Mika Koivisto

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/4898044/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Event-related brain potential correlates of visual awareness. Neuroscience and Biobehavioral Reviews, 2010, 34, 922-934.	6.1	237
2	The effects of memory load on event-related EEG desynchronization and synchronization. Clinical Neurophysiology, 2000, 111, 2071-2078.	1.5	217
3	Effects of 902 MHz electromagnetic field emitted by cellular telephones on response times in humans. NeuroReport, 2000, 11, 413-415.	1.2	172
4	The effects of electromagnetic field emitted by GSM phones on working memory. NeuroReport, 2000, 11, 1641-1643.	1.2	165
5	Effects of electromagnetic field emitted by cellular phones on the EEG during a memory task. NeuroReport, 2000, 11, 761-764.	1.2	165
6	An ERP study of change detection, change blindness, and visual awareness. Psychophysiology, 2003, 40, 423-429.	2.4	165
7	Tracking the processes behind conscious perception: A review of event-related potential correlates of visual consciousness. Consciousness and Cognition, 2011, 20, 972-983.	1.5	148
8	Time course of semantic activation in the cerebral hemispheres. Neuropsychologia, 1997, 35, 497-504.	1.6	112
9	Effect of a 902 MHz electromagnetic field emitted by mobile phones on human cognitive function: A replication study. Bioelectromagnetics, 2003, 24, 283-288.	1.6	107
10	Independence of Visual Awareness from the Scope of Attention: an Electrophysiological Study. Cerebral Cortex, 2006, 16, 415-424.	2.9	105
11	Effects of electromagnetic field emitted by cellular phones on the EEG during an auditory memory task: A double blind replication study. Bioelectromagnetics, 2004, 25, 33-40.	1.6	97
12	How Meaning Shapes Seeing. Psychological Science, 2007, 18, 845-849.	3.3	96
13	Recurrent Processing in V1/V2 Contributes to Categorization of Natural Scenes. Journal of Neuroscience, 2011, 31, 2488-2492.	3.6	92
14	The role of attention in subitizing. Cognition, 2008, 107, 82-104.	2.2	90
15	The relationship between awareness and attention: Evidence from ERP responses. Neuropsychologia, 2009, 47, 2891-2899.	1.6	90
16	ERP and MEG correlates of visual consciousness: The second decade. Consciousness and Cognition, 2020, 80, 102917.	1.5	88
17	The role of early visual cortex (V1/V2) in conscious and unconscious visual perception. NeuroImage, 2010, 51, 828-834.	4.2	83
18	GSM phone signal does not produce subjective symptoms. Bioelectromagnetics, 2001, 22, 212-215.	1.6	77

#	Article	IF	CITATIONS
19	The chronometry of visual perception: Review of occipital TMS masking studies. Neuroscience and Biobehavioral Reviews, 2014, 45, 295-304.	6.1	76
20	Processing of natural scenery is associated with lower attentional and cognitive load compared with urban ones. Journal of Environmental Psychology, 2019, 62, 1-11.	5.1	76
21	The earliest electrophysiological correlate of visual awareness?. Brain and Cognition, 2008, 66, 91-103.	1.8	74
22	Independence of visual awareness from attention at early processing stages. NeuroReport, 2005, 16, 817-821.	1.2	69
23	Neural processing around 200 ms after stimulus-onset correlates with subjective visual awareness. Neuropsychologia, 2016, 84, 235-243.	1.6	68
24	Categorical priming in the cerebral hemispheres: automatic in the left hemisphere, postlexical in the right hemisphere?. Neuropsychologia, 1998, 36, 661-668.	1.6	67
25	Affective processing requires awareness Journal of Experimental Psychology: General, 2015, 144, 339-365.	2.1	64
26	The effects of eye movements, spatial attention, and stimulus features on inattentional blindness. Vision Research, 2004, 44, 3211-3221.	1.4	62
27	Perceptual priming in Alzheimer's and Parkinson's diseases. Neuropsychologia, 1996, 34, 449-457.	1.6	53
28	Subjective visual awareness emerges prior to P3. European Journal of Neuroscience, 2016, 43, 1601-1611.	2.6	53
29	Electrophysiological correlates of visual consciousness and selective attention. NeuroReport, 2007, 18, 753-756.	1.2	51
30	The role of selective attention in visual awareness of stimulus features: Electrophysiological studies. Cognitive, Affective and Behavioral Neuroscience, 2008, 8, 195-210.	2.0	50
31	The Effect of Age on Attentional Modulation in Dichotic Listening. Developmental Neuropsychology, 2009, 34, 225-239.	1.4	49
32	The role of unattended distractors in sustained inattentional blindness. Psychological Research, 2007, 72, 39-48.	1.7	44
33	Is selective primary visual cortex stimulation achievable with TMS?. Human Brain Mapping, 2012, 33, 652-665.	3.6	44
34	Early processing in primary visual cortex is necessary for conscious and unconscious vision while late processing is necessary only for conscious vision in neurologically healthy humans. NeuroImage, 2017, 150, 230-238.	4.2	44
35	Different Electrophysiological Correlates of Visual Awareness for Detection and Identification. Journal of Cognitive Neuroscience, 2017, 29, 1621-1631.	2.3	44
36	Automatic Influences of Memory in Alzheimer's Disease. Cortex, 1998, 34, 209-219.	2.4	42

