## **Edward Awh**

# List of Publications by Year in Descending Order

Source: https://exaly.com/author-pdf/4890685/edward-awh-publications-by-year.pdf

Version: 2024-04-20

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

118 46 12,471 111 h-index g-index citations papers 6.6 5.6 131 13,947 avg, IF L-index ext. citations ext. papers

#	Paper	IF	Citations
118	Inter-electrode correlations measured with EEG predict individual differences in cognitive ability. <i>Current Biology</i> , <b>2021</b> , 31, 4998-5008.e6	6.3	1
117	Controlling the Flow of Distracting Information in Working Memory. Cerebral Cortex, 2021, 31, 3323-333	3 <b>7</b> .1	8
116	Spatially Guided Distractor Suppression during Visual Search. <i>Journal of Neuroscience</i> , <b>2021</b> , 41, 3180-31	1 <b>9.</b> 16	6
115	Sustained Attention and Spatial Attention Distinctly Influence Long-term Memory Encoding. Journal of Cognitive Neuroscience, <b>2021</b> , 33, 2132-2148	3.1	1
114	Perceptual Grouping Reveals Distinct Roles for Sustained Slow Wave Activity and Alpha Oscillations in Working Memory. <i>Journal of Cognitive Neuroscience</i> , <b>2021</b> , 33, 1354-1364	3.1	2
113	Multivariate analysis of EEG activity indexes contingent attentional capture. <i>NeuroImage</i> , <b>2021</b> , 226, 117562	7.9	2
112	Covert Attention Increases the Gain of Stimulus-Evoked Population Codes. <i>Journal of Neuroscience</i> , <b>2021</b> , 41, 1802-1815	6.6	3
111	Estimating the statistical power to detect set-size effects in contralateral delay activity. <i>Psychophysiology</i> , <b>2021</b> , 58, e13791	4.1	2
110	Decoding chromaticity and luminance from patterns of EEG activity. <i>Psychophysiology</i> , <b>2021</b> , 58, e13779	4.1	4
109	Covert Spatial Attention Speeds Target Individuation. <i>Journal of Neuroscience</i> , <b>2020</b> , 40, 2717-2726	6.6	17
108	Multivariate analysis reveals a generalizable human electrophysiological signature of working memory load. <i>Psychophysiology</i> , <b>2020</b> , 57, e13691	4.1	3
107	Attention fluctuations impact ongoing maintenance of information in working memory. <i>Psychonomic Bulletin and Review</i> , <b>2020</b> , 27, 1269-1278	4.1	4
106	Perturbing Neural Representations of Working Memory with Task-irrelevant Interruption. <i>Journal of Cognitive Neuroscience</i> , <b>2020</b> , 32, 558-569	3.1	13
105	Alpha-band Activity Tracks the Zoom Lens of Attention. <i>Journal of Cognitive Neuroscience</i> , <b>2020</b> , 32, 272	:-3:82	3
104	Object-based biased competition during covert spatial orienting. <i>Attention, Perception, and Psychophysics</i> , <b>2019</b> , 81, 1366-1385	2	4
103	Alpha-band oscillations track the retrieval of precise spatial representations from long-term memory. <i>Journal of Neurophysiology</i> , <b>2019</b> , 122, 539-551	3.2	14
102	Real-time triggering reveals concurrent lapses of attention and working memory. <i>Nature Human Behaviour</i> , <b>2019</b> , 3, 808-816	12.8	31

