

Andrew Gonzalez

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/514730/andrew-gonzalez-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

153
papers

20,540

#	Paper	IF	Citations
153	Contrasting responses of soybean aphids, primary parasitoids, and hyperparasitoids to forest fragments and agricultural landscape structure. <i>Agriculture, Ecosystems and Environment</i> , 2022 , 326, 107752	5.7	2
152	A Glyphosate-Based Herbicide Cross-Selects for Antibiotic Resistance Genes in Bacterioplankton Communities.. <i>MSystems</i> , 2022 , e0148221	7.6	1
151	Monitoring social-ecological networks for biodiversity and ecosystem services in human-dominated landscapes. <i>Facets</i> , 2021 , 6, 1670-1692	2.3	3
150	Grand challenges in biodiversity-ecosystem functioning research in the era of science-policy platforms require explicit consideration of feedbacks. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2021 , 288, 20210783	4.4	2
149	Scaling up biodiversity-ecosystem functioning relationships: the role of environmental heterogeneity in space and time. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2021 , 288, 20202779	4.4	8
148	Refining analyses of existing data sets is valuable for macrogenetics: a response to Paz-Vinas, Jensen et al., (2021). <i>Ecology Letters</i> , 2021 , 24, 1285-1286	10	0
147	Prior exposure to stress allows the maintenance of an ecosystem cycle following severe acidification. <i>Oikos</i> , 2021 , 130, 1062	4	1
146	Biodiversity as insurance: from concept to measurement and application. <i>Biological Reviews</i> , 2021 , 96, 2333-2354	13.5	13
145	Biodiversity-productivity relationships are key to nature-based climate solutions. <i>Nature Climate Change</i> , 2021 , 11, 543-550	21.4	21
144	Landscape modification and nutrient-driven instability at a distance. <i>Ecology Letters</i> , 2021 , 24, 398-414	10	8
143	Ecosystem services and the resilience of agricultural landscapes. <i>Advances in Ecological Research</i> , 2021 , 1-43	4.6	10
142	Resistance, resilience, and functional redundancy of freshwater bacterioplankton communities facing a gradient of agricultural stressors in a mesocosm experiment. <i>Molecular Ecology</i> , 2021 , 30, 4771-4788	5.7	4
141	Widespread agrochemicals differentially affect zooplankton biomass and community structure. <i>Ecological Applications</i> , 2021 , 31, e02423	4.9	5
140	A roadmap towards predicting species interaction networks (across space and time). <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2021 , 376, 20210063	5.8	7
139	Life in fluctuating environments. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2020 , 375, 20190454	5.8	25
138	Breaking ecological barriers: Anthropogenic disturbance leads to habitat transitions, hybridization, and high genetic diversity. <i>Science of the Total Environment</i> , 2020 , 740, 140046	10.2	6
137	Tropical forest fragmentation and isolation: Is community decay a random process?. <i>Global Ecology and Conservation</i> , 2020 , 23, e01168	2.8	2

