycle. Journal of Asian Earth Sciences, 2018, 159, 69-73.	2.3	5
22	Evidence of ENSO signals in a stalagmite-based Asian monsoon record during the medieval warm period. Palaeogeography, Palaeoclimatology, Palaeoecology, 2021, 584, 110714.	2.3	5
23	A quick cooling event of the East Asian monsoon responding to Heinrich Event 1: Evidence from stalagmite δ180 records. Science in China Series D: Earth Sciences, 2002, 45, 88-96.	0.9	4
24	Century-scale climatic oscillations during the Last Glacial Maximum revealed by stalagmite isotopic records from Longfugong Cave, China. Environmental Earth Sciences, 2020, 79, 1.	2.7	0