# (2017-2019)

101	Item-specific delay activity demonstrates concurrent storage of multiple active neural representations in working memory. <i>PLoS Biology</i> , <b>2019</b> , 17, e3000239	9.7	15
100	Dissecting the Neural Focus of Attention Reveals Distinct Processes for Spatial Attention and Object-Based Storage in Visual Working Memory. <i>Psychological Science</i> , <b>2019</b> , 30, 526-540	7.9	39
99	Real-time triggering reveals sustained attention and working memory lapse together. <i>Journal of Vision</i> , <b>2019</b> , 19, 133c	0.4	
98	Examining the effects of memory compression with the contralateral delay activity. <i>Journal of Vision</i> , <b>2019</b> , 19, 204a	0.4	
97	The influence of task-relevant vs. task-irrelevant interruption on dissociable sub-component processes of the focus of attention. <i>Journal of Vision</i> , <b>2019</b> , 19, 90c	0.4	
96	Classification of load in visual working memory using single-trial EEG data. <i>Journal of Vision</i> , <b>2019</b> , 19, 247a	0.4	
95	Characterizing the influence of spatial attention on stimulus-evoked cortical representations. Journal of Vision, <b>2019</b> , 19, 99c	0.4	
94	Decoding chromaticity and luminance information with multivariate EEG. <i>Journal of Vision</i> , <b>2019</b> , 19, 70	0.4	
93	"Memory compression" effects in visual working memory are contingent on explicit long-term memory. <i>Journal of Experimental Psychology: General</i> , <b>2019</b> , 148, 1373-1385	4.7	7
92	The role of alpha oscillations in spatial attention: limited evidence for a suppression account. <i>Current Opinion in Psychology</i> , <b>2019</b> , 29, 34-40	6.2	63
91	Contralateral Delay Activity Indexes Working Memory Storage, Not the Current Focus of Spatial Attention. <i>Journal of Cognitive Neuroscience</i> , <b>2018</b> , 30, 1185-1196	3.1	35
90	Chunking in working memory via content-free labels. <i>Scientific Reports</i> , <b>2018</b> , 8, 23	4.9	15
89	Spatially Selective Alpha Oscillations Reveal Moment-by-Moment Trade-offs between Working Memory and Attention. <i>Journal of Cognitive Neuroscience</i> , <b>2018</b> , 30, 256-266	3.1	23
88	The N2pc does not reflect a shift of covert spatial attention. <i>Journal of Vision</i> , <b>2018</b> , 18, 1220	0.4	1
87	Decoding the limits of simultaneous storage in working memory. Journal of Vision, 2018, 18, 366	0.4	
86	Benchmarks provide common ground for model development: Reply to Logie (2018) and Vandierendonck (2018). <i>Psychological Bulletin</i> , <b>2018</b> , 144, 972-977	19.1	
85	Benchmarks for models of short-term and working memory. <i>Psychological Bulletin</i> , <b>2018</b> , 144, 885-958	19.1	110
84	Alpha-Band Oscillations Enable Spatially and Temporally Resolved Tracking of Covert Spatial Attention. <i>Psychological Science</i> , <b>2017</b> , 28, 929-941	7.9	102

83	Alpha-Band Activity Reveals Spontaneous Representations of Spatial Position in Visual Working Memory. <i>Current Biology</i> , <b>2017</b> , 27, 3216-3223.e6	6.3	63
82	Clear evidence for item limits in visual working memory. <i>Cognitive Psychology</i> , <b>2017</b> , 97, 79-97	3.1	69
81	The role of long-term memory in a test of visual working memory: Proactive facilitation but no proactive interference. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , <b>2017</b> , 43, 1-22	2.2	16
80	Alpha-Band Activity Tracks Updates to the Content of Spatial Working Memory. <i>Journal of Vision</i> , <b>2017</b> , 17, 337	0.4	
79	Neural representations of spatial position recalled from long-term and short-term memory diverge across the cortical hierarchy. <i>Journal of Vision</i> , <b>2017</b> , 17, 1115	0.4	
78	Memory compression using statistical regularities requires explicit awareness. <i>Journal of Vision</i> , <b>2017</b> , 17, 855	0.4	
77	Topography of alpha-band power tracks improvement in working memory precision with repeated encoding. <i>Journal of Vision</i> , <b>2017</b> , 17, 333	0.4	
76	Alpha-band activity reveals robust representations of spatial position during the storage of non-spatial features in working memory. <i>Journal of Vision</i> , <b>2017</b> , 17, 335	0.4	1
75	The role of context in volitional control of feature-based attention. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , <b>2016</b> , 42, 213-24	2.6	4
74	The contralateral delay activity as a neural measure of visual working memory. <i>Neuroscience and Biobehavioral Reviews</i> , <b>2016</b> , 62, 100-8	9	150
73	Retrieval practice enhances the accessibility but not the quality of memory. <i>Psychonomic Bulletin and Review</i> , <b>2016</b> , 23, 831-41	4.1	24
72	The capacity to detect synchronous audiovisual events is severely limited: Evidence from mixture modeling. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , <b>2016</b> , 42, 2115-2124	2.6	7
71	The topography of alpha-band activity tracks the content of spatial working memory. <i>Journal of Neurophysiology</i> , <b>2016</b> , 115, 168-77	3.2	110
70	Feature-Selective Attentional Modulations in Human Frontoparietal Cortex. <i>Journal of Neuroscience</i> , <b>2016</b> , 36, 8188-99	6.6	48
69	Attention: feedback focuses a wandering mind. <i>Nature Neuroscience</i> , <b>2015</b> , 18, 327-8	25.5	4
68	Working memory delay activity predicts individual differences in cognitive abilities. <i>Journal of Cognitive Neuroscience</i> , <b>2015</b> , 27, 853-65	3.1	51
67	Working memory and fluid intelligence: capacity, attention control, and secondary memory retrieval. <i>Cognitive Psychology</i> , <b>2014</b> , 71, 1-26	3.1	289
66	Electrophysiological evidence for failures of item individuation in crowded visual displays. <i>Journal of Cognitive Neuroscience</i> , <b>2014</b> , 26, 2298-309	3.1	5

