#	ARTICLE	IF	CITATIONS
1	Pulsed pressure enhances osmotic dehydration and subsequent hot air drying kinetics and quality attributes of red beetroot. <i>Drying Technology</i> , 2023, 41, 262-276.	3.1	10
2	Superheated steam processing: An emerging technology to improve food quality and safety. <i>Critical Reviews in Food Science and Nutrition</i> , 2023, 63, 8720-8736.	10.3	13
3	Nanotechnology for Food Safety and Security: A Comprehensive Review. <i>Food Reviews International</i> , 2023, 39, 3858-3878.	8.4	3
4	Hot-air impingement roast drying of beef jerky: Effect of relative humidity on quality attributes. <i>Drying Technology</i> , 2023, 41, 277-289.	3.1	5
5	Peanut drying: Effects of various drying methods on drying kinetic models, physicochemical properties, germination characteristics, and microstructure. <i>Information Processing in Agriculture</i> , 2023, 10, 447-458.	4.1	11
6	Effect of hot air impingement drying on drying behavior, volatile components profile, shell burst ratio, flavonoid contents, microstructure of <i>Amomum villosum</i> fruits. <i>Drying Technology</i> , 2023, 41, 107-121.	3.1	6
7	Effect of high-humidity hot air impingement blanching and pulsed vacuum drying on phytochemicals content, antioxidant capacity, rehydration kinetics and ultrastructure of Thompson seedless grape. <i>Drying Technology</i> , 2022, 40, 1013-1026.	3.1	23
8	Effects of solar drying operation equipped with a finned and double-pass heat collector on energy utilization, essential oil extraction and bio-active compounds of peppermint (<i>Mentha Piperita</i>) Tj ETQq0 0 0 0 BT /Overclock 10 Tf		
9	Effect of vacuum-steam pulsed blanching (VSPB) on drying characteristics and quality properties of garlic slices. <i>Drying Technology</i> , 2022, 40, 1232-1246.	3.1	11
10	Effects of drying temperature on the drying characteristics and volatile profiles of <i>Citrus reticulata</i> Blanco peels under two stages of maturity. <i>Drying Technology</i> , 2022, 40, 2456-2469.	3.1	12
11	The influence mechanism and control strategy of relative humidity on hot air drying of fruits and vegetables: a review. <i>Drying Technology</i> , 2022, 40, 2217-2234.	3.1	17
12	The effect of high humidity hot air impingement blanching on the changes in molecular and rheological characteristics of pectin fractions extracted from okra pods. <i>Food Hydrocolloids</i> , 2022, 123, 107199.	10.7	8
13	Effects of different drying methods on drying characteristics, microstructure, quality, and energy consumption of <i>Panax Notoginseng</i> roots (Araliaceae). <i>Drying Technology</i> , 2022, 40, 1247-1261.	3.1	3
14	Vacuum-steam pulsed blanching (VSPB) enhances drying quality, shortens the drying time of gingers by inactivating enzymes, altering texture, microstructure and ultrastructure. <i>LWT - Food Science and Technology</i> , 2022, 154, 112714.	5.2	17
15	Effect of ventilated solar-geothermal drying on 3E (exergy, energy, and economic analysis), and quality attributes of tomato paste. <i>Energy</i> , 2022, 243, 122764.	8.8	27
16	Short- and Medium-Wave Infrared Drying of Cantaloupe (<i>Cucumis melon</i> L.) Slices: Drying Kinetics and Process Parameter Optimization. <i>Processes</i> , 2022, 10, 114.	2.8	15
17	Pulsed Vacuum Drying of Pepper (<i>Capsicum annum</i> L.): Effect of High-Humidity Hot Air Impingement Blanching Pretreatment on Drying Kinetics and Quality Attributes. <i>Foods</i> , 2022, 11, 318.	4.3	16
18	Effects of various storage conditions on total phenolic, carotenoids, antioxidant capacity, and color of dried apricots. <i>Food Control</i> , 2022, 136, 108846.	5.5	24

#	ARTICLE	IF	CITATIONS
19	Improvement of drying efficiency and quality attributes of blueberries using innovative far-infrared radiation heating assisted pulsed vacuum drying (FIR-PVD). Innovative Food Science and Emerging Technologies, 2022, 77, 102948.	5.6	48
20	An emerging pretreatment technology for reducing postharvest loss of vegetables-a case study of red pepper (<i>Capsicum annuum</i> L.) drying. Drying Technology, 2022, 40, 1620-1628.	3.1	8
