| #  | Article                                                                                                                                                                                                                                                       | IF   | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | Nature of the collagen synthesized by a transplanted chondrosarcoma. Archives of Biochemistry and Biophysics, 1975, 166, 181-186.                                                                                                                             | 1.4  | 250       |
| 2  | Stimulation of Collagen Formation by Insulin and Insulin-Like Growth Factor I in Cultures of Human Lung Fibroblasts*. Endocrinology, 1989, 124, 964-970.                                                                                                      | 1.4  | 218       |
| 3  | Myocardin-Related Transcription Factor A Regulates Conversion of Progenitors to Beige Adipocytes.<br>Cell, 2015, 160, 105-118.                                                                                                                                | 13.5 | 129       |
| 4  | Identification of the collagenous proteins synthesized by cultured cells from human skin.<br>Biochemistry, 1975, 14, 1589-1594.                                                                                                                               | 1.2  | 115       |
| 5  | Production of Procollagen by Human Fibroblasts in Culture. Proceedings of the National Academy of Sciences of the United States of America, 1972, 69, 3260-3262.                                                                                              | 3.3  | 109       |
| 6  | Extracellular matrix synthesis in vascular disease: hypertension, and atherosclerosis. Journal of Biomedical Research, 2014, 28, 25.                                                                                                                          | 0.7  | 109       |
| 7  | Myocardin-related Transcription Factor-A Complexes Activate Type I Collagen Expression in Lung Fibroblasts. Journal of Biological Chemistry, 2011, 286, 44116-44125.                                                                                          | 1.6  | 108       |
| 8  | Identification of collagen $\hat{l}\pm 1$ (I) trimer and normal type I collagen in a polyoma virus-induced mouse tumor. Archives of Biochemistry and Biophysics, 1977, 182, 33-41.                                                                            | 1.4  | 103       |
| 9  | A secreted phosphoprotein marker for neoplastic transformation of both epithelial and fibroblastic cells. Nature, 1983, 302, 714-715.                                                                                                                         | 13.7 | 101       |
| 10 | A Role of Myocardin Related Transcription Factor-A (MRTF-A) in Scleroderma Related Fibrosis. PLoS ONE, 2015, 10, e0126015.                                                                                                                                    | 1.1  | 77        |
| 11 | Collagen α1(I) Gene (COL1A1) Is Repressed by RFX Family. Journal of Biological Chemistry, 2005, 280, 21004-21014.                                                                                                                                             | 1.6  | 57        |
| 12 | Characterization of collagen precursors found in rat skin and rat bone. Biochemistry, 1977, 16, 2980-2985.                                                                                                                                                    | 1.2  | 56        |
| 13 | Interferon-Î <sup>3</sup> Induces Major Histocompatibility Class II Transactivator (CIITA), Which Mediates Collagen Repression and Major Histocompatibility Class II Activation by Human Aortic Smooth Muscle Cells. Circulation Research, 2006, 98, 472-479. | 2.0  | 55        |
| 14 | Major Histocompatibility Class II Transactivator (CIITA) Mediates Repression of Collagen (COL1A2) Transcription by Interferon $\hat{I}^3$ (IFN- $\hat{I}^3$ ). Journal of Biological Chemistry, 2004, 279, 41319-41332.                                       | 1.6  | 54        |
| 15 | The RFX Family Interacts at the Collagen (COL1A2) Start Site and Represses Transcription. Journal of Biological Chemistry, 2002, 277, 24926-24937.                                                                                                            | 1.6  | 52        |
| 16 | TNF-α upregulates the A2B adenosine receptor gene: The role of NAD(P)H oxidase 4. Biochemical and Biophysical Research Communications, 2008, 375, 292-296.                                                                                                    | 1.0  | 51        |
| 17 | Aortic Carboxypeptidase-like Protein (ACLP) Enhances Lung Myofibroblast Differentiation through Transforming Growth Factor Î <sup>2</sup> Receptor-dependent and -independent Pathways. Journal of Biological Chemistry, 2014, 289, 2526-2536.                | 1.6  | 50        |
| 18 | Characterization of collagen synthesized by normal and chemically transformed rat liver epithelial cell lines. Biochemistry, 1980, 19, 1820-1825.                                                                                                             | 1.2  | 45        |

| #  | Article                                                                                                                                                                                                                                                                         | IF  | Citations |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | DNA hypermethylation near the transcription start site of collagen alpha2(I) gene occurs in both cancer cell lines and primary colorectal cancers. Cancer Research, 2003, 63, 1789-97.                                                                                          | 0.4 | 42        |
| 20 | Regulatory Factor for X-box Family Proteins Differentially Interact with Histone Deacetylases to Repress Collagen $\hat{l}\pm 2(I)$ Gene (COL1A2) Expression. Journal of Biological Chemistry, 2006, 281, 9260-9270.                                                            | 1.6 | 40        |
| 21 | Binding of Lysyl Oxidase to Fibrils of Type I Collagen. Connective Tissue Research, 1985, 14, 109-119.                                                                                                                                                                          | 1.1 | 37        |
| 22 | A Methylation-responsive MDBP/RFX Site Is in the First Exon of the Collagen $\hat{l}\pm 2(I)$ Promoter. Journal of Biological Chemistry, 1999, 274, 36649-36655.                                                                                                                | 1.6 | 37        |
