#	Article	IF	Citations
1	Headache and quality of life in Finnish female municipal employees. Scandinavian Journal of Pain, 2022, 22, 457-463.	1.3	0
2	Temporal changes in selfâ€reported sleep quality, sleep duration and sleep medication use in relation to temporal changes in quality of life and work ability over a 1â€year period among Finnish municipal employees. Journal of Sleep Research, 2022, , e13605.	3.2	2
3	The Cardiovascular-Mortality-Based Estimate for Normal Range of the Ankleâ€“Brachial Index (ABI). Journal of Cardiovascular Development and Disease, 2022, 9, 147.	1.6	4
4	Blood pressure load per body surface area is higher in women than in men. Journal of Human Hypertension, 2021, 35, 371-377.	2.2	0
5	Hyperuricemia Is Not an Independent Predictor of Erectile Dysfunction. Sexual Medicine, 2021, 9, 100319-100319.	1.6	8
6	The feasibility and outcome of a community-based primary prevention program for cardiovascular disease in the 21st century. Scandinavian Journal of Primary Health Care, 2021, 39, 157-165.	1.5	5
7	Design of a prospective follow-up study on early parenthood and smoking behaviour during pregnancy in Finnish primary healthcare. Scandinavian Journal of Public Health, 2021, 49, 970-980.	2.3	1
8	Body surface area may explain sex differences in findings from the oral glucose tolerance test among subjects with normal glucose tolerance. Nutrition, Metabolism and Cardiovascular Diseases, 2021, 31, 2678-2684.	2.6	5
9	The impact of antihypertensive treatment initiation on health-related quality of life and cardiovascular risk factor levels: a prospective, interventional study. BMC Cardiovascular Disorders, 2021, 21, 444.	1.7	0
10	Both lean and fat body mass associate with blood pressure. European Journal of Internal Medicine, 2021, 91, 40-44.	2.2	19
11	A high lean body mass is not protecting from type 2 diabetes in the presence of a high body fat mass. Diabetes and Metabolism, 2021, 47, 101219.	2.9	12
12	Maternal Smoking and Hospital Treatment During Pregnancy. Nicotine and Tobacco Research, 2020, 22, 1162-1169.	2.6	5
13	Decreased forced expiratory volume in first second is associated with erectile dysfunction in apparently healthy men. A preliminary study.. International Journal of Impotence Research, 2020, 32, 420-425.	1.8	2
14	Metabolic syndrome is not associated with erectile dysfunction in apparently healthy men. Primary Care Diabetes, 2020, 14, 460-463.	1.8	6
15	Lean body mass is not beneficial, but may be detrimental for glucose tolerance â€“ Splitting body mass index according to body composition. Primary Care Diabetes, 2020, 14, 747-752.	1.8	4
16	The Impact of Self-Reported Recurrent Headache on Absenteeism and Presenteeism at Work Among Finnish Municipal Female Employees . Journal of Pain Research, 2020, Volume 13, 2135-2142.	2.0	6
17	The associations of physical activity and physical capability with cardiovascular health among workingâ€age finnish women. Translational Sports Medicine, 2020, 3, 213-221.	1.1	0
18	Yield of elective coronary angiography; gender differences, patient history, risk factors and angiographic findings in a primary care population. Scandinavian Journal of Primary Health Care, 2020, 38, 481-486.	1.5	0

#	Article	IF	Citations
19	Body surface area and glucose tolerance â€“ The smaller the person, the greater the 2-hour plasma glucose. Diabetes Research and Clinical Practice, 2019, 157, 107877.	2.8	12
20	Ideal cardiovascular health and quality of life among Finnish municipal employees. Preventive Medicine Reports, 2019, 15, 100922.	1.8	14
21	The role of psychosocial risk factors in the burden of headache . Journal of Pain Research, 2019, Volume 12, 1733-1741.	2.0	9
22	The Nordic countries on top of the world â€“ what next?. Scandinavian Journal of Primary Health Care, 2018, 36, 353-354.	1.5	2
23	Ideal cardiovascular health and psychosocial risk factors among Finnish female municipal workers. Scandinavian Journal of Public Health, 2017, 45, 50-56.	2.3	21
24	The shorter the person, the higher the blood pressure. Journal of Hypertension, 2017, 35, 1170-1177.	0.5	24
