#	ARTICLE	IF	CITATIONS
1	Wet-only sequential deposition in a rural area in north-eastern Spain. <i>Tellus, Series B: Chemical and Physical Meteorology</i> , 2022, 53, 40.	0.8	10
2	Variability of sub-micrometer particle number size distributions and concentrations in the Western Mediterranean regional background. <i>Tellus, Series B: Chemical and Physical Meteorology</i> , 2022, 65, 19243.	0.8	23
3	How can ventilation be improved on public transportation buses? Insights from CO ₂ measurements. <i>Environmental Research</i> , 2022, 205, 112451.	3.7	17
4	Organic and Elemental Carbon in the Urban Background in an Eastern Mediterranean City. <i>Atmosphere</i> , 2022, 13, 197.	1.0	8
5	Primary and secondary organic winter aerosols in Mediterranean cities under different mixing layer conditions (Barcelona and Granada). <i>Environmental Science and Pollution Research</i> , 2022, 29, 36255-36272.	2.7	10
6	European aerosol phenomenology α^{\sim} 8: Harmonised source apportionment of organic aerosol using 22 Year-long ACSM/AMS datasets. <i>Environment International</i> , 2022, 166, 107325.	4.8	41
7	2011–2020 trends of urban and regional ammonia in and around Barcelona, NE Spain. <i>Chemosphere</i> , 2022, 304, 135347.	4.2	8
8	Absorption enhancement of black carbon particles in a Mediterranean city and countryside: effect of particulate matter chemistry, ageing and trend analysis. <i>Atmospheric Chemistry and Physics</i> , 2022, 22, 8439-8456.	1.9	10
9	Trends in primary and secondary particle number concentrations in urban and regional environments in NE Spain. <i>Atmospheric Environment</i> , 2021, 244, 117982.	1.9	5
10	Source contribution and origin of PM ₁₀ and arsenic in a complex industrial region (Huelva, SW Spain). <i>Environmental Pollution</i> , 2021, 274, 116268.	3.7	11
11	Applicability of benchtop multi-wavelength polar photometers to off-line measurements of the Multi-Angle Absorption Photometer (MAAP) samples. <i>Journal of Aerosol Science</i> , 2021, 152, 105701.	1.8	5
12	Aircraft vertical profiles during summertime regional and Saharan dust scenarios over the north-western Mediterranean basin: aerosol optical and physical properties. <i>Atmospheric Chemistry and Physics</i> , 2021, 21, 431-455.	1.9	7
13	Tracing surface and airborne SARS-CoV-2 RNA inside public buses and subway trains. <i>Environment International</i> , 2021, 147, 106326.	4.8	119
14	Anthropogenic Perturbations to the Atmospheric Molybdenum Cycle. <i>Global Biogeochemical Cycles</i> , 2021, 35, e2020GB006787.	1.9	12
15	The effect of meteorological conditions and atmospheric composition in the occurrence and development of new particle formation (NPF) events in Europe. <i>Atmospheric Chemistry and Physics</i> , 2021, 21, 3345-3370.	1.9	21
16	The case of a southern European glacier which survived Roman and medieval warm periods but is disappearing under recent warming. <i>Cryosphere</i> , 2021, 15, 1157-1172.	1.5	11
17	A European aerosol phenomenology - 7: High-time resolution chemical characteristics of submicron particulate matter across Europe. <i>Atmospheric Environment: X</i> , 2021, 10, 100108.	0.8	23
18	Increase in secondary organic aerosol in an urban environment. <i>Atmospheric Chemistry and Physics</i> , 2021, 21, 8323-8339.	1.9	25

#	ARTICLE	IF	CITATIONS
19	Quantifying traffic, biomass burning and secondary source contributions to atmospheric particle number concentrations at urban and suburban sites. <i>Science of the Total Environment</i> , 2021, 768, 145282.	3.9	26
20	2005–2018 trends in ozone peak concentrations and spatial contributions in the Guadalquivir Valley, southern Spain. <i>Atmospheric Environment</i> , 2021, 254, 118385.	1.9	13
21	Overview of the SLOPE I and II campaigns: aerosol properties retrieved with lidar and sun–sky photometer measurements. <i>Atmospheric Chemistry and Physics</i> , 2021, 21, 9269-9287.	1.9	12
