#	ARTICLE	IF	CITATIONS
1	Desiccated Microclimates for Heritage Metals: Creation and Management. <i>Studies in Conservation</i> , 2021, 66, 127-153.	1.1	2
2	Refining the use of oxygen consumption as a proxy corrosion rate measure for archaeological and historic iron. <i>European Physical Journal Plus</i> , 2021, 136, 1.	2.6	3
3	The Influence of Relative Humidity and Intrinsic Chloride on Post-excavation Corrosion Rates of Archaeological Wrought Iron. <i>Studies in Conservation</i> , 2019, 64, 456-471.	1.1	18
4	The impact of aqueous washing on the ability of $\hat{\text{I}}^2\text{FeOOH}$ to corrode iron. <i>Environmental Science and Pollution Research</i> , 2017, 24, 2138-2149.	5.3	15
5	Surface preparation of historic wrought iron: Evidencing the requirement for standardisation. <i>Materials and Corrosion - Werkstoffe Und Korrosion</i> , 2016, 67, 176-189.	1.5	4
6	The impact of chloride desalination on the corrosion rate of archaeological iron. <i>Studies in Conservation</i> , 2013, 58, 326-337.	1.1	23
7	The efficiency of chloride extraction from archaeological iron objects using deoxygenated alkaline solutions. <i>Studies in Conservation</i> , 2012, 57, 29-41.	1.1	25
8	SS GREAT BRITAIN: CONSERVATION AND ACCESS – SYNERGY AND COST. <i>Studies in Conservation</i> , 2008, 53, 109-114.	1.1	5
9	Towards quantified assessment of aqueous chloride extraction methods for archaeological iron: Deoxygenated treatment environments. <i>The Conservator</i> , 2008, 31, 75-86.	0.2	14
10	Indexing reliability for condition survey data. <i>The Conservator</i> , 2007, 30, 49-62.	0.2	24
11	Desiccated Storage of Chloride-Contaminated Archaeological Iron Objects. <i>Studies in Conservation</i> , 2005, 50, 241-252.	1.1	31
12	ss Great Britain: Teamwork as a platform for innovative conservation. <i>The Conservator</i> , 2005, 29, 73-86.	0.2	7
13	The Role of $\hat{\text{I}}^2\text{FeOOH}$ in the Corrosion of Archaeological Iron. <i>Materials Research Society Symposia Proceedings</i> , 2004, 852, 21.	0.1	4
14	Using multiple hypotheses in collection condition surveys. <i>The Conservator</i> , 2003, 27, 13-22.	0.2	4
15	Chloride extraction from archaeological iron: comparative treatment efficiencies. <i>Studies in Conservation</i> , 1996, 41, 208-212.	1.1	14
16	Degree of Mineralization: Its Significance for the Stability and Treatment of Excavated Ironwork. <i>Studies in Conservation</i> , 1983, 28, 85.	1.1	3
17	Degree of mineralization: its significance for the stability and treatment of excavated ironwork. <i>Studies in Conservation</i> , 1983, 28, 85-90.	1.1	25
18	Making a large scale replica: The pillar of Eliseg. <i>The Conservator</i> , 1982, 6, 6-11.	0.2	5
