List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/48978/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Association between postâ€reflux swallowâ€induced peristaltic wave index and esophageal mucosal integrity in patients with GERD symptoms. Neurogastroenterology and Motility, 2023, 35, e14344.	3.0	4
2	Relevance of Excessive Air Swallowing in GERD Patients With Concomitant Functional Dyspepsia and Poor Response to PPI Therapy. Journal of Clinical Gastroenterology, 2023, 57, 466-471.	2.2	2
3	Reflux characteristics triggering postâ€reflux swallowâ€nduced peristaltic wave (PSPW) in patients with GERD symptoms. Neurogastroenterology and Motility, 2022, 34, e14183.	3.0	10
4	Application of Lyon Consensus criteria for GORD diagnosis: evaluation of conventional and new impedance-pH parameters. Gut, 2022, 71, 1062-1067.	12.1	32
5	Letter to the Editor: Relevance of a Correct GERD Patient Classification Before Anti-reflux Procedures. Journal of Gastrointestinal Surgery, 2022, 26, 721-722.	1.7	0
6	Applying Lyon Consensus criteria in the workâ€up of patients with proton pump inhibitoryâ€refractory heartburn. Alimentary Pharmacology and Therapeutics, 2022, 55, 1423-1430.	3.7	24
7	Nonachalasic esophageal motor disorders, from diagnosis to therapy. Expert Review of Gastroenterology and Hepatology, 2022, 16, 205-216.	3.0	2
8	Letter: the potential link between oesophageal hypervigilance, visceral anxiety, increased swallow rate and oesophageal mucosal integrity. Alimentary Pharmacology and Therapeutics, 2022, 55, 756-757.	3.7	2
9	Editorial: Lyon consensus metrics—towards personalised diagnosis of nonâ€erosive reflux disease: Authors' reply. Alimentary Pharmacology and Therapeutics, 2022, 55, 1216-1217.	3.7	0
10	Advancements in the use of 24-hour impedance-pH monitoring for GERD diagnosis. Current Opinion in Pharmacology, 2022, 65, 102264.	3.5	4
11	Normal values and regional differences in oesophageal impedance-pH metrics: a consensus analysis of impedance-pH studies from around the world. Gut, 2021, 70, 1441-1449.	12.1	49
12	Postreflux swallowâ€induced peristaltic wave index from pHâ€impedance monitoring associates with esophageal body motility and esophageal acid burden. Neurogastroenterology and Motility, 2021, 33, e13973.	3.0	14
13	Esophageal pH increments associated with postâ€reflux swallowâ€induced peristaltic waves show the occurrence and relevance of esophagoâ€salivary reflex in clinical setting. Neurogastroenterology and Motility, 2021, 33, e14085.	3.0	20
14	Association between Dietary Habits and Fecal Microbiota Composition in Irritable Bowel Syndrome Patients: A Pilot Study. Nutrients, 2021, 13, 1479.	4.1	15
15	Impaired Colonic Contractility and Intestinal Permeability in Symptomatic Uncomplicated Diverticular Disease. Journal of Neurogastroenterology and Motility, 2021, 27, 292-301.	2.4	6
16	Patients With Definite and Inconclusive Evidence of Reflux According to Lyon Consensus Display Similar Motility and Esophagogastric Junction Characteristics. Journal of Neurogastroenterology and Motility, 2021, 27, 565-573.	2.4	7
17	Novel impedanceâ€pH parameters are associated with proton pump inhibitor response in patients with inconclusive diagnosis of gastroâ€oesophageal reflux disease according to Lyon Consensus. Alimentary Pharmacology and Therapeutics, 2021, 54, 412-418.	3.7	42
18	Diagnostic delay and misdiagnosis in eosinophilic oesophagitis. Digestive and Liver Disease, 2021, 53, 1632-1639.	0.9	28

#	Article	IF	CITATIONS
19	The Results From Up-Front Esophageal Testing Predict Proton Pump Inhibitor Response in Patients With Chronic Cough. American Journal of Gastroenterology, 2021, 116, 2199-2206.	0.4	14
20	Editorial: inconclusive diagnosis of GERD: are new parameters in impedanceâ€pHmetry ready for clinical use? Authors' reply. Alimentary Pharmacology and Therapeutics, 2021, 54, 498-499.	3.7	2
