#	ARTICLE	IF	CITATIONS
1	American Thoracic Society/European Respiratory Society Statement on Pulmonary Rehabilitation. American Journal of Respiratory and Critical Care Medicine, 2006, 173, 1390-1413.	2.5	1,644
2	Noninvasive positive pressure ventilation in the acute care setting: where are we?. European Respiratory Journal, 2008, 31, 874-886.	3.1	707
3	Noninvasive Mechanical Ventilation in the Weaning of Patients with Respiratory Failure Due to Chronic Obstructive Pulmonary Disease. Annals of Internal Medicine, 1998, 128, 721.	2.0	548
4	Patterns of home mechanical ventilation use in Europe: results from the Eurovent survey. European Respiratory Journal, 2005, 25, 1025-1031.	3.1	548
5	The Italian multicentre study on noninvasive ventilation in chronic obstructive pulmonary disease patients. European Respiratory Journal, 2002, 20, 529-538.	3.1	405
6	Non-invasive mechanical ventilation in acute respiratory failure due to chronic obstructive pulmonary disease: correlates for success.. Thorax, 1995, 50, 755-757.	2.7	298
7	Comparison of the Efficacy, Tolerability, and Safety of Formoterol Dry Powder and Oral, Slow-Release Theophylline in the Treatment of COPD. Chest, 2002, 121, 1058-1069.	0.4	236
8	Non-invasive modalities of positive pressure ventilation improve the outcome of acute exacerbations in COPD patients. Intensive Care Medicine, 1993, 19, 450-455.	3.9	201
9	Effect of Nasal Pressure Support Ventilation and External PEEP on Diaphragmatic Activity in Patients with Severe Stable COPD. Chest, 1993, 103, 143-150.	0.4	189
10	Long-term effectiveness of pulmonary rehabilitation in patients with chronic airway obstruction. European Respiratory Journal, 1999, 13, 125-132.	3.1	157
11	Comparison of Two Methods for Weaning Patients with Chronic Obstructive Pulmonary Disease Requiring Mechanical Ventilation for More Than 15 Days. American Journal of Respiratory and Critical Care Medicine, 2001, 164, 225-230.	2.5	157
12	Chronic respiratory care for neuromuscular diseases in adults. European Respiratory Journal, 2009, 34, 444-451.	3.1	156
13	Muscle Strength and Physical Performance in Patients Without Previous Disabilities Recovering From COVID-19 Pneumonia. American Journal of Physical Medicine and Rehabilitation, 2021, 100, 105-109.	0.7	154
14	Early physiotherapy in the respiratory intensive care unit. Respiratory Medicine, 2005, 99, 1096-1104.	1.3	148
15	Clinical Significance of Serum Mesothelin in Patients with Mesothelioma and Lung Cancer. Clinical Cancer Research, 2007, 13, 5076-5081.	3.2	138
16	New strategies to improve exercise tolerance in chronic obstructive pulmonary disease. European Respiratory Journal, 2004, 24, 313-322.	3.1	137
17	Joint Statement on the Role of Respiratory Rehabilitation in the COVID-19 Crisis: The Italian Position Paper. Respiration, 2020, 99, 493-499.	1.2	135
18	Respiratory intermediate care units: a European survey: European Respiratory Society Task Force on epidemiology of respiratory intermediate care in Europe. European Respiratory Journal, 2002, 20, 1343-1350.	3.1	134

#	ARTICLE	IF	CITATIONS
19	Causes of death in patients with COPD and chronic respiratory failure. <i>Monaldi Archives for Chest Disease</i> , 1997, 52, 43-7.	0.3	131
20	COVID-19 pandemic and non invasive respiratory management: Every Goliath needs a David. An evidence based evaluation of problems. <i>Pulmonology</i> , 2020, 26, 213-220.	1.0	129
21	Physiologic Evaluation of Pressure Support Ventilation by Nasal Mask in Patients with Stable COPD. <i>Chest</i> , 1992, 101, 385-391.	0.4	126
