#	ARTICLE	IF	CITATIONS
1	World Gastroenterology Organisation Global Guidelines. <i>Journal of Clinical Gastroenterology</i> , 2022, 56, 1-15.	1.1	5
2	Low FODMAP diet beyond IBS: Evidence for use in other conditions. <i>Current Opinion in Pharmacology</i> , 2022, 64, 102208.	1.7	5
3	The Role of Food in the Treatment of Bowel Disorders: Focus on Irritable Bowel Syndrome and Functional Constipation. <i>American Journal of Gastroenterology</i> , 2022, 117, 947-957.	0.2	31
4	The lived experience of irritable bowel syndrome: A focus on dietary management. <i>Australian Journal of General Practice</i> , 2022, 51, 395-400.	0.3	0
5	How to Implement the 3-Phase FODMAP Diet Into Gastroenterological Practice. <i>Journal of Neurogastroenterology and Motility</i> , 2022, 28, 343-356.	0.8	15
6	Orthorexia nervosa is a concern in gastroenterology: A scoping review. <i>Neurogastroenterology and Motility</i> , 2022, 34, .	1.6	5
7	The key to success: Targeting enzymes to their dietary counterpart. <i>Neurogastroenterology and Motility</i> , 2021, 33, e14204.	1.6	0
8	Naturally occurring dietary salicylates in the genesis of functional gastrointestinal symptoms in patients with irritable bowel syndrome: Pilot study. <i>JGH Open</i> , 2021, 5, 871-878.	0.7	4
9	Plant-based diets in gastrointestinal disorders: something, nothing, or everything?. <i>The Lancet Gastroenterology and Hepatology</i> , 2021, 6, 992.	3.7	1
10	Evaluation of lactulose, lactose, and fructose breath testing in clinical practice: A focus on methane. <i>JGH Open</i> , 2020, 4, 198-205.	0.7	12
11	Implementation of the low FODMAP diet in functional gastrointestinal symptoms: A real world experience. <i>Neurogastroenterology and Motility</i> , 2020, 32, e13730.	1.6	50
12	Nutritional profile of rodent diets impacts experimental reproducibility in microbiome preclinical research. <i>Scientific Reports</i> , 2020, 10, 17784.	1.6	24
13	Letter: the gluten-free diet as a bottom-up approach for irritable bowel syndrome. Authors' reply. <i>Alimentary Pharmacology and Therapeutics</i> , 2020, 51, 185-186.	1.9	1
14	Review article: biological mechanisms for symptom causation by individual FODMAP subgroups – the case for a more personalised approach to dietary restriction. <i>Alimentary Pharmacology and Therapeutics</i> , 2019, 50, 517-529.	1.9	27
15	The impact of dietary fermentable carbohydrates on a postinflammatory model of irritable bowel syndrome. <i>Neurogastroenterology and Motility</i> , 2019, 31, e13675.	1.6	11
16	Food Intolerances. <i>Nutrients</i> , 2019, 11, 1684.	1.7	83
17	The keto diet and the gut: cause for concern?. <i>The Lancet Gastroenterology and Hepatology</i> , 2019, 4, 908-909.	3.7	8
18	Fermentable short chain carbohydrate (FODMAP) content of common plant-based foods and processed foods suitable for vegetarian and vegan based eating patterns. <i>Journal of Human Nutrition and Dietetics</i> , 2018, 31, 422-435.	1.3	40

#	ARTICLE	IF	CITATIONS
19	Dietary therapies for functional bowel symptoms: Recent advances, challenges, and future directions. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13238.	1.6	38
20	Increasing Symptoms in Irritable Bowel Symptoms With Ingestion of Galacto-Oligosaccharides Are Mitigated by α -Galactosidase Treatment. <i>American Journal of Gastroenterology</i> , 2018, 113, 124-134.	0.2	40
21	Applying precision to the design and interpretation of dietary trials. <i>Clinical Nutrition</i> , 2018, 37, 2291.	2.3	0
22	Re-challenging FODMAPs: the low FODMAP diet phase two. <i>Journal of Gastroenterology and Hepatology (Australia)</i> , 2017, 32, 11-15.	1.4	50
23	The clinical value of breath hydrogen testing. <i>Journal of Gastroenterology and Hepatology (Australia)</i> , 2017, 32, 20-22.	1.4	19
24	Editorial: rethinking predictors of response to the low FODMAP diet – should we retire fructose and lactose breath hydrogen testing and concentrate on visceral hypersensitivity?. <i>Alimentary Pharmacology and Therapeutics</i> , 2017, 45, 1281-1282.	1.9	8
25	Poor reproducibility of breath hydrogen testing: Implications for its application in functional bowel disorders. <i>United European Gastroenterology Journal</i> , 2017, 5, 284-292.	1.6	39
26	Questioning the Utility of Breath Testing in Clinical Practice. <i>American Journal of Gastroenterology</i> , 2017, 112, 1886.	0.2	1
27	Adding glucose to food and solutions to enhance fructose absorption is not effective in preventing fructose-induced functional gastrointestinal symptoms: randomised controlled trials in patients with fructose malabsorption. <i>Journal of Human Nutrition and Dietetics</i> , 2017, 30, 73-82.	1.3	20
28	Fermentable oligosaccharides, disaccharides, monosaccharides and polyols: role in irritable bowel syndrome. <i>Expert Review of Gastroenterology and Hepatology</i> , 2014, 8, 819-834.	1.4	99
