#	ARTICLE	IF	CITATIONS
1	Functional, communicative and critical health literacy of chronic disease patients and their importance for self-management. <i>Patient Education and Counseling</i> , 2015, 98, 41-48.	1.0	241
2	Comorbidity of chronic diseases. <i>Quality of Life Research</i> , 2005, 14, 45-55.	1.5	206
3	Multimorbidity care model: Recommendations from the consensus meeting of the Joint Action on Chronic Diseases and Promoting Healthy Ageing across the Life Cycle (JA-CHRODIS). <i>Health Policy</i> , 2018, 122, 4-11.	1.4	176
4	Measuring patient activation in the Netherlands: translation and validation of the American short form Patient Activation Measure (PAM13). <i>BMC Public Health</i> , 2012, 12, 577.	1.2	167
5	Effectiveness of comprehensive care programs for patients with multiple chronic conditions or frailty: A systematic literature review. <i>Health Policy</i> , 2016, 120, 818-832.	1.4	149
6	Illness perceptions of cancer patients: relationships with illness characteristics and coping. <i>Psycho-Oncology</i> , 2015, 24, 11-18.	1.0	108
7	Perceived genetic knowledge, attitudes towards genetic testing, and the relationship between these among patients with a chronic disease. <i>Patient Education and Counseling</i> , 2007, 65, 197-204.	1.0	104
8	Chronic disease and mental disorder. <i>Social Science and Medicine</i> , 2005, 60, 789-797.	1.8	101
9	Illness perceptions in dialysis patients and their association with quality of life. <i>Psychology and Health</i> , 2008, 23, 679-690.	1.2	95
10	Communication of biobanks' research results: What do (potential) participants want?. <i>American Journal of Medical Genetics, Part A</i> , 2010, 152A, 2482-2492.	0.7	86
11	Participation in daytime activities among people with mild or moderate intellectual disability. <i>Journal of Intellectual Disability Research</i> , 2011, 55, 4-18.	1.2	86
12	Managing multimorbidity: Profiles of integrated care approaches targeting people with multiple chronic conditions in Europe. <i>Health Policy</i> , 2018, 122, 44-52.	1.4	82
13	Available Support and Received Support: Different Effects Under Stressful Circumstances. <i>Journal of Social and Personal Relationships</i> , 1997, 14, 59-77.	1.4	75
14	eHealth in integrated care programs for people with multimorbidity in Europe: Insights from the ICARE4EU project. <i>Health Policy</i> , 2018, 122, 53-63.	1.4	71
15	Knowledge and Attitudes Towards Genetic Testing: A Two Year Follow-Up Study in Patients with Asthma, Diabetes Mellitus and Cardiovascular Disease. <i>Journal of Genetic Counseling</i> , 2007, 16, 493-504.	0.9	66
16	Determinants of Increased Primary Health Care Use in Cancer Survivors. <i>Journal of Clinical Oncology</i> , 2012, 30, 4155-4160.	0.8	65
17	For which health problems do cancer survivors visit their General Practitioner?. <i>European Journal of Cancer</i> , 2013, 49, 211-218.	1.3	62
18	Patient-centeredness of integrated care programs for people with multimorbidity. Results from the European ICARE4EU project. <i>Health Policy</i> , 2018, 122, 36-43.	1.4	60

#	ARTICLE	IF	CITATIONS
19	Social position of adolescents with chronic digestive disorders. <i>European Journal of Gastroenterology and Hepatology</i> , 2002, 14, 543-549.	0.8	59
20	Health care utilization of patients with multiple chronic diseases in the Netherlands: Differences and underlying factors. <i>European Journal of Internal Medicine</i> , 2016, 35, 44-50.	1.0	56
21	Chronic Disease Management Programmes: an adequate response to patients' needs?. <i>Health Expectations</i> , 2014, 17, 608-621.	1.1	55
22	The information-seeking behavior of cancer outpatients: a description of the situation. <i>Patient Education and Counseling</i> , 1993, 22, 35-46.	1.0	54
23	Labour participation of the chronically ill: A profile sketch. <i>European Journal of Public Health</i> , 2002, 12, 124-130.	0.1	54
24	Bringing Internet connectivity to rural Zambia using a collaborative approach. , 2007, , .		54
