

Donald R Ort

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/4998055/donald-r-ort-publications-by-year.pdf>

Version: 2024-04-10

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

101 papers	14,501 citations	47 h-index	104 g-index
104 ext. papers	16,997 ext. citations	9.4 avg, IF	6.73 L-index

#	Paper	IF	Citations
101	Photoautotrophic organic acid production: Glycolic acid production by microalgal cultivation. <i>Chemical Engineering Journal</i> , 2021 , 133636	14.7	2
100	Alternative pathway to photorespiration protects growth and productivity at elevated temperatures in a model crop. <i>Plant Biotechnology Journal</i> , 2021 ,	11.6	6
99	Microalgal metabolic engineering strategies for the production of fuels and chemicals.. <i>Bioresource Technology</i> , 2021 , 345, 126529	11	3
98	Perspectives on improving light distribution and light use efficiency in crop canopies. <i>Plant Physiology</i> , 2021 , 185, 34-48	6.6	12
97	A role for differential Rubisco activase isoform expression in C4 bioenergy grasses at high temperature. <i>GCB Bioenergy</i> , 2021 , 13, 211-223	5.6	9
96	High sink strength prevents photosynthetic down-regulation in cassava grown at elevated CO2 concentration. <i>Journal of Experimental Botany</i> , 2021 , 72, 542-560	7	10
95	Glycolate production by a <i>Chlamydomonas reinhardtii</i> mutant lacking carbon-concentrating mechanism. <i>Journal of Biotechnology</i> , 2021 , 335, 39-46	3.7	3
94	L-malic acid production from xylose by engineered <i>Saccharomyces cerevisiae</i> . <i>Biotechnology Journal</i> , 2021 , e2000431	5.6	2
93	Soybean photosynthetic and biomass responses to carbon dioxide concentrations ranging from pre-industrial to the distant future. <i>Journal of Experimental Botany</i> , 2020 , 71, 3690-3700	7	4
92	Arabidopsis plants expressing only the redox-regulated Rca-Isoform have constrained photosynthesis and plant growth. <i>Plant Journal</i> , 2020 , 103, 2250-2262	6.9	1
91	Photosynthetic Efficiency Improvement 2020 , 256-256		
90	A wish list for synthetic biology in photosynthesis research. <i>Journal of Experimental Botany</i> , 2020 , 71, 2219-2225	7	11
89	A phytophotonic approach to enhanced photosynthesis. <i>Energy and Environmental Science</i> , 2020 , 13, 4794-4807	35.4	0
88	Towards a multiscale crop modelling framework for climate change adaptation assessment. <i>Nature Plants</i> , 2020 , 6, 338-348	11.5	72
87	In vivo evidence for a regulatory role of phosphorylation of Rubisco activase at the Thr78 site. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2019 , 116, 18723-18731	11.5	7
86	Perspective: Understanding the Intersection of Climate/Environmental Change, Health, Agriculture, and Improved Nutrition - A Case Study: Type 2 Diabetes. <i>Advances in Nutrition</i> , 2019 , 10, 731-738	10	2
85	Carbon assimilation in crops at high temperatures. <i>Plant, Cell and Environment</i> , 2019 , 42, 2750-2758	8.4	30