## (2010-2014)

65	Induced I hythms track the content and quality of visual working memory representations with high temporal precision. <i>Journal of Neuroscience</i> , <b>2014</b> , 34, 7587-99	6.6	23	
64	Factorial comparison of working memory models. <i>Psychological Review</i> , <b>2014</b> , 121, 124-49	6.3	164	
63	Visual crowding cannot be wholly explained by feature pooling. <i>Journal of Experimental Psychology:</i> Human Perception and Performance, <b>2014</b> , 40, 1022-33	2.6	36	
62	Evidence for a fixed capacity limit in attending multiple locations. <i>Cognitive, Affective and Behavioral Neuroscience</i> , <b>2014</b> , 14, 62-77	3.5	4	
61	A Neural Measure of Item Individuation <b>2014</b> , 226-235		2	
60	A neural measure of precision in visual working memory. <i>Journal of Cognitive Neuroscience</i> , <b>2013</b> , 25, 754-61	3.1	121	
59	Selection and storage of perceptual groups is constrained by a discrete resource in working memory. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , <b>2013</b> , 39, 824-835	2.6	21	
58	The capacity of audiovisual integration is limited to one item. <i>Psychological Science</i> , <b>2013</b> , 24, 345-51	7.9	28	
57	Attending multiple items decreases the selectivity of population responses in human primary visual cortex. <i>Journal of Neuroscience</i> , <b>2013</b> , 33, 9273-82	6.6	13	
56	A common discrete resource for visual working memory and visual search. <i>Psychological Science</i> , <b>2013</b> , 24, 929-38	7.9	42	
55	The positional-specificity effect reveals a passive-trace contribution to visual short-term memory. <i>PLoS ONE</i> , <b>2013</b> , 8, e83483	3.7	7	
54	The plateau in mnemonic resolution across large set sizes indicates discrete resource limits in visual working memory. <i>Attention, Perception, and Psychophysics</i> , <b>2012</b> , 74, 891-910	2	25	
53	Top-down versus bottom-up attentional control: a failed theoretical dichotomy. <i>Trends in Cognitive Sciences</i> , <b>2012</b> , 16, 437-43	14	865	
52	Polymorphisms in the 5-HTTLPR gene mediate storage capacity of visual working memory. <i>Journal of Cognitive Neuroscience</i> , <b>2012</b> , 24, 1069-76	3.1	28	
51	Neural measures reveal a fixed item limit in subitizing. <i>Journal of Neuroscience</i> , <b>2012</b> , 32, 7169-77	6.6	71	
50	Increased sensitivity to perceptual interference in adults with attention deficit hyperactivity disorder. <i>Journal of the International Neuropsychological Society,</i> <b>2012</b> , 18, 511-20	3.1	14	
49	Precision in visual working memory reaches a stable plateau when individual item limits are exceeded. <i>Journal of Neuroscience</i> , <b>2011</b> , 31, 1128-38	6.6	129	
48	Statistical learning induces discrete shifts in the allocation of working memory resources. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , <b>2010</b> , 36, 1419-29	2.6	43	

