#	Article	IF	CITATIONS
1	Identification of vicilin, legumin and antimicrobial peptide 2a as macadamia nut allergens. Food Chemistry, 2022, 370, 131028.	8.2	13
2	Advances, Practical Implementation, and Unmet Needs Regarding Oral Immunotherapy for Food Allergy. Journal of Allergy and Clinical Immunology: in Practice, 2022, 10, 19-33.	3.8	14
3	Ana o 3 slgE testing increases the accuracy of cashew allergy diagnosis using a twoâ€step model. Pediatric Allergy and Immunology, 2022, 33, e13705.	2.6	9
4	Cashew allergy diagnosis: A two-step algorithm leads to fewer oral food challenges. Journal of Allergy and Clinical Immunology: in Practice, 2022, 10, 1652-1654.e2.	3.8	1
5	Author Reply. Value in Health, 2022, , .	0.3	0
6	Pneumococcal IgG Antibody Responses to 23vPPV in Healthy Controls Using an Automated ELISA. Journal of Clinical Immunology, 2022, 42, 760-770.	3.8	4
7	The natural history of peanut and egg allergy in children up to age 6 years in the HealthNuts population-based longitudinal study. Journal of Allergy and Clinical Immunology, 2022, 150, 657-665.e13.	2.9	38
8	PrEggNut Study: protocol for a randomised controlled trial investigating the effect of a maternal diet rich in eggs and peanuts from <23 weeks' gestation during pregnancy to 4 months' lactatio infant IgE-mediated egg and peanut allergy outcomes. BMJ Open, 2022, 12, e056925.	n o 1. 9	10
9	Association Between Earlier Introduction of Peanut and Prevalence of Peanut Allergy in Infants in Australia. JAMA - Journal of the American Medical Association, 2022, 328, 48.	7.4	37
10	No cashew allergy in infants introduced to cashew by age 1 year. Journal of Allergy and Clinical Immunology, 2021, 147, 383-384.	2.9	12
11	Minimising Immunisation Pain of childhood vaccines: The MIP pilot study. Journal of Paediatrics and Child Health, 2021, 57, 376-382.	0.8	0
12	Vitamin D insufficiency is associated with reduced regulatory T cell frequency in foodâ€allergic infants. Pediatric Allergy and Immunology, 2021, 32, 771-775.	2.6	7
13	Respiratory Syncytial Virus Vaccination During Pregnancy and Effects in Infants. Obstetrical and Gynecological Survey, 2021, 76, 10-13.	0.4	1
14	Epigenetic programming underpins Bâ€cell dysfunction in peanut and multiâ€food allergy. Clinical and Translational Immunology, 2021, 10, e1324.	3.8	13
15	Altered immune cell profiles and impaired CD4 Tâ€cell activation in single and multiâ€food allergic adolescents. Clinical and Experimental Allergy, 2021, 51, 674-684.	2.9	9
16	Impact of maternal diphtheria-tetanus-acellular pertussis vaccination on pertussis booster immune responses in toddlers: Follow-up of a randomized trial. Vaccine, 2021, 39, 1598-1608.	3.8	6
17	Correlation of Vaccine Responses. Frontiers in Immunology, 2021, 12, 646677.	4.8	7
18	The safety of BCG revaccination: A systematic review. Vaccine, 2021, 39, 2736-2745.	3.8	25

#	Article	IF	CITATIONS
19	Improving vaccination uptake with the implementation of an immunisation Nurse Practitioner. Australian Journal of Advanced Nursing, 2021, 38, .	0.9	2
20	The Accuracy of Diagnostic Testing in Determining Tree Nut Allergy: A Systematic Review. Journal of Allergy and Clinical Immunology: in Practice, 2021, 9, 2028-2049.e2.	3.8	26
21	The Risk of Allergic Reaction to SARS-CoV-2 Vaccines and Recommended Evaluation and Management: A Systematic Review, Meta-Analysis, GRADE Assessment, and International Consensus Approach. Journal of Allergy and Clinical Immunology: in Practice, 2021, 9, 3546-3567.	3.8	152
22	Maternal Vaccination and Infant Influenza and Pertussis. Pediatrics, 2021, 148, .	2.1	12
23	National predictors of influenza vaccine uptake in pregnancy: the FluMum prospective cohort study, Australia, 2012–2015. Australian and New Zealand Journal of Public Health, 2021, 45, 455-461.	1.8	9
24	Subcutaneous nodule at the vaccine injection site – A case of mistaken identity. Vaccine, 2021, 39, 6013-6014.	3.8	0