22	Lessons from the COVID-19 air pollution decrease in Spain: Now what?. <i>Science of the Total Environment</i> , 2021, 779, 146380.	3.9	80
23	Understanding the local and remote source contributions to ambient O ₃ during a pollution episode using a combination of experimental approaches in the Guadalquivir valley, southern Spain. <i>Science of the Total Environment</i> , 2021, 777, 144579.	3.9	6
24	Short-term health effects from outdoor exposure to biomass burning emissions: A review. <i>Science of the Total Environment</i> , 2021, 781, 146739.	3.9	64
25	A phenomenology of new particle formation (NPF) at 13 European sites. <i>Atmospheric Chemistry and Physics</i> , 2021, 21, 11905-11925.	1.9	13
26	Determination of the multiple-scattering correction factor and its cross-sensitivity to scattering and wavelength dependence for different AE33 Aethalometer filter tapes: a multi-instrumental approach. <i>Atmospheric Measurement Techniques</i> , 2021, 14, 6335-6355.	1.2	31
27	Associations between sources of particle number and mortality in four European cities. <i>Environment International</i> , 2021, 155, 106662.	4.8	16
28	Compositional changes of PM _{2.5} in NE Spain during 2009–2018: A trend analysis of the chemical composition and source apportionment. <i>Science of the Total Environment</i> , 2021, 795, 148728.	3.9	18
29	Short-term effect of air pollution on attention function in adolescents (ATENCIÓN): A randomized controlled trial in high schools in Barcelona, Spain. <i>Environment International</i> , 2021, 156, 106614.	4.8	4
30	Seasonality of the particle number concentration and size distribution: a global analysis retrieved from the network of Global Atmosphere Watch (GAW) near-surface observatories. <i>Atmospheric Chemistry and Physics</i> , 2021, 21, 17185-17223.	1.9	31
31	Switzerland's PM ₁₀ and PM _{2.5} environmental increments show the importance of non-exhaust emissions. <i>Atmospheric Environment: X</i> , 2021, 12, 100145.	0.8	3
32	Public Transport Strikes and Their Relationships With Air Pollution, Mortality, and Hospital Admissions. <i>American Journal of Epidemiology</i> , 2020, 189, 116-119.	1.6	1
33	Source apportionment of particle number size distribution in urban background and traffic stations in four European cities. <i>Environment International</i> , 2020, 135, 105345.	4.8	106
34	Evaluation of the Semi-Continuous OCEC analyzer performance with the EUSAAR2 protocol. <i>Science of the Total Environment</i> , 2020, 747, 141266.	3.9	22
35	Chemistry of dry and wet atmospheric deposition over the Balearic Islands, NW Mediterranean: Source apportionment and African dust areas. <i>Science of the Total Environment</i> , 2020, 747, 141187.	3.9	21
36	Long-range and local air pollution: what can we learn from chemical speciation of particulate matter at paired sites?. <i>Atmospheric Chemistry and Physics</i> , 2020, 20, 409-429.	1.9	24

#	ARTICLE	IF	CITATIONS
37	Variability of air pollutants, and PM composition and sources at a regional background site in the Balearic Islands: Review of western Mediterranean phenomenology from a 3-year study. <i>Science of the Total Environment</i> , 2020, 717, 137177.	3.9	14
38	Characterization of organic aerosol at a rural site influenced by olive waste biomass burning. <i>Chemosphere</i> , 2020, 248, 125896.	4.2	12
39	Changes in air quality during the lockdown in Barcelona (Spain) one month into the SARS-CoV-2 epidemic. <i>Science of the Total Environment</i> , 2020, 726, 138540.	3.9	610
40	Particulate Matter Concentrations in a Middle Eastern City – An Insight to Sand and Dust Storm Episodes. <i>Aerosol and Air Quality Research</i> , 2020, 20, 2780-2792.	0.9	8
41	Molecular insights into new particle formation in Barcelona, Spain. <i>Atmospheric Chemistry and Physics</i> , 2020, 20, 10029-10045.	1.9	27