47	Quantity, not quality: the relationship between fluid intelligence and working memory capacity. <i>Psychonomic Bulletin and Review</i> , <b>2010</b> , 17, 673-9	4.1	266
46	A bilateral advantage for storage in visual working memory. <i>Cognition</i> , <b>2010</b> , 117, 69-79	3.5	36
45	Discrete capacity limits in visual working memory. Current Opinion in Neurobiology, <b>2010</b> , 20, 177-82	7.6	188
44	Experience-dependent changes in the topography of visual crowding. <i>Journal of Vision</i> , <b>2009</b> , 9, 15.1-9	0.4	4
43	Spatially global representations in human primary visual cortex during working memory maintenance. <i>Journal of Neuroscience</i> , <b>2009</b> , 29, 15258-65	6.6	140
42	Discrete resource allocation in visual working memory. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , <b>2009</b> , 35, 1359-67	2.6	65
41	The elusive link between conflict and conflict adaptation. <i>Psychological Research</i> , <b>2009</b> , 73, 794-802	2.5	74
40	Online response-selection and the attentional blink: Multiple-processing channels. <i>Visual Cognition</i> , <b>2009</b> , 17, 531-554	1.8	4
39	Stimulus-specific delay activity in human primary visual cortex. <i>Psychological Science</i> , <b>2009</b> , 20, 207-14	7.9	516
38	The bouncer in the brain. <i>Nature Neuroscience</i> , <b>2008</b> , 11, 5-6	25.5	94
38	The bouncer in the brain. <i>Nature Neuroscience</i> , <b>2008</b> , 11, 5-6  How to Exploit Diversity for Scientific Gain: Using Individual Differences to Constrain Cognitive Theory. <i>Current Directions in Psychological Science</i> , <b>2008</b> , 17, 171-176	25.5 6.5	94
	How to Exploit Diversity for Scientific Gain: Using Individual Differences to Constrain Cognitive	6.5	
37	How to Exploit Diversity for Scientific Gain: Using Individual Differences to Constrain Cognitive Theory. <i>Current Directions in Psychological Science</i> , <b>2008</b> , 17, 171-176	6.5	116
37	How to Exploit Diversity for Scientific Gain: Using Individual Differences to Constrain Cognitive Theory. <i>Current Directions in Psychological Science</i> , <b>2008</b> , 17, 171-176  The processing locus of interference from salient singleton distractors. <i>Visual Cognition</i> , <b>2008</b> , 16, 166-165. Sleep-dependent learning and practice-dependent deterioration in an orientation discrimination	6.5	116
37 36 35	How to Exploit Diversity for Scientific Gain: Using Individual Differences to Constrain Cognitive Theory. <i>Current Directions in Psychological Science</i> , <b>2008</b> , 17, 171-176  The processing locus of interference from salient singleton distractors. <i>Visual Cognition</i> , <b>2008</b> , 16, 166-25  Sleep-dependent learning and practice-dependent deterioration in an orientation discrimination task. <i>Behavioral Neuroscience</i> , <b>2008</b> , 122, 267-72  Perceptual expertise enhances the resolution but not the number of representations in working	6.5	116 8 18
37 36 35 34	How to Exploit Diversity for Scientific Gain: Using Individual Differences to Constrain Cognitive Theory. <i>Current Directions in Psychological Science</i> , <b>2008</b> , 17, 171-176  The processing locus of interference from salient singleton distractors. <i>Visual Cognition</i> , <b>2008</b> , 16, 166-Sleep-dependent learning and practice-dependent deterioration in an orientation discrimination task. <i>Behavioral Neuroscience</i> , <b>2008</b> , 122, 267-72  Perceptual expertise enhances the resolution but not the number of representations in working memory. <i>Psychonomic Bulletin and Review</i> , <b>2008</b> , 15, 215-22  Spatial attention, preview, and popout: which factors influence critical spacing in crowded	6.5 18.8 2.1 4.1	116 8 18 78
37 36 35 34 33	How to Exploit Diversity for Scientific Gain: Using Individual Differences to Constrain Cognitive Theory. <i>Current Directions in Psychological Science</i> , <b>2008</b> , 17, 171-176  The processing locus of interference from salient singleton distractors. <i>Visual Cognition</i> , <b>2008</b> , 16, 166-Sleep-dependent learning and practice-dependent deterioration in an orientation discrimination task. <i>Behavioral Neuroscience</i> , <b>2008</b> , 122, 267-72  Perceptual expertise enhances the resolution but not the number of representations in working memory. <i>Psychonomic Bulletin and Review</i> , <b>2008</b> , 15, 215-22  Spatial attention, preview, and popout: which factors influence critical spacing in crowded displays?. <i>Journal of Vision</i> , <b>2007</b> , 7, 7.1-23  Visual working memory represents a fixed number of items regardless of complexity. <i>Psychological</i>	6.5 18.8 2.1 4.1	116 8 18 78 65