| 23 | The Accumulation of Type I Collagen Mrnas in Human Embryonic Lung Fibroblasts Stimulated by Transforming Growth Factor-Î <sup>2</sup> . Connective Tissue Research, 1990, 24, 237-247.                                                                                          | 1.1 | 36        |
| 24 | Interferon $\hat{I}^3$ Repression of Collagen (COL1A2) Transcription Is Mediated by the RFX5 Complex. Journal of Biological Chemistry, 2003, 278, 49134-49144.                                                                                                                  | 1.6 | 36        |
| 25 | Regulating the Activity of Class II Transactivator by Posttranslational Modifications: Exploring the Possibilities. Molecular and Cellular Biology, 2009, 29, 5639-5644.                                                                                                        | 1.1 | 32        |
| 26 | CIITA Mediates Interferon-Î <sup>3</sup> Repression of Collagen Transcription through Phosphorylation-dependent Interactions with Co-repressor Molecules. Journal of Biological Chemistry, 2008, 283, 1243-1256.                                                                | 1.6 | 29        |
| 27 | Expression of type I collagen mRNA in glomeruli of rats with passive Heymann nephritis. Kidney International, 1993, 43, 121-127.                                                                                                                                                | 2.6 | 26        |
| 28 | Collagen synthesis by cultures of stromal cells from normal human and keratoconus corneas. Biochemical and Biophysical Research Communications, 1979, 86, 465-472.                                                                                                              | 1.0 | 24        |
| 29 | Fibronectin and collagen of cultured skin fibroblasts in diabetes mellitus. Biochemical and Biophysical Research Communications, 1981, 100, 275-282.                                                                                                                            | 1.0 | 23        |
| 30 | Methylation in the initiation region of the first exon suppresses collagen pro-α2(I) gene transcription. Biochimica Et Biophysica Acta Gene Regulatory Mechanisms, 1998, 1443, 75-89.                                                                                           | 2.4 | 22        |
| 31 | Role of the pro- $\hat{l}\pm 2$ (I) COOH-terminal region in assembly of type I collagen: Truncation of the last 10 amino acid residues of pro- $\hat{l}\pm 2$ (I) chain prevents assembly of type I collagen heterotrimer. Journal of Cellular Biochemistry, 1998, 71, 216-232. | 1.2 | 22        |
| 32 | Peroxisome Proliferator-activated Receptor $\hat{I}^3$ Interacts with CIITAÂ-RFX5 Complex to Repress Type I Collagen Gene Expression. Journal of Biological Chemistry, 2007, 282, 26046-26056.                                                                                  | 1.6 | 21        |
| 33 | Role of the pro- $\hat{l}\pm 2$ (I) COOH-terminal region in assembly of type I collagen: Disruption of two intramolecular disulfide bonds in pro- $\hat{l}\pm 2$ (I) blocks assembly of type I collagen. Journal of Cellular Biochemistry, 1998, 71, 233-242.                   | 1.2 | 20        |
| 34 | Identification of collagens synthesized by cultures of normal human corneal and keratoconus stromal cells. Biochimica Et Biophysica Acta - General Subjects, 1983, 755, 318-325.                                                                                                | 1.1 | 17        |
| 35 | Discordant refulation of human type I collagen genes by prostaglandin E2. Biochimica Et Biophysica<br>Acta - Molecular Cell Research, 1992, 1135, 67-72.                                                                                                                        | 1.9 | 17        |
| 36 | Major Histocompatibility Class II Transactivator Expression in Smooth Muscle Cells from A2b Adenosine Receptor Knock-out Mice. Journal of Biological Chemistry, 2008, 283, 14213-14220.                                                                                         | 1.6 | 17        |

| #  | Article                                                                                                                                                                                                                 | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Discordant regulation of transforming growth factor- $\hat{l}^2$ receptors by prostaglandin E2. Biochimica Et Biophysica Acta Gene Regulatory Mechanisms, 1995, 1261, 19-24.                                            | 2.4 | 14        |
| 38 | Collagen and major histocompatibility class II expression in mesenchymal cells from CIITA hypomorphic mice. Molecular Immunology, 2007, 44, 1709-1721.                                                                  | 1.0 | 12        |
| 39 | The Effect of Class II Transactivator Mutations on Bleomycin-Induced Lung Inflammation and Fibrosis.<br>American Journal of Respiratory Cell and Molecular Biology, 2011, 44, 898-905.                                  | 1.4 | 12        |
| 40 | Expression of $\hat{l}\pm 2$ type I collagen in W8 cells increases cell adhesion and decreases colony formation in soft agar. Matrix Biology, 1994, 14, 21-30.                                                          | 1.5 | 11        |
| 41 | Transgenic mice with a mutated collagen promoter display normal response during bleomycin-induced fibrosis and possess neurological abnormalities. , 2000, 77, 135-148.                                                 |     | 10        |
| 42 | A member of the Y-box protein family interacts with an upstream element in the $\hat{l}\pm 1$ (I) collagen gene. Matrix Biology, 2001, 20, 527-541.                                                                     | 1.5 | 9         |
| 43 | Cell-specific expression of the $\hat{l}\pm 1(l)$ collagen promoter-CAT transgene in skin and lung: A response to TGF- $\hat{l}^2$ subcutaneous injection and bleomycin endotracheal instillation. , 1996, 63, 135-148. |     | 8         |
| 44 | Collagen synthesis in normal BHK cells and temperature-sensitive chemically transformed BHK cells. In Vitro, 1979, 15, 455-462.                                                                                         | 1.2 | 7         |
| 45 | Mechanisms for Noncoordinate Expression of Type 1 Collagen Alpha Chains. Annals of the New York Academy of Sciences, 1990, 580, 459-461.                                                                                | 1.8 | 6         |
| 46 | Aortic Carboxypeptidase‣ike Protein Enhances Lung Myofibroblast Differentiation. FASEB Journal, 2013, 27, 132.11.                                                                                                       | 0.2 | 0         |