42	Multidecadal trend analysis of in situ aerosol radiative properties around the world. <i>Atmospheric Chemistry and Physics</i> , 2020, 20, 8867-8908.	1.9	58
43	A global analysis of climate-relevant aerosol properties retrieved from the network of Global Atmosphere Watch (GAW) near-surface observatories. <i>Atmospheric Measurement Techniques</i> , 2020, 13, 4353-4392.	1.2	65
44	2005–2017 ozone trends and potential benefits of local measures as deduced from air quality measurements in the north of the Barcelona metropolitan area. <i>Atmospheric Chemistry and Physics</i> , 2019, 19, 7445-7465.	1.9	21
45	Relating high ozone, ultrafine particles, and new particle formation episodes using cluster analysis. <i>Atmospheric Environment: X</i> , 2019, 4, 100051.	0.8	9
46	Source apportionment of urban PM1 in Barcelona during SAPUSS using organic and inorganic components. <i>Environmental Science and Pollution Research</i> , 2019, 26, 32114-32127.	2.7	15
47	African dust and air quality over Spain: Is it only dust that matters?. <i>Science of the Total Environment</i> , 2019, 686, 737-752.	3.9	65
48	Monitoring the impact of desert dust outbreaks for air quality for health studies. <i>Environment International</i> , 2019, 130, 104867.	4.8	134
49	Retrieval of aerosol properties from ceilometer and photometer measurements: long-term evaluation with in situ data and statistical analysis at Montsec (southern Pyrenees). <i>Atmospheric Measurement Techniques</i> , 2019, 12, 3255-3267.	1.2	25
50	Vertical and horizontal fall-off of black carbon and NO2 within urban blocks. <i>Science of the Total Environment</i> , 2019, 686, 236-245.	3.9	18
51	The second ACTRIS inter-comparison (2016) for Aerosol Chemical Speciation Monitors (ACSM): Calibration protocols and instrument performance evaluations. <i>Aerosol Science and Technology</i> , 2019, 53, 830-842.	1.5	35
52	Analysis of summer O ₃ in the Madrid air basin with the LOTOS-EUROS chemical transport model. <i>Atmospheric Chemistry and Physics</i> , 2019, 19, 14211-14232.	1.9	21
53	Overview of the NOAA/ESRL Federated Aerosol Network. <i>Bulletin of the American Meteorological Society</i> , 2019, 100, 123-135.	1.7	36
54	Effectiveness of commercial face masks to reduce personal PM exposure. <i>Science of the Total Environment</i> , 2019, 650, 1582-1590.	3.9	59

#	ARTICLE	IF	CITATIONS
55	Short-term effects of ultrafine particles on daily mortality by primary vehicle exhaust versus secondary origin in three Spanish cities. <i>Environment International</i> , 2018, 111, 144-151.	4.8	55
56	Short-term exposure to traffic-related air pollution and ischemic stroke onset in Barcelona, Spain. <i>Environmental Research</i> , 2018, 162, 160-165.	3.7	48
57	Impact of aerosol particle sources on optical properties in urban, regional and remote areas in the north-western Mediterranean. <i>Atmospheric Chemistry and Physics</i> , 2018, 18, 1149-1169.	1.9	31
58	Air quality trends in an industrialised area of SW Spain. <i>Journal of Cleaner Production</i> , 2018, 186, 465-474.	4.6	19
59	2005–2014 trends of PM10 source contributions in an industrialized area of southern Spain. <i>Environmental Pollution</i> , 2018, 236, 570-579.	3.7	35
60	Particle-related exposure, dose and lung cancer risk of primary school children in two European countries. <i>Science of the Total Environment</i> , 2018, 616-617, 720-729.	3.9	47
61	Effect of public transport strikes on air pollution levels in Barcelona (Spain). <i>Science of the Total Environment</i> , 2018, 610-611, 1076-1082.	3.9	52
62	European aerosol phenomenology – 6: scattering properties of atmospheric aerosol particles from 28 ACTRIS sites. <i>Atmospheric Chemistry and Physics</i> , 2018, 18, 7877-7911.	1.9	76
63	Vertical and horizontal distribution of regional new particle formation events in Madrid. <i>Atmospheric Chemistry and Physics</i> , 2018, 18, 16601-16618.	1.9	30