25	Health care utilization of patients with multiple chronic diseases in The Netherlands: Differences and underlying factors. <i>European Journal of Internal Medicine</i> , 2015, 26, 190-196.	1.0	53
26	Ageing with an intellectual disability: the impact of personal resources on well-being. <i>Journal of Intellectual Disability Research</i> , 2013, 57, 1068-1078.	1.2	52
27	Predictive genetic testing for cardiovascular diseases: Impact on carrier children. <i>American Journal of Medical Genetics, Part A</i> , 2008, 146A, 3136-3146.	0.7	50
28	Illness perceptions and self-care behaviours in the first years of living with type 2 diabetes; does the presence of complications matter?. <i>Psychology and Health</i> , 2015, 30, 1274-1287.	1.2	49
29	Illness perceptions and treatment perceptions of patients with chronic kidney disease: Different phases, different perceptions?. <i>British Journal of Health Psychology</i> , 2013, 18, 244-262.	1.9	48
30	Quality of care assessment for people with multimorbidity. <i>Journal of Internal Medicine</i> , 2019, 285, 289-300.	2.7	48
31	Self-management support needs of patients with chronic illness: Do needs for support differ according to the course of illness?. <i>Patient Education and Counseling</i> , 2013, 93, 626-632.	1.0	47
32	Clinical experience of rehabilitation therapists with chronic diseases: a quantitative approach. <i>Clinical Rehabilitation</i> , 1998, 12, 143-150.	1.0	44
33	Health-related quality of life of children with a positive carrier status for inherited cardiovascular diseases. <i>American Journal of Medical Genetics, Part A</i> , 2008, 146A, 700-707.	0.7	44
34	Does trust in health care influence the use of complementary and alternative medicine by chronically ill people?. <i>BMC Public Health</i> , 2006, 6, 188.	1.2	43
35	Diabetes-related distress over the course of illness: results from the Diacourse study. <i>Diabetic Medicine</i> , 2015, 32, 1617-1624.	1.2	43
36	Do everyday problems of people with chronic illness interfere with their disease management?. <i>BMC Public Health</i> , 2015, 15, 1000.	1.2	42

#	ARTICLE	IF	CITATIONS
37	School and leisure activities in adolescents and young adults with chronic digestive disorders: Impact of burden of disease. <i>International Journal of Behavioral Medicine</i> , 2006, 13, 121-130.	0.8	40
38	About Cats and Dogs â€¦ Reconsidering the Relationship Between Pet Ownership and Health Related Outcomes in Community-Dwelling Elderly. <i>Social Indicators Research</i> , 2011, 102, 373-388.	1.4	40
39	People with mild to moderate intellectual disability talking about their diabetes and how they manage. <i>Journal of Intellectual Disability Research</i> , 2012, 56, 351-360.	1.2	37
40	The Stress of Being Chronically Ill: From Disease-Specific to Task-Specific Aspects. <i>Journal of Behavioral Medicine</i> , 2004, 27, 255-271.	1.1	36
41	Money does not bring wellâ€being, but it does help! The relationship between financial resources and life satisfaction of the chronically ill mediated by social deprivation and loneliness. <i>Journal of Community and Applied Social Psychology</i> , 2008, 18, 39-53.	1.4	36
42	Work adjustments among the chronically ill. <i>International Journal of Rehabilitation Research</i> , 2001, 24, 7-14.	0.7	35
43	What are essential elements of high-quality palliative care at home? An interview study among patients and relatives faced with advanced cancer. <i>BMC Palliative Care</i> , 2019, 18, 96.	0.8	35
44	Pre-dialysis patients' perceived autonomy, self-esteem and labor participation: associations with illness perceptions and treatment perceptions. A cross-sectional study. <i>BMC Nephrology</i> , 2010, 11, 35.	0.8	34
45	Patient-Perceived Self-Management Tasks and Support Needs of People with Chronic Illness: Generic or Disease Specific?. <i>Annals of Behavioral Medicine</i> , 2015, 49, 221-229.	1.7	34
