#	ARTICLE	IF	CITATIONS
1	Uniform Relativization. Lecture Notes in Computer Science, 2019, , 50-61.	1.3	0
2	Coherence of Reducibilities with Randomness Notions. Theory of Computing Systems, 2018, 62, 1599-1619.	1.1	0
3	Relation between the rate of convergence of strong law of large numbers and the rate of concentration of Bayesian prior in game-theoretic probability. Stochastic Processes and Their Applications, 2018, 128, 1466-1484.	0.9	2
4	USING ALMOST-EVERYWHERE THEOREMS FROM ANALYSIS TO STUDY RANDOMNESS. Bulletin of Symbolic Logic, 2016, 22, 305-331.	0.2	11
5	Reducibilities Relating to Schnorr Randomness. Theory of Computing Systems, 2016, 58, 441-462.	1.1	3
6	Unified characterizations of lowness properties via Kolmogorov complexity. Archive for Mathematical Logic, 2015, 54, 329-358.	0.3	3
7	Schnorr Triviality and Its Equivalent Notions. Theory of Computing Systems, 2015, 56, 465-486.	1.1	3
8	Derandomization in game-theoretic probability. Stochastic Processes and Their Applications, 2015, 125, 39-59.	0.9	4
9	Uniform Kurtz randomness. Journal of Logic and Computation, 2014, 24, 863-882.	0.8	4
10	The law of the iterated logarithm in game-theoretic probability with quadratic and stronger hedges. Stochastic Processes and Their Applications, 2013, 123, 3132-3152.	0.9	7
11	L1-Computability, Layerwise Computability and Solovay Reducibility. Computability, 2013, 2, 15-29.	0.3	11
12	The difference between optimality and universality. Logic Journal of the IGPL, 2012, 20, 222-234.	1.5	1
13	Convergence of random series and the rate of convergence of the strong law of large numbers in game-theoretic probability. Stochastic Processes and Their Applications, 2012, 122, 1-30.	0.9	10
14	Truth-table Schnorr randomness and truth-table reducible randomness. Mathematical Logic Quarterly, 2011, 57, 323-338.	0.2	17
