#	ARTICLE	IF	CITATIONS
1	Chronic conditions and multimorbidity: skill-mix innovations for enhanced quality and coordination of care. , 2022, , 152-220.		3
2	Assessing the experience of person-centred coordinated care of people with chronic conditions in the Netherlands: Validation of the Dutch P3CEQ. Health Expectations, 2022, 25, 1069-1080.	2.6	7
3	Priorities and preferences for care of people with multiple chronic conditions. Health Expectations, 2021, 24, 1300-1311.	2.6	6
4	Measuring Older Peoples'™ Experiences of Person-Centred Coordinated Care: Experience and Methodological Reflections from Applying a Patient Reported Experience Measure in SUSTAIN. International Journal of Integrated Care, 2021, 21, 3.	0.2	5
5	The European multistakeholder PanCareFollowUp project: novel, person-centred survivorship care to improve care quality, effectiveness, cost-effectiveness and accessibility for cancer survivors and caregivers. European Journal of Cancer, 2021, 153, 74-85.	2.8	18
6	Identifying high-need patients with multimorbidity from their illness perceptions and personal resources to manage their health and care: a longitudinal study. BMC Family Practice, 2020, 21, 75.	2.9	9
7	Self-care of patients with type 2 diabetes mellitus over the course of illness: implications for tailoring support. Journal of Diabetes and Metabolic Disorders, 2020, 19, 81-89.	1.9	10
8	Identifying multimorbid patients with high care needs - A study based on electronic medical record data. European Journal of General Practice, 2020, 26, 189-195.	2.0	10
9	Effectiveness of a self-management support program for type 2 diabetes patients in the first years of illness: Results from a randomized controlled trial. PLoS ONE, 2019, 14, e0218242.	2.5	12
10	What are essential elements of high-quality palliative care at home? An interview study among patients and relatives faced with advanced cancer. BMC Palliative Care, 2019, 18, 96.	1.8	35
11	From protocolized to person-centered chronic care in general practice: study protocol of an action-based research project (COPILLOT). Primary Health Care Research and Development, 2019, 20, e134.	1.2	6
12	Improving self-management of people with type 2 diabetes in the first years after diagnosis: Development and pilot of a theory-based interactive group intervention. SAGE Open Medicine, 2019, 7, 205031211984791.	1.8	1
13	Quality of care assessment for people with multimorbidity. Journal of Internal Medicine, 2019, 285, 289-300.	6.0	48
14	People with activity limitations'™ perceptions of their health condition and their relationships with social participation and experienced autonomy. BMC Public Health, 2019, 19, 1536.	2.9	7
15	Application of the JA-CHRODIS Integrated Multimorbidity Care Model (IMCM) to a Case Study of Diabetes and Mental Health. International Journal of Environmental Research and Public Health, 2019, 16, 5151.	2.6	6
16	Identifying subgroups of persons with multimorbidity based on their needs for care and support. BMC Family Practice, 2019, 20, 179.	2.9	20
17	A Methodological Approach for Implementing an Integrated Multimorbidity Care Model: Results from the Pre-Implementation Stage of Joint Action CHRODIS-PLUS. International Journal of Environmental Research and Public Health, 2019, 16, 5044.	2.6	22
18	Collaborating on Early Detection of Frailty; a Multifaceted Challenge. International Journal of Integrated Care, 2019, 19, 6.	0.2	5

#	ARTICLE	IF	CITATIONS
19	Assigning a Prominent Role to “The Patient Experience” in Assessing the Quality of Integrated Care for Populations with Multiple Chronic Conditions. <i>International Journal of Integrated Care</i> , 2019, 19, 19.	0.2	18
20	Tackling the challenge of multi-morbidity: Actions for health policy and research. <i>Health Policy</i> , 2018, 122, 1-3.	3.0	16
21	Disentangling the effect of illness perceptions on health status in people with type 2 diabetes after an acute coronary event. <i>BMC Family Practice</i> , 2018, 19, 35.	2.9	11
22	Palliative care for patients with cancer: do patients receive the care they consider important? A survey study. <i>BMC Palliative Care</i> , 2018, 17, 61.	1.8	15
23	Managing multimorbidity: Profiles of integrated care approaches targeting people with multiple chronic conditions in Europe. <i>Health Policy</i> , 2018, 122, 44-52.	3.0	82
24	Multimorbidity care model: Recommendations from the consensus meeting of the Joint Action on Chronic Diseases and Promoting Healthy Ageing across the Life Cycle (JA-CHRODIS). <i>Health Policy</i> , 2018, 122, 4-11.	3.0	176
25	Patient-centeredness of integrated care programs for people with multimorbidity. Results from the European ICARE4EU project. <i>Health Policy</i> , 2018, 122, 36-43.	3.0	60
26	eHealth in integrated care programs for people with multimorbidity in Europe: Insights from the ICARE4EU project. <i>Health Policy</i> , 2018, 122, 53-63.	3.0	71