22	Physiological Response to Pressure Support Ventilation Delivered before and after Extubation in Patients Not Capable of Totally Spontaneous Autonomous Breathing. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2001, 164, 638-641.	2.5	122
23	Tele-monitoring of ventilator-dependent patients: a European Respiratory Society Statement. <i>European Respiratory Journal</i> , 2016, 48, 648-663.	3.1	121
24	Is It Really Useful To Repeat Outpatient Pulmonary Rehabilitation Programs in Patients With Chronic Airway Obstruction?. <i>Chest</i> , 2001, 119, 1696-1704.	0.4	118
25	Survival and prediction of successful ventilator weaning in COPD patients requiring mechanical ventilation for more than 21 days. <i>European Respiratory Journal</i> , 1994, 7, 1645-1652.	3.1	117
26	Acute Exacerbations in Severe COLD Patients. <i>Chest</i> , 1992, 101, 1533-1538.	0.4	115
27	Non-invasive mechanical ventilation in severe chronic obstructive lung disease and acute respiratory failure: short-and long-term prognosis. <i>Intensive Care Medicine</i> , 1996, 22, 94-100.	3.9	111
28	Supported Arm Training in Patients Recently Weaned From Mechanical Ventilation. <i>Chest</i> , 2005, 128, 2511-2520.	0.4	100
29	Respiratory intensive care units in Italy: a national census and prospective cohort study. <i>Thorax</i> , 2001, 56, 373-378.	2.7	99
30	Effects of proportional assist ventilation on exercise tolerance in COPD patients with chronic hypercapnia. <i>European Respiratory Journal</i> , 1998, 11, 422-427.	3.1	97
31	The development of a clinical management algorithm for early physical activity and mobilization of critically ill patients: synthesis of evidence and expert opinion and its translation into practice. <i>Clinical Rehabilitation</i> , 2011, 25, 771-787.	1.0	97
32	Lack of additional effect of adjunct of assisted ventilation to pulmonary rehabilitation in mild COPD patients.. <i>Respiratory Medicine</i> , 2002, 96, 359-367.	1.3	94
33	The Appropriate Setting of Noninvasive Pressure Support Ventilation in Stable COPD Patients. <i>Chest</i> , 2000, 118, 1286-1293.	0.4	93
34	Quality control of equipment in home mechanical ventilation: a European survey. <i>European Respiratory Journal</i> , 2005, 26, 86-94.	3.1	92
35	Sick euthyroid syndrome in patients with moderate-to-severe chronic heart failure. <i>European Heart Journal</i> , 1996, 17, 1860-1866.	1.0	90
36	Breathing pattern, ventilatory drive and respiratory muscle strength in patients with chronic heart failure. <i>European Respiratory Journal</i> , 1994, 7, 17-22.	3.1	88

#	ARTICLE	IF	CITATIONS
37	Acute effects of deep diaphragmatic breathing in COPD patients with chronic respiratory insufficiency. <i>European Respiratory Journal</i> , 1998, 11, 408-415.	3.1	87
38	Recruitment of some respiratory muscles during three maximal inspiratory manoeuvres.. <i>Thorax</i> , 1993, 48, 702-707.	2.7	86
39	Seven-year time course of lung function, symptoms, health-related quality of life, and exercise tolerance in COPD patients undergoing pulmonary rehabilitation programs. <i>Respiratory Medicine</i> , 2007, 101, 1961-1970.	1.3	84
40	Cognitive and perceived health status in patient with chronic obstructive pulmonary disease surviving acute on chronic respiratory failure: a controlled study. <i>Intensive Care Medicine</i> , 2002, 28, 170-177.	3.9	83
41	Pulmonary Rehabilitation in Patients Recovering from COVID-19. <i>Respiration</i> , 2021, 100, 416-422.	1.2	82
