#	ARTICLE	IF	CITATIONS
1	Long-term endoscopic follow-up after sleeve gastrectomy. <i>Journal of Visceral Surgery</i> , 2022, 159, 39-42.	0.4	6
2	Abdominal Pain Severity Is Mainly Associated with Bloating Severity in Patients with Functional Bowel Disorders and Functional Abdominal Pain. <i>Digestive Diseases and Sciences</i> , 2022, 67, 3026-3035.	1.1	2
3	Biopsychosocial Model and Perceived Constipation Severity According to the Constipation Phenotype. <i>Digestive Diseases and Sciences</i> , 2021, 66, 3588-3596.	1.1	6
4	Personality of patients with fecal incontinence. <i>International Journal of Colorectal Disease</i> , 2021, 36, 331-337.	1.0	1
5	COLIGENTA treatment of small intestinal bacterial overgrowth. Results of an open study.. <i>Digestive and Liver Disease</i> , 2021, 53, 66-71.	0.4	0
6	Characteristics of patients with overlap functional gastrointestinal disorders. <i>Journal of Gastroenterology and Hepatology (Australia)</i> , 2021, 36, 2171-2179.	1.4	7
7	Lactose Sensitivity and Lactose Malabsorption: The 2 Faces of Lactose Intolerance. <i>Journal of Neurogastroenterology and Motility</i> , 2021, 27, 257-264.	0.8	9
8	FODMAP Consumption by Adults from the French Population-Based NutriNet-Sant� Cohort. <i>Journal of Nutrition</i> , 2021, 151, 3180-3186.	1.3	3
9	Functional gastrointestinal disorders as predictors of suicidal ideation. An observational study. <i>European Journal of Gastroenterology and Hepatology</i> , 2021, 33, e758-e765.	0.8	5
10	COVID-19 pandemic and lockdown stress consequences in people with and without Irritable Bowel Syndrome. <i>Ethics, Medicine and Public Health</i> , 2021, 18, 100660.	0.5	8
11	Self-Perceived Stress Is Associated With Chest Pain and Personality in Patients With Refractory Functional Gastrointestinal Disorders. <i>Journal of Nervous and Mental Disease</i> , 2021, Publish Ahead of Print, .	0.5	0
12	Association between Self-Reported Gluten Avoidance and Irritable Bowel Syndrome: Findings of the NutriNet-Sant� Study. <i>Nutrients</i> , 2021, 13, 4147.	1.7	3
13	Fermentable Oligo-, Di-, and Mono-Saccharides and Polyols (FODMAPs) Consumption and Irritable Bowel Syndrome in the French NutriNet-Sant� Cohort. <i>Nutrients</i> , 2021, 13, 4513.	1.7	4
14	Clinical, Physiological, and Psychological Correlates of the Improvement of Defecation during Menses in Women with Functional Gastrointestinal Disorders. <i>Visceral Medicine</i> , 2020, 36, 487-493.	0.5	1
15	Data Mining Approach for the Characterization of Functional Bowel Disorders According to Symptom Intensity Provides a Small Number of Homogenous Groups. <i>Digestive Diseases</i> , 2020, 38, 310-319.	0.8	10
16	Suivi endoscopique � long terme apr�s sleeve gastrectomie. <i>Journal De Chirurgie Visc�rale</i> , 2020, 159, 40-40.	0.0	0
17	Jackhammer esophagus: Clinical presentation, manometric diagnosis, and therapeutic results� Results from a multicenter French cohort. <i>Neurogastroenterology and Motility</i> , 2020, 32, e13918.	1.6	21
18	Psychological profiles of irritable bowel syndrome patients with different phenotypes. <i>Intestinal Research</i> , 2020, 18, 459-468.	1.0	6

#	ARTICLE	IF	CITATIONS
19	More movement with evaluating colonic transit in humans. <i>Neurogastroenterology and Motility</i> , 2019, 31, e13541.	1.6	21
20	Influence of Age and Body Mass Index on Total and Segmental Colonic Transit Times in Constipated Subjects. <i>Journal of Neurogastroenterology and Motility</i> , 2019, 25, 258-266.	0.8	14
21	Clinical and psychological characteristics of patients with globus. <i>Clinics and Research in Hepatology and Gastroenterology</i> , 2019, 43, 614-622.	0.7	6
22	Painful or Mild-Pain Constipation? A Clinically Useful Alternative to Classification as Irritable Bowel Syndrome with Constipation Versus Functional Constipation. <i>Digestive Diseases and Sciences</i> , 2018, 63, 1763-1773.	1.1	24
23	Food consumption and dietary intakes in 36,448 adults and their association with irritable bowel syndrome: Nutrinet-Sant� study. <i>Therapeutic Advances in Gastroenterology</i> , 2018, 11, 1756283X1774662.	1.4	35