84	Yield response of field-grown soybean exposed to heat waves under current and elevated [CO ₂]. <i>Global Change Biology</i> , 2019 , 25, 4352-4368	11.4	19
83	Economical synthesis of C-labeled aminolevulinic acid for specific in situ labeling of plant tetrapyrroles. <i>Photosynthesis Research</i> , 2019 , 142, 241-247	3.7	
82	Are we approaching a water ceiling to maize yields in the United States?. <i>Ecosphere</i> , 2019 , 10, e02773	3.1	24
81	Synthetic glycolate metabolism pathways stimulate crop growth and productivity in the field. <i>Science</i> , 2019 , 363,	33.3	272
80	Photosystem II Subunit S overexpression increases the efficiency of water use in a field-grown crop. <i>Nature Communications</i> , 2018 , 9, 868	17.4	119
79	Canopy warming accelerates development in soybean and maize, offsetting the delay in soybean reproductive development by elevated CO ₂ concentrations. <i>Plant, Cell and Environment</i> , 2018 , 41, 2806-2820	8.4	10
78	Optimizing photorespiration for improved crop productivity. <i>Journal of Integrative Plant Biology</i> , 2018 , 60, 1217-1230	8.3	32
77	Chlorophyll Can Be Reduced in Crop Canopies with Little Penalty to Photosynthesis. <i>Plant Physiology</i> , 2018 , 176, 1215-1232	6.6	54
76	The Impacts of Fluctuating Light on Crop Performance. <i>Plant Physiology</i> , 2018 , 176, 990-1003	6.6	98
75	Leaf and canopy scale drivers of genotypic variation in soybean response to elevated carbon dioxide concentration. <i>Global Change Biology</i> , 2017 , 23, 3908-3920	11.4	17
74	Simulated heat waves during maize reproductive stages alter reproductive growth but have no lasting effect when applied during vegetative stages. <i>Agriculture, Ecosystems and Environment</i> , 2017 , 240, 162-170	5.7	47
73	Photosynthesis: ancient, essential, complex, diverse and in need of improvement in a changing world. <i>New Phytologist</i> , 2017 , 213, 43-47	9.8	21
72	Uncertainty in measurements of the photorespiratory CO ₂ compensation point and its impact on models of leaf photosynthesis. <i>Photosynthesis Research</i> , 2017 , 132, 245-255	3.7	13
71	Bile Acid Sodium Symporter BASS6 Can Transport Glycolate and Is Involved in Photorespiratory Metabolism in. <i>Plant Cell</i> , 2017 , 29, 808-823	11.6	39
70	The impact of modifying photosystem antenna size on canopy photosynthetic efficiency-Development of a new canopy photosynthesis model scaling from metabolism to canopy level processes. <i>Plant, Cell and Environment</i> , 2017 , 40, 2946-2957	8.4	51
69	Recycling Carbon Dioxide during Xylose Fermentation by Engineered <i>Saccharomyces cerevisiae</i> . <i>ACS Synthetic Biology</i> , 2017 , 6, 276-283	5.7	41
68	Photosynthesis, Light Use Efficiency, and Yield of Reduced-Chlorophyll Soybean Mutants in Field Conditions. <i>Frontiers in Plant Science</i> , 2017 , 8, 549	6.2	58
67	The Role of Sink Strength and Nitrogen Availability in the Down-Regulation of Photosynthetic Capacity in Field-Grown L. at Elevated CO ₂ Concentration. <i>Frontiers in Plant Science</i> , 2017 , 8, 998	6.2	45