46	Health-related needs of people with multiple chronic diseases: differences and underlying factors. <i>Quality of Life Research</i> , 2016, 25, 651-660.	1.5	34
47	Attitudes and dilemmas of caregivers supporting people with intellectual disabilities who have diabetes. <i>Patient Education and Counseling</i> , 2012, 87, 383-388.	1.0	32
48	The importance of illness duration, age at diagnosis and the year of diagnosis for labour participation chances of people with chronic illness: results of a nationwide panel-study in the Netherlands. <i>BMC Public Health</i> , 2013, 13, 803.	1.2	32
49	The role of illness perceptions in labor participation of the chronically ill. <i>International Archives of Occupational and Environmental Health</i> , 2008, 82, 13-20.	1.1	30
50	The Development of and First Experiences with a Behavioural Self-regulation Intervention for End-stage Renal Disease Patients and Their Partners. <i>Journal of Health Psychology</i> , 2011, 16, 274-283.	1.3	29
51	Stress in chronic disease: Do the perceptions of patients and their general practitioners match?. <i>British Journal of Health Psychology</i> , 2001, 6, 229-242.	1.9	28
52	Subjective well-being of elderly women: Conceptual differences between cancer patients, women suffering from chronic ailments and healthy women. <i>British Journal of Clinical Psychology</i> , 1995, 34, 289-300.	1.7	26
53	Disease characteristics as determinants of the labour market position of adolescents and young adults with chronic digestive disorders. <i>European Journal of Gastroenterology and Hepatology</i> , 2006, 18, 203-209.	0.8	26
54	Healthâ€related quality of life and health care use in cancer survivors compared with patients with chronic diseases. <i>Cancer</i> , 2016, 122, 962-970.	2.0	26

#	ARTICLE	IF	CITATIONS
55	Developments in patient activation of people with chronic illness and the impact of changes in self-reported health: results of a nationwide longitudinal study in The Netherlands. <i>Patient Education and Counseling</i> , 2014, 97, 383-390.	1.0	25
56	A prospective analysis of the effect of neighbourhood and individual social capital on changes in self-rated health of people with chronic illness. <i>BMC Public Health</i> , 2014, 14, 675.	1.2	25
57	Biobank Research: Reporting Results to Individual Participants. <i>European Journal of Health Law</i> , 2009, 16, 229-247.	0.1	24
58	Peer support to decrease diabetes-related distress in patients with type 2 diabetes mellitus: design of a randomised controlled trial. <i>BMC Endocrine Disorders</i> , 2014, 14, 21.	0.9	24
59	Perceived autonomy and self-esteem in Dutch dialysis patients: The importance of illness and treatment perceptions. <i>Psychology and Health</i> , 2010, 25, 733-749.	1.2	23
60	Researchers'™ opinions towards the communication of results of biobank research: a survey study. <i>European Journal of Human Genetics</i> , 2012, 20, 258-262.	1.4	22
61	A Methodological Approach for Implementing an Integrated Multimorbidity Care Model: Results from the Pre-Implementation Stage of Joint Action CHRODIS-PLUS. <i>International Journal of Environmental Research and Public Health</i> , 2019, 16, 5044.	1.2	22
62	Clinical and functional correlates of foot pain in diabetic patients. <i>Disability and Rehabilitation</i> , 1998, 20, 330-336.	0.9	21
63	Identifying subgroups of persons with multimorbidity based on their needs for care and support. <i>BMC Family Practice</i> , 2019, 20, 179.	2.9	20
64	Depressive symptomatology of post-menopausal breast cancer patients: a comparison of women recently treated by mastectomy or by breast-conserving therapy. <i>European Journal of Surgical Oncology</i> , 1995, 21, 498-503.	0.5	18
65	Partners of cancer patients consult their GPs significantly more often with both somatic and psychosocial problems. <i>Scandinavian Journal of Primary Health Care</i> , 2013, 31, 203-208.	0.6	18
66	The European multistakeholder PanCareFollowUp project: novel, person-centred survivorship care to improve care quality, effectiveness, cost-effectiveness and accessibility for cancer survivors and caregivers. <i>European Journal of Cancer</i> , 2021, 153, 74-85.	1.3	18