24	Sleep quality and functional gastrointestinal disorders. A psychological issue. <i>Journal of Digestive Diseases</i> , 2018, 19, 84-92.	0.7	31
25	Change of appetite in patients with functional digestive disorder. Association with psychological disorders: A cross-sectional study. <i>Journal of Gastroenterology and Hepatology (Australia)</i> , 2018, 33, 195-202.	1.4	10
26	Clinical and psychological correlates of soiling in adult patients with functional gastrointestinal disorders. <i>International Journal of Colorectal Disease</i> , 2018, 33, 1793-1797.	1.0	5
27	Association Between Ultra-Processed Food Consumption and Functional Gastrointestinal Disorders: Results From the French NutriNet-Sant� Cohort. <i>American Journal of Gastroenterology</i> , 2018, 113, 1217-1228.	0.2	106
28	Is-it possible to distinguish irritable bowel syndrome with constipation from functional constipation?. <i>Techniques in Coloproctology</i> , 2017, 21, 125-132.	0.8	12
29	Osteopathic management of chronic constipation in women patients. Results of a pilot study. <i>Clinics and Research in Hepatology and Gastroenterology</i> , 2017, 41, 602-611.	0.7	20
30	Both men and women with functional gastrointestinal disorders suffer from a high incidence of sexual dysfunction. <i>Clinics and Research in Hepatology and Gastroenterology</i> , 2017, 41, e93-e96.	0.7	6
31	Clinical, psychological, and physiological correlates of patients who defecate after meal. <i>European Journal of Gastroenterology and Hepatology</i> , 2017, 29, 174-180.	0.8	1
32	Western Dietary Pattern Is Associated with Irritable Bowel Syndrome in the French NutriNet Cohort. <i>Nutrients</i> , 2017, 9, 986.	1.7	33
33	Association between self-reported vegetarian diet and the irritable bowel syndrome in the French NutriNet cohort. <i>PLoS ONE</i> , 2017, 12, e0183039.	1.1	12
34	Place de lâ€™ost�opathie dans le traitement des troubles fonctionnels digestifs. <i>HEGEL - HEpato-GastroEnt�rologie Lib�rale</i> , 2017, N� 4, 369-370.	0.0	0
35	Decreased Prevalence of Nonspecific Functional Bowel Disorders and Increased Constipation in Patients after Sleeve Gastrectomy or Gastric Banding. <i>Bariatric Surgical Patient Care</i> , 2016, 11, 158-164.	0.1	4
36	Randomized clinical trial. <i>European Journal of Gastroenterology and Hepatology</i> , 2016, 28, 1087-1093.	0.8	2

#	ARTICLE	IF	CITATIONS
37	Su1579 RFIDTRANSIT - A New Non-Irradiant Method of Measure of Total and Segmental Colonic Transit Time. <i>Gastroenterology</i> , 2016, 150, S531-S532.	0.6	1
38	Difficult defecation in constipated patients and its relationship to colonic disorders. <i>International Journal of Colorectal Disease</i> , 2016, 31, 685-691.	1.0	8
39	Body mass index association with functional gastrointestinal disorders: differences between genders. Results from a study in a tertiary center. <i>Journal of Gastroenterology</i> , 2016, 51, 337-345.	2.3	18
40	Are floating stools associated with specific functional bowel disorders?. <i>European Journal of Gastroenterology and Hepatology</i> , 2015, 27, 968-973.	0.8	4
41	A Randomized, Double-Blind, Placebo-Controlled, Phase 3 Trial to Evaluate the Efficacy, Safety, and Tolerability of Prucalopride in Men With Chronic Constipation. <i>American Journal of Gastroenterology</i> , 2015, 110, 741-748.	0.2	83
42	Functional Gastrointestinal Disorders in Obese Patients. The Importance of the Enrollment Source. <i>Obesity Surgery</i> , 2015, 25, 2143-2152.	1.1	20
43	Functional gastrointestinal disorders in 35,447 adults and their association with body mass index. <i>Alimentary Pharmacology and Therapeutics</i> , 2015, 41, 758-767.	1.9	83
44	How many segments are necessary to characterize delayed colonic transit time?. <i>International Journal of Colorectal Disease</i> , 2015, 30, 1381-1389.	1.0	19
45	Patients with irritable bowel syndrome and constipation are more depressed than patients with functional constipation. <i>Digestive and Liver Disease</i> , 2014, 46, 213-218.	0.4	24