21	Characterization of volatile compounds and microstructure in different tissues of "Eureka" lemon (<i>Citrus aurantium</i> L.). Food Chemistry, 2022, 350, 109843.	10.7	10
22	Effects of dielectric barrier discharge (DBD) plasma on the drying kinetics, color, phenolic compounds, energy consumption and microstructure of lotus pollen. Drying Technology, 2022, 40, 3100-3114.	3.1	4
23	Energy, environmental, economic, and color analysis of geo-exchange energy assisted-insulated north wall solar dryer for onion slices under relatively cloudy and rainy conditions. Solar Energy, 2022, 236, 1-16.	6.1	7
24	Pulsed vacuum drying of banana: Effects of ripeness on drying kinetics and physicochemical properties and related mechanism. LWT - Food Science and Technology, 2022, 161, 113362.	5.2	14
25	High-humidity hot air impingement blanching (HHAIB): An emerging technology for tomato peeling. Innovative Food Science and Emerging Technologies, 2022, 77, 102987.	5.6	6
26	Conventional and novel peeling methods for fruits and vegetables: A review. Innovative Food Science and Emerging Technologies, 2022, 77, 102961.	5.6	7
27	Structural Morphology and Rheological Properties of Pectin Fractions Extracted from Okra Pods Subjected to Cold Plasma Treatment. Food and Bioprocess Technology, 2022, 15, 1168-1181.	4.7	16
28	Modification of the cell wall polysaccharides and phytochemicals of okra pods by cold plasma treatment. Food Hydrocolloids, 2022, 131, 107763.	10.7	10
29	Effects of postharvest ripening on water status and distribution, drying characteristics, volatile profiles, phytochemical contents, antioxidant capacity and microstructure of kiwifruit (<i>Actinidia chinensis</i> L.). Food Chemistry, 2022, 350, 109843.	10.7	10
30	Improvement of Pacific White Shrimp (<i>Litopenaeus vannamei</i>) Drying Characteristics and Quality Attributes by a Combination of Salting Pretreatment and Microwave. Foods, 2022, 11, 2066.	4.3	13
31	Pesticide residue elimination for fruits and vegetables: the mechanisms, applications, and future trends of thermal and non-thermal technologies. Journal of Future Foods, 2022, 2, 223-240.	4.7	18
32	Effect of pulsed vacuum drying on drying kinetics and quality of roots of <i>Panax notoginseng</i> (Burk.) F. H. Chen (Araliaceae). Drying Technology, 2021, 39, 2234-2251.	3.1	17
33	Effects of vacuum-steam pulsed blanching on drying kinetics, colour, phytochemical contents, antioxidant capacity of carrot and the mechanism of carrot quality changes revealed by texture, microstructure and ultrastructure. Food Chemistry, 2021, 338, 127799.	8.2	85
34	Thermal Decontamination Technologies for Microorganisms and Mycotoxins in Low-Moisture Foods. Annual Review of Food Science and Technology, 2021, 12, 287-305.	9.9	27
35	Effects of different drying methods on drying kinetics, physicochemical properties, microstructure, and energy consumption of potato (<i>Solanum tuberosum</i> L.) cubes. Drying Technology, 2021, 39, 418-431.	3.1	55
36	Pulsed vacuum drying of kiwifruit slices and drying process optimization based on artificial neural network. Drying Technology, 2021, 39, 405-417.	3.1	28

#	ARTICLE	IF	CITATIONS
37	Effect of drying method and cultivar on sensory attributes, textural profiles, and volatile characteristics of grape raisins. <i>Drying Technology</i> , 2021, 39, 495-506.	3.1	28
38	Deep learnt grading of almond kernels. <i>Journal of Food Process Engineering</i> , 2021, 44, e13662.	2.9	3
39	Real-time detection system for moisture content and color change in jujube slices during drying process. <i>Journal of Food Processing and Preservation</i> , 2021, 45, e15539.	2.0	3
40	Effects of high-humidity hot air impingement steaming on <i>Gastrodia elata</i> : steaming degree, weight loss, texture, drying kinetics, microstructure and active components. <i>Food and Bioproducts Processing</i> , 2021, 127, 255-265.	3.6	17
41	Pulsed vacuum drying enhances drying of blueberry by altering micro-, ultrastructure and water status and distribution. <i>LWT - Food Science and Technology</i> , 2021, 142, 111013.	5.2	35