66	Expression of cyanobacterial FBP/SBPase in soybean prevents yield depression under future climate conditions. <i>Journal of Experimental Botany</i> , 2017 , 68, 715-726	7	43
65	Light sheet microscopy reveals more gradual light attenuation in light-green versus dark-green soybean leaves. <i>Journal of Experimental Botany</i> , 2016 , 67, 4697-709	7	26
64	Intensifying drought eliminates the expected benefits of elevated carbon dioxide for soybean. <i>Nature Plants</i> , 2016 , 2, 16132	11.5	172
63	An improved approach for measuring the impact of multiple CO ₂ conductances on the apparent photorespiratory CO ₂ compensation point through slope-intercept regression. <i>Plant, Cell and Environment</i> , 2016 , 39, 1198-203	8.4	14
62	The Costs of Photorespiration to Food Production Now and in the Future. <i>Annual Review of Plant Biology</i> , 2016 , 67, 107-29	30.7	182
61	Manipulating photorespiration to increase plant productivity: recent advances and perspectives for crop improvement. <i>Journal of Experimental Botany</i> , 2016 , 67, 2977-88	7	90
60	Colin A. Wraight, 1945-2014. <i>Photosynthesis Research</i> , 2016 , 127, 237-56	3.7	6
59	Investigating the Control of Chlorophyll Degradation by Genomic Correlation Mining. <i>PLoS ONE</i> , 2016 , 11, e0162327	3.7	9
58	The Plastid Casein Kinase 2 Phosphorylates Rubisco Activase at the Thr-78 Site but Is Not Essential for Regulation of Rubisco Activation State. <i>Frontiers in Plant Science</i> , 2016 , 7, 404	6.2	11
57	Physiological evidence for plasticity in glycolate/glycerate transport during photorespiration. <i>Photosynthesis Research</i> , 2016 , 129, 93-103	3.7	24
56	Photosynthetic terpene hydrocarbon production for fuels and chemicals. <i>Plant Biotechnology Journal</i> , 2015 , 13, 137-46	11.6	39
55	The influence of photosynthetic acclimation to rising CO ₂ and warmer temperatures on leaf and canopy photosynthesis models. <i>Global Biogeochemical Cycles</i> , 2015 , 29, 194-206	5.9	35
54	Redesigning photosynthesis to sustainably meet global food and bioenergy demand. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015 , 112, 8529-36	11.5	515
53	Photosynthetic energy conversion efficiency: setting a baseline for gauging future improvements in important food and biofuel crops. <i>Plant Physiology</i> , 2015 , 168, 383-92	6.6	43
52	Canopy warming caused photosynthetic acclimation and reduced seed yield in maize grown at ambient and elevated [CO ₂]. <i>Global Change Biology</i> , 2015 , 21, 4237-49	11.4	86
51	Improved method for measuring the apparent CO ₂ photocompensation point resolves the impact of multiple internal conductances to CO ₂ to net gas exchange. <i>Plant, Cell and Environment</i> , 2015 , 38, 2462-74	8.4	38
50	Heat waves imposed during early pod development in soybean (<i>Glycine max</i>) cause significant yield loss despite a rapid recovery from oxidative stress. <i>Global Change Biology</i> , 2015 , 21, 3114-25	11.4	70
49	Botany. Limits on yields in the Corn Belt. <i>Science</i> , 2014 , 344, 484-5	33.3	93