67	Assigning a Prominent Role to 'The Patient Experience' in Assessing the Quality of Integrated Care for Populations with Multiple Chronic Conditions. <i>International Journal of Integrated Care</i> , 2019, 19, 19.	0.1	18
68	Regulated competition in health care: Switching and barriers to switching in the Dutch health insurance system. <i>BMC Health Services Research</i> , 2011, 11, 95.	0.9	17
69	Coping in adolescents and young adults with chronic digestive disorders: Impact on school and leisure activities. <i>Psychology and Health</i> , 2006, 21, 447-462.	1.2	16
70	Labor Participation Among Patients with Inflammatory Bowel Disease. <i>Inflammatory Bowel Diseases</i> , 2013, 19, 81-91.	0.9	16
71	Participation of People With Physical Disabilities: Three-Year Trend and Potential for Improvement. <i>Archives of Physical Medicine and Rehabilitation</i> , 2013, 94, 944-950.	0.5	16
72	Tackling the challenge of multi-morbidity: Actions for health policy and research. <i>Health Policy</i> , 2018, 122, 1-3.	1.4	16

#	ARTICLE	IF	CITATIONS
73	Patient involvement in diabetes care: experiences in nine diabetes care groups. <i>International Journal of Integrated Care</i> , 2015, 15, e044.	0.1	16
74	Health care use by diabetic patients in the Netherlands: patterns and predicting factors. <i>Diabetes Research and Clinical Practice</i> , 2003, 61, 199-209.	1.1	15
75	Palliative care for patients with cancer: do patients receive the care they consider important? A survey study. <i>BMC Palliative Care</i> , 2018, 17, 61.	0.8	15
76	Individual care plans for chronically ill patients within primary care in the Netherlands: Dissemination and associations with patient characteristics and patient-perceived quality of care. <i>Scandinavian Journal of Primary Health Care</i> , 2015, 33, 100-106.	0.6	14
77	Who is responsible for providing care? Investigating the role of care tasks and past experiences in a cross-sectional survey in the Netherlands. <i>BMC Health Services Research</i> , 2017, 17, 477.	0.9	14
78	Living with diabetes: a group-based self-management support programme for T2DM patients in the early phases of illness and their partners, study protocol of a randomised controlled trial. <i>BMC Health Services Research</i> , 2014, 14, 144.	0.9	13
79	The role of social support in dialysis patients's feelings of autonomy and self-esteem: Is support more beneficial for patients with specific illness perceptions?. <i>Families, Systems and Health</i> , 2014, 32, 313-327.	0.4	13
80	Preferences and experiences of chronically ill and disabled patients regarding shared decision-making: Does the type of care to be decided upon matter?. <i>Patient Education and Counseling</i> , 2011, 84, 111-117.	1.0	12
81	Effectiveness of a self-management support program for type 2 diabetes patients in the first years of illness: Results from a randomized controlled trial. <i>PLoS ONE</i> , 2019, 14, e0218242.	1.1	12
82	Disentangling the effect of illness perceptions on health status in people with type 2 diabetes after an acute coronary event. <i>BMC Family Practice</i> , 2018, 19, 35.	2.9	11
83	Comparison of perceptions of obesity among adults with central obesity with and without additional cardiometabolic risk factors and among those who were formally obese, 3 years after screening for central obesity. <i>BMC Public Health</i> , 2015, 15, 1214.	1.2	10
84	Self-care of patients with type 2 diabetes mellitus over the course of illness: implications for tailoring support. <i>Journal of Diabetes and Metabolic Disorders</i> , 2020, 19, 81-89.	0.8	10
85	Identifying multimorbid patients with high care needs - A study based on electronic medical record data. <i>European Journal of General Practice</i> , 2020, 26, 189-195.	0.9	10
86	Podiatric care for diabetic patients with foot problems. <i>International Journal of Rehabilitation Research</i> , 1999, 22, 181-188.	0.7	9
