|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Cold storage of the egg parasitoids <i>Trissolcus basalis</i> (Wollaston) and <i>Telenomus podisi</i> Ashmead (Hymenoptera: Scelionidae). <i>Biological Control</i> , 2006, 36, 232-237.                                                       | 3.0 | 52        |
| 2  | <i>Tuta absoluta</i> (Lepidoptera: Gelechiidae): Thermal requirements and effect of temperature on development, survival, reproduction and longevity. <i>European Journal of Entomology</i> , 2015, 112, 658-663.                              | 1.2 | 39        |
| 3  | Emergence, longevity and fecundity of <i>Trissolcus basalis</i> and <i>Telenomus podisi</i> after cold storage in the pupal stage. <i>Pesquisa Agropecuaria Brasileira</i> , 2004, 39, 841-845.                                                | 0.9 | 34        |
| 4  | Effects of temperature on the immature development and emergence of five species of <i>Trichogramma</i> . <i>BioControl</i> , 2009, 54, 445-450.                                                                                               | 2.0 | 33        |
| 5  | Performance of Southern Green Stink Bug (Heteroptera: Pentatomidae) Nymphs and Adults on a Novel Food Plant (Japanese Privet) and Other Hosts. <i>Annals of the Entomological Society of America</i> , 1996, 89, 822-827.                      | 2.5 | 27        |
| 6  | < b>Ovicidal effect of the essential oils from 18 Brazilian <i>Piper</i> species: controlling <i>Anticarsia gemmatalis</i> (Lepidoptera, Erebidae) at the initial stage of development. <i>Acta Scientiarum - Agronomy</i> , 2018, 40, .       | 0.6 | 25        |
| 7  | How <i>Trichogramma</i> survives during soybean offseason in Southern Brazil and the implications for its success as a biocontrol agent. <i>BioControl</i> , 2015, 60, 1-11.                                                                   | 2.0 | 19        |
| 8  | Toxicity of essential oils from leaves of <i>Piperaceae</i> species in rice stalk stink bug eggs, <i>Tibraca limbaticornis</i> (Hemiptera: Pentatomidae). <i>Ciencia E Agrotecnologia</i> , 2016, 40, 676-687.                                 | 1.5 | 19        |
| 9  | Biotic factors are more important than abiotic factors in regulating the abundance of <i>Plutella xylostella</i> L., in Southern Brazil. <i>Revista Brasileira De Entomologia</i> , 2016, 60, 328-333.                                         | 0.4 | 19        |
| 10 | Estimating the development rate of the tomato leaf miner, <i>Tuta absoluta</i> (Lepidoptera: Tephritidae) Tj ETQq0 0 0 rgBT /Overlock 10 <sub>3.4</sub> Tf 50 382                                                                              |     |           |
| 11 | Modelling reproduction of <i>Plutella xylostella</i> L. (Lepidoptera: Plutellidae): climate change may modify pest incidence levels. <i>Bulletin of Entomological Research</i> , 2012, 102, 489-496.                                           | 1.0 | 18        |
| 12 | Efeito da alternância de temperaturas no desenvolvimento e emergência de <i>Trissolcus basalis</i> (Wollaston) e <i>Telenomus podisi</i> Ashmead (Hymenoptera: Scelionidae). <i>Neotropical Entomology</i> , 2001, 30, 269-275.                | 1.2 | 18        |
| 13 | Biology and reproductive capacity of <i>Spodoptera eridania</i> (Cramer) (Lepidoptera, Noctuidae) in different soybean cultivars. <i>Revista Brasileira De Entomologia</i> , 2015, 59, 89-95.                                                  | 0.4 | 17        |
| 14 | &lt;b&gt;Morphological and chemical characteristics of onion plants (&lt;i>Allium cepa&lt;/i> L.) associated with resistance to onion thrips. <i>Acta Scientiarum - Agronomy</i> , 2015, 37, 85.                                               | 0.6 | 17        |
| 15 | Efeito da estocagem em baixa temperatura na capacidade reprodutiva e longevidade de <i>Trissolcus basalis</i> (Wollaston) e <i>Telenomus podisi</i> Ashmead (Hymenoptera: Scelionidae). <i>Neotropical Entomology</i> , 2002, 31, 115-120.     | 1.2 | 16        |
| 16 | Temperature Effects on the Development and Reproduction of Three <i>Trichogramma</i> (Hymenoptera: Trichogrammatidae) Species Reared on <i>Trichoplusia ni</i> (Lepidoptera: Noctuidae) Eggs. <i>Journal of Insect Science</i> , 2015, 15, 90. | 1.5 | 15        |
| 17 | Integrative taxonomy and phylogeography of <i>Telenomus remus</i> (Scelionidae), with the first record of natural parasitism of <i>Spodoptera</i> spp. in Brazil. <i>Scientific Reports</i> , 2021, 11, 14110.                                 | 3.3 | 15        |