21	Exploring the association between esophageal mucosal inflammation, impaired motility, and GERD severity. Neurogastroenterology and Motility, 2021, 33, e14211.	3.0	2
22	Letter: is wireless oesophageal pH monitoring the best technique to evaluate nightâ€ŧime reflux?. Alimentary Pharmacology and Therapeutics, 2021, 54, 974-975.	3.7	1
23	An update of pharmacology, efficacy, and safety of vonoprazan in acid-related disorders. Expert Review of Gastroenterology and Hepatology, 2021, , 1-10.	3.0	4
24	Post-reflux swallow-induced peristaltic wave index and mean nocturnal baseline impedance predict PPI response in GERD patients with extra esophageal symptoms. Digestive and Liver Disease, 2020, 52, 173-177.	0.9	22
25	Correlation between reflux burden, peristaltic function, and mucosal integrity in GERD patients. Neurogastroenterology and Motility, 2020, 32, e13752.	3.0	27
26	Fragmented and failed swallows on esophageal highâ€resolution manometry associate with abnormal reflux burden better than weak swallows. Neurogastroenterology and Motility, 2020, 32, e13736.	3.0	32
27	Role of Overweight and Obesity in Gastrointestinal Disease. Nutrients, 2020, 12, 111.	4.1	59
28	Understanding the relationship between esophageal motor disorders and reflux disease. Expert Review of Gastroenterology and Hepatology, 2020, 14, 933-940.	3.0	3
29	Palmitic Acid Affects Intestinal Epithelial Barrier Integrity and Permeability In Vitro. Antioxidants, 2020, 9, 417.	5.1	23
30	Clinical impact of proton pump inhibitor response and dependence. Neurogastroenterology and Motility, 2020, 32, e13846.	3.0	0
31	High-resolution Manometry Determinants of Refractoriness of Reflux Symptoms to Proton Pump Inhibitor Therapy. Journal of Neurogastroenterology and Motility, 2020, 26, 447-454.	2.4	19
32	The Lyon Consensus: Does It Differ From the Previous Ones?. Journal of Neurogastroenterology and Motility, 2020, 26, 311-321.	2.4	26
33	Nutritional Aspects in Inflammatory Bowel Diseases. Nutrients, 2020, 12, 372.	4.1	127
34	New classifications of gastroesophageal reflux disease: an improvement for patient management?. Expert Review of Gastroenterology and Hepatology, 2019, 13, 761-769.	3.0	11
35	High-resolution Manometry Findings During Solid Swallows Correlate With Delayed Reflux Clearance and Acid Exposure Time in Non-erosive Reflux Disease Patients. Journal of Neurogastroenterology and Motility, 2019, 25, 68-74.	2.4	11
36	Role of Esophageal Motility, Acid Reflux, and of Acid Suppression in Nonobstructive Dysphagia. Journal of Clinical Gastroenterology, 2018, 52, 607-613.	2.2	4

#	Article	IF	CITATIONS
37	Prevalence and clinical characteristics of refractoriness to optimal proton pump inhibitor therapy in nonâ€erosive reflux disease. Alimentary Pharmacology and Therapeutics, 2018, 48, 1074-1081.	3.7	32
38	Role of Mixed Reflux and Hypomotility with Delayed Reflux Clearance in Patients with Non-cardiac Chest Pain. Journal of Neurogastroenterology and Motility, 2016, 22, 606-612.	2.4	14
39	Practice guidelines on the use of esophageal manometry – A GISMAD-SIGE-AIGO medical position statement. Digestive and Liver Disease, 2016, 48, 1124-1135.	0.9	82
40	Reply. Gastroenterology, 2015, 148, 1067.	1.3	0
41	Acid reflux episodes sensitize the esophagus to perception of weakly acidic and mixed reflux in nonâ€erosive reflux disease patients. Neurogastroenterology and Motility, 2014, 26, 108-114.	3.0	15
42	Impedance-High Resolution Manometry Analysis of Patients With Nonerosive Reflux Disease. Clinical Gastroenterology and Hepatology, 2014, 12, 52-57.	4.4	27
43	Reflux pattern and role of impedanceâ€pH variables in predicting PPI response in patients with suspected GERDâ€related chronic cough. Alimentary Pharmacology and Therapeutics, 2014, 40, 966-973.	3.7	63
44	Dilated intercellular space diameter as marker of refluxâ€related mucosal injury in children with chronic cough and gastroâ€oesophageal reflux disease. Alimentary Pharmacology and Therapeutics, 2014, 39, 733-742.	3.7	13