87	Tailored support for type 2 diabetes patients with an acute coronary event after discharge from hospital - design and development of a randomised controlled trial. <i>Diabetology and Metabolic Syndrome</i> , 2014, 6, 5.	1.2	9
88	Effectiveness of tailored support for people with Type 2 diabetes after a first acute coronary event: a multicentre randomized controlled trial (the Diacourse-ACE study). <i>Diabetic Medicine</i> , 2016, 33, 125-133.	1.2	9
89	Identifying high-need patients with multimorbidity from their illness perceptions and personal resources to manage their health and care: a longitudinal study. <i>BMC Family Practice</i> , 2020, 21, 75.	2.9	9
90	The possession of technical aids among persons with a somatic chronic disease. <i>Disability and Rehabilitation</i> , 2003, 25, 393-398.	0.9	8

#	ARTICLE	IF	CITATIONS
91	The combined effect of cancer and chronic diseases on general practitioner consultation rates. <i>Cancer Epidemiology</i> , 2015, 39, 109-114.	0.8	8
92	What part of the total care consumed by type 2 diabetes patients is directly related to diabetes? Implications for disease management programs. <i>International Journal of Integrated Care</i> , 2011, 11, e140.	0.1	8
93	People with multimorbidity: forgotten outsiders or dynamic self-managers?. <i>Journal of Health Organization and Management</i> , 2014, 28, 696-712.	0.6	7
94	Green space and changes in self-rated health among people with chronic illness. <i>European Journal of Public Health</i> , 2014, 24, 640-642.	0.1	7
95	Perceived quality of chronic illness care is associated with self-management: Results of a nationwide study in the Netherlands. <i>Health Policy</i> , 2016, 120, 431-439.	1.4	7
96	Cancer survivors' activation to self-management and its relationship with participation in paid work and work-related problems. <i>Psycho-Oncology</i> , 2017, 26, 1881-1887.	1.0	7
97	People with activity limitations™ perceptions of their health condition and their relationships with social participation and experienced autonomy. <i>BMC Public Health</i> , 2019, 19, 1536.	1.2	7
98	Assessing the experience of person-centred coordinated care of people with chronic conditions in the Netherlands: Validation of the Dutch P3CEQ. <i>Health Expectations</i> , 2022, 25, 1069-1080.	1.1	7
99	From protocolized to person-centered chronic care in general practice: study protocol of an action-based research project (COPILOT). <i>Primary Health Care Research and Development</i> , 2019, 20, e134.	0.5	6
100	Application of the JA-CHRODIS Integrated Multimorbidity Care Model (IMCM) to a Case Study of Diabetes and Mental Health. <i>International Journal of Environmental Research and Public Health</i> , 2019, 16, 5151.	1.2	6
101	Priorities and preferences for care of people with multiple chronic conditions. <i>Health Expectations</i> , 2021, 24, 1300-1311.	1.1	6
102	Measuring Older Peoples™ Experiences of Person-Centred Coordinated Care: Experience and Methodological Reflections from Applying a Patient Reported Experience Measure in SUSTAIN. <i>International Journal of Integrated Care</i> , 2021, 21, 3.	0.1	5
103	Collaborating on Early Detection of Frailty; a Multifaceted Challenge. <i>International Journal of Integrated Care</i> , 2019, 19, 6.	0.1	5
104	Individual care plans in chronic illness care: aims, use and outcomes. <i>International Journal of Integrated Care</i> , 2016, 16, 209.	0.1	4
105	Chronic conditions and multimorbidity: skill-mix innovations for enhanced quality and coordination of care. , 2022, , 152-220.		3
106	Separate and joint effects of physical and mental health on participation of people with somatic chronic illness. <i>Journal of Nursing and Healthcare of Chronic Illness</i> , 2011, 3, 61-72.	0.5	2
107	Effect of the partner's health and support on cancer patients' use of general practitioner care. <i>Psycho-Oncology</i> , 2016, 25, 559-566.	1.0	2
