#	ARTICLE	IF	CITATIONS
1	Treatment Trials in Young Patients with Chronic Obstructive Pulmonary Disease and Pre-“Chronic Obstructive Pulmonary Disease Patients: Time to Move Forward. American Journal of Respiratory and Critical Care Medicine, 2022, 205, 275-287.	5.6	72
2	Inhaled corticosteroids reduce senescence in endothelial progenitor cells from patients with COPD. Thorax, 2022, 77, 616-620.	5.6	8
3	Update in Chronic Obstructive Pulmonary Disease 2020. American Journal of Respiratory and Critical Care Medicine, 2021, 204, 14-22.	5.6	9
4	Guidance on Statistical Reporting to Help Improve Your Chances of a Favorable Statistical Review. American Journal of Respiratory and Critical Care Medicine, 2020, 201, 1035-1038.	5.6	10
5	Understanding the impact of chronic obstructive pulmonary disease exacerbations on patient health and quality of life. European Journal of Internal Medicine, 2020, 73, 1-6.	2.2	67
6	Development and Reporting of Prediction Models: Guidance for Authors From Editors of Respiratory, Sleep, and Critical Care Journals. Critical Care Medicine, 2020, 48, 623-633.	0.9	188
7	Pharmacologic Management of Chronic Obstructive Pulmonary Disease. An Official American Thoracic Society Clinical Practice Guideline. American Journal of Respiratory and Critical Care Medicine, 2020, 201, e56-e69.	5.6	202
8	Chronic Airway Diseases Early Stratification (CADSET): a new ERS Clinical Research Collaboration. European Respiratory Journal, 2019, 53, 1900217.	6.7	25
9	Changes in cold-related mortalities between 1995 and 2016 in South East England. Public Health, 2019, 169, 36-40.	2.9	5
10	Increased Chronic Obstructive Pulmonary Disease Exacerbations of Likely Viral Etiology Follow Elevated Ambient Nitrogen Oxides. American Journal of Respiratory and Critical Care Medicine, 2019, 199, 581-591.	5.6	30
11	Increased vulnerability of COPD patient groups to urban climate in view of global warming. International Journal of COPD, 2018, Volume 13, 3493-3501.	2.3	18
12	Childhood Exposures, Asthma, Smoking, Interactions, and the Catch-Up Hypothesis. Annals of the American Thoracic Society, 2018, 15, 1241-1242.	3.2	3
13	Prediction of Chronic Obstructive Pulmonary Disease Exacerbation Frequency. Clinical Parameters Are Still Better Than Biomarkers. American Journal of Respiratory and Critical Care Medicine, 2017, 195, 415-416.	5.6	10
14	Combined Impact of Smoking and Early-Life Exposures on Adult Lung Function Trajectories. American Journal of Respiratory and Critical Care Medicine, 2017, 196, 1021-1030.	5.6	108
15	Physical activity and exercise capacity in patients with moderate COPD exacerbations. European Respiratory Journal, 2016, 48, 340-349.	6.7	57
16	The Presence of Chronic Mucus Hypersecretion across Adult Life in Relation to Chronic Obstructive Pulmonary Disease Development. American Journal of Respiratory and Critical Care Medicine, 2016, 193, 662-672.	5.6	137
17	Impact of Prolonged Exacerbation Recovery in Chronic Obstructive Pulmonary Disease. American Journal of Respiratory and Critical Care Medicine, 2015, 192, 943-950.	5.6	99
18	Community-based recruitment of patients with COPD into clinical research. Thorax, 2014, 69, 951-952.	5.6	5

#	ARTICLE	IF	CITATIONS
19	Heat-related thermal sensation, comfort and symptoms in a northern population: the National FINRISK 2007 study. <i>European Journal of Public Health</i> , 2014, 24, 620-626.	0.3	26
20	Long-term antibiotic therapy reduces exacerbation frequency in patients with COPD but it remains unclear which patients to target. <i>Evidence-Based Medicine</i> , 2014, 19, 99-99.	0.6	3
21	Detection and severity grading of COPD exacerbations using the exacerbations of chronic pulmonary disease tool (EXACT). <i>European Respiratory Journal</i> , 2014, 43, 735-744.	6.7	63
22	Human rhinovirus infection during naturally occurring COPD exacerbations. <i>European Respiratory Journal</i> , 2014, 44, 87-96.	6.7	143
23	Trends in management and outcomes of COPD patients in primary care, 2000â€“2009: a retrospective cohort study. <i>Npj Primary Care Respiratory Medicine</i> , 2014, 24, 14015.	2.6	37
24	The CODEX Index. <i>Chest</i> , 2014, 145, 934-935.	0.8	3
25	Rapid FEV 1 Decline, Early COPD, and Angiotensin-Converting Enzymes?. <i>Chest</i> , 2014, 145, 671-672.	0.8	2
26	Factors associated with change in exacerbation frequency in COPD. <i>Respiratory Research</i> , 2013, 14, 79.	3.6	58
27	Deprivation, winter season, and COPD exacerbations. <i>Primary Care Respiratory Journal: Journal of the General Practice Airways Group</i> , 2013, 22, 264-265.	2.3	7
28	Detrended fluctuation analysis of peak expiratory flow and exacerbation frequency in COPD. <i>European Respiratory Journal</i> , 2012, 40, 1123-1129.	6.7	24
29	Influence of Season on Exacerbation Characteristics in Patients With COPD. <i>Chest</i> , 2012, 141, 94-100.	0.8	84
30	Changes in prevalence and load of airway bacteria using quantitative PCR in stable and exacerbated COPD. <i>Thorax</i> , 2012, 67, 1075-1080.	5.6	193
31	The Impact of Ischemic Heart Disease on Symptoms, Health Status, and Exacerbations in Patients With COPD. <i>Chest</i> , 2012, 141, 851-857.	0.8	89
32	Temporal Clustering of Exacerbations in Chronic Obstructive Pulmonary Disease. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2010, 182, 985-985.	5.6	1
33	Causes for the recent changes in cold- and heat-related mortality in England and Wales. <i>Climatic Change</i> , 2010, 102, 539-553.	3.6	59
34	Increased Risk of Myocardial Infarction and Stroke Following Exacerbation of COPD. <i>Chest</i> , 2010, 137, 1091-1097.	0.8	398
35	Temporal Clustering of Exacerbations in Chronic Obstructive Pulmonary Disease. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2009, 179, 369-374.	5.6	231
36	Airway and Systemic Inflammation and Decline in Lung Function in Patients With COPD. <i>Chest</i> , 2005, 128, 1995-2004.	0.8	404

#	ARTICLE	IF	CITATIONS
37	Relationships Among Bacteria, Upper Airway, Lower Airway, and Systemic Inflammation in COPD [*] . Chest, 2005, 127, 1219.	0.8	101
38	Early Therapy Improves Outcomes of Exacerbations of Chronic Obstructive Pulmonary Disease. American Journal of Respiratory and Critical Care Medicine, 2004, 169, 1298-1303.	5.6	596