25	Cost-Effectiveness of Food Allergy Interventions in Children: A Systematic Review of Economic Evaluations. Value in Health, 2021, 24, 1360-1376.	0.3	9
26	Limited evidence for antiâ€inflammatory medications for obstructive sleep apnoea in children. Journal of Paediatrics and Child Health, 2021, , .	0.8	1
27	BCG vaccination to reduce the impact of COVID-19 in healthcare workers: Protocol for a randomised controlled trial (BRACE trial). BMJ Open, 2021, 11, e052101.	1.9	27
28	Food allergy across the globe. Journal of Allergy and Clinical Immunology, 2021, 148, 1347-1364.	2.9	115
29	Skin Prick Test Predictive Values for the Outcome of Cashew Challenges in Children. Journal of Allergy and Clinical Immunology: in Practice, 2020, 8, 141-148.e2.	3.8	13
30	Biological sex influences antibody responses to routine vaccinations in the first year of life. Acta Paediatrica, International Journal of Paediatrics, 2020, 109, 147-157.	1.5	7
31	Impact of tetanus-diphtheria-acellular pertussis immunization during pregnancy on subsequent infant immunization seroresponses: follow-up from a large randomized placebo-controlled trial. Vaccine, 2020, 38, 2105-2114.	3.8	21
32	Immunogenicity, transplacental transfer of pertussis antibodies and safety following pertussis immunization during pregnancy: Evidence from a randomized, placebo-controlled trial. Vaccine, 2020, 38, 2095-2104.	3.8	24
33	Integrating trials into a whole-population cohort of children and parents: statement of intent (trials) for the Generation Victoria (GenV) cohort. BMC Medical Research Methodology, 2020, 20, 238.	3.1	11
34	Community-Based Adverse Food Reactions and Anaphylaxis in Children with IgE-Mediated Food Allergy at Age 6 Years: A Population-Based Study. Journal of Allergy and Clinical Immunology: in Practice, 2020, 8, 3515-3524.	3.8	9
35	Respiratory Syncytial Virus Vaccination during Pregnancy and Effects in Infants. New England Journal of Medicine, 2020, 383, 426-439.	27.0	265
36	Yellow Fever Vaccination In EGC-Allergic Children. Pediatric Infectious Disease Journal, 2020, 39, e76-e78.	2.0	13

#	Article	IF	CITATIONS
37	A Potential Role for Epigenetically Mediated Trained Immunity in Food Allergy. IScience, 2020, 23, 101171.	4.1	18
38	Feasibility and acceptability of the multi-component P3-MumBubVax antenatal intervention to promote maternal and childhood vaccination: A pilot study. Vaccine, 2020, 38, 4024-4031.	3.8	20
39	Impact of Australian mandatory †No Jab, No Pay' and †No Jab, No Play' immunisation policies on immunisation services, parental attitudes to vaccination and vaccine uptake, in a tertiary paediatric hospital, the Royal Children's Hospital, Melbourne. Vaccine, 2020, 38, 5231-5240.	3.8	13
40	Monitoring changes in infant feeding practices after changes to guidelines for food allergy prevention. Medical Journal of Australia, 2020, 212, 256-257.	1.7	1
41	Subcutaneous nodules following immunization in children; in Victoria, Australia from 2007 to 2016. Vaccine, 2020, 38, 3169-3177.	3.8	6
42	Mass cytometry reveals cellular fingerprint associated with IgE+ peanut tolerance and allergy in early life. Nature Communications, 2020, 11, 1091.	12.8	44
43	Emollients for prevention of atopic dermatitis in infancy. Lancet, The, 2020, 395, 923-924.	13.7	26
44	Prevalence and natural history of tree nut allergy. Annals of Allergy, Asthma and Immunology, 2020, 124, 466-472.	1.0	46
45	Immunisation and allergy in children and adults: A case-based approach. Australian Journal of General Practice, 2020, 49, 637-643.	0.8	3
46	Hyper-Inflammatory Monocyte Activation Following Endotoxin Exposure in Food Allergic Infants. Frontiers in Immunology, 2020, 11, 567981.	4.8	11
47	OPTIMUM study protocol: an adaptive randomised controlled trial of a mixed whole-cell/acellular pertussis vaccine schedule. BMJ Open, 2020, 10, e042838.	1.9	2
48	OPTIMUM study protocol: an adaptive randomised controlled trial of a mixed whole-cell/acellular pertussis vaccine schedule. BMJ Open, 2020, 10, e042838.	1.9	7
