|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Experimental leaching of atacamite, chrysocolla and malachite: Relationship between copper retention and cation exchange capacity. <i>Hydrometallurgy</i> , 2005, 78, 180-186.                                                                      | 4.3 | 18        |
| 2 | Spatial distribution and chemical partitioning of potentially toxic elements in soils around Khatoon-Abad Cu Smelter, SE Iran. <i>Journal of Geochemical Exploration</i> , 2019, 196, 66-80.                                                        | 3.2 | 16        |
| 3 | Geochemical stability of potentially toxic elements in porphyry copper-mine tailings from Chile as linked to ecological and human health risks assessment. <i>Environmental Science and Pollution Research</i> , 2021, 28, 57499-57529.             | 5.3 | 9         |
| 4 | The use of water-extractable Cu, Mo, Zn, As, Pb concentrations and automated mineral analysis of flue dust particles as tools for impact studies in topsoils exposed to past emissions of a Cu-smelter. <i>Chemie Der Erde</i> , 2014, 74, 365-373. | 2.0 | 5         |
| 5 | Zeolitization of tuffs at Quinamãvida, central southern Chile. <i>Clays and Clay Minerals</i> , 2007, 55, 524-533.                                                                                                                                  | 1.3 | 3         |
| 6 | Assessment of Mineralogical, Textural, and Water Chemistry Changes During Long-Distance Tailings-Slurry Transport. <i>Mine Water and the Environment</i> , 2020, 39, 135-149.                                                                       | 2.0 | 3         |
