

# Elena A Dolgikh

## List of Publications by Citations

**Source:** <https://exaly.com/author-pdf/4969213/elena-a-dolgikh-publications-by-citations.pdf>

**Version:** 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

17  
papers

312  
citations

#	Paper	IF	Citations
17	Medicago LYK3, an entry receptor in rhizobial nodulation factor signaling. <i>Plant Physiology</i> , <b>2007</b> , 145, 183-91	6.6	232
16	Receptor-Like Kinase LYK9 in Pisum sativum L. Is the CERK1-Like Receptor that Controls Both Plant Immunity and AM Symbiosis Development. <i>International Journal of Molecular Sciences</i> , <b>2017</b> , 19,	6.3	27
15	Role of a receptor-like kinase K1 in pea Rhizobium symbiosis development. <i>Planta</i> , <b>2018</b> , 248, 1101-1120	4.7	15
14	The DELLA Proteins Influence the Expression of Cytokinin Biosynthesis and Response Genes During Nodulation. <i>Frontiers in Plant Science</i> , <b>2019</b> , 10, 432	6.2	9
13	-mediated transformation of L. roots as a tool for studying the mycorrhizal and root nodule symbioses. <i>PeerJ</i> , <b>2019</b> , 7, e6552	3.1	7
12	Mutational analysis indicates that abnormalities in rhizobial infection and subsequent plant cell and bacteroid differentiation in pea ( <i>Pisum sativum</i> ) nodules coincide with abnormal cytokinin responses and localization. <i>Annals of Botany</i> , <b>2020</b> , 125, 905-923	4.1	7
11	Identification of BELL Transcription Factors Involved in Nodule Initiation and Development in the Legumes and. <i>Plants</i> , <b>2020</b> , 9,	4.5	6
10	Structural Variations in LysM Domains of LysM-RLK K1 May Result in a Different Effect on Pea?Rhizobial Symbiosis Development. <i>International Journal of Molecular Sciences</i> , <b>2019</b> , 20,	6.3	5
9	LysM Receptor-Like Kinase LYK9 of L. May Regulate Plant Responses to Chitoooligosaccharides Differing in Structure. <i>International Journal of Molecular Sciences</i> , <b>2021</b> , 22,	6.3	2
8	Transcriptomic analysis of sym28 and sym29 supernodulating mutants of pea ( <i>Pisum sativum</i> L.) under complex inoculation with beneficial microorganisms. <i>Biological Communications</i> , <b>2021</b> , 66,	1.9	1
7	Phylogenetic and structural analysis of annexins in pea ( <i>Pisum sativum</i> L.) and their role in legume-rhizobial symbiosis development. <i>Vavilovskii Zhurnal Genetiki i Seleksii</i> , <b>2021</b> , 25, 502-513	0.9	0
6	The Role of Heterotrimeric G-Protein Beta Subunits During Nodulation in Gaertn and L.. <i>Frontiers in Plant Science</i> , <b>2021</b> , 12, 808573	6.2	0
5	Annexins and their role in the control of symbioses development in plants. <i>Ecological Genetics</i> , <b>2020</b> , 18, 293-300	0.5	
4	The role of universal regulators of plant growth and development the DELLA proteins in the control of symbiosis. <i>Ecological Genetics</i> , <b>2019</b> , 17, 33-41	0.5	
3	Role of the plant heterotrimeric G-proteins in the signal pathways regulation. <i>Ecological Genetics</i> , <b>2019</b> , 17, 43-54	0.5	
2	Studying the effect of tissue-specific expression of the K1 gene encoding LysM-receptor-like kinase on the development of symbiosis in peas. <i>BIO Web of Conferences</i> , <b>2020</b> , 23, 03005	0.4	
1	Searching for regulators that interact with BELL1 transcription factor and control the legume-rhizobial symbiosis development. <i>Ecological Genetics</i> , <b>2021</b> , 19, 37-45	0.5