| 18 | Egg parasitoids of <i>Anticarsia gemmatalis</i> Hübner (Lepidoptera: Noctuidae) in soybeans. <i>Neotropical Entomology</i> , 1999, 28, 545-548.                                                                                                | 0.2 | 14        |

| #  | ARTICLE                                                                                                                                                                                                                                                                                                        | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Incidência natural de parasitismo em ovos de pentatomídeos da soja no centro-sul do Paraná. <i>Neotropical Entomology</i> , 1990, 19, 221-232.                                                                                                                                                                 | 0.2 | 14        |
| 20 | Incidência natural e biologia de <i>Trichogramma atropovirilia</i> Oatman & Platner, 1983 (Hymenoptera,) <i>Tj ETQq0 0 0 rgBT /Overlock 10 Tf 5 Brasileira De Entomologia</i> , 2003, 47, 201-204.                                                                                                             | 0.4 | 13        |
| 21 | Development, reproduction, and longevity of <i>Telenomus cyamophylax</i> , egg parasitoid of the velvetbean caterpillar <i>Anticarsia gemmatalis</i> , in relation to temperature. <i>Biological Control</i> , 2004, 29, 1-4.                                                                                  | 3.0 | 13        |
| 22 | Performance of the Wheat Armyworm, <i>Pseudaletia sequax</i> Franclemont, on Natural and Artificial Diets. <i>Neotropical Entomology</i> , 2012, 41, 288-295.                                                                                                                                                  | 1.2 | 13        |
| 23 | Thermal Requirements, Fertility, and Number of Generations of <i>Neoleucinodes elegantalis</i> (Guené) (Lepidoptera: Crambidae). <i>Neotropical Entomology</i> , 2015, 44, 338-344.                                                                                                                            | 1.2 | 13        |
| 24 | Efeito da temperatura no desenvolvimento das fases imaturas de <i>Pseuduletia sequax</i> Franclemont (Lepidoptera: Noctuidae). <i>Neotropical Entomology</i> , 1996, 25, 27-32.                                                                                                                                | 0.2 | 13        |
| 25 | Effects of adult-derived carbohydrates and amino acids on the reproduction of <i>&lt; i&gt;Plutella xylostella&lt;/i&gt;</i> . <i>Physiological Entomology</i> , 2013, 38, 13-19.                                                                                                                              | 1.5 | 12        |
| 26 | <i>Hypatropis inermis</i> (Hemiptera, Pentatomidae): first record on rice crops. <i>Revista Brasileira De Entomologia</i> , 2015, 59, 12-13.                                                                                                                                                                   | 0.4 | 12        |
| 27 | Natural parasitism in eggs of <i>Anticarsia gemmatalis</i> Hübner (Lepidoptera, Noctuidae) by <i>Trichogramma</i> spp. (Hymenoptera, Trichogrammatidae) in Brazil. <i>Revista Brasileira De Entomologia</i> , 2005, 49, 148-151.                                                                               | 0.4 | 11        |
| 28 | Importance of carbohydrate sources to the reproductive output of the wheat armyworm <i>&lt; i&gt;Pseudaletia sequax&lt;/i&gt;</i> . <i>Agricultural and Forest Entomology</i> , 2012, 14, 29-35.                                                                                                               | 1.3 | 11        |
| 29 | <i>Telenomus cyamophylax</i> n. sp. (Hymenoptera: Scelionidae) attacking eggs of the velvetbean caterpillar, <i>Anticarsia gemmatalis</i> Hübner (Lepidoptera: Noctuidae). <i>Neotropical Entomology</i> , 1997, 26, 177-181.                                                                                  | 0.2 | 11        |
| 30 | Storage of Pentatomid Eggs in Liquid Nitrogen and Dormancy of <i>Trissolcus basalis</i> (Wollaston) and <i>Telenomus podisi</i> Ashmead (Hymenoptera: Platygastridae) Adults as a Method of Mass Production. <i>Neotropical Entomology</i> , 2013, 42, 534-538.                                                | 1.2 | 10        |
