| # | ARTICLE | IF | CITATIONS |
|---|--|-----|-----------|
| 1 | Comparative effectiveness of trimethoprim-sulfamethoxazole versus atovaquone for the prophylaxis of pneumocystis pneumonia in patients with connective tissue diseases receiving prolonged high-dose glucocorticoids. <i>Rheumatology International</i> , 2022, 42, 1403-1409. | 3.0 | 9 |
| 2 | Identification of plexin D1 on circulating extracellular vesicles as a potential biomarker of polymyositis and dermatomyositis. <i>Rheumatology</i> , 2022, 61, 1669-1679. | 1.9 | 4 |
| 3 | The real-world effectiveness of anti-RANKL antibody denosumab on the clinical fracture prevention in patients with rheumatoid arthritis: The ANSWER cohort study. <i>Modern Rheumatology</i> , 2022, 32, 834-838. | 1.8 | 4 |
| 4 | Differential efficacy of TNF inhibitors with or without the immunoglobulin fragment crystallizable (Fc) portion in rheumatoid arthritis: the ANSWER cohort study. <i>Rheumatology International</i> , 2022, 42, 1227-1234. | 3.0 | 8 |
| 5 | Pressure Ulcer in Three Cases of Anit-MDA5 Antibody Positive Dermatomyositis. <i>Nishinohon Journal of Dermatology</i> , 2022, 84, 121-125. | 0.0 | 0 |
| 6 | Comparison of the efficacy and safety of biologic agents between elderly-onset and young-onset RA patients: the ANSWER cohort study. <i>Rheumatology International</i> , 2020, 40, 1987-1995. | 3.0 | 11 |
| 7 | Subjective well-being among rheumatoid arthritis patients. <i>International Journal of Rheumatic Diseases</i> , 2019, 22, 1863-1870. | 1.9 | 5 |
| 8 | Factors associated with the achievement of biological disease-modifying antirheumatic drug-free remission in rheumatoid arthritis: the ANSWER cohort study. <i>Arthritis Research and Therapy</i> , 2018, 20, 165. | 3.5 | 33 |
| 9 | Drug retention and discontinuation reasons between seven biologics in patients with rheumatoid arthritis -The ANSWER cohort study-. <i>PLoS ONE</i> , 2018, 13, e0194130. | 2.5 | 65 |