42	Physiological effects of flow and pressure triggering during non- invasive mechanical ventilation in patients with chronic obstructive pulmonary disease. <i>Thorax</i> , 1997, 52, 249-254.	2.7	78
43	Clinical standards for the assessment, management and rehabilitation of post-TB lung disease. <i>International Journal of Tuberculosis and Lung Disease</i> , 2021, 25, 797-813.	0.6	78
44	Production of Endogenous Nitric Oxide in Chronic Obstructive Pulmonary Disease and Patients with Cor Pulmonale. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2000, 162, 446-450.	2.5	77
45	Breathing pattern and respiratory mechanics in patients with amyotrophic lateral sclerosis. <i>European Respiratory Journal</i> , 1997, 10, 1614-1621.	3.1	75
46	Endogenous nitric oxide in patients with stable COPD: correlates with severity of disease. <i>Thorax</i> , 1998, 53, 881-883.	2.7	75
47	Physiologic effects of early administered mask proportional assist ventilation in patients with chronic obstructive pulmonary disease and acute respiratory failure. <i>Critical Care Medicine</i> , 2000, 28, 1791-1797.	0.4	74
48	Respiratory muscle function and exercise capacity in multiple sclerosis. <i>European Respiratory Journal</i> , 1994, 7, 23-28.	3.1	72
49	Acute exacerbations in patients with COPD: predictors of need for mechanical ventilation. <i>European Respiratory Journal</i> , 1996, 9, 1487-1493.	3.1	69
50	The clinical management in extremely severe COPD. <i>Respiratory Medicine</i> , 2007, 101, 1613-1624.	1.3	69
51	Aerobic Exercise Training in Very Severe Chronic Obstructive Pulmonary Disease. <i>American Journal of Physical Medicine and Rehabilitation</i> , 2017, 96, 541-548.	0.7	67
52	Noninvasive mechanical ventilation in acute respiratory failure. <i>European Respiratory Journal</i> , 1996, 9, 795-807.	3.1	66
53	Physiological and symptom determinants of exercise performance in patients with chronic airway obstruction. <i>Respiratory Medicine</i> , 2000, 94, 256-263.	1.3	63
54	Italian suggestions for pulmonary rehabilitation in COVID-19 patients recovering from acute respiratory failure: results of a Delphi process. <i>Monaldi Archives for Chest Disease</i> , 2020, 90, .	0.3	63

#	ARTICLE	IF	CITATIONS
55	International approaches to the prescription of long-term oxygen therapy. <i>European Respiratory Journal</i> , 2001, 18, 909-913.	3.1	62
56	Efficacy of pulmonary rehabilitation in chronic respiratory failure (CRF) due to chronic obstructive pulmonary disease (COPD): The Maugeri Study. <i>Respiratory Medicine</i> , 2007, 101, 2447-2453.	1.3	60
57	In-Hospital Short-term Training Program for Patients With Chronic Airway Obstruction. <i>Chest</i> , 2001, 120, 1500-1505.	0.4	59
58	Tumour necrosis factor family genes in a phenotype of COPD associated with emphysema. <i>European Respiratory Journal</i> , 2003, 21, 444-449.	3.1	59
59	Noninvasive mechanical ventilation in high-risk pulmonary infections: a clinical review. <i>European Respiratory Review</i> , 2014, 23, 427-438.	3.0	59
60	Comparison of Five Bilevel Pressure Ventilators in Patients with Chronic Ventilatory Failure. <i>Chest</i> , 2002, 122, 2105-2114.	0.4	58
61	Rehabilitation, weaning and physical therapy strategies in chronic critically ill patients. <i>European Respiratory Journal</i> , 2012, 39, 487-492.	3.1	58
62	Awake palliative thoracic surgery in a high-risk patient: one-lung, non-invasive ventilation combined with epidural blockade. <i>Anaesthesia</i> , 2008, 63, 761-763.	1.8	57