25	Relationship of musculoskeletal pain and well-being at work â€“ Does pain matter?. Scandinavian Journal of Pain, 2017, 15, 38-43.	1.3	24
26	Health-related quality of life in metabolically healthy obese individuals. Obesity Research and Clinical Practice, 2017, 11, 499-500.	1.8	1
27	Self-rated health as an indicator of ideal cardiovascular health among working-aged women. Scandinavian Journal of Primary Health Care, 2017, 35, 322-328.	1.5	18
28	Physical Activity Improves Borderline Ankleâ€“Brachial Index Values in a Cardiovascular Risk Population. Annals of Vascular Surgery, 2016, 32, 50-56.	0.9	5
29	Erectile dysfunction cannot be used in primary screening of pre-diabetes. Diabetes Research and Clinical Practice, 2015, 108, e60-e62.	2.8	6
30	Lifestyle of metabolically healthy obese individuals. Primary Care Diabetes, 2015, 9, 179-183.	1.8	6
31	Primary care-based, targeted screening programme to promote sustained weight management. Scandinavian Journal of Primary Health Care, 2014, 32, 30-36.	1.5	8
32	Target organ damage and cardiovascular risk factors among subjects with previously undiagnosed hypertension. European Journal of Preventive Cardiology, 2014, 21, 980-988.	1.8	15
33	Body mass index and health-related quality of life in apparently healthy individuals. Quality of Life Research, 2014, 23, 67-74.	3.1	47
34	Weight Change and Health Related Quality of Life: Population-Based Longitudinal Study of the Effects of Health Related Quality of Life on the Success of Weight Management. Journal of Community Health, 2014, 39, 349-354.	3.8	6
35	High-Intensity Physical Activity, Stable Relationship, and High Education Level Associate with Decreasing Risk of Erectile Dysfunction in 1,000 Apparently Healthy Cardiovascular Risk Subjects. Journal of Sexual Medicine, 2014, 11, 2277-2284.	0.6	15
36	Screening for cardiovascular risk factors and self-rated health in a community setting: a cross-sectional study in Finland. British Journal of General Practice, 2014, 64, e611-e615.	1.4	14

#	Article	IF	Citations
37	Impaired glucose metabolism and health related quality of life. Primary Care Diabetes, 2013, 7, 223-227.	1.8	13
38	Estimating glomerular filtration rate in hypertensive subjects: Comparison of the Chronic Kidney Disease Epidemiology Collaboration (CKD-EPI) and Modification of Diet in Renal Disease (MDRD) Study equations. Annals of Medicine, 2012, 44, 487-493.	3.8	7
39	Ankleâ^'brachial index and health-related quality of life. European Journal of Preventive Cardiology, 2012, 19, 901-907.	1.8	20
40	Assessment of cardiovascular risk in primary health care. Scandinavian Journal of Primary Health Care, 2012, 30, 101-106.	1.5	8
41	Time to change the glomerular filtration rate estimating formula in primary care?. European Journal of Internal Medicine, 2012, 23, 355-357.	2.2	9
42	Endothelial function in a cardiovascular risk population with borderline ankle–brachial index. Vascular Health and Risk Management, 2011, 7, 97.	2.3	32
43	Health-related quality of life and awareness of hypertension. Journal of Hypertension, 2011, 29, 2070-2074.	0.5	45
44	Surrogates of Large Artery versus Small Artery Stiffness and Ankle-Brachial Index. International Journal of Angiology, 2011, 20, 167-172.	0.6	3
45	The assessment of total cardiovascular risk in hypertensive subjects in primary care. Annals of Medicine, 2010, 42, 187-195.	3.8	1
46	Ankleâ€“brachial index is lower in hypertensive than in normotensive individuals in a cardiovascular risk population. Journal of Hypertension, 2009, 27, 2036-2043.	0.5	22
47	Glucose Homeostasis in Hypertensive Subjects. Hypertension, 2008, 51, 945-949.	2.7	27
48	Waist circumference home measurement--a device to find out patients in cardiovascular risk. European Journal of Public Health, 2008, 19, 95-99.	0.3	19
49	Borderline peripheral arterial disease. International Journal of Angiology, 2008, 17, 175-177.	0.6	8
50	Effects of age, sex and smoking on ankle-brachial index in a Finnish population at risk for cardiovascular disease. International Journal of Angiology, 2007, 16, 128-130.	0.6	6
