|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Self-controlling resource management model for electric vehicle fast charging stations with priority service. <i>Energy</i> , 2022, 239, 122276.                                                      | 8.8 | 11        |
| 2  | Feedback controlled resource management model for express service in electric vehicle charging stations. <i>Journal of Cleaner Production</i> , 2021, 311, 127629.                                    | 9.3 | 11        |
| 3  | Adaptive Traffic Signal Control to Reduce Delay Time at a Single Intersection Point. , 2021, , .                                                                                                      |     | 0         |
| 4  | Capacitated strategic assortment planning under explicit demand substitution. <i>European Journal of Operational Research</i> , 2021, 294, 1120-1138.                                                 | 5.7 | 1         |
| 5  | User Localization in an Indoor Environment by Combining Different Algorithms through Plurality Rule. , 2020, , 64-68.                                                                                 |     | 0         |
| 6  | Resource management optimization for a smart microgrid. <i>Journal of Renewable and Sustainable Energy</i> , 2019, 11, .                                                                              | 2.0 | 9         |
| 7  | Heuristic policies for mobile asset sharing within hospitals. <i>Computers and Industrial Engineering</i> , 2017, 111, 352-363.                                                                       | 6.3 | 0         |
| 8  | Policy Analysis with Simulation: Centralization of Blood Supply Chain. , 2017, , .                                                                                                                    |     | 0         |
| 9  | A mobile asset sharing policy for hospitals with real time locating systems. <i>Technology and Health Care</i> , 2016, 24, 121-133.                                                                   | 1.2 | 4         |
| 10 | A framework for energy reduction in manufacturing process chains (E-MPC) and a case study from the Turkish household appliance industry. <i>Journal of Cleaner Production</i> , 2016, 112, 3342-3360. | 9.3 | 18        |
| 11 | RFID in production and service systems: Technology, applications and issues. <i>Information Systems Frontiers</i> , 2015, 17, 1369-1380.                                                              | 6.4 | 41        |
| 12 | Managing transshipments in a multi-retailer system with approximate policies. <i>Journal of the Operational Research Society</i> , 2015, 66, 947-964.                                                 | 3.4 | 17        |
| 13 | A comparison of artificial neural network and multinomial logit models in predicting mergers. <i>Journal of Applied Statistics</i> , 2013, 40, 712-720.                                               | 1.3 | 9         |
| 14 | Self Controlling Tabu Search algorithm for the Quadratic Assignment Problem. <i>Computers and Industrial Engineering</i> , 2011, 60, 310-319.                                                         | 6.3 | 33        |
| 15 | Application of Self Controlling Software Approach to Reactive Tabu Search. , 2008, , .                                                                                                                |     | 6         |