136	Community rescue in experimental phytoplankton communities facing severe herbicide pollution. <i>Nature Ecology and Evolution</i> , 2020 , 4, 578-588	12.3	21
135	Scaling-up biodiversity-ecosystem functioning research. <i>Ecology Letters</i> , 2020 , 23, 757-776	10	95
134	Converting Ecological Currencies: Energy, Material, and Information Flows. <i>Trends in Ecology and Evolution</i> , 2020 , 35, 1068-1077	10.9	4
133	No consistent effects of humans on animal genetic diversity worldwide. <i>Ecology Letters</i> , 2020 , 23, 55-67	10	25
132	Research gaps in knowledge of the impact of urban growth on biodiversity. <i>Nature Sustainability</i> , 2020 , 3, 16-24	22.1	99
131	Environmental fluctuations can promote evolutionary rescue in high-extinction-risk scenarios. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2020 , 287, 20201144	4.4	5
130	Evolutionary Rescue Is Mediated by the History of Selection and Dispersal in Diversifying Metacommunities. <i>Frontiers in Ecology and Evolution</i> , 2020 , 8,	3.7	2
129	Trophic structure modulates community rescue following acidification. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2019 , 286, 20190856	4.4	11
128	Species richness change across spatial scales. <i>Oikos</i> , 2019 , 128, 1079-1091	4	78
127	Ecological Data Should Not Be So Hard to Find and Reuse. <i>Trends in Ecology and Evolution</i> , 2019 , 34, 494-496	4.9	30
126	Mixed evidence for adaptation to environmental pollution. <i>Evolutionary Applications</i> , 2019 , 12, 1259-1273	4.8	13
125	Understanding Maladaptation by Uniting Ecological and Evolutionary Perspectives. <i>American Naturalist</i> , 2019 , 194, 495-515	3.7	27
124	Causes of maladaptation. <i>Evolutionary Applications</i> , 2019 , 12, 1229-1242	4.8	45
123	The geography of biodiversity change in marine and terrestrial assemblages. <i>Science</i> , 2019 , 366, 339-345	33.3	176
122	The Montagu Connection: Understanding How Ecosystems Can Provide Resilience to the Risk of Ecosystem Service Change 2019 , 291-300		
121	Spatial evolutionary dynamics produce a negative cooperation-population size relationship. <i>Theoretical Population Biology</i> , 2019 , 125, 94-101	1.2	5
120	The overlooked impact of rising glyphosate use on phosphorus loading in agricultural watersheds. <i>Frontiers in Ecology and the Environment</i> , 2019 , 17, 48-56	5.5	43
119	Quantifying effects of biodiversity on ecosystem functioning across times and places. <i>Ecology Letters</i> , 2018 , 21, 763-778	10	75

118	Complementary crops and landscape features sustain wild bee communities 2018 , 28, 1093-1105		23
117	Is local biodiversity declining or not? A summary of the debate over analysis of species richness time trends. <i>Biological Conservation</i> , 2018 , 219, 175-183	6.2	83
116	Moving forward in implementing green infrastructures: Stakeholder perceptions of opportunities and obstacles in a major North American metropolitan area. <i>Cities</i> , 2018 , 81, 61-70	5.6	30
115	Is habitat fragmentation good for biodiversity?. <i>Biological Conservation</i> , 2018 , 226, 9-15	6.2	221
114	The strength of the biodiversity-ecosystem function relationship depends on spatial scale. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2018 , 285,	4.4	42
113	Stability and dynamic properties of octocoral communities in the Tropical Eastern Pacific. <i>Marine Ecology - Progress Series</i> , 2018 , 588, 71-84	2.6	2
112	Multiscale change in reef coral species diversity and composition in the Tropical Eastern Pacific. <i>Coral Reefs</i> , 2018 , 37, 105-120	4.2	4
111	Reproductive traits and their relationship with water temperature in three common octocoral (Anthozoa: Octocoralia) species from the tropical eastern Pacific. <i>Bulletin of Marine Science</i> , 2018 , 94, 1527-1541	1.3	1
110	Selecting surrogate species for connectivity conservation. <i>Biological Conservation</i> , 2018 , 227, 326-334	6.2	28
109	Urban tinkering. <i>Sustainability Science</i> , 2018 , 13, 1549-1564	6.4	23
108	Dispersal governs the reorganization of ecological networks under environmental change. <i>Nature Ecology and Evolution</i> , 2017 , 1, 162	12.3	58
107	Linking the influence and dependence of people on biodiversity across scales. <i>Nature</i> , 2017 , 546, 65-72	50.4	274
106	Applying network theory to prioritize multispecies habitat networks that are robust to climate and land-use change. <i>Conservation Biology</i> , 2017 , 31, 1383-1396	6	132
105	The Genetic Signature of Range Expansion in a Disease Vector-The Black-Legged Tick. <i>Journal of Heredity</i> , 2017 , 108, 176-183	2.4	7
104	Effects of network modularity on the spread of perturbation impact in experimental metapopulations. <i>Science</i> , 2017 , 357, 199-201	33.3	97
103	Rapid morphological divergence in two closely related and co-occurring species over the last 50 years. <i>Evolutionary Ecology</i> , 2017 , 31, 847-864	1.8	17
102	Functional connectivity of the white-footed mouse in Southern Quebec, Canada. <i>Landscape Ecology</i> , 2017 , 32, 1987-1998	4.3	4
101	Signatures of the collapse and incipient recovery of an overexploited marine ecosystem. <i>Royal Society Open Science</i> , 2017 , 4, 170215	3.3	39