49	The Effect of Maternal Immunisation During Pregnancy on Infant Vaccine Responses. EClinicalMedicine, 2019, 13, 21-30.	7.1	50
50	Human papillomavirus vaccine uptake in adolescents with developmental disabilities. Journal of Intellectual and Developmental Disability, 2019, 44, 98-102.	1.6	9
51	Role of Rotavirus Vaccination in Decline in Incidence of Type 1 Diabetes—Reply. JAMA Pediatrics, 2019, 173, 895.	6.2	Ο
52	Coding Error in Study of Rotavirus Vaccination and Type 1 Diabetes in Children. JAMA Pediatrics, 2019, 173, 894.	6.2	4
53	Does rotavirus turn on type 1 diabetes?. PLoS Pathogens, 2019, 15, e1007965.	4.7	18
54	Association of Rotavirus Vaccination With the Incidence of Type 1 Diabetes in Children. JAMA Pediatrics, 2019, 173, 280.	6.2	97

#	Article	IF	CITATIONS
55	The influence of neonatal Bacille Calmette-Guérin (BCG) immunisation on heterologous vaccine responses in infants. Vaccine, 2019, 37, 3735-3744.	3.8	31
56	Influenza and pertussis vaccination of women during pregnancy in Victoria, 2015–2017. Medical Journal of Australia, 2019, 210, 454-462.	1.7	34
57	Subcutaneous nodules: an important adverse event following immunization. Expert Review of Vaccines, 2019, 18, 405-410.	4.4	8
58	Vaccine Allergy? Skin Testing and Challenge at a Tertiary Pediatric Hospital in Melbourne, Australia. Journal of Allergy and Clinical Immunology: in Practice, 2019, 7, 1541-1549.	3.8	12
59	The immunomodulatory effects of measlesâ€mumpsâ€rubella vaccination on persistence of heterologous vaccine responses. Immunology and Cell Biology, 2019, 97, 577-585.	2.3	9
60	Persistence of pneumococcal antibodies after primary immunisation with a polysaccharide–protein conjugate vaccine. Archives of Disease in Childhood, 2019, 104, 680-684.	1.9	5
61	Earlier ingestion of peanut after changes to infant feeding guidelines: The EarlyNuts study. Journal of Allergy and Clinical Immunology, 2019, 144, 1327-1335.e5.	2.9	71
62	Diagnosing Peanut Allergy with Fewer Oral Food Challenges. Journal of Allergy and Clinical Immunology: in Practice, 2019, 7, 375-380.	3.8	25
63	The Safety of Influenza and Pertussis Vaccination in Pregnancy in a Cohort of Australian Mother-Infant Pairs, 2012–2015: The FluMum Study. Clinical Infectious Diseases, 2019, 68, 402-408.	5.8	31
64	Patterns of tree nut sensitization and allergy in the first 6Âyears of life in a population-based cohort. Journal of Allergy and Clinical Immunology, 2019, 143, 644-650.e5.	2.9	67
65	Antibody persistence and booster response in adolescents and young adults 4 and 7.5 years after immunization with 4CMenB vaccine. Vaccine, 2019, 37, 1209-1218.	3.8	33
66	Immunogenicity and safety of one or two doses of the quadrivalent meningococcal vaccine MenACWY-TT given alone or with the 13-valent pneumococcal conjugate vaccine in toddlers: A phase III, open-label, randomised study. Vaccine, 2018, 36, 1908-1916.	3.8	17
67	Potential immediate hypersensitivity reactions following immunization in preschool aged children in Victoria, Australia. Human Vaccines and Immunotherapeutics, 2018, 14, 2088-2092.	3.3	5
68	Vaccine decision-making begins in pregnancy: Correlation between vaccine concerns, intentions and maternal vaccination with subsequent childhood vaccine uptake. Vaccine, 2018, 36, 6473-6479.	3.8	108
69	Time to Open Our Eyes? A Challenge to the Role of Polysomnography for Trials in Pediatric Sleep-Disordered Breathing. Journal of Clinical Sleep Medicine, 2018, 14, 489-490.	2.6	4
70	152. Protective Antibody Levels 7.5 Years After Primary Vaccination in Adolescence With a Recombinant, 4-Component, Meningococcal Serogroup B Vaccine (4CMenB) and Response to a Booster Dose in Adolescents and Young Adults: Phase IIIb Clinical Findings. Open Forum Infectious Diseases, 2018, 5, 511 511	0.9	0
71	Immunogenicity and Safety of Monovalent Acellular Pertussis Vaccine at Birth. JAMA Pediatrics, 2018, 172, 1045.	6.2	34
