| #  | Article                                                                                                                                                                                                                                                                        | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Differential control of human Treg and effector T cells in tumor immunity by Fc-engineered anti–CTLA-4 antibody. Proceedings of the National Academy of Sciences of the United States of America, 2019, 116, 609-618.                                                          | 7.1 | 141       |
| 2  | Dysregulation of melanocyte function by Th17â€related cytokines: significance of Th17 cell infiltration in autoimmune vitiligo vulgaris. Pigment Cell and Melanoma Research, 2012, 25, 219-230.                                                                                | 3.3 | 123       |
| 3  | Periostin, a matricellular protein, accelerates cutaneous wound repair by activating dermal fibroblasts. Experimental Dermatology, 2012, 21, 331-336.                                                                                                                          | 2.9 | 101       |
| 4  | CCR8-targeted specific depletion of clonally expanded Treg cells in tumor tissues evokes potent tumor immunity with long-lasting memory. Proceedings of the National Academy of Sciences of the United States of America, 2022, $119$ , .                                      | 7.1 | 68        |
| 5  | LRIG-1 Provides a Novel Prognostic Predictor in Squamous Cell Carcinoma of the Skin: Immunohistochemical Analysis for 38 Cases. Dermatologic Surgery, 2006, 31, 423-430.                                                                                                       | 0.8 | 55        |
| 6  | Periostin accelerates human malignant melanoma progression by modifying the melanoma microenvironment. Pigment Cell and Melanoma Research, 2014, 27, 630-639.                                                                                                                  | 3.3 | 50        |
| 7  | Guide for medical professionals (i.e. dermatologists) for the management of Rhododenolâ€induced leukoderma. Journal of Dermatology, 2015, 42, 113-128.                                                                                                                         | 1.2 | 50        |
| 8  | An immune pathological and ultrastructural skin analysis for rhododenol-induced leukoderma patients. Journal of Dermatological Science, 2015, 77, 185-188.                                                                                                                     | 1.9 | 31        |
| 9  | Uncoupling of ER/Mitochondrial Oxidative Stress in mTORC1 Hyperactivation-Associated Skin Hypopigmentation. Journal of Investigative Dermatology, 2018, 138, 669-678.                                                                                                          | 0.7 | 22        |
| 10 | Three-dimensional cell shapes and arrangements in human sweat glands as revealed by whole-mount immunostaining. PLoS ONE, 2017, 12, e0178709.                                                                                                                                  | 2.5 | 22        |
| 11 | Possible involvement of CCR4+CD8+ T cells and elevated plasma CCL22 and CCL17 in patients with Rhododenol-induced leukoderma. Journal of Dermatological Science, 2015, 77, 188-190.                                                                                            | 1.9 | 19        |
| 12 | Dysregulation of autophagy in melanocytes contributes to hypopigmented macules in tuberous sclerosis complex. Journal of Dermatological Science, 2018, 89, 155-164.                                                                                                            | 1.9 | 17        |
| 13 | Coexistence of Langerhans cells activation and immune cells infiltration in progressive nonsegmental vitiligo. Journal of Dermatological Science, 2014, 73, 83-85.                                                                                                             | 1.9 | 13        |
| 14 | Local and disease control for nasal melanoma treated with radiation and concomitant antiâ€programmed death 1 antibody. Journal of Dermatology, 2020, 47, 423-425.                                                                                                              | 1.2 | 12        |
| 15 | Intratumoral injection of hemagglutinating virus of Japan-envelope vector yielded an antitumor effect for advanced melanoma: a phase I/lla clinical study. Cancer Immunology, Immunotherapy, 2020, 69, 1131-1140.                                                              | 4.2 | 12        |
| 16 | Rhododendrolâ€induced leukoderma update I: Clinical findings and treatment. Journal of Dermatology, 2021, 48, 961-968.                                                                                                                                                         | 1.2 | 12        |
| 17 | Tumor response evaluation in patients with malignant melanoma undergoing immune checkpoint inhibitor therapy and prognosis prediction using 18F-FDG PET/CT: multicenter study for comparison of EORTC, PERCIST, and imPERCIST. Japanese Journal of Radiology, 2022, 40, 75-85. | 2.4 | 12        |
| 18 | Japanese realâ€world study of sequential nivolumab and ipilimumab treament in melanoma. Journal of Dermatology, 2019, 46, 947-955.                                                                                                                                             | 1.2 | 11        |

| #  | Article                                                                                                                                                                                                                                                            | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Immunohistochemical Analysis of Interleukin-17 Producing T Helper Cells and Regulatory T Cells<br>Infiltration in Annular Erythema Associated with Sjögren's Syndrome. Annals of Dermatology, 2014,<br>26, 203.                                                    | 0.9 | 11        |
| 20 | Rhododendrolâ€induced leukoderma update II: Pathophysiology, mechanisms, risk evaluation, and possible mechanismâ€based treatments in comparison with vitiligo. Journal of Dermatology, 2021, 48, 969-978.                                                         | 1,2 | 10        |
| 21 | The effect of rhododendrol inhibition of NF-κB on melanocytes in the presence of tyrosinase. Journal of Dermatological Science, 2016, 83, 157-159.                                                                                                                 | 1.9 | 7         |
| 22 | Physicianâ€initiated firstâ€inâ€human clinical study using a novel angiogenic peptide, AG30/5C, for patients with severe limb ulcers. Geriatrics and Gerontology International, 2017, 17, 2150-2156.                                                               | 1.5 | 6         |