| 31 | Quantitative and qualitative damage caused by <i>Oebalus poecilus</i> (Hemiptera, Pentatomidae) to upland rice cultivated in new agricultural frontier of the Amazon rainforest (Brazil). <i>Ciencia E Agrotecnologia</i> , 2017, 41, 300-311.                                                                 | 1.5 | 10        |
| 32 | A stochastic model for predicting the stage emergence of <i>&lt; i&gt;Plutella xylostella&lt;/i&gt;</i> under field conditions. <i>Annals of Applied Biology</i> , 2016, 169, 190-199.                                                                                                                         | 2.5 | 9         |
| 33 | Temperature-Dependent Parasitism, Survival, and Longevity of Five Species of <i>Trichogramma</i> Westwood (Hymenoptera: Trichogrammatidae) Associated with <i>Anticarsia gemmatalis</i> Hübner (Lepidoptera:) <i>Tj ETQq1 1 0.784314 rgBT /Overlock 10 Tf 5 Brasileira De Entomologia</i> , 2003, 47, 201-204. | 1.0 | 9         |
| 34 | Mass production of <i>Trichogramma</i> spp. using <i>Mythimna sequax</i> eggs stored in liquid nitrogen. <i>BioControl</i> , 2016, 61, 497-505.                                                                                                                                                                | 2.0 | 8         |
| 35 | Selective polarity- and adsorption-guided extraction/purification of <i>Annona</i> sp. Polar acetogenins and biological assay against agricultural pests. <i>Applied Biochemistry and Biotechnology</i> , 1998, 70-72, 67-76.                                                                                  | 2.9 | 7         |
| 36 | <i>Annona crassiflora</i> Mart. (Annonaceae): effect of crude extract of seeds on larvae of soybean looper <i>Chrysodeixis includens</i> (Lepidoptera: Noctuidae). <i>Bragantia</i> , 2017, 76, 398-405.                                                                                                       | 1.3 | 7         |

| #  | ARTICLE                                                                                                                                                                                                                                                                                              | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Development of Cleruchoides noackae, an egg-parasitoid of <i>Thaumastocoris peregrinus</i> , in eggs laid on different substrates, with different ages and post-cold storage. <i>BioControl</i> , 2018, 63, 193-202.                                                                                 | 2.0 | 7         |
| 38 | First record of <i>Cotesia scotti</i> ( ) (Hymenoptera: Braconidae: Microgastrinae) comb. nov. parasitising <i>Spodoptera cosmioides</i> (Walk, 1858) and <i>Spodoptera eridania</i> (Stoll, 1782) (Lepidoptera: Noctuidae) in Brazil. <i>Revista Brasileira De Entomologia</i> , 2019, 63, 238-244. | 0.4 | 7         |
| 39 | Efeito do parasitismo por <i>Glyptapanteles muesebecki</i> (Blanchard) no consumo e utilização do alimento por <i>Pseudaletia sequax</i> Franclemont. <i>Neotropical Entomology</i> , 1998, 27, 255-264.                                                                                             | 0.2 | 6         |
| 40 | Reports of new wing color polymorphism and taxonomic information to cercopids (Auchenorrhyncha: Cercopidae) from upland rice crop, Pará State, Brazil. <i>Brazilian Journal of Biology</i> , 2018, 78, 728-735.                                                                                      | 0.9 | 6         |
| 41 | Capacidade reprodutiva e longevidade de <i>Glyptapanteles muesebecki</i> (Blanchard) (Hymenoptera:) Tj ETQq1 1 0.784314 rgBT /Overlock Neotropical Entomology, 1999, 28, 485-490.                                                                                                                    | 0.2 | 6         |
| 42 | Distribution and loss of phorate residues in the foliage of broad bean plants following root uptake of <sup>14</sup> C-labelled phorate. <i>Pest Management Science</i> , 1976, 7, 301-306.                                                                                                          | 0.4 | 5         |
| 43 | Preliminary studies of enhanced contrast radiography in anatomy and embryology of insects with Elettra synchrotron light. <i>Nuclear Instruments and Methods in Physics Research, Section A: Accelerators, Spectrometers, Detectors and Associated Equipment</i> , 2005, 548, 207-212.               | 1.6 | 5         |