63	Combined Serum Mesothelin and Plasma Osteopontin Measurements in Malignant Pleural Mesothelioma. <i>Journal of Thoracic Oncology</i> , 2011, 6, 1587-1593.	0.5	57
64	Unusual applications of noninvasive ventilation. <i>European Respiratory Journal</i> , 2011, 38, 440-449.	3.1	57
65	Non-invasive ventilation-aided transoesophageal echocardiography in high-risk patients: a pilot study. <i>European Journal of Echocardiography</i> , 2010, 11, 554-556.	2.3	56
66	The patient needing prolonged mechanical ventilation: a narrative review. <i>Multidisciplinary Respiratory Medicine</i> , 2018, 13, 6.	0.6	56
67	The COVID-19 outbreak: From "black swan" to global challenges and opportunities. <i>Pulmonology</i> , 2020, 26, 117-118.	1.0	55
68	Time course of exercise capacity, skeletal and respiratory muscle performance after heart-lung transplantation. <i>European Respiratory Journal</i> , 1996, 9, 1508-1514.	3.1	54
69	Chest wall kinematics and respiratory muscle action in walking healthy humans. <i>Journal of Applied Physiology</i> , 1999, 87, 938-946.	1.2	54
70	Heart failure-related myopathy. Clinical and pathophysiological insights. <i>European Heart Journal</i> , 1999, 20, 1191-1200.	1.0	54
71	Effects of oxygen on autonomic nervous system dysfunction in patients with chronic obstructive pulmonary disease. <i>European Respiratory Journal</i> , 1999, 13, 119-124.	3.1	54
72	Tracheostomy in patients with long-term mechanical ventilation: A survey. <i>Respiratory Medicine</i> , 2010, 104, 749-753.	1.3	52

#	ARTICLE	IF	CITATIONS
73	Haemodynamic effects of pressure support and PEEP ventilation by nasal route in patients with stable chronic obstructive pulmonary disease.. Thorax, 1993, 48, 523-528.	2.7	48
74	Effects of early inpatient rehabilitation after acute exacerbation of COPD. Respiratory Medicine, 2009, 103, 1526-1531.	1.3	48
75	Negative Pressure Ventilation vs External High-Frequency Oscillation During Rigid Bronchoscopy. Chest, 2000, 118, 18-23.	0.4	47
76	Nonpharmacological treatment and relief of symptoms in COPD. European Respiratory Journal, 2008, 32, 218-228.	3.1	47
77	Increased Number and Expertise of Italian Respiratory High-Dependency Care Units: The Second National Survey. Respiratory Care, 2011, 56, 1100-1107.	0.8	47
78	Long-term home care programmes may reduce hospital admissions in COPD with chronic hypercapnia. European Respiratory Journal, 1996, 9, 1605-1610.	3.1	46
79	Dyspnoea and hypoxaemia after lung surgery: the role of interatrial right-to-left shunt. European Respiratory Journal, 2006, 28, 174-181.	3.1	46
80	Mask Proportional Assist vs Pressure Support Ventilation in Patients in Clinically Stable Condition With Chronic Ventilatory Failure. Chest, 2002, 122, 479-488.	0.4	45
81	Telemedicine in chronic obstructive pulmonary disease. Breathe, 2016, 12, 350-356.	0.6	45
82	Outcome of COPD patients performing nocturnal non-invasive mechanical ventilation. Respiratory Medicine, 1998, 92, 1215-1222.	1.3	42
83	A proposal of a new model for long-term weaning: Respiratory intensive care unit and weaning center. Respiratory Medicine, 2010, 104, 1505-1511.	1.3	42
84	Comparison between Plasma and Serum Osteopontin Levels: Usefulness in Diagnosis of Epithelial Malignant Pleural Mesothelioma. International Journal of Biological Markers, 2010, 25, 164-170.	0.7	41
85	Last 3 months of life in home-ventilated patients: the family perception. European Respiratory Journal, 2010, 35, 1064-1071.	3.1	41
86	The difficult-to-wean patient. Expert Review of Respiratory Medicine, 2010, 4, 685-692.	1.0	41