100	Defector clustering is linked to cooperation in a pathogenic bacterium. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2017 , 284,	4.4	9
99	Patterns of pollinator turnover and increasing diversity associated with urban habitats. <i>Urban Ecosystems</i> , 2017 , 20, 1359-1371	2.8	43
98	Loss of habitat and connectivity erodes species diversity, ecosystem functioning, and stability in metacommunity networks. <i>Ecography</i> , 2017 , 40, 98-108	6.5	108
97	Experimental evidence does not support the Habitat Amount Hypothesis. <i>Ecography</i> , 2017 , 40, 48-55	6.5	97
96	A general biodiversity-function relationship is mediated by trophic level. <i>Oikos</i> , 2017 , 126, 18-31	4	73
95	Spatial ecological networks: planning for sustainability in the long-term. <i>Current Opinion in Environmental Sustainability</i> , 2017 , 29, 187-197	7.2	20
94	Biotic nitrogen fixation in the bryosphere is inhibited more by drought than warming. <i>Oecologia</i> , 2016 , 181, 1243-58	2.9	11
93	Estimating local biodiversity change: a critique of papers claiming no net loss of local diversity. <i>Ecology</i> , 2016 , 97, 1949-1960	4.6	167
92	Multipurpose habitat networks for short-range and long-range connectivity: a new method combining graph and circuit connectivity. <i>Methods in Ecology and Evolution</i> , 2016 , 7, 222-231	7.7	96
91	The impacts of urban sprawl on ecological connectivity in the Montreal Metropolitan Region. <i>Environmental Science and Policy</i> , 2016 , 58, 61-73	6.2	68
90	Multi-taxa integrated landscape genetics for zoonotic infectious diseases: deciphering variables influencing disease emergence. <i>Genome</i> , 2016 , 59, 349-61	2.4	12
89	Management of vegetation under electric distribution lines will affect the supply of multiple ecosystem services. <i>Land Use Policy</i> , 2016 , 51, 66-75	5.6	13
88	Ecosystem multifunctionality in metacommunities. <i>Ecology</i> , 2016 , 97, 2867-2879	4.6	32
87	A network approach reveals surprises about the history of the niche. <i>Ecosphere</i> , 2016 , 7, e01266	3.1	3
86	Landscape structure affects the provision of multiple ecosystem services. <i>Environmental Research Letters</i> , 2016 , 11, 124017	6.2	56
85	Improving the forecast for biodiversity under climate change. <i>Science</i> , 2016 , 353,	33.3	511
84	Population decline and the effects of disturbances on the structure and recovery of octocoral communities (Coelenterata: Octocorallia) in Pacific Panama. <i>Journal of the Marine Biological Association of the United Kingdom</i> , 2015 , 95, 81-90	1.1	2
83	Local densities connect spatial ecology to game, multilevel selection and inclusive fitness theories of cooperation. <i>Journal of Theoretical Biology</i> , 2015 , 380, 414-25	2.3	6