#	Article	IF	CITATIONS
37	Comparison of event-related potentials in attentional blink and repetition blindness. Brain Research, 2008, 1189, 115-126.	2.2	40
38	Hemispheric Asymmetries in Activation and Integration of Categorical Information. Laterality, 2000, 5, 1-21.	1.0	38
39	Cognitive representations underlying the N400 priming effect. Cognitive Brain Research, 2001, 12, 487-490.	3.0	38
40	Mobile phone effects on children's event-related oscillatory EEG during an auditory memory task. International Journal of Radiation Biology, 2006, 82, 443-450.	1.8	38
41	Visual feature binding: The critical time windows of V1/V2 and parietal activity. NeuroImage, 2012, 59, 1608-1614.	4.2	38
42	Transcranial magnetic stimulation of early visual cortex interferes with subjective visual awareness and objective forced-choice performance. Consciousness and Cognition, 2011, 20, 288-298.	1.5	35
43	Two means of suppressing visual awareness: A direct comparison of visual masking and transcranial magnetic stimulation. Cortex, 2012, 48, 333-343.	2.4	33
44	Who is afraid of the invisible snake? Subjective visual awareness modulates posterior brain activity for evolutionarily threatening stimuli. Biological Psychology, 2016, 121, 53-61.	2.2	33
45	Reversal negativity and bistable stimuli: Attention, awareness, or something else?. Brain and Cognition, 2010, 74, 24-34.	1.8	31
46	Lexical access to inflected words as measured by lateralized visual lexical decision. Psychological Research, 1998, 61, 220-229.	1.7	30
47	Relationship between visual binding, reentry and awareness. Consciousness and Cognition, 2011, 20, 1293-1303.	1.5	30
48	V1 activity during feedforward and early feedback processing is necessary for both conscious and unconscious motion perception. NeuroImage, 2019, 185, 313-321.	4.2	30
49	Neuronavigated transcranial magnetic stimulation suggests that area V2 is necessary for visual awareness. Neuropsychologia, 2012, 50, 1621-1627.	1.6	27
50	Behavioral and electrophysiological evidence for fast emergence of visual consciousness. Neuroscience of Consciousness, 2015, 2015, niv004.	2.6	27
51	The linear impact of concurrent working memory load on dynamics of Necker cube perceptual reversals. Journal of Vision, 2014, 14, 13-13.	0.3	26
52	Interhemispheric interaction in semantic categorization of pictures. Cognitive Brain Research, 2000, 9, 45-51.	3.0	25
53	Assessment of sexual interest using a choice reaction time task and priming: A feasibility study. Legal and Criminological Psychology, 2009, 14, 65-82.	2.0	25
54	Unconscious response priming by shape depends on geniculostriate visual projection. European Journal of Neuroscience, 2012, 35, 623-633.	2.6	25