87	Tiotropium and exercise training in COPD patients: Effects on dyspnea and exercise tolerance. International Journal of COPD, 2008, Volume 3, 771-780.	0.9	40
88	Noninvasive Ventilation for Awake Percutaneous Aortic Valve Implantation in High-Risk Respiratory Patients: A Case Series. Journal of Cardiothoracic and Vascular Anesthesia, 2011, 25, 1109-1112.	0.6	39
89	Measures of physical performance in COVID-19 patients: a mapping review. Pulmonology, 2021, 27, 518-528.	1.0	39
90	Long-term mechanical ventilation and nutrition. Respiratory Medicine, 2004, 98, 413-420.	1.3	38

#	ARTICLE	IF	CITATIONS
91	Interactive videogame as rehabilitation tool of patients with chronic respiratory diseases: Preliminary results of a feasibility study. <i>Respiratory Medicine</i> , 2014, 108, 1516-1524.	1.3	38
92	Noninvasive respiratory support in acute hypoxemic respiratory failure associated with COVID-19 and other viral infections. <i>Minerva Anestesiologica</i> , 2020, 86, 1190-1204.	0.6	37
93	Evidence of Acute Diaphragmatic Fatigue in a "Natural" Condition: The Diaphragm during Labor. <i>The American Review of Respiratory Disease</i> , 1992, 146, 1226-1230.	2.9	36
94	Nasal proportional assist ventilation unloads the inspiratory muscles of stable patients with hypercapnia due to COPD. <i>European Respiratory Journal</i> , 2000, 16, 491.	3.1	36
95	Proportional assist ventilation (PAV): a significant advance or a futile struggle between logic and practice?. <i>Thorax</i> , 2002, 57, 272-276.	2.7	36
96	Weakness of respiratory and skeletal muscles after a short course of steroids in patients with acute lung rejection. <i>European Respiratory Journal</i> , 2002, 20, 497-499.	3.1	36
97	The role of tele-medicine in patients with respiratory diseases. <i>Expert Review of Respiratory Medicine</i> , 2017, 11, 893-900.	1.0	36
98	Response to pulmonary rehabilitation: toward personalised programmes?. <i>European Respiratory Journal</i> , 2015, 46, 1538-1540.	3.1	35
99	Attitudes and preferences of home mechanical ventilation users from four European countries: an ERS/ELF survey. <i>ERJ Open Research</i> , 2017, 3, 00015-2017.	1.1	35
100	Assisted ventilation as an aid to exercise training: a mechanical doping?. <i>European Respiratory Journal</i> , 2006, 27, 3-5.	3.1	34
101	Noninvasive ventilation: a decade of progress. <i>European Respiratory Journal</i> , 2002, 19, 587-589.	3.1	32
102	Physiotherapy in the perioperative period. <i>Bailliere's Best Practice and Research in Clinical Anaesthesiology</i> , 2010, 24, 283-289.	1.7	32
103	Peri-operative physiotherapy. <i>Multidisciplinary Respiratory Medicine</i> , 2013, 8, 4.	0.6	32
104	A Study of Short-Term Effect of Rehabilitative Therapy in Chronic Obstructive Pulmonary Disease. <i>Respiration</i> , 1981, 41, 40-44.	1.2	31
105	Strategies to relieve dyspnoea in patients with advanced chronic respiratory diseases. A narrative review. <i>Pulmonology</i> , 2019, 25, 289-298.	1.0	31
106	Pattern of Variables Describing Desaturator COPD Patients, as Revealed by Cluster Analysis. <i>Chest</i> , 2005, 128, 3828-3837.	0.4	30
107	Home Non-Invasive Mechanical Ventilation and Long-Term Oxygen Therapy in Stable Hypercapnic Chronic Obstructive Pulmonary Disease Patients: Comparison of Costs. <i>Respiration</i> , 2009, 77, 44-50.	1.2	30
108	Frequent coexistence of chronic heart failure and chronic obstructive pulmonary disease in respiratory and cardiac outpatients: Evidence from SUSPIRIUM, a multicentre Italian survey. <i>European Journal of Preventive Cardiology</i> , 2017, 24, 567-576.	0.8	30