82	Patchiness in a microhabitat chip affects evolutionary dynamics of bacterial cooperation. <i>Lab on a Chip</i> , 2015 , 15, 3723-9	7.2	5
81	Data curation: Act to staunch loss of research data. <i>Nature</i> , 2015 , 520, 436	50.4	11
80	Habitat fragmentation and its lasting impact on Earth's ecosystems. <i>Science Advances</i> , 2015 , 1, e1500052	4.3	1586
79	Community rescue in experimental metacommunities. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015 , 112, 14307-12	11.5	47
78	Pollination services are mediated by bee functional diversity and landscape context. <i>Agriculture, Ecosystems and Environment</i> , 2015 , 200, 12-20	5.7	132
77	Predicting the outcome of competition when fitness inequality is variable. <i>Royal Society Open Science</i> , 2015 , 2, 150274	3.3	9
76	Strong and nonlinear effects of fragmentation on ecosystem service provision at multiple scales. <i>Environmental Research Letters</i> , 2015 , 10, 094014	6.2	57
75	The Montjeu Connection: linking landscapes, biodiversity, and ecosystem services to improve decision making. <i>Ecology and Society</i> , 2015 , 20,	4.1	27
74	Ecosystem functions across trophic levels are linked to functional and phylogenetic diversity. <i>PLoS ONE</i> , 2015 , 10, e0117595	3.7	49
73	Towards the Establishment of a Green Infrastructure in the Region of Montreal (Quebec, Canada). <i>Planning Practice and Research</i> , 2015 , 30, 355-375	1.2	19
72	Warming induces synchrony and destabilizes experimental pond zooplankton metacommunities. <i>Oikos</i> , 2015 , 124, 1171-1180	4	13
71	Dispersal, environmental forcing, and parasites combine to affect metapopulation synchrony and stability. <i>Ecology</i> , 2015 , 96, 284-90	4.6	11
70	Agricultural landscape structure affects arthropod diversity and arthropod-derived ecosystem services. <i>Agriculture, Ecosystems and Environment</i> , 2014 , 192, 144-151	5.7	46
69	The negative relationship between mammal host diversity and Lyme disease incidence strengthens through time. <i>Ecology</i> , 2014 , 95, 3244-3250	4.6	23
68	Temperate forest fragments maintain aboveground carbon stocks out to the forest edge despite changes in community composition. <i>Oecologia</i> , 2014 , 176, 893-902	2.9	31
67	Landscape resistance and habitat combine to provide an optimal model of genetic structure and connectivity at the range margin of a small mammal. <i>Molecular Ecology</i> , 2014 , 23, 3983-98	5.7	30
66	Linking Biodiversity and Ecosystem Services: Current Uncertainties and the Necessary Next Steps. <i>BioScience</i> , 2014 , 64, 49-57	5.7	218
65	Synchronous dynamics of zooplankton competitors prevail in temperate lake ecosystems. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2014 , 281, 20140633	4.4	34

64	Species richness and the temporal stability of biomass production: a new analysis of recent biodiversity experiments. <i>American Naturalist</i> , 2014 , 183, 1-12	3.7	225
63	Survival, growth, and recruitment of octocoral species (Coelenterata: Octocorallia) in Coiba National Park, Pacific Panama. <i>Bulletin of Marine Science</i> , 2014 , 90, 623-650	1.3	12
62	Climate change and habitat fragmentation drive the occurrence of <i>Borrelia burgdorferi</i> , the agent of Lyme disease, at the northeastern limit of its distribution. <i>Evolutionary Applications</i> , 2014 , 7, 750-64	4.8	92
61	Forest fragments modulate the provision of multiple ecosystem services. <i>Journal of Applied Ecology</i> , 2014 , 51, 909-918	5.8	100
60	The potential connectivity of waterhole networks and the effectiveness of a protected area under various drought scenarios. <i>PLoS ONE</i> , 2014 , 9, e95049	3.7	15
59	Linking Landscape Connectivity and Ecosystem Service Provision: Current Knowledge and Research Gaps. <i>Ecosystems</i> , 2013 , 16, 894-908	3.9	217
58	Evolutionary rescue and adaptation to abrupt environmental change depends upon the history of stress. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2013 , 368, 20120079	5.8	92
57	Functional diversity and management mediate aboveground carbon stocks in small forest fragments. <i>Ecosphere</i> , 2013 , 4, art85	3.1	42
56	Stochastic environmental fluctuations drive epidemiology in experimental host-parasite metapopulations. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2013 , 280, 20131747	4.4	21
55	Evolutionary rescue: an emerging focus at the intersection between ecology and evolution. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2013 , 368, 20120404	5.8	238
54	Evolutionary rescue can maintain an oscillating community undergoing environmental change. <i>Interface Focus</i> , 2013 , 3, 20130036	3.9	16
53	Unifying sources and sinks in ecology and Earth sciences. <i>Biological Reviews</i> , 2013 , 88, 365-79	13.5	65
52	Traits explain community disassembly and trophic contraction following experimental environmental change. <i>Global Change Biology</i> , 2012 , 18, 2448-2457	11.4	65
51	Effective dispersal of large seeds by Baird's tapir: a large-scale field experiment. <i>Journal of Tropical Ecology</i> , 2012 , 28, 119-122	1.3	9
50	A global synthesis reveals biodiversity loss as a major driver of ecosystem change. <i>Nature</i> , 2012 , 486, 105-8	50.4	1362
49	Biodiversity loss and its impact on humanity. <i>Nature</i> , 2012 , 486, 59-67	50.4	3613
48	Evolution of dispersal in a predator-prey metacommunity. <i>American Naturalist</i> , 2012 , 179, 204-16	3.7	19
47	The functional role of producer diversity in ecosystems. <i>American Journal of Botany</i> , 2011 , 98, 572-92	2.7	775