#	Article	IF	CITATIONS
55	Strategies of Semantic Categorization in the Cerebral Hemispheres. Brain and Language, 1999, 66, 341-357.	1.6	24
56	Unconscious and Conscious Processing of Color Rely on Activity in Early Visual Cortex: A TMS Study. Journal of Cognitive Neuroscience, 2012, 24, 819-829.	2.3	24
57	Conscious and unconscious uses of memory in multiple sclerosis. Journal of the Neurological Sciences, 2002, 198, 79-85.	0.6	23
58	The electrophysiological correlates of stimulus visibility and metacontrast masking. Consciousness and Cognition, 2009, 18, 794-803.	1.5	23
59	Recurrent Processing Enhances Visual Awareness but Is Not Necessary for Fast Categorization of Natural Scenes. Journal of Cognitive Neuroscience, 2014, 26, 223-231.	2.3	22
60	Visual features and perceptual context modulate attention towards evolutionarily relevant threatening stimuli: Electrophysiological evidence Emotion, 2019, 19, 348-364.	1.8	22
61	Interhemispheric categorization of pictures and words. Brain and Cognition, 2003, 52, 181-191.	1.8	20
62	The effects of perceptual load on semantic processing under inattention. Psychonomic Bulletin and Review, 2009, 16, 864-868.	2.8	20
63	Perceptual reversals of <scp>N</scp> ecker stimuli during intermittent presentation with limited attentional resources. Psychophysiology, 2013, 50, 82-96.	2.4	20
64	The influence of executive functions on spatial biases varies during the lifespan. Developmental Cognitive Neuroscience, 2014, 10, 170-180.	4.0	20
65	Backward Priming and Postlexical Processing in the Right Hemisphere. Laterality, 1998, 3, 21-40.	1.0	19
66	Hemispheric dissociations in controlled lexical–semantic processing Neuropsychology, 1999, 13, 488-497.	1.3	19
67	Neural correlates of visual awareness at stimulus low vs. high-levels of processing. Neuropsychologia, 2018, 121, 144-152.	1.6	19
68	Prechange event-related potentials predict change blindness in various attention conditions. NeuroReport, 2005, 16, 869-873.	1.2	18
69	Visual rightward spatial bias varies as a function of age. Laterality, 2013, 18, 44-67.	1.0	17
70	Event-related potential responses to perceptual reversals are modulated by working memory load. Neuropsychologia, 2014, 56, 428-438.	1.6	17
71	Hemispheric Asymmetries in Activation and Integration of Categorical Information. Laterality, 2000, 5, 1-21.	1.0	16
72	Semantic priming by pictures and words in the cerebral hemispheres. Cognitive Brain Research, 2000, 10, 91-98.	3.0	15

#	Article	IF	CITATIONS
73	Auditory Rightward Spatial Bias Varies as a Function of Age. Developmental Neuropsychology, 2011, 36, 367-387.	1.4	15
74	The electrophysiology of introspection. Consciousness and Cognition, 2006, 15, 662-672.	1.5	14
75	Unlike in Clinical Blindsight Patients, Unconscious Processing of Chromatic Information Depends on Early Visual Cortex in Healthy Humans. Brain Stimulation, 2014, 7, 415-420.	1.6	14
76	Hemispheric semantic priming in the single word presentation task. Neuropsychologia, 2002, 40, 978-985.	1.6	13
77	A Preconscious Neural Mechanism of Hypnotically Altered Colors: A Double Case Study. PLoS ONE, 2013, 8, e70900.	2.5	13
78	Rapid and accurate processing of multiple objects in briefly presented scenes. Journal of Vision, 2016, 16, 8.	0.3	13
79	Unconscious vision spots the animal but not the dog: Masked priming of natural scenes. Consciousness and Cognition, 2016, 41, 10-23.	1.5	13
80	Lateralized free-association priming: Implications for the hemispheric organization of semantic memory. Neuropsychologia, 1995, 33, 115-124.	1.6	12
81	Form-Specific Priming and Functional Brain Asymmetries in Perceptual Identification. Cortex, 1996, 32, 527-536.	2.4	12
82	Overlapping activity periods in early visual cortex and posterior intraparietal area in conscious visual shape perception: A TMS study. NeuroImage, 2014, 84, 765-774.	4.2	12
83	The Level of Processing Modulates Visual Awareness: Evidence from Behavioral and Electrophysiological Measures. Journal of Cognitive Neuroscience, 2021, 33, 1295-1310.	2.3	12
84	Watching Nature Videos Promotes Physiological Restoration: Evidence From the Modulation of Alpha Waves in Electroencephalography. Frontiers in Psychology, 0, 13, .	2.1	12
85	Is reentry critical for visual awareness of object presence?. Vision Research, 2012, 63, 43-49.	1.4	11
86	Seeing Blue As Red: <i>A Hypnotic Suggestion Can Alter Visual Awareness of Colors</i> . International Journal of Clinical and Experimental Hypnosis, 2016, 64, 261-284.	1.8	11
87	Transcranial magnetic stimulation of early visual cortex suppresses conscious representations in a dichotomous manner without gradually decreasing their precision. NeuroImage, 2017, 158, 308-318.	4.2	11
88	The effects of working memory load on visual awareness and its electrophysiological correlates. Neuropsychologia, 2018, 120, 86-96.	1.6	11
89	Posthypnotic Suggestion Alters Conscious Color Perception in an Automatic Manner. International Journal of Clinical and Experimental Hypnosis, 2013, 61, 371-387.	1.8	10
90	Neuronavigated TMS of early visual cortex eliminates unconscious processing of chromatic stimuli. Neuropsychologia, 2020, 136, 107266.	1.6	10