#### (1996-2005)

29	Resolving visual interference during covert spatial orienting: online attentional control through static records of prior visual experience. <i>Journal of Experimental Psychology: General</i> , <b>2005</b> , 134, 192-20	6 <sup>4.7</sup>	22
28	Evidence against a central bottleneck during the attentional blink: multiple channels for configural and featural processing. <i>Cognitive Psychology</i> , <b>2004</b> , 48, 95-126	3.1	58
27	The where and how of attention-based rehearsal in spatial working memory. <i>Cognitive Brain Research</i> , <b>2004</b> , 20, 194-205		134
26	Preparatory activity in visual cortex indexes distractor suppression during covert spatial orienting. Journal of Neurophysiology, <b>2004</b> , 92, 3538-45	3.2	130
25	Top-down control over biased competition during covert spatial orienting <i>Journal of Experimental Psychology: Human Perception and Performance</i> , <b>2003</b> , 29, 52-63	2.6	64
24	What is the source of activation for working memory?. <i>Behavioral and Brain Sciences</i> , <b>2003</b> , 26, 741-742	0.9	
23	Conflict adaptation effects in the absence of executive control. <i>Nature Neuroscience</i> , <b>2003</b> , 6, 450-2	25.5	585
22	Top-down control over biased competition during covert spatial orienting. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , <b>2003</b> , 29, 52-63	2.6	33
21	Evidence for two components of object-based selection. <i>Psychological Science</i> , <b>2001</b> , 12, 329-34	7.9	40
20	Overlapping mechanisms of attention and spatial working memory. <i>Trends in Cognitive Sciences</i> , <b>2001</b> , 5, 119-126	14	892
19	Evidence for split attentional foci <i>Journal of Experimental Psychology: Human Perception and Performance</i> , <b>2000</b> , 26, 834-846	2.6	206
18	The role of spatial selective attention in working memory for locations: evidence from event-related potentials. <i>Journal of Cognitive Neuroscience</i> , <b>2000</b> , 12, 840-7	3.1	199
17	Rehearsal in Spatial Working Memory: Evidence From Neuroimaging. <i>Psychological Science</i> , <b>1999</b> , 10, 433-437	7.9	154
16	The anterior cingulate cortex lends a hand in response selection. <i>Nature Neuroscience</i> , <b>1999</b> , 2, 853-4	25.5	116
15	The role of parietal cortex in verbal working memory. <i>Journal of Neuroscience</i> , <b>1998</b> , 18, 5026-34	6.6	518
14	Rehearsal in spatial working memory <i>Journal of Experimental Psychology: Human Perception and Performance</i> , <b>1998</b> , 24, 780-790	2.6	302
13	Verbal Working Memory Load Affects Regional Brain Activation as Measured by PET. <i>Journal of Cognitive Neuroscience</i> , <b>1997</b> , 9, 462-75	3.1	556
12	PET evidence for an amodal verbal working memory system. <i>NeuroImage</i> , <b>1996</b> , 3, 79-88	7.9	221

11	Verbal and Spatial Working Memory in Humans. <i>Psychology of Learning and Motivation - Advances in Research and Theory</i> , <b>1996</b> , 35, 43-88	1.4	27
10	Dissociation of Storage and Rehearsal in Verbal Working Memory: Evidence From Positron Emission Tomography. <i>Psychological Science</i> , <b>1996</b> , 7, 25-31	7.9	693
9	Human rehearsal processes and the frontal lobes: PET evidence. <i>Annals of the New York Academy of Sciences</i> , <b>1995</b> , 769, 97-117	6.5	130
8	Spatial versus Object Working Memory: PET Investigations. <i>Journal of Cognitive Neuroscience</i> , <b>1995</b> , 7, 337-56	3.1	431
7	Spatial working memory in humans as revealed by PET. <i>Nature</i> , <b>1993</b> , 363, 623-5	50.4	1020
6	Sustained attention and spatial attention distinctly influence long-term memory encoding		1
5	Working memory implements distinct maintenance mechanisms depending on task goals		1
4	Alpha-band oscillations track the retrieval of precise spatial representations from long-term memory		2
3	Item-specific delay activity demonstrates concurrent storage of multiple items in working memory		1
2	Multivariate analysis of EEG activity indexes contingent and non-contingent attentional capture		1
1	Covert spatial attention speeds target individuation		2