42	Vacuum-steam pulsed blanching (VSPB): An emerging blanching technology for beetroot. <i>LWT - Food Science and Technology</i> , 2021, 147, 111532.	5.2	13
43	Microwave-vacuum-assisted drying of pretreated cranberries: Drying kinetics, bioactive compounds and antioxidant activity. <i>LWT - Food Science and Technology</i> , 2021, 146, 111464.	5.2	21
44	Moisturizing strategy for enhanced convective drying of mushroom slices. <i>Renewable Energy</i> , 2021, 172, 728-739.	8.9	21
45	Effects of postharvest ripening on physicochemical properties, microstructure, cell wall polysaccharides contents (pectin, hemicellulose, cellulose) and nanostructure of kiwifruit (<i>Actinidia</i>) Tj ETQq1 1 0.7843 14 rg81 /Over	11.3	6
46	Quantitative characterization and effective inactivation of biological hazards in struvite recovered from digested poultry slurry. <i>Water Research</i> , 2021, 204, 117659.	11.3	6
47	Vacuum-steam pulsed blanching (VSPB) softens texture and enhances drying rate of carrot by altering cellular structure, pectin polysaccharides and water state. <i>Innovative Food Science and Emerging Technologies</i> , 2021, 74, 102801.	5.6	26
48	Prediction of energy and exergy of mushroom slices drying in hot air impingement dryer by artificial neural network. <i>Drying Technology</i> , 2020, 38, 1959-1970.	3.1	48
49	Step-down relative humidity convective air drying strategy to enhance drying kinetics, efficiency, and quality of American ginseng root (<i>Panax quinquefolium</i>). <i>Drying Technology</i> , 2020, 38, 903-916.	3.1	31
50	Color prediction of mushroom slices during drying using Bayesian extreme learning machine. <i>Drying Technology</i> , 2020, 38, 1869-1881.	3.1	33
51	Emerging chemical and physical disinfection technologies of fruits and vegetables: a comprehensive review. <i>Critical Reviews in Food Science and Nutrition</i> , 2020, 60, 2481-2508.	10.3	131
52	Postharvest Processing and Storage Methods for <i>Camellia oleifera</i> Seeds. <i>Food Reviews International</i> , 2020, 36, 319-339.	8.4	31
53	Design and performance evaluation of a pilot-scale pulsed vacuum infrared drying (PVID) system for drying of berries. <i>Drying Technology</i> , 2020, 38, 1340-1355.	3.1	25
54	Effect of drying air temperature on drying kinetics, color, carotenoid content, antioxidant capacity and oxidation of fat for lotus pollen. <i>Drying Technology</i> , 2020, 38, 1151-1164.	3.1	56

#	ARTICLE	IF	CITATIONS
55	Review of recent applications and research progress in hybrid and combined microwave-assisted drying of food products: Quality properties. <i>Critical Reviews in Food Science and Nutrition</i> , 2020, 60, 2212-2264.	10.3	54
56	Hot air impingement drying kinetics and quality attributes of orange peel. <i>Journal of Food Processing and Preservation</i> , 2020, 44, e14294.	2.0	51
57	Sustainable drying research in China. <i>Drying Technology</i> , 2020, 38, 1958-1958.	3.1	1
58	Multistage relative humidity control strategy enhances energy and exergy efficiency of convective drying of carrot cubes. <i>International Journal of Heat and Mass Transfer</i> , 2020, 149, 119231.	4.8	50
59	Pulsed vacuum pickling (PVP) of garlic cloves: Mass transfer kinetics and quality attributes. <i>Drying Technology</i> , 2020, 38, 712-723.	3.1	6
60	Importance of drying in support of human welfare. <i>Drying Technology</i> , 2020, 38, 1542-1543.	3.1	49
61	High-humidity hot air impingement blanching (HHAIB) efficiently inactivates enzymes, enhances extraction of phytochemicals and mitigates brown actions of chili pepper. <i>Food Control</i> , 2020, 111, 107050.	5.5	33
62	Cold plasma enhances drying and color, rehydration ratio and polyphenols of wolfberry via microstructure and ultrastructure alteration. <i>LWT - Food Science and Technology</i> , 2020, 134, 110173.	5.2	66
63	Classification of first quality fancy cashew kernels using four deep convolutional neural network models. <i>Journal of Food Process Engineering</i> , 2020, 43, e13552.	2.9	12