#	Article	IF	CITATIONS
91	The rightâ€side perceptual bias in aging determined in a laboratory setting and during a virtual driving task. Scandinavian Journal of Psychology, 2018, 59, 32-40.	1.5	9
92	Pattern matters: Snakes exhibiting triangular and diamond-shaped skin patterns modulate electrophysiological activity in human visual cortex. Neuropsychologia, 2019, 131, 62-72.	1.6	9
93	Masked blindsight in normal observers: Measuring subjective and objective responses to two features of each stimulus. Consciousness and Cognition, 2020, 81, 102929.	1.5	9
94	Unconscious response priming during continuous flash suppression. PLoS ONE, 2018, 13, e0192201.	2.5	9
95	Hemispheric dissociations in controlled lexical-semantic processing Neuropsychology, 1999, 13, 488-497.	1.3	9
96	Top-Down Processing and Nature Connectedness Predict Psychological and Physiological Effects of Nature. Environment and Behavior, 2022, 54, 917-945.	4.7	9
97	TMS-EEG reveals hemispheric asymmetries in top-down influences of posterior intraparietal cortex on behavior and visual event-related potentials. Neuropsychologia, 2017, 107, 94-101.	1.6	8
98	Object Recognition in the Cerebral Hemispheres as Revealed by Visual Field Experiments. Laterality, 2003, 8, 135-153.	1.0	7
99	Synaesthesia-type associations and perceptual changes induced by hypnotic suggestion. Scientific Reports, 2017, 7, 17310.	3.3	7
100	The role of eye movements in lateralised word recognition. Laterality, 2006, 11, 155-169.	1.0	6
101	Transcranial magnetic stimulation (TMS)-induced Blindsight of Orientation is Degraded Conscious Vision. Neuroscience, 2021, 475, 206-219.	2.3	6
102	What is Right and What is Left in Semantic Processing: A Reply to Chiarello. Laterality, 2000, 5, 29-33.	1.0	5
103	Reply to Bachmann on ERP correlates of visual awareness. Consciousness and Cognition, 2009, 18, 809-810.	1.5	5
104	Subjective ratings of fear are associated with frontal late positive potential asymmetry, but not with early brain activity over the occipital and centroâ€parietal cortices. Psychophysiology, 2020, 57, e13665.	2.4	5
105	Does TMS on V3 block conscious visual perception?. Neuropsychologia, 2019, 128, 223-231.	1.6	4
106	Backward Priming and Postlexical Processing in the Right Hemisphere. Laterality, 1998, 3, 21-40.	1.0	4
107	Affective responses to urban but not to natural scenes depend on inter-individual differences in childhood nature exposure. Journal of Environmental Psychology, 2022, 82, 101840.	5.1	4
108	Electrophysiological evidence for phenomenal consciousness. Cognitive Neuroscience, 2010, 1, 225-227.	1.4	3

#	Article	IF	CITATIONS
109	NeuroCar virtual driving environment: Simultaneous evaluation of driving skills and spatial perceptual-attentional capacity. , 2016, , .		3
110	Top-down preparation modulates visual categorization but not subjective awareness of objects presented in natural backgrounds. Vision Research, 2017, 133, 73-80.	1.4	2
111	Differential interactions of age and sleep deprivation in driving and spatial perception by male drivers in a virtual reality environment. Scandinavian Journal of Psychology, 2021, 62, 787-797.	1.5	2
112	Open and empathic personalities see two things at the same time: the relationship of big-five personality traits and cognitive empathy with mixed percepts during binocular rivalry. Current Psychology, 2023, 42, 9552-9562.	2.8	2
113	Modality-specific and modality-general electrophysiological correlates of visual and auditory awareness: Evidence from a bimodal ERP experiment. Neuropsychologia, 2022, 166, 108154.	1.6	2
114	TMS-Induced Seizure Following Focal Single-Pulse IPS Stimulation. Brain Stimulation, 2015, 8, 1238.	1.6	1