46	Extinction debt in source-sink metacommunities. <i>PLoS ONE</i> , 2011 , 6, e17567	3.7	18
45	The maximal body mass-area relationship in island mammals. <i>Journal of Biogeography</i> , 2011 , 38, 2278-2285	4.1	5
44	Metacommunity diversity depends on connectivity and patch arrangement in heterogeneous habitat networks. <i>Ecography</i> , 2011 , 34, 415-424	6.5	87
43	Metacommunity theory explains the emergence of food web complexity. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2011 , 108, 19293-8	11.5	119
42	Adaptation and evolutionary rescue in metapopulations experiencing environmental deterioration. <i>Science</i> , 2011 , 332, 1327-30	33.3	256
41	Origin and deposition sites influence seed germination and seedling survival of <i>Manilkara zapota</i> : implications for long-distance, animal-mediated seed dispersal. <i>Seed Science Research</i> , 2011 , 21, 305-313 ^{1.3}	1.3	10
40	The disentangled bank: how loss of habitat fragments and disassembles ecological networks. <i>American Journal of Botany</i> , 2011 , 98, 503-16	2.7	85
39	Connectivity, non-random extinction and ecosystem function in experimental metacommunities. <i>Ecology Letters</i> , 2010 , 13, 543-52	10	110
38	Synchrony and stability of food webs in metacommunities. <i>American Naturalist</i> , 2010 , 175, E16-34	3.7	82
37	Ecological Systems as Complex Systems: Challenges for an Emerging Science. <i>Diversity</i> , 2010 , 2, 395-410	2.5	71
36	The Bryosphere: An Integral and Influential Component of the Earth's Biosphere. <i>Ecosystems</i> , 2010 , 13, 612-627	3.9	160
35	A patch-dynamic framework for food web metacommunities. <i>Theoretical Ecology</i> , 2010 , 3, 223-237	1.6	51
34	Evolutionary rescue can prevent extinction following environmental change. <i>Ecology Letters</i> , 2009 , 12, 942-8	10	358
33	A cross-national analysis of how economic inequality predicts biodiversity loss. <i>Conservation Biology</i> , 2009 , 23, 1304-13	6	58
32	Metacommunities: Spatial Community Ecology 2009 ,		10
31	The Causes and Consequences of Compensatory Dynamics in Ecological Communities. <i>Annual Review of Ecology, Evolution, and Systematics</i> , 2009 , 40, 393-414	13.5	292
30	Biodiversity as spatial insurance: the effects of habitat fragmentation and dispersal on ecosystem functioning 2009 , 134-146		34
29	The rate of environmental change drives adaptation to an antibiotic sink. <i>Journal of Evolutionary Biology</i> , 2008 , 21, 1724-31	2.3	64