64	Recent advances in non-thermal decontamination technologies for microorganisms and mycotoxins in low-moisture foods. <i>Trends in Food Science and Technology</i> , 2020, 106, 104-112.	15.1	62
65	Microwave-assisted hot air convective drying of whole cranberries subjected to various initial treatments. <i>LWT - Food Science and Technology</i> , 2020, 133, 109906.	5.2	10
66	Combined Hot Air and Microwave-Vacuum Drying of Cranberries: Effects of Pretreatments and Pulsed Vacuum Osmotic Dehydration on Drying Kinetics and Physicochemical Properties. <i>Food and Bioprocess Technology</i> , 2020, 13, 1848-1856.	4.7	32
67	Quality changes of frozen mango with regard to water mobility and ice crystals during frozen storage. <i>Journal of Food Process Engineering</i> , 2020, 43, e13508.	2.9	7
68	Evaluation of storage stability of dried cranberry powders based on the moisture sorption isotherms and glass transition temperatures. <i>Drying Technology</i> , 2020, , 1-11.	3.1	11
69	Comparison of the Thermal Transitions of Spray-Dried and Freeze-Dried Egg Whites by Differential Scanning Calorimetry. <i>Food and Bioprocess Technology</i> , 2020, 13, 1329-1343.	4.7	3
70	Pulsed pressure pickling enhances acetic acid transfer, thiosulfinates degradation, color and ultrastructure changes of <i>Allium sativum</i> garlic. <i>Innovative Food Science and Emerging Technologies</i> , 2020, 65, 102438.	5.6	16
71	Prediction of size and mass of pistachio kernels using random Forest machine learning. <i>Journal of Food Process Engineering</i> , 2020, 43, e13473.	2.9	15
72	Cold plasma pretreatment enhances drying kinetics and quality attributes of chili pepper (<i>Capsicum</i>) Tj ETQqO 0 0 rgBT /Overlock 10 Tf 5	5.2	130

#	ARTICLE	IF	CITATIONS
73	Drying characteristics and modeling of apple slices during microwave intermittent drying. Journal of Food Process Engineering, 2019, 42, e13212.	2.9	19
74	Effects of ripening stage on physicochemical properties, drying kinetics, pectin polysaccharides contents and nanostructure of apricots. Carbohydrate Polymers, 2019, 222, 114980.	10.2	73
75	Special issue for the 9th Asia-Pacific drying conference (ADC 2017). Drying Technology, 2019, 37, 270-270.	3.1	0
76	Ultrasound Pretreatment to Enhance Drying Kinetics of Kiwifruit (<i>Actinidia deliciosa</i>) Slices: Pros and Cons. Food and Bioprocess Technology, 2019, 12, 865-876.	4.7	73
77	<i>Effect of drying and high-humidity hot air impingement blanching (HHAIB) parameters on drying characteristics and quality of apple slices</i>. , 2019, , .		0
78	High-humidity hot air impingement blanching (HHAIB) enhances drying quality of apricots by inactivating the enzymes, reducing drying time and altering cellular structure. Food Control, 2019, 96, 104-111.	5.5	99
79	Experimental and simulation studies of heat transfer in high-humidity hot air impingement blanching (HHAIB) of carrot. Food and Bioprocess Technology, 2019, 12, 196-204.	3.6	13
80	Effect of high-humidity hot air impingement blanching (HHAIB) and drying parameters on drying characteristics and quality of broccoli florets. Drying Technology, 2019, 37, 1251-1264.	3.1	65
81	Pulsed vacuum drying of Chinese ginger (<i>Zingiber officinale</i> Roscoe) slices: Effects on drying characteristics, rehydration ratio, water holding capacity, and microstructure. Drying Technology, 2019, 37, 301-311.	3.1	63
82	Chemical and physical pretreatments of fruits and vegetables: Effects on drying characteristics and quality attributes â€“ a comprehensive review. Critical Reviews in Food Science and Nutrition, 2019, 59, 1408-1432.	10.3	264
83	High-humidity hot air impingement blanching alters texture, cell-wall polysaccharides, water status and distribution of seedless grape. Carbohydrate Polymers, 2018, 194, 9-17.	10.2	85
84	Pulsed vacuum drying (PVD) of wolfberry: Drying kinetics and quality attributes. Drying Technology, 2018, 36, 1501-1514.	3.1	49
85	Pulsed vacuum drying enhances drying kinetics and quality of lemon slices. Journal of Food Engineering, 2018, 224, 129-138.	5.2	176