64	Nanoparticle formation and emission during laser ablation of ceramic tiles. <i>Journal of Aerosol Science</i> , 2018, 126, 152-168.	1.8	15
65	Spatio-temporal patterns of high summer ozone events in the Madrid Basin, Central Spain. <i>Atmospheric Environment</i> , 2018, 185, 207-220.	1.9	17
66	Phenomenology of summer ozone episodes over the Madrid Metropolitan Area, central Spain. <i>Atmospheric Chemistry and Physics</i> , 2018, 18, 6511-6533.	1.9	42
67	Temporal and spatial variability of atmospheric particle number size distributions across Spain. <i>Atmospheric Environment</i> , 2018, 190, 146-160.	1.9	20
68	Identification of technical problems affecting performance of DustTrak DRX aerosol monitors. <i>Science of the Total Environment</i> , 2017, 584-585, 849-855.	3.9	50
69	Spatiotemporal evolution of a severe winter dust event in the western Mediterranean: Aerosol optical and physical properties. <i>Journal of Geophysical Research D: Atmospheres</i> , 2017, 122, 4052-4069.	1.2	38
70	Outdoor and indoor particle characterization from a large and uncontrolled combustion of a tire landfill. <i>Science of the Total Environment</i> , 2017, 593-594, 543-551.	3.9	25
71	Characterization of atmospheric black carbon and co-pollutants in urban and rural areas of Spain. <i>Atmospheric Environment</i> , 2017, 169, 36-53.	1.9	65
72	Spatial and temporal variability of carbonaceous aerosols: Assessing the impact of biomass burning in the urban environment. <i>Science of the Total Environment</i> , 2017, 578, 613-625.	3.9	117

#	ARTICLE	IF	CITATIONS
73	Impact of North America on the aerosol composition in the North Atlantic free troposphere. Atmospheric Chemistry and Physics, 2017, 17, 7387-7404.	1.9	23
74	Near-real-time processing of a ceilometer network assisted with sun-photometer data: monitoring a dust outbreak over the Iberian Peninsula. Atmospheric Chemistry and Physics, 2017, 17, 11861-11876.	1.9	57
75	Phenomenology of high-ozone episodes in NE Spain. Atmospheric Chemistry and Physics, 2017, 17, 2817-2838.	1.9	45
76	AIRUSE-LIFE+: estimation of natural source contributions to urban ambient air PM ₁₀ and PM _{2.5} concentrations in southern Europe – implications to compliance with limit values. Atmospheric Chemistry and Physics, 2017, 17, 3673-3685.	1.9	67
77	Speciation of organic aerosols in the Saharan Air Layer and in the free troposphere westerlies. Atmospheric Chemistry and Physics, 2017, 17, 8939-8958.	1.9	20
78	Quantifying Dry and Wet Deposition Fluxes in Two Regions of Contrasting African Influence: The NE Iberian Peninsula and the Canary Islands. Atmosphere, 2017, 8, 86.	1.0	22
79	Secondary organic aerosol origin in an urban environment: influence of biogenic and fuel combustion precursors. Faraday Discussions, 2016, 189, 337-359.	1.6	40
80	Intercomparison of a portable and two stationary mobility particle sizers for nanoscale aerosol measurements. Aerosol Science and Technology, 2016, 50, 653-668.	1.5	29
81	Soluble iron dust export in the high altitude Saharan Air Layer. Atmospheric Environment, 2016, 133, 49-59.	1.9	24
82	A European aerosol phenomenology-5: Climatology of black carbon optical properties at 9 regional background sites across Europe. Atmospheric Environment, 2016, 145, 346-364.	1.9	132
83	A European aerosol phenomenology -4: Harmonized concentrations of carbonaceous aerosol at 10 regional background sites across Europe. Atmospheric Environment, 2016, 144, 133-145.	1.9	50
84	Impact of harbour emissions on ambient PM ₁₀ and PM _{2.5} in Barcelona (Spain): Evidences of secondary aerosol formation within the urban area. Science of the Total Environment, 2016, 571, 237-250.	3.9	90
85	On the origin of the highest ozone episodes in Spain. Science of the Total Environment, 2016, 572, 379-389.	3.9	49
86	Vertical and horizontal variability of PM ₁₀ source contributions in Barcelona during SAPUSS. Atmospheric Chemistry and Physics, 2016, 16, 6785-6804.	1.9	10