| 23 | Ganglioside GD3 May Suppress the Functional Activities of Benign Skin T Cells in Cutaneous T-Cell Lymphoma. Frontiers in Immunology, 2021, 12, 651048.                                                                                                             | 4.8 | 6         |
| 24 | Genomeâ€wide association study identifies <i>CDH13</i> as a susceptibility gene for rhododendrolâ€induced leukoderma. Pigment Cell and Melanoma Research, 2020, 33, 826-833.                                                                                       | 3.3 | 5         |
| 25 | Case of granuloma annulare after using tocilizumab. Journal of Dermatology, 2020, 47, e117-e119.                                                                                                                                                                   | 1.2 | 5         |
| 26 | Autoantibodies detected in patients with vitiligo vulgaris but not in those with rhododendrol-induced leukoderma. Journal of Dermatological Science, 2019, 95, 80-83.                                                                                              | 1.9 | 4         |
| 27 | Pigmented epithelioid melanocytoma with lymph node metastasis in a patient with uncontrolled atopic dermatitis. Journal of Dermatology, 2014, 41, n/a-n/a.                                                                                                         | 1.2 | 2         |
| 28 | Case of minocyclineâ€induced hyperpigmentation mimicking angiosarcoma. Journal of Dermatology, 2019, 46, e414-e416.                                                                                                                                                | 1.2 | 2         |
| 29 | Immunohistochemical analysis of rhododendrol-induced leukoderma in improved and aggravated cases. Journal of Dermatological Science, 2020, 99, 140-143.                                                                                                            | 1.9 | 2         |
| 30 | Hepatitis <scp>C</scp> â€related mixed type vitiligo in a patient with <scp>I</scp> vemark syndrome. Journal of Dermatology, 2014, 41, 185-186.                                                                                                                    | 1.2 | 1         |
| 31 | A case of malignant melanoma with shrinking metastases after sequential severe irAEs. Journal of Cutaneous Immunology and Allergy, 2020, 3, 50-51.                                                                                                                 | 0.3 | 1         |
| 32 | A case of drugâ€induced hypersensitivity syndrome due to diaminodiphenyl sulfone complicated by acute respiratory failure with atypical erythema around existing prurigo. Journal of Cutaneous Immunology and Allergy, 2020, 3, 45-47.                             | 0.3 | 1         |
| 33 | A case of giant porokeratosis coexisting disseminated superficial porokeratosis. Journal of Cutaneous Immunology and Allergy, 2020, 3, 139-141.                                                                                                                    | 0.3 | 1         |
| 34 | Primary cutaneous anaplastic large cell lymphoma with rapid liver infiltration after spontaneous resolution of the primary lesion. Journal of Dermatology, 2020, 47, e190-e191.                                                                                    | 1.2 | 1         |
| 35 | Use of a combination of oral psoralen, ultraviolet A and interferonâ€Î³ for the treatment of mycosis fungoides during pregnancy, which probably evoked CD8 <sup>+</sup> CD30 <sup>+</sup> lymphoproliferative disorder. Journal of Dermatology, 2021, 48, e17-e18. | 1.2 | 1         |
| 36 | A rare case of multiple pyoderma gangrenosum coâ€mobilized with pseudoxanthoma elasticum. Journal of Cutaneous Immunology and Allergy, 2021, 4, 71-72.                                                                                                             | 0.3 | 1         |

| #  | Article                                                                                                                                                                                                       | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Immunohistopathological observation of a case recovering from leukotrichia after suction blister transplantation. Journal of Dermatology, 2021, 48, e263-e264.                                                | 1.2 | 1         |
| 38 | Successful High-Dose Radiation Treatment for Chemo-Resistant Oral Squamous Cell Carcinoma in a Kindler's Syndrome Patient. Annals of Dermatology, 2021, 33, 382.                                              | 0.9 | 1         |
| 39 | A phase I dose-escalation, safety/tolerability, and preliminary efficacy study of the intratumoral administration of GEN0101 in patients with advanced melanoma. Cancer Immunology, Immunotherapy, 2022, , 1. | 4.2 | 1         |
| 40 | A rare case of folliculotropic mycosis fungoides with eosinophilic pneumonia. Journal of Cutaneous Immunology and Allergy, 2022, 5, 141-143.                                                                  | 0.3 | 1         |
| 41 | Nivolumab-induced systemic lymphadenopathy occurring during treatment of malignant melanoma: a case report. International Journal of Hematology, 2022, 116, 302-306.                                          | 1.6 | 1         |
| 42 | Rare case of malignant melanoma presenting expanded volar pigmentation after surgery. Journal of Dermatology, 2019, 46, e409-e410.                                                                            | 1.2 | 0         |
| 43 | An Extremely Rare Case of Leukoderma Induced by Cosmetics Containing Ascorbic Acid. Case Reports in Dermatology, 2019, 11, 86-90.                                                                             | 0.8 | O         |
| 44 | Rare case of segmental vitiligo in which lesional enlargement occurred after suction blister transplantation. Journal of Dermatology, 2020, 47, e340-e342.                                                    | 1.2 | 0         |
| 45 | Case of immunoglobulin G4â€related disease presenting with an intramuscular mass. Journal of Dermatology, 2020, 47, e219-e220.                                                                                | 1.2 | 0         |
| 46 | Effect of sirolimus gel on sweating: A pilot study. Journal of Dermatology, 2021, 48, e161-e162.                                                                                                              | 1.2 | 0         |
| 47 | Symmetric multiple ulceration in a patient diagnosed with Munchausen syndrome. Journal of Cutaneous Immunology and Allergy, 2022, 5, 29-31.                                                                   | 0.3 | 0         |
| 48 | Hypohidrosis in the macules in tuberous sclerosis complex and neurofibromatosis. Journal of Dermatology, 2021, 48, 418-419.                                                                                   | 1.2 | 0         |