27	Cancer survivors' activation to self-management and its relationship with participation in paid work and work-related problems. <i>Psycho-Oncology</i> , 2017, 26, 1881-1887.	2.3	7
28	Who is responsible for providing care? Investigating the role of care tasks and past experiences in a cross-sectional survey in the Netherlands. <i>BMC Health Services Research</i> , 2017, 17, 477.	2.2	14
29	ICARE4EU, a Health Programme project (2008-2013) on integrated care for multimorbidity, targeted at policymakers. <i>European Journal of Public Health</i> , 2016, 26, .	0.3	1
30	Effect of the partner's health and support on cancer patients' use of general practitioner care. <i>Psycho-Oncology</i> , 2016, 25, 559-566.	2.3	2
31	Health-related quality of life and health care use in cancer survivors compared with patients with chronic diseases. <i>Cancer</i> , 2016, 122, 962-970.	4.1	26
32	Effectiveness of comprehensive care programs for patients with multiple chronic conditions or frailty: A systematic literature review. <i>Health Policy</i> , 2016, 120, 818-832.	3.0	149
33	Health care utilization of patients with multiple chronic diseases in the Netherlands: Differences and underlying factors. <i>European Journal of Internal Medicine</i> , 2016, 35, 44-50.	2.2	56
34	Corrigendum to “Health care utilization of patients with multiple chronic diseases in The Netherlands: Differences and underlying factors” [Eur. J. Intern. Med. 26 (2015) 190–196]. <i>European Journal of Internal Medicine</i> , 2016, 35, 43.	2.2	1
35	Health-related needs of people with multiple chronic diseases: differences and underlying factors. <i>Quality of Life Research</i> , 2016, 25, 651-660.	3.1	34
36	Perceived quality of chronic illness care is associated with self-management: Results of a nationwide study in the Netherlands. <i>Health Policy</i> , 2016, 120, 431-439.	3.0	7

#	ARTICLE	IF	CITATIONS
37	Effectiveness of tailored support for people with Type 2 diabetes after a first acute coronary event: a multicentre randomized controlled trial (the Diacourseâ€œscp>ACE</scp> study). Diabetic Medicine, 2016, 33, 125-133.	2.3	9
38	Individual care plans in chronic illness care: aims, use and outcomes. International Journal of Integrated Care, 2016, 16, 209.	0.2	4
39	Integrated and patient-centered care for people with multimorbidity: insights from European practices. International Journal of Integrated Care, 2016, 16, 212.	0.2	0
40	1121 CAPPA: Care for prostate cancer patients. European Journal of Cancer, 2015, 51, S170.	2.8	0
41	Comparison of perceptions of obesity among adults with central obesity with and without additional cardiometabolic risk factors and among those who were formally obese, 3 years after screening for central obesity. BMC Public Health, 2015, 15, 1214.	2.9	10
42	Do everyday problems of people with chronic illness interfere with their disease management?. BMC Public Health, 2015, 15, 1000.	2.9	42
43	Diabetesâ€œrelated distress over the course of illness: results from the Diacourse study. Diabetic Medicine, 2015, 32, 1617-1624.	2.3	43
44	Illness perceptions and self-care behaviours in the first years of living with type 2 diabetes; does the presence of complications matter?. Psychology and Health, 2015, 30, 1274-1287.	2.2	49
45	Illness perceptions of cancer patients: relationships with illness characteristics and coping. Psycho-Oncology, 2015, 24, 11-18.	2.3	108
46	The combined effect of cancer and chronic diseases on general practitioner consultation rates. Cancer Epidemiology, 2015, 39, 109-114.	1.9	8
47	Health care utilization of patients with multiple chronic diseases in The Netherlands: Differences and underlying factors. European Journal of Internal Medicine, 2015, 26, 190-196.	2.2	53
48	Individual care plans for chronically ill patients within primary care in the Netherlands: Dissemination and associations with patient characteristics and patient-perceived quality of care. Scandinavian Journal of Primary Health Care, 2015, 33, 100-106.	1.5	14
49	Patient-Perceived Self-Management Tasks and Support Needs of People with Chronic Illness: Generic or Disease Specific?. Annals of Behavioral Medicine, 2015, 49, 221-229.	2.9	34
50	Functional, communicative and critical health literacy of chronic disease patients and their importance for self-management. Patient Education and Counseling, 2015, 98, 41-48.	2.2	241
51	Patient involvement in diabetes care: experiences in nine diabetes care groups. International Journal of Integrated Care, 2015, 15, e044.	0.2	16
52	People with multimorbidity: forgotten outsiders or dynamic self-managers?. Journal of Health Organization and Management, 2014, 28, 696-712.	1.3	7
53	Chronic Disease Management Programmes: an adequate response to patientsâ€™ needs?. Health Expectations, 2014, 17, 608-621.	2.6	55
54	Tailored support for type 2 diabetes patients with an acute coronary event after discharge from hospital â€œ design and development of a randomised controlled trial. Diabetology and Metabolic Syndrome, 2014, 6, 5.	2.7	9