87	Ice nucleating particles in the Saharan Air Layer. Atmospheric Chemistry and Physics, 2016, 16, 9067-9087.	1.9	93
88	Trends analysis of PM source contributions and chemical tracers in NE Spain during 2004–2014: a multi-exponential approach. Atmospheric Chemistry and Physics, 2016, 16, 11787-11805.	1.9	48
89	Detection of Saharan dust and biomass burning events using near-real-time intensive aerosol optical properties in the north-western Mediterranean. Atmospheric Chemistry and Physics, 2016, 16, 12567-12586.	1.9	54
90	AIRUSE-LIFE+: a harmonized PM speciation and source apportionment in five southern European cities. Atmospheric Chemistry and Physics, 2016, 16, 3289-3309.	1.9	267

#	ARTICLE	IF	CITATIONS
91	Geochemistry of PM ₁₀ over Europe during the EMEP intensive measurement periods in summer 2012 and winter 2013. Atmospheric Chemistry and Physics, 2016, 16, 6107-6129.	1.9	54
92	Atmospheric pollutants in peri-urban forests of Quercus ilex: evidence of pollution abatement and threats for vegetation. Environmental Science and Pollution Research, 2016, 23, 6400-6413.	2.7	35
93	An inter-comparison of PM ₁₀ source apportionment using PCA and PMF receptor models in three European sites. Environmental Science and Pollution Research, 2016, 23, 15133-15148.	2.7	65
94	Traffic induced particle resuspension in Paris: Emission factors and source contributions. Atmospheric Environment, 2016, 129, 114-124.	1.9	96
95	Variability in exposure to ambient ultrafine particles in urban schools: Comparative assessment between Australia and Spain. Environment International, 2016, 88, 142-149.	4.8	36
96	Assessment of the variability of atmospheric pollution in National Parks of mainland Spain. Atmospheric Environment, 2016, 132, 332-344.	1.9	17
97	Spatiotemporally resolved black carbon concentration, schoolchildren's exposure and dose in Barcelona. Indoor Air, 2016, 26, 391-402.	2.0	69
98	Case Studies of Source Apportionment and Suggested Measures at Southern European Cities. Issues in Environmental Science and Technology, 2016, , 168-263.	0.4	4
99	Black Carbon Exposure of Schoolchildren in Barcelona. Springer Proceedings in Complexity, 2016, , 173-175.	0.2	0
100	Chapter 10 New Considerations for PM, Black Carbon, and Particle Number Concentration for Air Quality Monitoring Across Different European Cities. , 2016, , 177-218.		0
101	Atmospheric Particle Size Distributions in the Spanish Network of Environmental DMAs (REDMAAS). IOP Conference Series: Earth and Environmental Science, 2015, 28, 012001.	0.2	1
102	Joint analysis of continental and regional background environments in the western Mediterranean: PM ₁ and PM ₁₀ concentrations and composition. Atmospheric Chemistry and Physics, 2015, 15, 1129-1145.	1.9	36
103	Chemical characterization of submicron regional background aerosols in the western Mediterranean using an Aerosol Chemical Speciation Monitor. Atmospheric Chemistry and Physics, 2015, 15, 6379-6391.	1.9	69
104	Modulation of Saharan dust export by the North African dipole. Atmospheric Chemistry and Physics, 2015, 15, 7471-7486.	1.9	99
105	ACTRIS ACSM intercomparison " Part 1: Reproducibility of concentration and fragment results from 13 individual Quadrupole Aerosol Chemical Speciation Monitors (Q-ACSM) and consistency with co-located instruments. Atmospheric Measurement Techniques, 2015, 8, 5063-5087.	1.2	104
106	ACTRIS ACSM intercomparison " Part 2: Intercomparison of ME-2 organic source apportionment results from 15 individual, co-located aerosol mass spectrometers. Atmospheric Measurement Techniques, 2015, 8, 2555-2576.	1.2	118
107	Road traffic and sandy playground influence on ambient pollutants in schools. Atmospheric Environment, 2015, 111, 94-102.	1.9	9
108	Long-term real-time chemical characterization of submicron aerosols at Montsec (southern Pyrenees), Tj ETQq0 0 0, rgBT /Overlock 10 T	1.9	80