48	Biochemical acclimation, stomatal limitation and precipitation patterns underlie decreases in photosynthetic stimulation of soybean (<i>Glycine max</i>) at elevated [CO ₂] and temperatures under fully open air field conditions. <i>Plant Science</i> , 2014 , 226, 136-46	5.3	32
47	Impacts of rising tropospheric ozone on photosynthesis and metabolite levels on field grown soybean. <i>Plant Science</i> , 2014 , 226, 147-61	5.3	39
46	Inconsistency of mesophyll conductance estimate causes the inconsistency for the estimates of maximum rate of Rubisco carboxylation among the linear, rectangular and non-rectangular hyperbola biochemical models of leaf photosynthesis--a case study of CO ₂ enrichment and leaf aging effects in soybean. <i>Plant Science</i> , 2014 , 226, 49-60	5.3	12
45	Identical substitutions in magnesium chelatase paralogs result in chlorophyll-deficient soybean mutants. <i>G3: Genes, Genomes, Genetics</i> , 2014 , 5, 123-31	3.2	33
44	Leaf hydraulic conductance declines in coordination with photosynthesis, transpiration and leaf water status as soybean leaves age regardless of soil moisture. <i>Journal of Experimental Botany</i> , 2014 , 65, 6617-27	7	41
43	Energy and carbon accounting to compare bioenergy crops. <i>Current Opinion in Biotechnology</i> , 2013 , 24, 369-75	11.4	12
42	e-Photosynthesis: a comprehensive dynamic mechanistic model of C3 photosynthesis: from light capture to sucrose synthesis. <i>Plant, Cell and Environment</i> , 2013 , 36, 1711-27	8.4	84
41	Global warming can negate the expected CO ₂ stimulation in photosynthesis and productivity for soybean grown in the Midwestern United States. <i>Plant Physiology</i> , 2013 , 162, 410-23	6.6	124
40	A meta-analysis of responses of canopy photosynthetic conversion efficiency to environmental factors reveals major causes of yield gap. <i>Journal of Experimental Botany</i> , 2013 , 64, 3723-33	7	32
39	Cassava abiotic FACE: Greater than expected yield stimulation of cassava (<i>Manihot esculenta</i>) by future CO ₂ levels. <i>Global Change Biology</i> , 2012 , 18, 2661-2675	11.4	59
38	Elements of a dynamic systems model of canopy photosynthesis. <i>Current Opinion in Plant Biology</i> , 2012 , 15, 237-44	9.9	64
37	Examining Cassava's Potential to Enhance Food Security Under Climate Change. <i>Tropical Plant Biology</i> , 2012 , 5, 30-38	1.6	44
36	Greater antioxidant and respiratory metabolism in field-grown soybean exposed to elevated O ₃ under both ambient and elevated CO ₂ . <i>Plant, Cell and Environment</i> , 2012 , 35, 169-84	8.4	71
35	Differential responses in two varieties of winter wheat to elevated ozone concentration under fully open-air field conditions. <i>Global Change Biology</i> , 2011 , 17, 580-591	11.4	127
34	Comparing photosynthetic and photovoltaic efficiencies and recognizing the potential for improvement. <i>Science</i> , 2011 , 332, 805-9	33.3	1143
33	Over-expressing the C(3) photosynthesis cycle enzyme Sedoheptulose-1-7 Bisphosphatase improves photosynthetic carbon gain and yield under fully open air CO(2) fumigation (FACE). <i>BMC Plant Biology</i> , 2011 , 11, 123	5.3	124
32	Optimizing antenna size to maximize photosynthetic efficiency. <i>Plant Physiology</i> , 2011 , 155, 79-85	6.6	205
31	How do we improve crop production in a warming world?. <i>Plant Physiology</i> , 2010 , 154, 526-30	6.6	169