28	Scale dependence of species-energy relationships: evidence from fishes in thousands of lakes. <i>American Naturalist</i> , 2008 , 171, 800-15	3.7	27
27	Whither adaptation?. <i>Biology and Philosophy</i> , 2008 , 23, 673-699	1.7	48
26	When does ecosystem engineering cause invasion and species replacement?. <i>Oikos</i> , 2008 , 117, 1247-1257		27
25	The inflationary effects of environmental fluctuations ensure the persistence of sink metapopulations. <i>Ecology</i> , 2007 , 88, 2848-56	4.6	70
24	Economic inequality predicts biodiversity loss. <i>PLoS ONE</i> , 2007 , 2, e444	3.7	76
23	Source-sink dynamics shape the evolution of antibiotic resistance and its pleiotropic fitness cost. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2007 , 274, 2351-6	4.4	78
22	Changes in nestedness in experimental communities of soil fauna undergoing extinction. <i>Pedobiologia</i> , 2007 , 50, 497-503	1.7	31
21	Plant Biodiversity and Responses to Elevated Carbon Dioxide. <i>Global Change - the IGBP Series</i> , 2007 , 103-112		2
20	Environmental Variability Modulates the Insurance Effects of Diversity in Non-equilibrium Communities 2007 , 159-177		12
19	STABLE COEXISTENCE IN A FLUCTUATING ENVIRONMENT: AN EXPERIMENTAL DEMONSTRATION. <i>Ecology</i> , 2005 , 86, 2815-2824	4.6	139
18	POPULATION SYNCHRONY INDUCED BY RESOURCE FLUCTUATIONS AND DISPERSAL IN AN AQUATIC MICROCOSM. <i>Ecology</i> , 2005 , 86, 1463-1471	4.6	42
17	The metacommunity concept: a framework for multi-scale community ecology. <i>Ecology Letters</i> , 2004 , 7, 601-613	10	3226
16	Population and community variability in randomly fluctuating environments. <i>Oikos</i> , 2004 , 106, 105-116	4	73
15	Are natural microcosms useful model systems for ecology?. <i>Trends in Ecology and Evolution</i> , 2004 , 19, 379-84	10.9	278
14	Impacts of environmental variability in open populations and communities: "inflation" in sink environments. <i>Theoretical Population Biology</i> , 2003 , 64, 315-30	1.2	47
13	Biodiversity as spatial insurance in heterogeneous landscapes. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2003 , 100, 12765-70	11.5	643
12	Heterotroph species extinction, abundance and biomass dynamics in an experimentally fragmented microecosystem. <i>Journal of Animal Ecology</i> , 2002 , 71, 594-602	4.7	149
11	The inflationary effects of environmental fluctuations in source-sink systems. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2002 , 99, 14872-7	11.5	110

10	Community relaxation in fragmented landscapes: the relation between species richness, area and age. <i>Ecology Letters</i> , 2000 , 3, 441-448	10	99
9	Spectral mimicry: A method of synthesizing matching time series with different Fourier spectra. <i>Circuits, Systems, and Signal Processing</i> , 1999 , 18, 431-442	2.2	26
8	Metapopulation dynamics, abundance, and distribution in a microecosystem. <i>Science</i> , 1998 , 281, 2045-7	33.3	342
7	A novel experimental apparatus to study the impact of white noise and 1/f noise on animal populations. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 1998 , 265, 11-5	4.4	30
6	Corridors maintain species richness in the fragmented landscapes of a microecosystem. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 1998 , 265, 577-582	4.4	167
5	Effects on population persistence: the interaction between environmental noise colour, intraspecific competition and space. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 1997 , 264, 1841-1847	4.4	122
4	Flower choice by honey bees (<i>Apis mellifera</i> L.): sex-phase of flowers and preferences among nectar and pollen foragers. <i>Oecologia</i> , 1995 , 101, 258-264	2.9	36
3	Multi-trophic metacommunity interactions mediate asynchrony and stability in fluctuating environments. <i>Ecological Monographs</i> , e1484	9	0