72	Recurrence risk of a hypotonic hyporesponsive episode in two Australian specialist immunisation clinics. Vaccine, 2018, 36, 6152-6157.	3.8	5

#	Article	IF	CITATIONS
73	Immunizations under sedation at a paediatric hospital in Melbourne, Australia from 2012–2016. Vaccine, 2018, 36, 3681-3685.	3.8	10
74	The clinical, immunological and microbiological impact of the 10-valent pneumococcal-Protein D conjugate vaccine in children with recurrent protracted bacterial bronchitis, chronic suppurative lung disease and bronchiectasis: A multi-centre, double-blind, randomised controlled trial. Human Vaccines and Immunotherapeutics, 2018, 14, 1-12.	3.3	11
75	Providing opportunistic immunisations for atâ€risk inpatients in a tertiary paediatric hospital. Journal for Specialists in Pediatric Nursing, 2017, 22, e12167.	1.1	11
76	Birth outcomes for Australian mother-infant pairs who received an influenza vaccine during pregnancy, 2012–2014: The FluMum study. Vaccine, 2017, 35, 1403-1409.	3.8	25
77	Immunization During Pregnancy: Impact on the Infant. Paediatric Drugs, 2017, 19, 313-324.	3.1	16
78	Antibody Persistence in Australian Adolescents Following Meningococcal C Conjugate Vaccination. Pediatric Infectious Disease Journal, 2015, 34, 279-285.	2.0	15
79	Immune responses to a recombinant, four-component, meningococcal serogroup B vaccine (4CMenB) in adolescents: A phase III, randomized, multicentre, lot-to-lot consistency study. Vaccine, 2015, 33, 5217-5224.	3.8	37
80	Pediatric anaphylactic adverse events following immunization in Victoria, Australia from 2007 to 2013. Vaccine, 2015, 33, 1602-1607.	3.8	24
81	Surveillance of adverse events following the introduction of 13-valent pneumococcal conjugate vaccine in infants, and comparison with adverse events following 7-valent pneumococcal conjugate vaccine, in Victoria, Australia. Human Vaccines and Immunotherapeutics, 2015, 11, 1828-1835.	3.3	6
82	Long-term Persistence of Immunity and B-Cell Memory Following Haemophilus influenzae Type b Conjugate Vaccination in Early Childhood and Response to Booster. Clinical Infectious Diseases, 2014, 58, 949-959.	5.8	9
83	A Licensed Combined Haemophilus influenzae Type b-Serogroups C and Y Meningococcal Conjugate Vaccine. Infectious Diseases and Therapy, 2013, 2, 1-13.	4.0	9
84	Single Nucleotide Polymorphisms in the Toll-Like Receptor 3 and CD44 Genes Are Associated with Persistence of Vaccine-Induced Immunity to the Serogroup C Meningococcal Conjugate Vaccine. Vaccine Journal, 2012, 19, 295-303.	3.1	17
85	B Cell Memory to a Serogroup C Meningococcal Conjugate Vaccine in Childhood and Response to Booster: Little Association with Serum IgG Antibody. Journal of Immunology, 2012, 189, 2673-2681.	0.8	24
86	Recurrent apnoea post immunisation: Informing re-immunisation policy. Vaccine, 2011, 29, 5681-5687.	3.8	19
87	Antibody Persistence after Serogroup C Meningococcal Conjugate Immunization of United Kingdom Primaryâ€6chool Children in 1999–2000 and Response to a Booster: A Phase 4 Clinical Trial. Clinical Infectious Diseases, 2010, 50, 1601-1610.	5.8	83
88	Plasma and memory Bâ€cell kinetics in infants following a primary schedule of CRM ₁₉₇ â€conjugated serogroup C meningococcal polysaccharide vaccine. Immunology, 2009, 127, 134-143.	4.4	37
89	Maintaining protection against invasive bacteria with protein–polysaccharide conjugate vaccines. Nature Reviews Immunology, 2009, 9, 213-220	22.7	389
90	Immunogenicity and Immune Memory of a Nonadjuvanted Quadrivalent Meningococcal Glycoconjugate Vaccine in Infants. Pediatric Infectious Disease Journal, 2009, 28, 186-193.	2.0	58

#	Article	IF	CITATIONS
91	Immunogenicity of a Tetravalent Meningococcal Clycoconjugate Vaccine in Infants. JAMA - Journal of the American Medical Association, 2008, 299, 173-84.	7.4	194
92	Towards an improved serogroup BNeisseria meningitidisvaccine. Expert Opinion on Biological Therapy, 2005, 5, 1611-1625.	3.1	29