30	Improving photosynthetic efficiency for greater yield. <i>Annual Review of Plant Biology</i> , 2010 , 61, 235-61	30.7	1039
29	More than taking the heat: crops and global change. <i>Current Opinion in Plant Biology</i> , 2010 , 13, 241-8	9.9	255
28	Genomic basis for stimulated respiration by plants growing under elevated carbon dioxide. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2009 , 106, 3597-602	11.5	172
27	Elevated CO ₂ effects on plant carbon, nitrogen, and water relations: six important lessons from FACE. <i>Journal of Experimental Botany</i> , 2009 , 60, 2859-76	7	1091
26	Gene expression profiling: opening the black box of plant ecosystem responses to global change. <i>Global Change Biology</i> , 2009 , 15, 1201-1213	11.4	33
25	FACE-ing the global change: Opportunities for improvement in photosynthetic radiation use efficiency and crop yield. <i>Plant Science</i> , 2009 , 177, 511-522	5.3	45
24	FACE-ing the facts: inconsistencies and interdependence among field, chamber and modeling studies of elevated [CO ₂] impacts on crop yield and food supply. <i>New Phytologist</i> , 2008 , 179, 5-9	9.8	210
23	What is the maximum efficiency with which photosynthesis can convert solar energy into biomass?. <i>Current Opinion in Biotechnology</i> , 2008 , 19, 153-9	11.4	685
22	Decreases in stomatal conductance of soybean under open-air elevation of [CO ₂] are closely coupled with decreases in ecosystem evapotranspiration. <i>Plant Physiology</i> , 2007 , 143, 134-44	6.6	193
21	Photosynthesis, productivity, and yield of maize are not affected by open-air elevation of CO ₂ concentration in the absence of drought. <i>Plant Physiology</i> , 2006 , 140, 779-90	6.6	378
20	Food for thought: lower-than-expected crop yield stimulation with rising CO ₂ concentrations. <i>Science</i> , 2006 , 312, 1918-21	33.3	1086
19	Increased C availability at elevated carbon dioxide concentration improves N assimilation in a legume. <i>Plant, Cell and Environment</i> , 2006 , 29, 1651-8	8.4	148
18	Long-term growth of soybean at elevated [CO ₂] does not cause acclimation of stomatal conductance under fully open-air conditions. <i>Plant, Cell and Environment</i> , 2006 , 29, 1794-800	8.4	93
17	Hourly and seasonal variation in photosynthesis and stomatal conductance of soybean grown at future CO ₂ and ozone concentrations for 3 years under fully open-air field conditions. <i>Plant, Cell and Environment</i> , 2006 , 29, 2077-90	8.4	117
16	Can improvement in photosynthesis increase crop yields?. <i>Plant, Cell and Environment</i> , 2006 , 29, 315-30	8.4	922
15	The role of pheophorbide a oxygenase expression and activity in the canola green seed problem. <i>Plant Physiology</i> , 2006 , 142, 88-97	6.6	43
14	The growth of soybean under free air [CO ₂] enrichment (FACE) stimulates photosynthesis while decreasing in vivo Rubisco capacity. <i>Planta</i> , 2005 , 220, 434-46	4.7	157
13	Chlorophyll a fluorescence induction kinetics in leaves predicted from a model describing each discrete step of excitation energy and electron transfer associated with Photosystem II. <i>Planta</i> , 2005 , 223, 114-133	4.7	213

12	The slow reversibility of photosystem II thermal energy dissipation on transfer from high to low light may cause large losses in carbon gain by crop canopies: a theoretical analysis. <i>Journal of Experimental Botany</i> , 2004 , 55, 1167-75	7	204
11	An in vivo analysis of the effect of season-long open-air elevation of ozone to anticipated 2050 levels on photosynthesis in soybean. <i>Plant Physiology</i> , 2004 , 135, 2348-57	6.6	121
10	Rising atmospheric carbon dioxide: plants FACE the future. <i>Annual Review of Plant Biology</i> , 2004 , 55, 591-628	30.7	1251
9	A photoprotective role for O(2) as an alternative electron sink in photosynthesis?. <i>Current Opinion in Plant Biology</i> , 2002 , 5, 193-8	9.9	363
8	Chilling-Induced Limitations on Photosynthesis in Warm Climate Plants: Contrasting Mechanisms.. <i>Seibutsu Kankyo Chosetsu [Environment Control in Biology</i> , 2002 , 40, 7-18		7
7	Variation in measured values of photosynthetic quantum yield in ecophysiological studies. <i>Oecologia</i> , 2001 , 128, 15-23	2.9	121
6	When there is too much light. <i>Plant Physiology</i> , 2001 , 125, 29-32	6.6	262
5	Diurnal regulation of photosynthesis in understory saplings. <i>New Phytologist</i> , 2000 , 145, 39-49	9.8	40
4	Differential effects of chilling-induced photooxidation on the redox regulation of photosynthetic enzymes. <i>Biochemistry</i> , 2000 , 39, 6679-88	3.2	70
3	Chilling delays circadian pattern of sucrose phosphate synthase and nitrate reductase activity in tomato. <i>Plant Physiology</i> , 1998 , 118, 149-58	6.6	69
2	The recovery of photosynthesis in tomato subsequent to chilling exposure. <i>Photosynthesis Research</i> , 1985 , 6, 121-32	3.7	44
1	Cooperation among electron-transfer complexes in ATP synthesis in chloroplasts. <i>FEBS Journal</i> , 1985 , 149, 503-10		24