86	High humidity hot air impingement blanching (HHAIB) enhances drying rate and softens texture of apricot via cell wall pectin polysaccharides degradation and ultrastructure modification. Food Chemistry, 2018, 261, 292-300.	8.2	84
87	Effects of high-humidity hot air impingement blanching (HHAIB) pretreatment on the change of antioxidant capacity, the degradation kinetics of red pigment, ascorbic acid in dehydrated red peppers during storage. Food Chemistry, 2018, 259, 65-72.	8.2	70
88	Evolution and modeling of colour changes of red pepper (<i>Capsicum Annuum</i> L.) during hot air drying. Journal of Food Engineering, 2018, 231, 101-108.	5.2	74
89	Pulsed vacuum drying (PVD) technology improves drying efficiency and quality of <i>Poria</i> cubes. Drying Technology, 2018, 36, 908-921.	3.1	33
90	Changes in the vitamin C content of mango with water state and ice crystals under state/phase transitions during frozen storage. Journal of Food Engineering, 2018, 222, 49-53.	5.2	33

#	ARTICLE	IF	CITATIONS
91	Red pepper (<i>Capsicum annuum</i> L.) drying: Effects of different drying methods on drying kinetics, physicochemical properties, antioxidant capacity, and microstructure. <i>Drying Technology</i> , 2018, 36, 893-907.	3.1	168
92	Effect of osmotic dehydration on desorption isotherms and glass transition temperatures of mango. <i>International Journal of Food Science and Technology</i> , 2018, 53, 2602-2609.	2.7	15
93	Innovative and Emerging Drying Technologies for Enhancing Food Quality. <i>Journal of Food Quality</i> , 2018, 2018, 1-2.	2.6	5
94	Artificial Neural Network Modeling of Drying Kinetics and Color Changes of Ginkgo Biloba Seeds during Microwave Drying Process. <i>Journal of Food Quality</i> , 2018, 2018, 1-8.	2.6	41
95	Energy efficient improvements in hot air drying by controlling relative humidity based on Weibull and Bi-Di models. <i>Food and Bioproducts Processing</i> , 2018, 111, 20-29.	3.6	54
96	Pulsed vacuum drying of rhizoma dioscoreae slices. <i>LWT - Food Science and Technology</i> , 2017, 80, 237-249.	5.2	49
97	Recent developments and trends in thermal blanching – A comprehensive review. <i>Information Processing in Agriculture</i> , 2017, 4, 101-127.	4.1	226
98	Far-infrared radiation heating assisted pulsed vacuum drying (FIR-PVD) of wolfberry (<i>Lycium barbarum</i>) Tj ETQq0 0 0 rgBT /Overlock 10 320-331.	3.6	121
99	Effect of osmotic dehydration pretreatment and glassy state storage on the quality attributes of frozen mangoes under long-term storage. <i>Journal of Food Science and Technology</i> , 2017, 54, 1527-1537.	2.8	18
100	Pulsed vacuum drying of wolfberry: Effects of infrared radiation heating and electronic panel contact heating methods on drying kinetics, color profile, and volatile compounds. <i>Drying Technology</i> , 2017, 35, 1312-1326.	3.1	42
101	Role of expert reviews in guiding future drying R&D. <i>Drying Technology</i> , 2017, 35, 525-526.	3.1	4
102	Pulsed vacuum drying of Thompson seedless grape: Effects of berry ripeness on physicochemical properties and drying characteristic. <i>Food and Bioproducts Processing</i> , 2017, 106, 117-126.	3.6	77
103	Blooming drying research in China. <i>Drying Technology</i> , 2017, 35, 1290-1290.	3.1	0
104	Effect of high-humidity hot air impingement blanching (HHAIB) on drying and quality of red pepper (<i>Capsicum annuum</i> L.). <i>Food Chemistry</i> , 2017, 220, 145-152.	8.2	132
105	Effects of various blanching methods on weight loss, enzymes inactivation, phytochemical contents, antioxidant capacity, ultrastructure and drying kinetics of red bell pepper (<i>Capsicum annuum</i> L.). <i>LWT - Food Science and Technology</i> , 2017, 77, 337-347.	5.2	154
106	Effects of state/phase transitions on the quality attributes of mango (<i>Mangifera indica</i> L.) during frozen storage. <i>International Journal of Food Science and Technology</i> , 2017, 52, 239-246.	2.7	29
107	Role of peer-review system in quality assurance of archival publications. <i>Drying Technology</i> , 2016, 34, 1901-1903.	3.1	0