46	Changes of lipid and fatty acid absorption induced by high dose of citric acid ester and lecithin emulsifiers. <i>International Journal of Food Sciences and Nutrition</i> , 2014, 65, 728-732.	1.3	2
47	Treatment of refractory irritable bowel syndrome with visceral osteopathy: Short-term and long-term results of a randomized trial. <i>Journal of Digestive Diseases</i> , 2013, 14, 654-661.	0.7	53
48	Anxiety and depression as markers of multiplicity of sites of functional gastrointestinal disorders: A gender issue?. <i>Clinics and Research in Hepatology and Gastroenterology</i> , 2013, 37, 422-430.	0.7	54
49	Agreement between indirect calorimetry and traditional tests of lactose malabsorption. <i>Digestive and Liver Disease</i> , 2013, 45, 727-732.	0.4	4
50	Abdominal pain localization is associated with non-diarrheic Rome functional gastrointestinal disorders. <i>Neurogastroenterology and Motility</i> , 2013, 25, 686.	1.6	10
51	Prevalence and Co-occurrence of Upper and Lower Functional Gastrointestinal Symptoms in Patients Eligible for Bariatric Surgery. <i>Obesity Surgery</i> , 2012, 22, 403-410.	1.1	50
52	Metformin and digestive disorders. <i>Diabetes and Metabolism</i> , 2011, 37, 90-96.	1.4	135
53	Non-compliance does not impair qualitative evaluation of colonic transit time. <i>Neurogastroenterology and Motility</i> , 2011, 23, 103-108.	1.6	8
54	Is the Colonic Response to Food Different in IBS in Contrast to Simple Constipation or Diarrhea Without Abdominal Pain?. <i>Digestive Diseases and Sciences</i> , 2011, 56, 2947-2956.	1.1	14

#	ARTICLE	IF	CITATIONS
55	Colonic response to food in constipation. International Journal of Colorectal Disease, 2006, 21, 826-833.	1.0	20
56	Different segmental transit times in patients with irritable bowel syndrome and "normal" colonic transit time: is there a correlation with symptoms?. Techniques in Coloproctology, 2006, 10, 287-296.	0.8	48
57	Anismus: a marker of multi-site functional disorders?. International Journal of Colorectal Disease, 2004, 19, 374-379.	1.0	39
58	Importance of colonic transit evaluation in the management of fecal incontinence. International Journal of Colorectal Disease, 2002, 17, 412-417.	1.0	26
59	Error analysis of classic colonic transit time estimates. American Journal of Physiology - Renal Physiology, 2000, 279, G520-G527.	1.6	47
60	Effects of oral pinaverium bromide on colonic response to food in irritable bowel syndrome patients. Biomedicine and Pharmacotherapy, 2000, 54, 381-387.	2.5	17
61	Anal pressure waves in patients with irritable bowel syndrome. Diseases of the Colon and Rectum, 1999, 42, 1487-1496.	0.7	6
62	A simplified way to assess colorectal transit time. Techniques in Coloproctology, 1999, 3, 71-73.	0.8	4
63	Simple clinical assessment of colonic response to food. International Journal of Colorectal Disease, 1998, 13, 217-222.	1.0	17
64	Relationship between Acid Neutralization Capacity of Saliva and Gastro-Oesophageal Reflux. Archives of Physiology and Biochemistry, 1997, 105, 19-26.	1.0	30
65	Methodological Factors affecting Esophageal Clearance. Archives of Physiology and Biochemistry, 1996, 104, 8-13.	1.0	1
66	Day-Night Patterns of Gastroesophageal Reflux. Chronobiology International, 1995, 12, 267-277.	0.9	1
67	Compartmental Analysis of Colonic Transit Reveals Abnormalities in Constipated Patients with Normal Transit. Clinical Science, 1995, 89, 129-135.	1.8	23
68	A new system for gastric emptying analysis using impedance measurement. Archives Internationales De Physiologie, De Biochimie Et De Biophysique, 1994, 102, 71-76.	0.1	1
69	A new method for the measurement of tremor at rest. Archives Internationales De Physiologie, De Biochimie Et De Biophysique, 1992, 100, 73-78.	0.1	19
70	What is the meaning of colorectal transit time measurement?. Diseases of the Colon and Rectum, 1992, 35, 773-782.	0.7	178
71	Idiopathic constipation by colonic dysfunction. Digestive Diseases and Sciences, 1989, 34, 1428-1433.	1.1	95
72	Megarectum. Digestive Diseases and Sciences, 1988, 33, 1164-1174.	1.1	66