45	Weak Peristalsis With Large Breaks Is Associated With Higher Acid Exposure and Delayed Reflux Clearance in the Supine Position in GERD Patients. American Journal of Gastroenterology, 2014, 109, 46-51.	0.4	85
46	Proton pump inhibitor resistance, the real challenge in gastro-esophageal reflux disease. World Journal of Gastroenterology, 2013, 19, 6529.	3.3	64
47	Impedance baseline and reflux perception in responder and non-responder non-erosive reflux disease patients. Scandinavian Journal of Gastroenterology, 2012, 47, 1266-1273.	1.5	32
48	Baseline Impedance Levels and Structural and Functional Integrity of the Esophageal Mucosa: Is Acid Still the Only Player?. American Journal of Gastroenterology, 2012, 107, 1104.	0.4	5
49	Increased frequency and enhanced perception of reflux in non-erosive reflux disease patients non-responders to proton pump inhibitors. Digestive and Liver Disease, 2012, 44, 549-554.	0.9	30
50	Oesophageal mucosal intercellular space diameter and reflux pattern in childhood erosive and non-erosive reflux disease. Digestive and Liver Disease, 2012, 44, 981-987.	0.9	13
51	Relationship between baseline impedance levels and esophageal mucosal integrity in children with erosive and nonâ€erosive reflux disease. Neurogastroenterology and Motility, 2012, 24, 828.	3.0	53
52	Plateletâ€activating factor and distinct chemokines are elevated in mucosal biopsies of erosive compared with nonâ€erosive reflux disease patients and controls. Neurogastroenterology and Motility, 2012, 24, 943.	3.0	22
53	Measurement of acid exposure of proximal esophagus: a better tool for diagnosing non-erosive reflux disease. Neurogastroenterology and Motility, 2011, 23, 711-e324.	3.0	1
54	Regional oesophageal sensitivity to acid and weakly acidic reflux in patients with nonâ€erosive reflux disease. Neurogastroenterology and Motility, 2009, 21, 253-258.	3.0	46

#	Article	IF	CITATION
55	Intercellular space diameters of the oesophageal epithelium in NERD patients: Head to head comparison between light and electron microscopy analysis. Digestive and Liver Disease, 2009, 41, 9-14.	0.9	28
56	Dynamic contrast enhanced magnetic resonance imaging of the terminal ileum: differentiation of activity of Crohn's disease. Abdominal Imaging, 2008, 33, 417-424.	2.0	114
57	Characteristics of the Esophageal Low-Pressure Zone in Healthy Volunteers and Patients With Esophageal Symptoms: Assessment by High-Resolution Manometry. American Journal of Gastroenterology, 2008, 103, 2544-2549.	0.4	41
58	Presence of gas in the refluxate enhances reflux perception in non-erosive patients with physiological acid exposure of the oesophagus. Gut, 2007, 57, 443-447.	12.1	100
59	Effect of oesophagitis on proximal extent of gastro-oesophageal reflux. Neurogastroenterology and Motility, 2007, 19, 459-464.	3.0	15
60	Dilated intercellular spaces and acid reflux at the distal and proximal oesophagus in patients with nonâ€erosive gastroâ€oesophageal reflux disease. Alimentary Pharmacology and Therapeutics, 2007, 25, 629-636.	3.7	107
61	Effect of hiatal hernia on proximal oesophageal acid clearance in gastro-oesophageal reflux disease patients. Alimentary Pharmacology and Therapeutics, 2006, 23, 751-757.	3.7	46
62	Infliximab reverses growth hormone resistance associated with inflammatory bowel disease. Alimentary Pharmacology and Therapeutics, 2005, 21, 1063-1071.	3.7	48
63	Effect of endoscopic augmentation of the lower oesophageal sphincter (Gatekeeper reflux repair) Tj ETQq1 1 0.7	84314 rgf 12.1	3T /Overloc
64	Dilated Intercellular Spaces of Esophageal Epithelium in Nonerosive Reflux Disease Patients with Physiological Esophageal Acid Exposure. American Journal of Gastroenterology, 2005, 100, 543-548.	0.4	221
65	Intraâ€oesophageal distribution and perception of acid reflux in patients with nonâ€erosive gastroâ€oesophageal reflux disease. Alimentary Pharmacology and Therapeutics. 2003. 18. 605-613.	3.7	140
